Borough Hall.

A much needed improvement has been completed in the Bureau of Buildings by the installation of metal filing cases for the filing of plans and permits for the business of that Bureau which will enable them to readily place their hands on plans and permits when required. Considerable miscellaneous work has also been furnished in the Bureau of Buildings by placing shelving in the document room. Three bins for holding plans and a number of new pigeon holes for the filing of old permits were also constructed.

The motor room on the ground floor has been painted. Old decayed steam pipe covering has been removed from the piping in the elevator shaft and new asbestos covering put in place. New door jambs, door and trim, also new closet for holding Engineers' tools, have been installed in the motor room.

Alterations and repairs to boilers, furnishing and placing new valves for same, and repairing brick work in the boiler room, have been made at the cost of \$700.

Much needed improvement has been accomplished by the painting of the tower, and the clock in same has also been overhauled. In this connection it is well to note that the ringing of the bell at the noon hour has been favorably commented on.

Kings County Court House.

The County Judges' private rooms and toilets have been painted, embracing ceilings, side walls and woodwork.

As per estimate furnished, alterations in Rooms 27 to 32 and in Room 45, for the use of the Supreme Court, have been completed. These alterations consist of new robing rooms for the Judges; new oak railings have been furnished in Rooms 27 and 45, and Judge's platform in Room 32 has been remodeled.

New cement floor has been put in place in the boiler room, and the brickwork around the boilers has been repaired, at a cost of some \$200.

Hall of Records.

Decayed flooring in the Commissioner of Record's room on the fourth floor, Surrogate's office on second floor and County Clerk's office on the first floor has been taken up and replaced with new yellow pine flooring.

Miscellaneous repairs have been made to folding shutters and filing cabinets and desks in the Register's office. Shelving has been placed in this building to accommodate the Bureau of Buildings so that old plans and permits may be stored therein.

The ceilings in the Register's office were found to be imperfect covering quite an area, and had to be removed and replaced with a new ceiling.

Steam pipes in the basement were repaired and two new sets of grates and miscellaneous repairs to brickwork were completed on the two boilers.

Municipal Building.

Alterations are under way to complete Rooms 1 and 3 for the accommodation of the Coroners, who will move from the Borough Hall so that rooms formerly occupied by them may be altered to suit the requirements of the Borough President's office.

Kings County Jail.

Side walls in the men's prison have been scraped and whitewashed. Ironwork connected with the gearing that operates on windows has been repaired.

Miscellaneous repairs have been made to ventilators and kitchen range in the men's prison.

Public Baths and Comfort Stations.

Two iron ventilators in sidewalk have been furnished in the Huron Street Bath. The entire interior of the Pitkin Avenue Bath has been repainted.

Miscellaneous repairs, covering plumbing, have been made in all the baths and comfort stations.

REPORT OF THE TOPOGRAPHICAL BUREAU FOR THE QUARTER ENDING SEPTEMBER 30, 1907.

Office of the Assistant Engineer in Charge,
September 30, 1907.

Hon. DESMOND DUNNE, Commissioner of Public Works:

Dear Sir—I transmit herewith the quarterly report for the three (3) months ending September 30, 1907.

The work of the Topographical Bureau consists of matters relating to the determination, the preservation, and the changes in the established lines and the established elevation of public streets, parks, etc.; the preparation of maps for the legal opening of streets, etc.; the making of reports on the legal status of streets, etc.; the preservation and maintenance of lines, monuments, records, etc.; and connecting to the several secondary stations in this Borough, the traverse lines, monumented street lines, and the monumented lines holding the triangulation stations.

The work of this Bureau is directly for the use of the Local Boards for the Board of Estimate and Apportionment, for the Corporation Counsel's office in the matter of condemnation proceedings for street openings, and for the various other departments of the City. Hence it affects the map of the City, which is the basis of all city improvements; and, therefore, not only the local improvements, such as highways, sewers, etc., but in a greater or less degree, the work of all the other departments of the Borough depend upon the work of the Topographical Bureau.

