BOARD OF EXAMINERS.

December 17, 1907.

Present—Messrs. Warren A. Conover, Charles Buek, Lewis Harding, Charles G. Smith, Edward F. Croker, Henry R. Marshall and George A. Just, Chairman.
Meeting called to order at 2 p. m.
On motion, minutes approved as read.
Appeal 78 of 1907, alteration 2456 of 1907, premises St. Vincent's Hospital, Seventh avenue and Twelfth street, Manhattan; Schickel & Ditmars, architects and appellants.

1. Building will be of unlawful height for non-fireproof building.
2. Walls in sixth story of unlawful thickness; show wall thickness on plan.
3. Walls also have excessive openings.
4. Fire escapes should be provided.
5. Auxiliary fire apparatus should be provided.
6. Provide fireproof shutters where necessary.
7. Furnish detail drawing of proposed fireproof floor filling.
8. Furnish details of roof garden construction, which should be fireproofed.

Awaiting Inspector's Report.

1. "Whenever a superintendent of buildings to whom such questions have been submitted shall reject or refuse to approve the mode, manner of constructions or materials proposed to be followed or used in the erection or alteration of any such building or structure;
2. "Or when it is claimed that the rules and regulations of the President of the Borough or the provisions of law or said ordinances do not apply."

Objection 1. The appellants desire to have a decision rendered upon the proposed improvement to the building which consists of squaring up the upper stories practically within the limits of height of peak roofs as they now stand, removing the present non-fireproof ceilings and roofs and substituting for them steel and concrete floor construction and carrying up the outer walls of brick and partition and dividing walls of brick or terra cotta as noted on plans.

The new roof will be built of steel and concrete construction and covered with copper and tile.

All the new structural work from the underside of the ceiling beams of fourth floor up to the highest point building will be fireproof.

1. The improvement as proposed is the squaring up of the upper stories of present building practically within the limits of height of peak roofs as they now stand, carrying up the two end portions of building one story and the centre pavilion two stories in height and finishing with flat roofs covered with tile and copper. A part of the roof over two end portions will be used as open roof garden.

The entire structure above the point of which new work begins, which is at the level of underside of ceiling of fourth floor, will be thoroughly fireproof.

The new floors and roof will be framed with steel I beams filled in with Roebbling's concrete floor arches, System B, and the partitions will be of 12-inch brick or 4-inch terra cotta blocks, laid up in Portland cement mortar, as indicated on drawings.

The building is now equipped with two sets of outside iron stairs and these will be extended up to the roof with landings at new floor levels.

In addition to the outside iron stairs there are at present in building two stairways, one at each end of building, which are of fireproof construction and built between brick walls. These will also be extended up to roof.

There is now installed in building a system of auxiliary fire apparatus which will be extended up to roof level with stand pipe and outlets of regulation size and fitted with standard hose, nozzle, racks, etc., according to the requirements of the Department governing same.

The appellants wish to draw attention to the fact that the materials used in the construction of the present building are of the highest grade. The walls of foundations and superstructure are laid up in cement mortar and are of ample thickness and strength to sustain the added loads.

The building is subdivided into a series of rooms practically independent of each other by means of 12 and 16 inch brick walls continuous from cellar to top story, the floor beams of which are deafened at each story, and this arrangement of the building, together with the construction, we think should be given consideration in dealing with this question.

The following answers to other objections made by the Superintendent of Buildings:

2. New wall thicknesses are indicated on drawings.
3. See revised drawings.
4. Two sets of outside iron stairs now on rear of building where indicated on plans, will be extended up to roof.
5. Auxiliary fire apparatus is now installed in building and this will be extended up to roof level with stand pipe and outlet of regulation size and fitted with standard hose, nozzle, racks, etc., according to the requirements of the Department governing same.
6. Fireproof shutters are unnecessary, as openings in this building do not come within 30 feet of any adjoining building.
7. Detail of fireproof floor filling submitted herewith.
8. Detail of fireproof roof garden construction is indicated on drawing.

Appearance—Mr. Lindsay, for Schickel & Ditmars.

On motion, appeal 78 of 1907, approved on condition that all three sets of interior stairs be made thoroughly fireproof from top to bottom, with wire glass in all openings; and provided that the landings at each story of these stairs be cut off by fireproof partitions, with doors and trim in same of fireproof material.

Mr. Conover recorded voting in the negative.

The Chairman presented and read a communication from the Board of Estimate and Apportionment enclosing copy of resolution adopted by that Board on the 13th instant anant refraining from increasing salaries, etc., receipt of which was acknowledged, the correspondence being placed on file.

Adjourned.

EDWARD V. BARTON, Clerk.

BOARD OF EXAMINERS.

December 24, 1907.

Present—Messrs. Warren A. Conover, Charles Buek, Lewis Harding, Charles G. Smith, Edward F. Croker, Henry R. Marshall and George A. Just, Chairman.

Meeting called to order at 2 p. m.

On motion, minutes approved as read.

Appeal 79 of 1907, new building 1115 of 1907, premises about 106.09 feet east of Jerome avenue and One Hundred and Seventieth street, The Bronx, Pacific Wireless Telegraph Company, Chas. C. Lapham, General Manager, appellant.

1. "This structure must be entirely fireproof; lower portion of same is of inflammable material in part."

2. It is claimed that the rules and regulations of the President of the Borough or the provisions of law or said ordinances do not apply.

The right to use a wood section at base of tower for the purpose of insulation.

First—It is absolutely essential that wood insulation be used to make said tower answer the purpose for which it is built.

Second—No buildings or inflammable material can ever come within 50 feet of said wood sections.

There is only 6 feet of column exposed on each corner, which can be covered with asbestos or any other suitable fireproof material that may be suggested that will not interfere with insulation.

No appearance.

On motion, laid over until next meeting, the Clerk being instructed to notify the appellant to appear at that time.

Adjourned.

EDWARD V. BARTON, Clerk.

PUBLIC NOTICE IS HEREBY GIVEN that at a meeting of the Board of Estimate and Apportionment held October 18, 1907, the following petition was received:

To the Board of Estimate and Apportionment of the City of New York:

Gentlemen—The Long Island Railroad Company, for the purpose of facilitating travel over its line, promoting the safety and comfort of its passengers, and to avoid the crossing at grade of the Union turnpike and several other streets, has had, by vote of two-thirds of its directors, altered or changed its route between a point about four hundred (400) feet west of Ascan avenue and a point about seven hundred (700) feet east of Lefferts avenue, in Richmond Hill, in the Second Ward of the Borough of Queens, City of New York, so that the same shall be a straight line between these points instead of the existing curve (which constitutes an element of delay and danger in operation), and had adopted a survey map and profile (of which a copy is hereto annexed), which survey map and profile was duly filed in the office of the Clerk of the County of Queens on October 4, 1907. The new route between these points will be constructed entirely upon property which is the property of the railroad. It will not cross any streets at grade, as the existing curve does; it will be carried over all intersecting streets by bridges. It will therefore be a public improvement.

It respectfully requests the consent of The City of New York to the said alteration and change of this portion of its route.

Dated New York, October 7, 1907.

Frank E. Haff, being duly sworn, says: That he is the secretary of the Long Island Railroad Company; that the facts stated in the foregoing petition are true to the best of his knowledge and belief.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately.

The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done.
