BOARD OF ESTIMATE AND APPORTIONMENT.

EXTRACT FROM

MINUTES, BOARD OF ESTIMATE AND APPORTIONMENT, CITY OF NEW YORK, APRIL 24, 1908.

LONG ISLAND RAILROAD COMPANY.

In the matter of the application of the Long Island Railroad Company for an extension of time for one year in which to complete the construction of the viaduct over First avenue, from Sixty-second street to a point north of the driveway of the Bay Ridge parkway, which construction was provided for in agreement entered into between the City and the company, bearing date February 13, 1906.

This application was presented to the Board at its meeting of January 10, 1908, together with communication from the Chief Engineer, transmitting report and proposed resolutions from the Division of Franchises, when consideration was postponed until the meeting of January 24, 1908, when the matter was referred back to the Chief Engineer.

The Secretary presented the following:

REPORT No. F-75.

BOARD OF ESTIMATE AND APPORTIONMENT,
OFFICE OF THE CHIEF ENGINEER,
April 15, 1908.

Hon. GEORGE B. McCLELLAN, Mayor, Chairman of the Board of Estimate and Apportionment:

SIR—On February 13, 1906, an agreement was entered into between The City of New York and the Long Island Railroad Company providing for closing portions of Sixty-fourth and Sixty-fifth streets and changing the grade of First avenue between Sixty-second street and Wakeman place, in the Borough of Brooklyn.

These changes in the City map were made in order to permit the Long Island Railroad Company to lay out and improve a terminal yard at the westerly end of its Manhattan Beach Branch. The railroad company under the agreement was to pay the City the value of the land lying within the streets closed, and it was also to construct at its own expense a viaduct on the line of First avenue and in conformity with the new grade, this viaduct extending from the southwesterly side of Sixty-third street to the centre line of Sixty-sixth street and spanning the proposed new terminal yard. The agreement provided that work was to be begun on the construction of this viaduct within sixty days after the execution of the agreement, and that it was to be completed within eighteen months, but that before work was begun the company should present to the Board the plans for the structure and secure its approval of such plans. Provision was also made for an extension of time not exceeding one year.

On November 15, 1907, complaints were submitted to the Board to the effect that First avenue had been closed and its use prevented by fences erected across it, while nothing had been done toward building the viaduct. An investigation was made and several reports were prepared by the Engineer in charge of the Division of Franchises, these reports indicating that the company had failed to carry out the provisions of its contract in that it had never submitted to the Board for its approval plans for the proposed viaduct and had not commenced its construction, although the time limit for such construction named in the agreement had passed, and it seemed that the company, having failed to carry out its part of the agreement, was in default to the City. These facts were brought to the attention of the President of the Long Island Railroad Company, who strongly protested against the suggestion that

his company had defaulted under its agreement, and who stated that the delay had been occasioned by the request of the Borough authorities that the construction of the viaduct be deferred pending an investigation as to the desirability of a modification of the grade of the southerly end, such modification being designed to permit the Shore road, or the Bay Ridge parkway, to be carried beneath the viaduct, instead of crossing First avenue at grade. The matter was laid before the Board at a meeting held on January 10, 1908, when there were submitted to the Board for its consideration resolutions declaring the company in default and providing for a modification of the original contract by extending the time upon the payment of the sum of \$500 by the railroad company. Other suggestions as to the tracks of the Sea Beach road and the Brooklyn Rapid Transit Company were also submitted, but these questions are not revived at this time in connection with the building of the First avenue viaduct. The matter was laid over, and on January 24 it was again on the calendar and referred back to the Chief Engineer, the President of the Borough of Brooklyn stating that he was about to submit plans for a change in the grade of First avenue and of Sixty-sixth street. Such plans were subsequently submitted, and after some discussion between the Chief Engineer of the Board and the Engineer of the Borough President they were revised and elaborated, and a public hearing upon the plans was fixed for April 24, 1908. Meanwhile the railroad company had submitted its plans for the viaduct, and has also requested an extension of time. These plans were not approved owing to the pending change in the grade of the street, and they have now been revised so that the viaduct plans conform with the proposed new grades which are to be considered at the meeting on April 24, separate reports having been presented, one upon the change of grade and the other upon the bridge plans, with the recommendation that they be approved.

