(b) \$10,000,000, face value, three year five per cent. gold notes, due March 1, 1910, issued under trust agreement with Morton Trust Company, Trustee;

Provided that the total amount to be secured by the said mortgage of both bonds and gold notes shall not at any time exceed the sum of \$55,000,000 of principal, and the said mortgage to be in the form identified as 17th revise and filed in the office of the Secretary of the Commission on this 23rd day of April, 1908.

Further Ordered, That the Commission does hereby authorize the issue by the petitioner of \$30,000,000, face value, of bonds pursuant to the said mortgage, and the use of the same by pledging said bonds as collateral security for an issue of \$25,000,000, face value, of the three year six per cent. notes of the petitioner, to be dated May 1, 1908, and to be issued under and in conformity with the provisions of a trust agreement between the petitioner and Morton Trust Company, as Trustee, dated April 1, 1908, to be in the form identified as 7th revise and filed in the office of the Secretary of the Commission on the 23rd day of April, 1908.

Remarks:

Respectfully,

Commissioner Maltbie, in explanation of his motion, said:

"I move the adoption of this resolution, Mr. Chairman, as a first step towards the reduction of the large number of fatal and serious accidents upon our street railways.

"In the six months ending February 1, 1908, the railways of Greater New York killed 299 persons and seriously injured 944. The total number of accidents due to collisions was 1196 and the number of vehicles and persons struck by cars was 7059. At this rate in an entire year, about 600 persons will be killed and 2000 seriously injured. The number of accidents due to collisions will approximate 2,400, and the number of persons and vehicles struck, 14,000. From the standpoint of humanity, this is a serious condition and ought not to be allowed to continue, if there is any way to prevent it.

"There is another phase of the subject. For the year ending June 30, 1907, the street railways of New York City paid out for injuries and damages, due to accidents, over \$2,500,000. Over one-half of this sum was paid by the Manhattan companies and one-third by the Brooklyn companies. Anything, therefore, which will reduce the number of accidents will not only be a blessing to humanity but will result in a saving financially to the companies.

"It is probably true that even with the best devices that can be adopted and with the greatest of care, it will not be possible to prevent accidents entirely, many of which will be serious and even fatal. But until the subject has been thoroughly investigated and every suggested remedy fully considered, our duty will not have been done, and it seems probable that the number of accidents can be very greatly reduced.

"The most important factors in the prevention of accidents are brakes, fenders and wheel guards. Certain types of each are much more effective than others, and in view of the high speed with which cars are run and in view of the congested character of many districts of the City, it is essential that only the most effective types of brakes and fenders be used and that all of low efficiency be eliminated as rapidly as possible. Our Division of Accidents has investigated hundreds of cases and it is the opinion of the Chief of the Division, Mr. Daggett, that fully one-half of the accidents would be prevented if a brake of the high power and efficiency claimed for the magnetic track brake were in universal use. A large number of lives would be saved and injuries avoided if every car were equipped with the best type of fender and wheel guard.

"I move, therefore, that the companies be directed to report the facts called for in the resolution I have just offered, that the Electrical Engineer be directed to report upon the relative efficiency of the various types of brakes, fenders and wheel guards used by the street railway companies under the jurisdiction of this Commission, and that, pending the submission of this report, an order for a hearing be issued as to the advisability of requiring every company to submit to the Commission for its approval the types of brakes, fenders and wheel guards to be used upon all cars hereafter purchased before such cars are ordered by the companies."

The Secretary presented the following communication from the Brooklyn Union Elevated Railroad Company, which was referred to Commissioner McCarroll:

April 20, 1908.