To make surveys and to prepare plans and profiles for all original improvements that are made by the Bureau of Highways; to determine for all contracts let by the Bureau of Highways the amount of excavation, the amount of fill, the number of linear feet of curbing, the number of square feet of sidewalks, the number of cubic yards of concrete, and the number of square yards of asphalt and to furnish the contractors with line stakes, grade stakes, and monthly estimates.

There has never existed a map of the Borough of Brooklyn showing all the changes that have been made in the street system of the various sections of the Borough since the original Commissioners' maps were adopted. I am now preparing such a map on a uniform scale of two hundred feet to the inch. Upon this map it is intended to note all the changes in street lines that were made in the past, and, also, such changes in the map of the City as may be hereafter adopted. As a result of this work there will be in this office a map which will be complete and always up to date.

2. Triangulation of the Borough of Brooklyn.

In accordance with chapter 406 of the Laws of 1903, the Board of Estimate and Apportionment, in co-operation with the United States Coast and Geodetic Survey, is authorized to extend and complete the triangulation of The City of New York. The field parties have been engaged in reducing the triangulation stations to the ground, or, in other words, tying each triangulation station to the street lines or the monument lines in its immediate neighborhood. This is the most difficult and tedious part of the triangulation and requires a great amount of work and of care, because the triangulation points, as a rule, are points upon high buildings, and, therefore, it is impossible to bring them down to the ground, except by a small system of triangulation. The following triangulation station was connected with the street lines in its neighborhood.

Bensonhurst school.

Binder, 4,245.5 cubic feet, at 35½ cents.....	1,507 15

Total cost of work, if done under last maintenance contract.. \$19,775 37

—a saving of \$803.58, if depreciation is not figured.

In connection with the above statement of costs I have included depreciation of plant on the basis of 10 per cent. per annum. While this has been included as a charge, it does not seem that it is fair to do so at this time, owing to the contract features under which the plant was built. Under the contract for the construction of this plant it is provided for preliminary acceptance. This acceptance was under date of June 13. It is further provided that for six months after this preliminary acceptance the contractor maintain and make good any defects that may develop in the plant, ordinary wear and tear excepted. So that, as a matter of fact, when the plant is finally turned over to the City, it might be said that it is taken over at 100 per cent. efficiency. The date of final acceptance of the plant is December 13, and while a charge for depreciation will hereafter be made, it does not seem to me to be exactly right to so charge for the three months ending September 30.

During this quarter there was used on the maintenance work 22,415 cubic feet of wearing surface. This represents on the street in superficial area actually laid about 13,450 square yards, and is the maintenance work that was required during this period on about 1,500,000 square yards of asphalt pavement. These repairs cost \$1.59 per square yard of pavement actually laid. Under the old contract method, and at the prices obtaining under the last maintenance contract this same amount of repairs would have cost \$19,775.37. This shows a net saving to the City under the method of making repairs by the Municipal Asphalt Plant of \$803.58 in three months. This simply represents the saving in dollars and cents, but does not show the peculiar and special benefits derived by the City on account of the operation of the plant in meeting emergency calls. Aside from any possible saving, the great advantage that the plant is to the City is that the City is no longer dependent upon the various asphalt companies for making repairs within a specified time, but is in a position to step in and make these repairs itself at once. The good results of this Borough Asphalt Plant are plainly apparent on the streets that are not under guarantee by various asphalt contractors. The repair work has not only been well done, but has been more cheaply and promptly done than heretofore under the old system, and it is safe to say that those streets that are under the exclusive control of the Municipal Asphalt Plant are to-day in excellent condition.

The attached table shows in detail the contract work completed, and in progress, during the quarter.

All of which is respectfully submitted,

JOHN C. SHERIDAN, Chief Engineer.

BUREAU OF SEWERS.