I am reliably informed that the contract for the steel viaduct has been let for a long time, and a number of inquiries have been made by the contractor as to the approval of the plans, in order that he might proceed with the preparation of the structural material. This question is presented to the Board at this time in order that a decision may be reached as to whether the agreement of February 13, 1906, is to be so amended as to extend the time allowed the company for the erection of the viaduct. There is every evidence that the delay was caused by a desire to conform with the wishes of the Borough authorities, although it would have been only prudent for the company to have laid the facts before the Board and secured the necessary extension of time. I do not believe that it is the wish of the Board to penalize the company for this delay, and I would therefore recommend that if the Board approves of the plans submitted on this date, it agree to an amendment of the original contract by granting an extension of time, a resolution to this effect being herewith submitted.

Respectfully,

NELSON P. LEWIS, Chief Engineer.

The following was offered:

Whereas, Under and by virtue of an agreement dated February 13, 1906, by and between The City of New York and the Long Island Railroad Company, the railroad company covenanted and agreed to construct and maintain, at its own expense, a steel viaduct over and along the line of First avenue and of the full width of the avenue, from a point at or near the southerly line of Sixty-third street to a point at or near the northerly line of Bay Ridge parkway, Borough of Brooklyn, in consideration of the closing of certain streets and the granting and conveying to said company of certain lands within the limits of said streets by The City of New York, under the provisions of section 205 of the Greater New York Charter; and

Whereas, Paragraph tenth of the agreement reads as follows:

"Tenth—The Long Island Company will begin the construction of the work hereinbefore specified within sixty (60) days after the execution of this agreement, and, except as herein provided, will complete the same within eighteen months thereafter, subject to delays caused by strikes, labor difficulties or the acts of God, in which case the Board of Estimate and Apportionment may extend the period of construction for not more than one year more. During the construction of said viaduct facilities shall be provided by the Long Island Company for public travel from Sixty-third to Sixty-sixth street, and over those portions of Sixty-third and Sixty-sixth streets affected by the changes contemplated herein, which shall be satisfactory to the authorities of said City;" and

Whereas, The Long Island Railroad Company, in a communication dated December 31, 1907, requested an extension of time for one year from December 27, 1907, to complete the construction of said viaduct; and

Whereas, This Board is in receipt of a report from its Chief Engineer recommending that the plans for the construction of the viaduct, as presented by the railroad company, be approved, and the agreement dated February 13, 1906, be amended so as to grant the extension of time requested; now therefore be it

Resolved, That the plan dated December 23, 1907, for the construction of said viaduct, presented by the Long Island Railroad Company, be and it hereby is approved; and be it further

Resolved, That the agreement dated February 13, 1906, be and it is hereby modified by striking therefrom paragraph tenth and inserting in lieu thereof the following:

"Tenth—The Long Island Company will begin the construction of the work hereby specified on or before July 1, 1908, and will complete the entire work on or before May 1, 1909. During the construction of said viaduct facilities shall be provided by the Long Island Company for public travel from Sixty-third to Sixty-sixth street and over those portions of Sixty-third and Sixty-sixth streets affected by the changes contemplated herein, as may be required by the Board of Estimate and Apportionment;" and be it further

Resolved, That the modification of the agreement of February 13, 1906, hereby authorized, shall not become effective unless and until the Long Island Railroad Company has executed an instrument in writing, the making of which shall be agreed and consented to by the American Surety Company of New York, accepting the terms, conditions and requirements of this modified agreement, and consenting to such modification and binding itself to carry out the provisions of the original agreement, except as herein expressly modified, and file same in the office of this Board within thirty (30) days after the date of the adoption of these resolutions.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen, the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx and Queens and the Acting President of the Borough of Richmond—16.

SOUTH SHORE TRACTION COMPANY.

The Secretary presented the following:

SOUTH SHORE TRACTION COMPANY,
FORTY-SECOND STREET AND BROADWAY,
NEW YORK, April 16, 1908.

Board of Estimate and Apportionment, Division of Franchises, Room 801, No. 277 Broadway, New York:

GENTLEMEN—A petition of the South Shore Traction Company, dated September 12, 1907, and an amended petition, dated January 14, 1908, were filed with your Board,

asking, on behalf of the Traction Company, the right to construct a street surface railroad over certain streets in the Borough of Queens. It has been deemed advisable to apply for the right to cross the Blackwells Island Bridge, and I have, therefore, filed a petition, dated April 13, 1908, which includes the request for the right to cross the Blackwells Island Bridge.