To the Public Service Commission, First District, State of New York:

GENTLEMEN—The Brooklyn Union Elevated Railroad Company, a domestic corporation, duly incorporated, organized and existing under and by virtue of the Laws of the State of New York, pursuant to the "Stock Corporation Law," which owns and operates a double track elevated railroad in Flatbush avenue, in Fulton street and in Myrtle avenue in the Borough of Brooklyn, City and State of New York, did, on the 9th day of September, 1907, make an application for a franchise to extend the same along what is known as the extension of Flatbush avenue, beginning at a point where Flatbush avenue intersects Fulton street and extending northerly along and through said extension to Flatbush avenue and Nassau street. Said application was made to your Honorable Body, subject to the approval of the Board of Estimate and Apportionment of the City of New York as provided in Chapter 429 of the Laws of 1907 and Chapter 4 of the Laws of 1891, together with all acts amendatory thereof and supplementary thereto.

Said franchise, if granted, will permit the connection of the elevated railroad on Myrtle Avenue, Flatbush avenue and on Fulton street with the said extension and thereby enable the Brooklyn Union Elevated Railroad Co. to operate elevated railroad trains to the Bridge Plaza of the Manhattan Bridge at or near Nassau street, in the Borough of Brooklyn.

On said September 9, 1907, the Brooklyn Union Elevated Railroad Co. made application to the Board of Estimate and Apportionment of the City of New York for a contract for the exclusive use of two of the tracks provided for elevated railroads upon and across the Manhattan bridge and approaches when constructed across the East River, together with the necessary terminals, switches, sidings, turnouts, wires and equipment for the operation of its said elevated cars from the Borough of Brooklyn over and across said bridge and approaches.

We have been informed that the Corporation Counsel has rendered an opinion determining that such application for the right to the exclusive use of said two tracks on the Manhattan Bridge and approaches should have been made to your Honorable Body, instead of the Board of Estimate and Apportionment of the City of New York.

Therefore, the Brooklyn Union Elevated Railroad Company does hereby make application to your Honorable Body for the right to the exclusive use of two of the tracks provided for elevated railroads upon and across the Manhattan Bridge and approaches, when constructed across the East River, together with the necessary connections, terminals, switches, sidings, turnouts, wires and equipment for the operation of its said elevated railroad cars from the Borough of Brooklyn over and across said bridge and approaches thereto.

Respectfully submitted,

BROOKLYN UNION ELEVATED RAILROAD COMPANY,
(Signed) By HENRY SEIBERT, President.

State of New York,

County of Kings,
Borough of Brooklyn, ss.:

Henry Seibert being duly sworn, deposes and says, that he is President of the Brooklyn Union Elevated Railroad Company, which is a domestic corporation of the State of New York; that the facts stated in the above application are true to his own knowledge, except as to the matters therein stated on information and belief and as to those matters he believes it to be true, and that he is authorized by the Board of Directors to make this application on behalf of said company.

The Secretary stated that the following letter had been drawn and would be sent by the Chairman to the Commissioner of Bridges:

April 28, 1908.

Mr. J. W. STEVENSON, Commissioner, Department of Bridges, 13 Park Row, New York City:

DEAR SIR—The Public Service Commission is proceeding with the preparation of plans for the Broadway portion of the Brooklyn loop lines. This involves the use of the Williamsburg Bridge by trains composed of all steel motor cars. Will this bridge carry trains composed of ten steel motor cars weighing forty-eight tons each? If not, how many of such motor cars may each train be composed of? An

answer to these questions at your earliest convenience will be an assistance to the Commission in the advancement of its work.

Yours very truly,
(Signed) WM. R. WILLCOX, Chairman.

The Secretary presented a communication from the West Side Taxpayers' Association, asking for the establishment of a subway station at 104th Street and Central Park, and it was understood that the following letter be signed by the Chairman and sent in reply thereto:

April 28th, 1908.

CHARLES HVASS, Esq., Chairman, Executive Committee, West Side Taxpayers' Association, 207 West 34th Street, New York City:

DEAR SIR—Your communication of April 10th in which you set forth the request of the West Side Taxpayers' Association, adopted by unanimous vote, that a new subway station be constructed at 104th Street and Central Park West, on account of the long distance between the 96th Street and the 110th Street station, has been duly considered. I have had the matter thoroughly investigated and have ascertained that during the construction of the subway, the proposal to place a station at this point was thoroughly discussed in 1902 and 1903. The minutes of the Rapid Transit Commission show that on March 19th, 1903, the following resolution moved by the Mayor was passed:

"Resolved, That in view of the opinion of the Chief Engineer and of the contractor that the station at 104th Street can not be constructed without causing serious delay in the completion of the subway, the station be definitely abandoned."