City of New York, Borough of Brooklyn,
Bureau of Sewers,

Chief Engineer's Office, Mechanics' Bank Bldg., October 29, 1907.

Hon. JAMES DUNNE, Superintendent of Sewers:

Dear Sir—I transmit herewith report of the operations of the Engineering Division of this Bureau for the third quarter, ending September 30, 1907.

As you will note from the tables next attached, 32,133 linear feet of sewers of all sizes were laid during the quarter, or the equivalent of 6.086 miles. Three thousand three hundred and six linear feet of this amount, due to reconstruction or abandonment of old sewers, does not affect the total mileage of the sewerage system; therefore, during the quarter the sewer system was increased 5,358 miles. The total amount of sewers, divided among sewers of various sizes, built during the quarter, is as follows:

	Feet.	Miles.
Pipe sewers, 12 inches to 24 inches in diameter.....	23,011	4.358
Reinforced concrete sewers, 30 inches to 144 inches in diameter.....	2,135	0.405
Brick sewers, 30 inches to 102 inches in diameter.....	6,987	1.323
Total.....	32,133	6.086

—the increase in mileage being 5,358 miles, making the total mileage of the Borough on September 30, 1907, 796.932 miles.

Of six-inch house connection drains, there were laid 19,338 feet, or 3.662 miles, which makes the total amount of six-inch house connection drain built by the Bureau to date of this report, 9,652 miles.

The number of basins built during the quarter has been 145, which makes the total number of basins now connected with the sewerage system, 9,833.

There remained upon June 30, 1907, thirty-seven resolutions for sewer improvements, for which plans and specifications had not been completed, to the value of \$3,094.100. During the quarter plans and specifications have been completed for twenty-nine of these, the cost being \$1,270,000.

Fifteen sewer improvements were authorized by the Board of Estimate and Apportionment during this quarter, the estimated cost being \$136,000. Plans and specifications for ten of these have been completed, the cost being \$96,000.

Plans for the remaining resolutions are under way and will be completed without delay.

On July 1 there remained one petition for a sewer to be built under private contract, and this has been withdrawn by the petitioner, as the Board of Estimate and Apportionment has authorized its construction by public contract.

During the quarter petitions have been received for ten improvements to be built under private contract, plans for seven of which have been completed.

One hundred and thirty-eight reports upon sewer improvements, in response to petitions for paving and in reply to petitions for sewers, have been made, the estimated cost being \$497,400, covering 14.1 miles of sewers. Thirty-seven of these reports are in response to petitions for paving, the estimated cost of the sewer improvements being \$135,400. One hundred and one of the above reports are in response to petitions for sewers, the estimated cost being \$362,000.

During the quarter bids were received for all three sections of the Gold street sewer at prices which are considered reasonable and fair. Bids have also been received for the first half of the Scott avenue and St. Nicholas avenue sewers.

Yours respectfully,

E. J. FORT, Chief Engineer of Sewers.

The action of the Secretary was approved.

A report was presented from the Chief Examiner, dated January 11, with reference to the protest of James D. Beatty, candidate for promotion to Assistant Foreman, Fire Department. It appeared that the candidate had stated that in the said examination he had been given a set of questions belonging to an examination for Assistant Engineer, Department of Public Works, instead of the questions appertaining to his own examination, and that before he discovered the error he had used up so much time that he was compelled to confine his answers to as few words as possible, and that in view of the circumstances he requested a rerating of his papers. The Secretary was directed to communicate with the candidate and state that no record of any such occurrence as he mentioned had been made in the Examiner's report of the examination; that the Commission was of the opinion that he should have made his protest on the day of the examination or immediately afterwards, instead of waiting for the promulgation of the eligible list, and that in view of all the circumstances in the case his request for a rerating of his papers was denied.

A communication was presented from the Chief Examiner, dated January 11, forwarding without recommendation the request of David F. Sheridan for the position of Monitor. The papers were ordered filed.