I would respectfully request, therefore, that your Board deem the petitions of September 12, 1907, and January 14, 1908, withdrawn, and treat the petition of April 14, 1908, as the only petition now before your Board in behalf of the South Shore Traction Company.

Very truly yours,
ARTHUR CARTER HUME, Secretary.

Which was ordered filed.

Also a branch or extension upon and across the Blackwells Island Bridge from the Borough of Queens to the Borough of Manhattan.

Which was referred to the Chief Engineer.

RAPID TRANSIT RAILWAY.

Broadway-Lafayette Avenue Route.

The Comptroller presented the following:

CITY OF NEW YORK—DEPARTMENT OF FINANCE,
COMPTROLLER'S OFFICE,
April 9, 1908.

Hon. GEORGE B. MCCLELLAN, Mayor and Chairman, Board of Estimate and Apportionment:

MY DEAR SIR—In view of the fact that the Board of Estimate and Apportionment, by a majority vote of its members, requested the Public Service Commission to advertise for bids for the construction of various subway routes, it occurs to me that it might be well for this Board to consider what is to be done with the route now building in Manhattan, between the Williamsburg and Brooklyn Bridges, running through Delancey street and Centre street to Park row.

Contracts exceeding \$9,000,000 are now in force and work is being pushed rapidly on them. It seems to me rather uncertain as to whether the Brooklyn Elevated Railroad trains, for the accommodation of the passengers of which the route was primarily authorized, will avail themselves of the opportunity which the subway affords and whether the company can or will equip its trains to enable them to take the grades, and will pay the City a return for the use of the subway which will even pay the interest upon the investment without regard to the Sinking Fund.

If arrangements are not made to have this done it will leave the City with a subway costing approximately \$10,000,000 exclusive of the cost of the real estate at the Brooklyn Bridge terminal on its hands, and no relief will be afforded on the present Brooklyn Bridge, nor will traffic on the Williamsburg Bridge be increased to any appreciable extent. Whether, eventually, such arrangements can be made or not, it occurs to me that the subway can be made available by the completion of the Brooklyn part of the so-called loop, by constructing the Broadway-Lafayette line in Brooklyn, which it is estimated would cost about \$10,000,000 at the maximum, and this would include Sections 1 and 2 of the proposed Fourth avenue subway.

The route as laid out runs through a heavily congested district in Brooklyn, the traffic of which to New York, over both the Williamsburg and Manhattan Bridges, is of the "short haul" class, and is obliged to crowd into the cars of the lines that tap it now, when they are already overcrowded with passengers coming from a further distance.

It appears to me that even as an independent proposition, if the loop line were completed, the City could easily get bidders to operate it even on a three cent fare basis for the comparatively short haul, and would insure to the City authorities absolute control of the bridges, and arrangements could be made at any future time for the accommodation of such extensions to outlying sections of Brooklyn, which would all of necessity depend upon the bridges or additional tunnels for a Manhattan outlet.

If it is the determination of the Board of Estimate and Apportionment to spend any of the limited amount of money available for subway construction after July 1, it occurs to me that instead of spending small amounts on sections of the longer routes so far authorized, which will simply mean the laying out of money without return, and the consequent loss of interest until such time as practically the entire routes are completed, and the completion of any one of them will be impossible until a Constitutional amendment goes into force, or until private capital can be made available to do the constructing, and this, to my mind, at the present time seems rather doubtful and

Instead of allowing the \$9,000,000 so far invested in Manhattan to lie idle I think it would be for the best interests of the City at large to put that subway to work as soon as completed, and in connection with it to get some practical results which will relieve congestion on the Brooklyn Bridge, put the Williamsburg Bridge to work at somewhere near its full capacity, and also make available the new Manhattan Bridge when it is completed within the next three years. The City would thus have a comprehensive system ready for operation, either by itself or under contract, and the amount necessary in the next three years that it would take to build the line would come within the City's financial ability to carry it out, and would obviate the necessity of having millions invested and lying idle for an indefinite period and bringing absolutely no relief to the traffic which is now compelled to use the bridges, because no relief could possibly come if the long routes authorized were compelled to

depend upon the slow stages of sectional construction, and a further delay which would be entailed if the City were compelled to do its own equipping and operating after completion.