But the report of the engineer upon which this resolution was made not only stated that the construction of the station at that time would cause delay, but it also stated that it would be exceedingly dangerous on account of the native rock being very treacherous in that location, and there was grave danger of interfering with five 48" water mains running through Central Park West. If it were found dangerous at that time to construct the station, it would be doubly so at the present time, for the dangers that then existed are still to be contended with, and we also have the additional danger of interfering with moving trains constantly, which would be likely to interrupt traffic so that trains would have to be stopped at this point part of the time.

Our engineer reports that a station at this point would be sixty feet below the surface, and that in constructing the station it would be necessary to enlarge the present arch of the tunnel as well as to construct the station approaches for elevators, which would require the taking out of 9,000 cubic yards of rock, and that it would cost not less than \$300,000.00 to build under the present conditions. He also reports that there is a grade there of 1.4 per cent, and also a curve on a radius of 580 feet, both of which would make this a very undesirable place for a station location on account of the operation of trains.

As to the other point, of the distance between 96th Street station and 110th Street station, which you say is 6,500 feet, we find that this is divided really into three sections; first, from 96th Street to 104th Street right along the line of the Broadway trains a distance of about 2,000 feet; 2,200 feet is the length of the tunnel from Central Park West to 110th Street, nearly all of which is underneath the Park, and the line under 104th Street is about 2,300 feet.

All of this section would not be able to use the new station at 104th Street if it were built, for the people living west of Amsterdam Avenue could just as readily go to 103rd Street station of the Broadway line, so that the remaining section that would be able to use to the best advantage the station proposed would be those people living between Central Park West and Amsterdam Avenue, a small section, and they have an elevated station at 104th Street.

It would seem too great a risk as well as too large an expense on behalf of the City to recommend the improvement you have requested for the purpose of accommodating a very small section of the city, which would at the same time delay and prejudice the large numbers that come on the Lenox Avenue line by causing an extra stop and thus delaying the time of the express service.

For these reasons I am constrained to advise your Association that this Commission is adverse to taking the action you have requested.

Very truly yours,
(Signed) WM. R. WILLCOX, Chairman.

The Secretary presented a resolution from the Board of Aldermen dated April 21st recommending the location of a station on the Lenox Avenue division of the Subway between 96th Street and Broadway and 110th Street and Lenox Avenue. The Secretary was thereupon directed to notify the Board of Aldermen that a similar application had already been received from the West Side Taxpayers' Association, and to send a copy of the reply which had been made to that Association.

The Secretary presented a communication dated April 22nd from Chas. E. The communication was referred to the Committee of the Whole.

COMMISSIONER OF LICENSES.

REPORT OF THE COMMISSIONER OF LICENSES FOR THE LICENSE YEAR FROM MAY 1, 1907, TO MAY 1, 1908.

Commissioner of Licenses,
No. 277 Broadway,
New York City, May 1, 1908.

Hon. GEORGE B. McCLELLAN, Mayor of The City of New York:

Sir—I have the honor to submit herewith a report of the work of the office of the Commissioner of Licenses for the license year just ending, the period being from May 1, 1907, to May 1, 1908. This is the fourth annual report on this office submitted to your Honor, the law creating the office having been enacted in May, 1904.

Respectfully,

JOHN N. BOGART, Commissioner of Licenses.

Work and Scope of the License Office.

The office of the Commissioner of Licenses was created four years ago. Since that time the scope of the License Law has been enlarged and the abuses which called it into existence have been reduced to a gratifying minimum. The principal evils which formerly made the employment agency business notorious are now practically eliminated.

When the office was established there were 450 agencies licensed in New York City. Now there are 763 agencies licensed and under almost perfect supervision. They include intelligence offices for domestic servants, labor agencies, shipping agencies, stenographers' bureaus, agencies for filling technical and clerical positions, theatrical agencies and nurses' registries.