On motion, it was

Resolved, That the provision of Rule VIII., clause 2, to the effect that "every application shall bear the certificate of four reputable citizens whose residences or places of business are within The City of New York," etc., be and the same hereby is waived so far as it applies to the coming examination for Patrolman on Aqueduct, and the Secretary is hereby authorized to accept such applications provided they bear the certificates of four reputable persons resident or engaged in business elsewhere.

The application of the President of the Borough of Queens for an amendment of the classification by including in the exempt class for his Department the following titles was again presented for consideration:

The Secretary stated that the first notice received from the Comptroller with reference to the appointment of the said persons had given the date of their assignment to duty as October 1. In view of the corrected notice, the Secretary was directed to certify the payrolls for a period of three months from the date of appointment.

A letter was presented from the President of the Borough of Queens, dated January 2, requesting authority to employ Miss Mary Bagley as Stenographer and Typewriter for a period not to exceed two months, at a compensation of \$100 a month. I called upon Mr. O'Brien and informed him that I possibly was a little below the required height. He then precisely told me he would fix me up all right through the aid of his machine. I paid my fee under the conditions in this advertisement. I was a little short according to the City doctors, and I then went to Mr. O'Brien and asked him to live up to his agreement, but he grabbed me and forced me from his office, at the same time threatened and swore at me.

"He has no intentions of refunding my money. Could you kindly tell me what this advertisement means—that part about refunding of money? Can I not bring him to a settlement somehow? I received your notice about those fraud Civil Service schools too late, as I paid my money in July to O'Brien. Kindly direct me. I need your advice. Do you think O'Brien can possibly get away from this fraud offer? Hoping to hear from you, I remain,

"Yours respectfully,

"ALBERT PETERSON,

"No. 170 Seventeenth Street, Brooklyn.

"Enclosed find Mr. O'Brien's advertisement from the Brooklyn 'Standard Union.'"

The Secretary was directed to take the matter up with the District Attorney of Kings County.

A communication was presented from the Commissioner of Street Cleaning, replying to the request of the Commission for a report on an alleged violation of the Civil Service Law in his Department in the assignment of one Pasqual Bresha, Section Foreman, to perform the duties of "Special Inspector." The communication was ordered continued on the calendar for the next meeting.

An affidavit was presented from Miss Bella Kantrowitz, of No. 1656 Eastern parkway, Brooklyn, dated January 9, to the effect that owing to illness she had been unable to file an application for Typewriting Copyist before the closing date, and requesting that she be permitted to compete in the examination. The request was denied for lack of power.

A communication was presented from Robert F. Tighe, No. 2054 Ryer avenue, The Bronx, protesting further against the transfer of the name of Joseph J. Hart from the eligible list of Deputy Tax Commissioner for the Borough of Manhattan to the list for the Borough of The Bronx, on the ground that his (Tighe's) prospect of appointment was prejudiced by such transfer. The Secretary was directed to communicate with Mr. Tighe and state that the Commission could not reconsider its decision in the matter.

A communication was presented from Mr. Edmund B. Powers, of No. 243 Schermerhorn street, Brooklyn, dated January 7, stating that his absence from the office of the Receiver of Taxes, Department of Finance, while employed there as a Temporary Clerk, was due to illness, and requesting that his name be removed from the "blacklist" and that he be marked "qualified" on the eligible lists of Attendant, Messenger, Clerk and on the preferred list of Temporary Clerk. Accompanying the candidate's communication was a letter from James D. Bouck, Esq., endorsed by the Receiver of Taxes, substantiating Mr. Powers' statements, and requesting that the Commission amend its records to show that his separation from the service was due to illness. After consideration of the matter, the Secretary was directed to restore the candidate to eligibility for appointment from the eligible lists of Attendant, Messenger, Senior Clerk (old) and Temporary Clerk (preferred), and to correct the records to show that the candidate was dropped from the payroll of the Department of Finance on account of continued illness.