The short loop line referred to would offer more relief for more people in quicker time than any other improvement so far suggested, and I respectfully bring this matter to your attention and to the attention of the Board of Estimate and Apportionment, and suggest that it be referred to the Public Service Commission for its consideration, and that the Public Service Commission of the First District be requested to communicate to this Board what the prospects are for making the line now building on the Manhattan side available upon completion.

Yours very truly,

H. A. METZ, Comptroller.

—with the request that it be referred to the Public Service Commission for the First District for its consideration.

The President of the Borough of Brooklyn presented the following statement:

I would ask the Comptroller to add to the proposed line, which he now suggests be referred to the Public Service Commission, a short additional section extending from the junction of Lafayette avenue and Broadway to Jamaica avenue, with spurs for future extensions into the Borough of Queens, as provided for in the original plan of the tri-borough route, which was presented to the Board by me in May, 1906, and was approved by the Board upon the recommendation of a Select Committee consisting of the Comptroller and myself. This, according to the map prepared by the Comptroller, would serve two wards, the Twenty-eighth and Twenty-fifth, with a population of 160,000, and would not greatly add to the cost of the subway system under consideration.

—with the request that such statement be forwarded to the Public Service Commission with the communication from the Comptroller.

There being no objection this course was pursued.

The following matter, not on the calendar for this day, was considered by unanimous consent:

JOHN GLASS.

By resolution adopted April 3, 1908, approved by the Mayor April 8, 1908, the consent granted to John Glass to lay a switch to connect with the tracks of the New York Central and Hudson River Railroad in Tenth avenue, from the southwest corner of Bloomfield street, and to extend along said avenue in front of the premises occupied by said Glass, Nos. 15 to 19 Tenth avenue, was rescinded.

Mr. Morgan, of the firm of Breed, Abbott & Morgan, appeared on behalf of Swift & Co., who he stated were at present using this switch track, and requested that his clients be given the same preference as given to the grantees maintaining similar track privileges along the line of the New York Central and Hudson River Railroad, and upon which the Board deferred action at its meeting of April 3, 1908, pending the report of the Corporation Counsel that he had entered into stipulations regarding the removal of the same.

The following was offered:

Whereas, The Board of Estimate and Apportionment, on April 3, 1908, adopted a resolution as follows:

"Whereas, The Board of Aldermen, on April 20, 1895, adopted a resolution as follows:

"Resolved, That permission be and the same is hereby given to John Glass to lay a switch to connect with the tracks of the New York Central and Hudson River Railroad in Tenth avenue from the southwest corner of Bloomfield street, and to extend along said avenue in front of the premises occupied by said John Glass, Nos. 15 to 19 Tenth avenue, as shown on the accompanying diagram, provided the said John Glass shall lay a rail of a pattern acceptable to the Commissioner of Public Works, and lay and maintain, during the continuance of the privilege granted by the resolution, a pavement that shall be in all respects satisfactory to the said Commissioner and shall extend for the whole length of said switch or tracks and from the pavement maintained by the New York Central and Hudson River Railroad Company to the curbstone. The switch, turnout and proposed new railroad track to be so placed as to leave a clear passageway not less than six feet wide between the out rail of the present railroad track on the avenue and the outer rail of the proposed turnout or new track, the work to be done at his own expense, under the direction and supervision of the Commissioner of Public Works; such permission to continue only during the pleasure of the Common Council."

—"which was approved by the Mayor May 4, 1895; and

"Whereas, The City of New York has acquired the fee of the above mentioned property; and

"Whereas, A portion of said track has been removed, and the remaining portion constitutes an obstruction in the street; now therefore be it

"Resolved, That the foregoing resolution be and it hereby is rescinded; and be it further

"Resolved, That the President of the Borough of Manhattan be and he hereby is requested to serve notice on John Glass to remove the remaining portion of said track from the surface of the street within thirty days after the adoption of this resolution, and in case of failure of John Glass so to do, the President of the Borough of Manhattan be and he hereby is requested to remove such track and charge the expense for such removal to said John Glass and report to this Board when the track is so removed."

Which was approved by the Mayor April 8, 1908.

Resolved, That the foregoing resolution be and it is hereby rescinded.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen, the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx and Queens and the Acting President of the Borough of Richmond—16.

The full minutes of the meeting of this day will appear in the CITY RECORD at a later date.