The office was not established for the purpose of providing revenue, although the amount to be collected for licenses during the coming year will exceed \$20,000. The purpose of the legislature in establishing the office was to abolish the immorality and prevent the extortion which were the outgrowth of the loose system under which employment agencies had been permitted to conduct their business in the past. The work is principally one of supervision and regulation.

The records of the office would show a larger amount of work this year but for the business depression which keenly affected employment agencies during the past four months. This condition is referred to in some measure of detail elsewhere in this report. There is also attached to the report a summary of the actual work of routine accomplished, such as the number of inspections made, the amount of fees refunded, the number of complaints investigated, the number of proceedings prosecuted in the criminal courts, the number of hearings or trials held in the office, etc.

Prosecutions in the criminal courts have become an important part of the duties of the office. During the past year there were forty such proceedings, in all of which evidence was collected and presented in the Magistrates' courts and later in the Courts of Special Sessions.

In addition to these prosecutions there were 581 hearings or trials held before the Commissioner and Deputy Commissioner. When these hearings result in the revocation of licenses, they are, under the License Law, reviewable in the Supreme Court. All of the Commissioner's decisions have so far been sustained. Some of the hearings are necessarily lengthy proceedings, as witnesses have to be subpoenaed and examined in every case.

The amount of money which employment agencies were ordered to refund to their clients is an important consideration. Although the individual sums involved are small, they represent the money of that part of the community which can least afford to lose it, namely, people out of employment.

All employment agencies are required to furnish bonds before licenses are issued to them, and in the event of any defaulting in the refund of fees, the persons affected can recover from the bonds. This provision of the law prevents many poor people from being swindled.

The law under which the office operates is a State law, applying to cities of the first class, but it really applies only to New York City because the volume of employment agency business of the rest of the State is insignificant in comparison. It is estimated that more than 500,000 persons in New York City and its suburbs do business with employment agencies of all kinds during the course of the year.

Regulation of Abuses and Protection for the Unwary.

Under the guise of getting work for the unemployed, assisting newly arrived immigrants and conducting training schools that lead to employment, many schemes bordering on dishonesty—a number of them actual swindling—exist in The City of New York, and most of them come into direct or indirect relation with the Employment Agency Law, which it is the duty of the Commissioner of Licenses to enforce. Frequently a person about to embark in a questionable enterprise obtains a license to conduct an employment agency, so that he can use the apparent sanction of the law to support his scheme.

Investigation by License Inspectors has prevented the consummation of many doubtful enterprises during the past year, but a few were carried out to such a point that many gullible persons have been induced to part with their money on various kinds of foolish pretenses. Some of the persons who engaged in the dishonest practices were licensed, some were not, and there were others to whom licenses had been denied because the Commissioner was not satisfied with their explanation of the manner in which they intended to conduct business.

One man conducted a school for immigrants where they were to be taught "American methods, language and customs," and at the end of a three weeks' course to get lucrative jobs. The immigrants gave him their money but did not get the jobs. He was convicted and sent to prison on evidence furnished by Inspectors of Licenses.

An employment agent who collects fees from Bohemians gave them for their money nothing but the addresses of charitable societies that attend to the welfare of immigrants. His license was revoked. Another agent took fees from a large number of Russians to get them employment at Whitehall, New York. When they reached their destination they found no work and were stranded. Some of them eventually made their way back to this City and a complaint was lodged against the agency, which resulted in the revocation of its license.

Other agents accepted orders from unauthorized persons to furnish laborers to works where no more labor was needed. They were made to return the amount the men spent for transportation. Still more were in the habit, during the winter, of taking fees from men to place them at snow shovelling "when the snow fell." Hundreds of men paid for this privilege, not knowing that the work could be obtained as readily without the aid of the agent as with it. Occasionally a man opens an office and advertises for cashiers, etc., to fill good positions. When the applicants reach him he asks for the deposit of a small sum of money "as security." If he succeeds in collecting money with fair rapidity he disappears and nothing more is heard of him. One of these offenders is now serving a term of three and a half years in prison, and refunds to his victims of nearly \$1,000 were ordered from the bonding company.

