1. This is a report of services provided in certain types of restrictive housing. Multiple housing units may comprise each restrictive housing unit type.
2. ESH transferred from GRVC to OBCC on 3/11/21. Some of the persons included in this section of the report started their stay at OBCC. For those individuals, the length of stay represented is for the time the spent GRVC only.
3. ESH transferred from GRVC to OBCC on 3/11/21. Some of the persons included in this section of the report started their stay at OBCC. For those individuals, the length of stay represented is for the time the spent at OBCC only.
4. These counts reflect the total stays with a restrictive housing (i.e., CAPS, ESH, PS, and RHU) end date between the start date and end date of reporting period. These counts do not include persons in restrictive housing that did not have an end date within the reporting period. Each distinct stay in restrictive housing is counted, meaning if one person was in punitive segregation and in restrictive housing in separate instances, that person would count once for punitive segregation and once for restrictive housing unit.
5. These counts reflect all persons in restrictive housing for at least one day between the start date and end date of the reporting period, regardless of when the stay in restrictive housing started or ended. This number will not match the length of stay counts. Each distinct stay in restrictive housing is counted, meaning if one person was in punitive segregation and in restrictive housing in separate instances, that person would count once for punitive segregation and once for restrictive housing unit.
6. These counts reflect all persons with a start date in restrictive housing between the start date and end date of the reporting period. These counts will not match the length of stay counts, which reflect persons that left restrictive housing during the reporting period, or the demographics or infraction counts, which reflect all persons in restrictive housing for at least one day between the start date and end date of the reporting period.
7. These counts reflect the housing type and facility that received the incarcerated persons during the reporting period. For instance, if a person was in mental observation housing in OBCC and was sent directly to RHU at GRVC, this admission would count once for RHU GRVC.
8. Placement in CAPS does not require a disciplinary hearing, only that an infraction has been served and that the incarcerated person meets the necessary clinical criteria.
9. These counts reflect the housing type and facility that sent the incarcerated persons during the reporting period. For instance, if a person was in GRVC punitive segregation and sent directly to CAPS or RHU at GRVC, this would count one time in the 'punitive segregation' column for GRVC.
10. These counts reflect the housing type and facility that sent the incarcerated persons during the reporting period. For instance, if a person was in GRVC RHU and sent directly to punitive segregation at GRVC, this would count one time in the 'RHU' column for GRVC.
11. Highest charge grade counts reflect the highest infraction charge for a person during the individual's incarceration, regardless of date of occurrence, who were in restrictive housing for at least one day between the start and end date of the reporting period. For example, if a grade 1 infraction was charged prior to the reporting period during the person's incarceration, the grade 1 infraction would be counted. The highest charge for each person was reported based on their restrictive housing category during the given reporting period. For example, if an person with a grade 1 infraction was in both punitive segregation and restrictive housing unit in separate instances, this person would count twice in this metric, once for grade 1 highest infraction in punitive segregation and once for grade 1 highest infraction in restrictive housing unit). A small amount of observations are unavailable due to either a highest infraction charge grade of 3, or missing data.
12. Data in this section was provided by NYC H+HC Correctional Health Services (CHS). Data is not available for patients housed in either RHU or PACE at RMSC due to comingling within housing areas (PACE/CAPS and RHU/Non-RHU).
13. CAPS unit provides unrestricted access to showers and calls; no requests made.
14. CAPS unit provides unrestricted access to showers and calls; no requests made.
15. "Inmate recreation day" means one day per each individual for every day in restrictive housing during each quarter. This number is calculated by multiplying the average daily population by the number of days in the given reporting period.
16. "Inmate shower day" means one day per each individual for every day in restrictive housing during each quarter. This number is calculated by multiplying the average daily population by the number of days in the given reporting period.
17. ESH provides escorted showers only for individuals in ESH level 1. The counts shown here exclude showers taken by persons in ESH levels 2 and 3.
18. These counts reflect the total number of distinct people who received at least one visit during the reporting period by their restrictive housing unit category. For example, if one person was in punitive segregation and in restrictive housing unit in separate instances and received 1 visit while in each housing area category, this person would count once for punitive segregation and once for restrictive housing unit. If a different person was in ESH and restrictive housing unit separately, and received 4 visits while in ESH and 1 visit while in RHU, this person would count once for ESH (because they received at least one visit in ESH during the reporting period) and once for RHU (because they received at least one visit in RHU during the reporting period).