JOSEPH HAAG, Secretary.

PROPOSALS FOR CONSTRUCTION OF RAPID TRANSIT LINES IN BROOKLYN.

INVITATION TO CONTRACTORS.

(FLATBUSH AVENUE EXTENSION, NASSAU STREET TO WILLOUGHBY STREET, MANHATTAN BRIDGE, No. 1.)

THE City of New York, acting by the Public Service Commission for the First District, by this advertisement invites proposals to construct that part of the proposed Fourth Avenue Subway in the Borough of Brooklyn which begins at the northerly side of Nassau Street and runs thence under said Flatbush Avenue Extension to a point about 20 feet north of the centre line of Willoughby Street.

The general plan of construction calls for a four-track subsurface Railroad, but the Contractor will not be required under the contract proposed to provide or lay tracks, ties or ballast. A station between Tillary Street and Johnson Street will be constructed; and suitable cross-overs, turn-outs and sidings are also to be provided, all as indicated on the detailed plans of construction. The tunnels are to have a height of not less than thirteen (13) feet in the clear, and a maximum width of fifteen (15) feet for each track, except at curves, etc., where the width may be increased. The roof of the tunnels is generally to be as near the surface of the street as street conditions and grades will permit. The roof and sides of the tunnels will be of iron or steel and masonry. Entrances to the station are intended to be placed within private property, rights in which will be acquired for the purpose, or on the streets, or on the sidewalks adjacent to private property, as indicated on the plans.

The manner of construction shall be by open excavation unless otherwise provided in the contract or directed by the Commission; such portions of the street, however, where the work may not be completed and the backfill is not placed at the expiration of fifteen months from the time of executing the contract, must be substantially boarded over to permit freedom of traffic, if so ordered by the Commission.

In the detailed plans for construction, provisions for pipe galleries along the line of the tunnel are included. Bids for the construction of the railroad must be accompanied by a separate bid for the construction of the pipe galleries above referred to, as it is essential for the City to separate the cost of the railroad from the cost of the pipe galleries. The Commission reserves the right to accept a bid for construction of the railroad and at the same time to reject the accompanying bid for pipe galleries.

Bidders must visit the location of the railroad and station to be built under this contract and note the present conditions along the line of the proposed railroad. The buildings standing within the lines of the said Flatbush Avenue Extension are being, or are to be, demolished and the materials removed by other contractors.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated in the printed form of contract now on file in the office of the Commission, No. 154 Nassau Street, in the Borough of Manhattan, and in the detailed drawings therein referred to, at which office copies of the contract and of the form of bond and contractor's proposal may be had on application. The contract drawings may be inspected at the same office. The printed form of contract and the detailed drawings are to be deemed a part of this invitation.

Partial payments to the contractor will be made monthly as the work proceeds, as provided in the form of contract.

The work of construction (including pipe galleries) is to be completed as soon as practicable, and within twenty-four months from the date of delivery of the contract.

Sealed bids or proposals will be received at the said office of the Commission, at No. 154 Nassau Street, in the Borough of Manhattan, The City of New York, until

FRIDAY, THE 8TH DAY OF MAY, 1908,

at 12 o'clock noon, at which time or at a later date to be fixed by the Commission the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

The proposal must contain a statement, in the form prescribed, of the quantities and unit values upon which the bid is based. Such statement shall be merely for the information of the Commission to enable it to determine upon what basis the proposal is made and for no other purpose whatsoever, and the Commission shall not be bound in any way to make payments or value work done, upon the basis of such quantities and unit values contained in such statement.

No proposal will be allowed to be withdrawn for any reason whatever after it shall have been deposited with the Commission.

The award of the contract or contracts (if awarded) will be made by the Commission within twenty days after the opening of the proposals. The bidder whose proposal shall be accepted shall in person or by duly authorized representative attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted, and that the contract is approved by the Board of Estimate and Apportionment; and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the contractor will be required to furnish security to the City by giving a bond in the penalty of one hundred and fifty thousand dollars. At the option of the successful bidder cash or approved securities may be deposited instead of giving a bond. If securities are deposited in place of a bond under this contract, they must be of the character of securities in which Savings Banks may invest their funds and must be approved by the Commission. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten per cent. of each amount certified from time to time to be due to the contractor will be retained until the work is fully completed.