These and similar schemes are of frequent occurrence and are as frequently dealt with by this office in addition to the regular work of supervising and preventing various forms of extortion in the intelligence offices, shipping, labor, theatrical, stenographers, nurses and clerical agencies.

Sending Girls to Disorderly Houses.

Unceasing vigilance is necessary to prevent a certain class of employment agents from sending girls, especially immigrant girls, to disorderly houses, either as inmates or servants. Such practice was said to be common on the East Side of the City prior to the enactment of the Employment Agency Law, four years ago. But whatever the practice may have been, it no longer exists.

Yet a very serious condition of affairs was brought to the Commissioner's attention only a few months ago. License Inspectors discovered that disorderly houses in Pittsburgh were being supplied with girls through New York employment agencies. A special investigator was sent to Pittsburgh and two girls were found who had been held captive there. They admitted that they had been sent to Pittsburgh by a New York employment agency, but believed they were going to fill situations as servants. They could not speak the language of the country.

Both girls were brought to New York and identified the agency from which they had been sent. But they could not identify the person who sent them, and therefore no criminal prosecution could be instituted against the proprietor of the agency. The license was revoked, however, and this particular agent put out of the business. Recently this agent obtained employment with another intelligence office on the East Side and the Commissioner has notified the latter that his license will not be renewed for the license year just beginning.

It has been found necessary in the interest of the proper regulation of employment agencies that when a person is found unfit to conduct an office of his own he must not work for or attempt to manage the office of any other agent. Only by such stringent measures can the employment agencies, especially those on the East Side, be kept clean.

Only a few agents were found to have sent girls to disorderly houses in the City during the past twelve months and these girls were sent to work as servants. Nevertheless the licenses were revoked for this cause. Disorderly houses no longer attempt to get their servants through employment agencies.

Evils of Unlicensed Agencies.

Preventing persons without licenses from doing business as employment agents is more difficult than might be imagined. In the tenement districts, sections of the City like Brownsville in Brooklyn, unlicensed agencies frequently spring up. Many women who acquire an acquaintance with the relatives of immigrant girls find opportunities to place them in positions, and a little success in this work at the beginning soon develops their business.

The worst feature of the practise, as far as the public is concerned, is that unreliable and dishonest help is furnished. Girls who want to work as servants, and whose references would not procure them employment through licensed agents, find no difficulty in inducing unauthorized persons to place them. Many of the girls placed in families through this means turn out to be dishonest. The office of the Commissioner of Licenses cannot exercise any supervision over persons who do not hold licenses, but these persons can be arrested for violation of the law for doing business without licenses. Several such proceedings have been instituted by this office in the criminal courts during the past year and the worst offenders have been punished by imprisonment.

Evidence is most difficult to obtain, however. City Magistrates will not hold persons, especially women, for violation of the Employment Agency Law in this regard unless at least two instances, substantiated by witnesses, are proven in which fees have been taken for furnishing employment or procuring help. To procure such evidence as will be satisfactory to the Magistrate it has been found necessary to employ persons who speak foreign languages. Even then the agents who engage in this business are so wary that they will not accept fees at the time of the transaction, but wait until after the servant has worked in the position for a week or longer.

In other parts of the City unlicensed agents are not so numerous, but they do business on a larger scale. In January last one of them, who had swindled a large number of foreigners out of sums ranging from \$5 to \$50 each, on the promise of placing them in permanent positions on railroads, was convicted and sentenced to six months' imprisonment. Two others were sentenced to a month's imprisonment each for similar practices. Several women were convicted and fined in the Court of Special Sessions in New York and Kings Counties.

Trade Depression Damages Agency Business.

Few lines of business have been more generally damaged by the industrial depression following the financial panic of October last than employment agencies which come under the jurisdiction of this office. All classes of agencies, without exception, have suffered. Employers reduced the number of their employees and cut wages. Construction work in many parts of the country ceased altogether, and the business of the majority of the labor agents who send men out of the city came to a standstill. The change in conditions became marked about the end of November last.

