May 18, 2009

CERTIFICATE            23507

RESOLVED That the Design Commission, having considered designs for the construction of the New Amsterdam Pavilion, a gift from the Dutch government, Peter Minuit Plaza, Whitehall Street between South Street and State Street, Manhattan, submitted by the Department of Parks & Recreation and the Department of Transportation, represented by exhibits 6041-AP, AQ & AR of record in this matter, hereby gives to the same unanimous final approval with the understanding that (1) the final design will utilize a custom color for the exterior cladding, specifically a combination of Benjamin Moore's OC-65 (Chantilly Lace) with a pearl finish and 30% Modern Masters ME-150 (Silver) with a metallic finish, as presented on 4/6/9, or if any color changes are made, they will be submitted for committee review; and (2) all site work, which should be shown in the context of the correct design for the larger Peter Minuit Plaza reconstruction project, will be submitted for final review and approval separately and address the following: (a) the size of the shadow encroaches on the plaza trees and should therefore be reduced (on April 6, 2009, the Parks Department suggested by 80%, which the committee found reasonable); (b) while cracking and spalling can be addressed by specifying a minimum 3" to 4" deep paver with a thermal finish, bluestone is porous and will stain due to the grease resulting from the food concession, and consequently the applicant should consider alternative paving materials, such as Jet Mist granite; and (c) any changes in the paving plan that deviate from a flush plane should be clarified (specifically noting their purpose, how they relate to the architecture, and how drainage is addressed) and drawn in both a detailed plan and section/elevation, per standard procedure. The Commission notes that any significant design revisions to the building that result from the design development process or through any value-engineering exercises must be submitted for committee review before any work proceeds.

Final approval is conditioned upon commencement of work before May 18, 2011 and submission of a minimum of three (3) 8" x 10" color archival-quality photographs of the completed project.