Bidders whose proposals are otherwise satisfactory to the Commission may, in case the sureties or securities named by them are not approved by the Commission, substitute in their proposals the names of new sureties or a different schedule of securities approved by the Commission; but such substitution must be made within five days after notice of disapproval by the Commission, unless this period is extended by the Commission.

In case of failure or neglect to execute and deliver the contract or to make the required deposit or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case the Commission will give notice thereof to the defaulting bidder. And the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interest of the City to contract with, or may by new advertisement invite further proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other contractor over the amount of the bid of such defaulting bidder.

Every proposal must, when submitted, be inclosed in a sealed envelope endorsed "PROPOSAL FOR CONSTRUCTING RAPID TRANSIT RAILROAD—FLATBUSH AVENUE EXTENSION, NASSAU STREET TO WILLOUGHBY STREET," and must be delivered to the Commission or to its Secretary; and in the presence of the person offering the proposal it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a certified check drawn upon a National or State Bank or Trust Company within The City of New York and satisfactory to the Commission, payable to the order of the Comptroller of The City of New York, for the sum of twelve thousand five hundred dollars.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, or make a deposit in cash or securities, then this invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damages by it sustained by reason of such failure; and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions as to security are complied with.

on the detailed plans of construction. The tunnels are to have a height of not less than thirteen (13) feet in the clear, and a maximum width of fifteen (15) feet for each track, except at curves, etc., where the width may be increased. The roof of the tunnels is generally to be as near the surface of the street as street conditions and grades will permit, but several of the tracks will branch and be depressed both north and south of the station in order to avoid grade crossings and to provide convenient connections with other subways now building or to be hereafter built. The roof and sides of the tunnels will be of iron or steel and masonry. Entrances to the station are intended to be placed within private property, rights in which will be acquired for the purpose, or on the streets, or on the sidewalks adjacent to private property as indicated on the plans.

The manner of construction shall be by open excavation in Flatbush Avenue Extension and by excavation under cover under Fulton Street and Ashland Place, unless otherwise provided in the Contract or directed by the Commission; such portions of the Flatbush Avenue Extension, however, where the work may not be completed and the backfill is not placed, at the expiration of fifteen (15) months from the time of executing the contract, must be substantially boarded over to permit freedom of traffic, if so ordered by the Commission.

In the detailed plans for construction, provisions for pipe galleries along the line of the railroad are included. Bids for the construction of the railroad must be accompanied by a separate bid for the construction of the pipe galleries above referred to, as it is essential for the City to separate the cost of the railroad from the cost of the pipe galleries. The Commission reserves the right to accept a bid for construction of the railroad and at the same time to reject the accompanying bid for pipe galleries.

Bidders must visit the location of the railroad and station to be built under this contract and note the present conditions along the line of the proposed railroad. The buildings standing within the lines of the said Flatbush Avenue Extension are being, or are to be, demolished and the materials removed by other contractors.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated in the printed form of contract now on file in the office of the Commission, No. 154 Nassau Street, in the Borough of Manhattan, and in the detailed drawings therein referred to, at which office copies of the contract and of the form of bond and contractor's proposal may be had on application. The contract drawings may be inspected at the same office. The printed form of contract and the detailed drawings are to be deemed a part of this invitation.

Partial payments to the contractor will be made monthly as the work proceeds, as provided in the form of contract.

The work of construction (including pipe galleries) is to be completed as soon as practicable, and within twenty-four months from the date of delivery of the contract.

Sealed bids or proposals will be received at the said office of the Commission, at No. 154 Nassau Street, in the Borough of Manhattan, The City of New York, until

FRIDAY, THE 8TH DAY OF MAY, 1908,

at 12 o'clock noon, at which time or at a later date to be fixed by the Commission the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

The proposal must contain a statement, in the form prescribed, of the quantities and unit values upon which the bid is based. Such statement shall be merely for the information of the Commission to enable it to determine upon what basis the proposal is made and for no other purpose whatsoever, and the Commission shall not be bound in any way to make payments or value work done, upon the basis of such quantities and unit values contained in such statement.

No proposal will be allowed to be withdrawn for any reason whatever after it shall have been deposited with the Commission.