Agencies which supply domestic servants have heretofore complained of the difficulty they experienced in obtaining servants. Usually they had more orders than they could fill. Now the offices of many are overrun with applicants for employment and conditions have been completely reversed. A lowering of the wage scale necessarily followed.

Commercial employment agencies report that during the first three months of 1908 the demand for office help, such as bookkeepers, clerks, etc., fell off 40 per cent., as compared with January, February and March, 1907. The demand for engineers, draughtsmen and superintendents during the first three months of 1908 almost ceased.

The only class of help, the demand for which kept up to former years, was that of salesmen. This is accounted for by the fact that merchants having stock on hand have been using every effort to get rid of it.

April has shown improvement in conditions, but no advance on the reduced wage schedule. Wages in all occupations where the help is furnished by employment agencies have been reduced from 10 to 30 per cent.

Decrease in Men's Wages.

Employment agencies report a heavy decrease in wages of men employed on railroad construction work, as compared with last spring. The New York Central Railroad, which paid its track laborers \$1.45 a day in April, 1907, paid them \$1.20 a day in April, 1908. The Erie Railroad, which paid the same class of workmen \$1.40 a day in April, 1907, pays \$1.25 a day at present.

The Labor Information Office for Italians, which furnishes a large number of Italian laborers to contractors throughout the country, under license from this office, reported as follows on April 25 of this year:

"The wages offered during the last quarter of 1907 and the first quarter of 1908 were from 15 to 25 per cent. less than the wages offered during the preceding period.

"The firm of McArthur Brothers & Co., which, during the year 1906 and the first three-quarters of 1907 paid wages of \$1.75 a day for ten hours' work in North Carolina, offered for the same work \$1.25 per day in October, 1907.

"The firm of Steele & Bave, who are building a road near Woodcliffe Lake, N. J., in the spring of 1907 paid for common labor 20 cents an hour. They are now paying 16½ cents an hour for the same work.

"The firm of Daly & Holbrook, who are building roads and railways for the New York, New Haven and Hartford Railroad, paid in the spring of 1907 \$1.75 a day. They are now paying \$1.50.

"The firm of Bellevue & Merritt, contractors, who are engaged on railroad work near Liberty, N. Y., paid \$1.60 a day in 1907. This year they are paying \$1.50.

"Many requests for men this year have been canceled two or three days after receipt, the employers reporting that they can obtain all the men they need at the place of work and therefore do not require the services of labor agencies."

Laborers on grading work, not employed on railroads, have had their wages reduced from \$1.50 to \$1.35 a day. Their living expenses—the amount which they pay weekly to the person in charge of the commissary for board and lodging—are the same as last year.

Employment agencies do not deal extensively in positions for skilled workmen, but they have had many applications this year from tradesmen who were unable to find employment at their own calling. Hundreds of these men were willing to accept employment at any kind of work, and naturally at greatly reduced wages. One large agency, which makes a specialty of furnishing male help, reports that in March, 1907, it received 726 orders for men and filled 65 per cent. of them. In March, 1908, the same agency received 480 orders and filled 63 per cent. The average reduction in wages, as shown by the books of this agency, was from 25 to 30 per cent. for all kinds of male help, tradesmen included.

Domestic Servants' Wages.

The wages paid domestic servants vary so much that no accurate comparison can be made to show the actual falling off. The books of 200 domestic servants' agencies indicate that the average earnings of cooks in private families have fallen off from \$35 to \$32.50 a month; houseworkers, who were paid from \$16 to \$25 a month in 1907, are receiving from \$15 to \$23 in 1908. The average wages paid to cooks obtained through agencies that supply the wealthier families have been reduced from \$50 to \$45 a month, and in the same families the wages paid butlers have fallen off from \$55 to \$50 a month.

Many other families in this class have reduced the wages of all the help employed by them since last December about 10 per cent., and the number of servants has been greatly decreased.

Stenographers' Salaries.