The request of Frank J. Carney, of No. 1992 Lexington avenue, that he be permitted to correct the date of birth given in his application for Patrolman from July 8, 1883, to July 15, 1882, to conform to the birth certificate furnished by him, was granted.

The following requests for restoration to the eligible lists indicated were granted: William J. Liebertz, No. 981 Prospect avenue, Brooklyn, Financial Clerk. (Stated that when he was certified to the Department of Docks and Ferries, on May 16, 1907, he was ill and out of the City.)

James B. Julian, No. 229 East Fortieth street, Temporary Clerk. (Statement of the Receiver of Taxes that he failed to reply to notice sent him on September 20, 1907, incorrect.)

Anna A. Hintze, M. D., No. 935 South Salina street, Syracuse, N. Y., Resident Physician (Class II.). (Stated that she was in New Hampshire when certified to the Department of Correction on August 8, 1907, and that she replied to notice and said she was unable to appear on the date named.)

The request of Isadore Gluck, of No. 328 East Nineteenth street, that his name be restored to the eligible list of Senior Clerk (old) was denied for laches.

The request of Miss Rose S. Fink, of No. 24 East One Hundred and Sixth street, that she be restored to eligibility for appointment as Typewriting Copyist, at \$750 per annum, was denied for laches.

The Commission then adjourned to meet Wednesday, January 22, 1908, at 10 o'clock in the forenoon.

F. A. SPENCER, Secretary.

DEPARTMENT OF DOCKS AND FERRIES.

FILLING PRIVILEGE.

OFFICE OF THE DEPARTMENT OF DOCKS AND FERRIES, PIER "A," FOOT OF BATTERY PLACE, NORTH RIVER, BOROUGH OF MANHATTAN, THE CITY OF NEW YORK.

SEALED BIDS OR ESTIMATES WILL BE received by the Commissioner of Docks at Pier "A," foot of Battery place, in The City of New York, until 12 o'clock noon on

FRIDAY, FEBRUARY 21, 1908.

FOR THE RIGHT TO DUMP AND FILL IN BEHIND THE BULKHEAD WALL RECENTLY BUILT OR TO BE BUILT ON THE EASTERLY PART OF THE FULTON SECTION, ON THE EAST RIVER, BOROUGH OF MANHATTAN.

TERMS AND CONDITIONS OF SALE.

The work to be done is to fill in with suitable material, as hereinafter described, the area be-

hind the new bulkhead wall extending from the line of the present filling about 18 feet west of the west line of Pier (new) No. 18, East River, easterly a distance of about 208 feet to the close row of piling located about 18 feet west of the westerly side line of Pier (new) No. 19, and extending also from the rear of the bulkhead wall, when it is completed, inshore a distance of from about 43 feet to 63 feet to the old crib bulkhead running along the southerly side of South street.

The exact limits of the basin to be filled under this agreement may be seen on a map at Pier "A," together with the soundings and other data used, the said map being a part of this agreement.

The filling will be brought to a grade level with the top of the coping of the bulkhead wall and will extend inshore on a regular grade to the level of the street adjacent.

It is estimated that the area outlining the above described limits will create a basin to be filled in, under this agreement, whose cubical contents in net void space is equal to about 5,000 cubic yards.

This estimate is arrived at by computing the net void space between the face of the old crib bulkhead, along the southerly side of South street, and the rear of the rip rap to be placed, in the rear of the bulkhead wall, either before commencement or during the progress of the work herein called for.

Bidders will state in writing a lump sum price, which they agree to pay for the privilege of filling in the void space behind the bulkhead wall, built or to be built, on the easterly part of the Fulton Section, as described above, and as appears in detail on the map at Pier "A," and which becomes a part of the contract or agreement.

In the estimated amount given, the amount in cubic yards is arrived at without placing any allowance for shrinkage, settlement, swelling of the material or penetration into the mud.