The award of the contract or contracts (if awarded) will be made by the Commission within twenty days after the opening of the proposals. The bidder whose proposal shall be accepted shall in person or by duly authorized representative attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment; and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the contractor will be required to furnish security to the City by giving a bond in the penalty of two hundred thousand dollars. At the option of the successful bidder cash or approved securities may be deposited instead of giving a bond. If securities are deposited in place of a bond under this contract, they must be of the character of securities in which Savings Banks may invest their funds and must be approved by the Commission. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten per cent. of each amount certified from time to time to be due to the contractor will be retained until the work is fully completed.

Bidders whose proposals are otherwise satisfactory to the Commission may, in case the sureties or securities named by them are not approved by the Commission, substitute in their proposals the names of new sureties or a different schedule of securities approved by the Commission; but such substitution must be made within five days after notice of disapproval by the Commission, unless this period is extended by the Commission.

In case of failure or neglect to execute and deliver the contract or to make the required deposit or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case the Commission will give notice thereof to the defaulting bidder. And the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interest of the City to contract with, or may by new advertisement invite further proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other contractor over the amount of the bid of such defaulting bidder.

Every proposal must, when submitted, be inclosed in a sealed envelope endorsed "PROPOSAL FOR CONSTRUCTING RAPID TRANSIT RAILROAD—(WILLOUGHBY STREET TO ASHLAND PLACE)" and must be delivered to the Commission or to its Secretary; and in the presence of the person offering the proposal it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a certified check drawn upon a National or State Bank or Trust Company within The City of New York and satisfactory to the Commission, payable to the order of the Comptroller of The City of

New York, for the sum of fifteen thousand dollars.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, or make a deposit in cash or securities, then this invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damages by it sustained by reason of such failure; and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions as to security are complied with.

The work of construction (including pipe galleries) is to be completed as soon as practicable, and within twenty-four months from the date of delivery of the contract.

Sealed bids or proposals will be received at the said office of the Commission, at No. 154 Nassau Street, in the Borough of Manhattan, The City of New York, until

FRIDAY, THE 8TH DAY OF MAY, 1908, at 12 o'clock noon, at which time or at a later date to be fixed by the Commission the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

The proposal must contain a statement, in the form prescribed, of the quantities and unit values upon which the bid is based. Such statement shall be merely for the information of the Commission to enable it to determine upon what basis the proposal is made, and for no other purpose whatsoever, and the Commission shall not be bound in any way to make payments or value work done, upon the basis of such quantities and unit values contained in such statement.

No proposal will be allowed to be withdrawn for any reason whatever after it shall have been deposited with the Commission.

The award of the contract or contracts (if awarded) will be made by the Commission within twenty days after the opening of the proposals. The bidder whose proposal shall be accepted shall in person or by duly authorized representative attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment; and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the contractor will be required to furnish security to the City by giving a bond in the penalty of one hundred and fifty thousand dollars. At the option of the successful bidder cash or approved securities may be deposited instead of giving a bond. If securities are deposited in place of a bond under this contract, they must be of the character of securities in which Savings Banks may invest their funds and must be approved by the Commission. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten per cent. of each amount certified from time to time to be due to the contractor will be retained until the work is fully completed.

Bidders whose proposals are otherwise satisfactory to the Commission may, in case the sureties or securities named by them are not approved by the Commission, substitute in their proposals the names of new sureties or a different schedule of securities approved by the Commission; but such substitution must be made within five days after notice of disapproval by

the Commission, unless this period is extended by the Commission.

In case of failure or neglect to execute and deliver the contract or to make the required deposit, or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case the Commission will give notice thereof to the defaulting bidder. And the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interest of the City to contract with, or may, by new advertisement invite further proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other contractor over the amount of the bid of such defaulting bidder.

Every proposal must, when submitted, be enclosed in a sealed envelope endorsed "PROPOSAL FOR CONSTRUCTING RAPID TRANSIT RAILROAD—(FOURTH AVENUE, TWENTY-SEVENTH STREET TO FORTY-THIRD STREET)" and must be delivered to the Commission or to its Secretary; and in the presence of the person offering the proposal it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a certified check drawn upon a National or State Bank or Trust Company within The City of New York, and satisfactory to the Commission, payable to the order of the Comptroller of The City of New York, for the sum of twelve thousand five hundred dollars.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, or make a deposit in cash or securities, then this invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damages by it sustained by reason of such failure; and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission, will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed, and its provisions as to security are complied with.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

The contract must be bid for separately.

The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done.
