Apparatus—Increase, \$9,000 :
 Due to the necessity of equipping the new company at One Hundred and Eighty-third street and Jerome avenue, the building for which will be completed before the end of the current year. It will also be necessary to replace worn-out apparatus, and to do considerable repair work during the coming year.

Buildings—Repairs—No increase.
 Contingencies—No increase.

Fuel—Increase, \$2,000 :
 This additional amount will be required during the ensuing year to supply the new companies to be organized.

Gas and Electric Lighting—No increase.
 General Supplies—No increase.

Horses—Increase, \$3,000 :
 Owing to the increase in price, and to the fact that many of the horses in service are becoming aged and will have to be replaced during the next year, the larger sum asked will be needed.

Forage—Increase, \$2,000 :
 In consequence of an advance in the price of grain, and to provide for the increased number of horses that will be in service in 1902, this increase is considered necessary.

Horseshoeing—Increase, \$1,000 :
 To provide for shoeing the additional horses that will be in use in the Department next year.

Harness—Increase, \$500 :
 This moderate advance over the allowance for the current year is considered advisable.

Hose—Increase, \$25,000 :
 To replace hose that has been several years in service, and to procure the additional quantity required for new companies, this increase is necessary. It is indispensable that the Department be provided with sufficient funds to meet all emergencies in this regard.

Machine and Paint Shop Supplies—Increase, \$2,000 :
 To make provision for the larger number of apparatus requiring attention, it is believed the allowance for the coming year should be increased to this extent.

Rents—No increase.

Telegraph Supplies and Repairs—Increase, \$7,950, as follows :
 Telephone rent, \$500, due to increase in number of telephone connections. Materials, \$2,000, to extend the telegraph system in the outlying districts of the Borough of The Bronx. Repairs, \$500, to make repairs to the system which should not be longer deferred. Keyless doors, \$15,500, for the purchase of additional keyless doors for new fire-alarm stations, replacing lock doors, etc. New boxes, \$350, a moderate advance on the allowance for this year (\$5,000) to purchase fire alarm signal-boxes, to replace boxes long in the service and which are not worth repairing. Rebuilding Telephone System, \$2,500 (no allowance this year), to initiate the work of providing modern means of transmitting information between the Central Office at these Headquarters and the various apparatus company houses.

Maintenance and Repairs to Fire-boats—Increase, \$1,000 :
 It is considered prudent to ask for this small advance over the allowance for this purpose for 1901.

For one new Fire-boat.....
 This boat is requested to take the place of the "William F. Havemeyer," a wooden boat constructed more than a quarter of a century ago. The United States Local Inspectors refused a renewal of license unless extensive repairs were made, and as these would involve the outlay of a large sum of money with no corresponding permanent good result, the "Havemeyer" was placed out of service on July 25 of this year. A new fire-boat is absolutely necessary to afford adequate protection against fire to the merchandise stored along our water-front, worth vast sums, as well as for the proper safeguarding of the shipping in the harbor.

Aggregate.....

The foregoing estimate, amounting to two million eight hundred and ninety-eight thousand five hundred and fifty-four dollars and fifty cents (\$2,898,554.50), is adopted as the sum of money which will be required for the expense necessary to the administration of the Fire Department of The City of New York, boroughs of Manhattan and The Bronx, for the year 1902.

JOHN J. SCANNELL, Fire Commissioner.

The increase asked for in the case of James G. Gillespie, Jacob M. Johnson, Albert Prast, John J. Corcoran, Bartholomew Looney, Chris. C. Quinn, William H. Guischard, William Egbert, and Matthew Dunnigan is explained as follows: These men are performing duty as Calkers, Carpenters, Painters and Tinsmiths, respectively, and application has been made to the Municipal Civil Service Commission (under date of July 16, 1901) to have the said individuals examined for change of title. Owing to the closing of the trade schools no examination can be held until October of the current year, and assuming that the aforesaid employees will successfully pass said examination the increase is asked in order that the prevailing rate of wages may be paid during the year 1902.

The increase in telegraph account is explained as follows: The number of connections, signal-boxes, etc., on the elevated railroad structure has been increased by reason of the extension of the alarm system during the current year, and the increase will be required to meet the expense for rentals during 1902. The new signal-boxes are necessary in the rapidly growing suburban sections of the Borough of Brooklyn, and to place additional boxes in Long Island City (Borough of Queens). The new electrical apparatus is required for new companies to be organized. The increase in the number of buildings in the suburban sections necessitates the extension of the telegraph system for which the increase for new wire is asked. The cables, terminals, etc., are necessary for the placing of the department wires under ground, where conduits are available.

The increase asked for apparatus, fuel, lighting, general supplies, horses, forage, shoeing, harness and hose is necessary for the proper equipment and maintenance of new companies for which appropriations for sites and buildings have been made.

An additional fire-boat is necessary for the proper protection of property along the water-front, and this appropriation is urgently requested.

The Village of Far Rockaway was allowed \$1,500 during the year 1901 by the Board of Estimate and Apportionment for the extension of the fire-alarm system, this being the only allowance made for this purpose under the provisions of chapter 82, Laws of 1900.

Since the enactment of chapter 82, Laws of 1900, the operation of the fire-alarm system in the volunteer firemen's territory of the Borough of Queens has been unsatisfactory and at times extremely hazardous.

Prior to the passage of that law the volunteer fire departments in said borough received for their maintenance such amounts as were authorized by the Charter of the City. This was discontinued by the Law of 1900, and in lieu thereof a specific sum has been paid annually to the treasurer of each volunteer fire company; that is to say, for an engine company, \$1,200; hook and ladder company, \$1,000; hose company, \$800. Those amounts represent an aggregate annual increase from \$21,636 to \$62,800, notwithstanding which fact many of the companies have failed or refused to defray any portion of the expense of maintaining the fire alarm telegraph, and the Paid Department is without any available funds to defray this expense, and has been compelled, so far as it could, to keep the lines in working order. This is a condition much too hazardous to be continued. Our resources are insufficient for the purpose. To remedy this condition of affairs it is proposed to establish a sub-central station in the Village of Jamaica, install telegraph systems in the villages now dependent on bell-towers only, extend and improve the present systems, and connect all with the sub-station at Jamaica, and thence by telephone to the Headquarters in Borough of Brooklyn.

The location of a sub-station as suggested, the installation of new systems and the improvement and extension of the old lines will give only needed protection. The entire plant to be under control and direction of the Fire Commissioner, as provided in section 729 of the Greater New York Charter.