The Department is not bound in any way by such estimate, and bidders must satisfy themselves of the actual quantity required to fill in the above described area by examination of the premises or such other means as they may prefer, the intention of the Department being to fill in the whole of the said premises behind the bulkhead wall within the above described limits, and no allowance will be made to the purchaser from the purchase price on account of any discrepancy which may be found between the above estimated quantity and the actual amount of filling required. The purchaser will be required to place the filling in accordance with the following specifications:

All the filling shall, unless otherwise directed, be placed directly in the rear of the bulkhead wall and carried from the bulkhead wall toward the shore until the bank of same has been carried out at the finished grade for a distance of about 30 feet from the face of the bulkhead wall, at which time, if so directed by the Engineer, the filling shall be started at the bank and carried outshore toward the bulkhead wall.

All material must be dumped and filled in only in such manner, at such points and in such order of procedure and at such times and seasons as may, from time to time, be directed, and the work of filling in may be entirely suspended for such periods of time as may be directed by the Engineer. The purchaser shall have no claim for damage or for any allowance from the purchase money on account of such suspension of the work.

All directions must be given by the Engineer, and wherever the word Engineer is used in these specifications it refers to and designates the Engineer-in-Chief of the Department of Docks and Ferries, or such officer or employee as may be designated by him.

Rip rap stone coming directly on or against the bulkhead wall must be deposited carefully in such manner as will not injure the same.

All the filling, except as otherwise specified herein, shall be of ashes, cellar dirt, broken stone, etc., entirely free from garbage or any organic matter objectionable in the opinion of the Engineer.

At any section of the bulkhead wall the filling shall be brought up level with the under side of the backing log of the bulkhead wall at such section, and no higher, unless otherwise directed.

The filling shall be commenced within five days after the date of the receipt of a notification from the Engineer that the work, or any part of it, is ready to be begun. The Department reserves the right of ordering the contractor to deposit not less than 100 cubic yards per day, as directed by the Engineer, and the whole amount of the filling called for to bring the above described basin up to grade, shall be completed within fifty (50) days from the date of the receipt of said notification. At the expiration of this time this agreement shall be considered closed unless a further extension of time shall be given by the Commissioner of Docks. If at any time during the progress of the work it shall be deemed necessary to order the suspension of the whole or any part of the filling, the time for completing said filling shall be extended as much as it may have been delayed by such suspension.

In case the purchaser at any time does not proceed with the work of filling in to the satisfaction of the Commissioner of Docks, the said Commissioner will at once terminate the privilege of filling in and proceed to have the remainder of the filling in done by other parties in such way and manner as he deems proper, and any loss which may result therefrom shall be charged against the principal and his surety.

The purchaser shall, during the work of filling in, and at all times until the completion thereof, take all necessary precautions and place proper guards for the prevention of accidents, and put up and maintain at night sufficient lights, and he shall indemnify and save harmless The City of New York from all damages and costs to which it may be put by reason of injury to the person or property of another resulting from negligence or carelessness in the performance of the work or guarding the same, to which the surety is also bound.

No bid or estimate will be considered unless accompanied by a certified check drawn to the order of the Commissioner of Docks, or money to the amount of twenty-five per centum of the amount of the bid, which amount shall be applied in the case of the successful bidder to the first one-quarter of the amount of the filling to be deposited; twenty-five per centum to be paid when the first one-quarter of filling has been completed; twenty-five per centum additional when one-half the filling has been completed, and the balance, twenty-five per centum, when three-quarters of said filling has been completed.

A surety or guarantee company, duly authorized by law to act as surety, to be approved by the Commissioner of Docks, will be required to enter into a bond or obligation jointly and severally with the purchaser, in the sum of double the amount of the purchase price as security for the satisfactory performance of said work, in accordance with the terms and conditions hereof.

Dated The City of New York, February 11, 1908.

Commissioner of Docks.

PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