The principal agents who obtain positions for stenographers and typewriters (female) report a heavy reduction in wages as compared with last year. This, however, affects only the employees taken on since December last, as the agencies are not aware of any reductions having been made in the salaries of the older employees. Beginners are now paid \$6 and \$7 a week, as against \$8 and \$9 a week a year ago. But the most significant phase of the business depression is the reduction made in the number of employees. The same houses which reduced the salaries of the stenographers and typewriters have, since the first of January, reduced in number their clerical force of all grades from 30 to 50 per cent.

Distribution of Unskilled Labor.

About sixty-five labor agencies send men out of The City of New York to work as contract laborers. The number of men usually sent out by these agencies amounts to 50,000 annually. The present license year began with promise to exceed this number, but the depression which fell upon all branches of industry during the latter part of 1907 cut off for a time the shipment of men outside the city as laborers. During December, January and February no men were shipped.

Almost half the number of men sent out of New York by the labor agencies go to the South. Florida, for the past two years, has taken most of them because of the great railroad construction work going on there. Virginia and North Carolina come next in the list of Southern States which call upon New York labor agencies for unskilled labor. Of the Northern States New York is by far the best patron of the labor agencies. It takes more than one-fourth of the total number of men sent out. Pennsylvania, West Virginia and New Jersey come next in the order of importance. About 42 per cent. of the laborers sent out by agencies are Italian, 14 per cent. Slavs and Hungarians, and the remaining 44 per cent. being composed of a dozen other nationalities, including a constantly increasing number of Greeks.

Not more than 10 per cent. of the labor distributed by the agencies may be classed as skilled. Railroad construction calls for about 70 per cent. of all labor.

The demand for labor has been greater in the South than in the North, but it is more difficult to meet because the distance to points is greater and the cost of transportation higher. Italians as a rule are loath to go to any place where a colony of their own countrymen is not already in existence, and sometimes the labor agencies use means not justified by the law to induce them to go to points some distance from New York.

The laborers themselves pay the cost of their own transportation; that is, the amount is advanced by the contractors and then deducted from the wages of the men in weekly installments. But as an inducement to them to remain on the work the transportation deductions are refunded in similar installments, so that the laborer, if he remains on the work long enough, will get his transportation at the expense of the company. But few of the men remain long enough. The transportation to the Southern points from New York averages from \$12 to \$16 a man. The men judge the distance of the work from New York by the amount of the transportation, and this proves as infallible a guide as an accurate knowledge of United States geography. A large transportation fee deters the immigrant from accepting what might prove desirable work. This is why it is often difficult to get the foreign laborers to go to the Southern States.

Why Laborers Avoid Farm Work.

Often the question is asked by those who study labor conditions, Why do not more men go to work on farms? A large number of the immigrants who come to the United States have been farm laborers, yet comparatively few of them follow the same line of work.

During the last three years more than 150,000 immigrants who settled in this State were classed as farm laborers, but not more than 10 per cent. continued in that occupation.

The State of New York alone, for instance, can sustain an additional agricultural population of two million workers. While the cities are congested the rural districts actually crave population.

The number of employment agencies which makes a specialty of supplying farm laborers has not increased since the creation of this department. There are in this city twenty-four agencies which supply such help, but they also supply gardeners, female domestic servants, porters and drivers. The business of furnishing farm hands is so uncertain that no agent can exclusively devote his time to it.

The supply of farm hands has never equalled the demand. The chief reason that men do not care to work on farms is that the farmer, not only in New York but in other states, will not consent to employ them the year around, but only during the busy season. The farmer believes he saves money by this policy. He is willing to board the farm laborer for the balance of the year outside the busy season, but is unwilling to pay him wages except for the time he is engaged in field work. In this arrangement the laborer will not acquiesce. If he gets \$23 a month for eight months he figures that his year's salary is \$184, or \$3.50 a week.

Farmers in this State are not paying as high wages this year as they paid last spring. The wages then ranged from \$21 to \$25 a month; this year they offer from \$18 to \$23. Many of them do not provide good accommodation for their help, and some of them are not liberal in their treatment of men who work from sunrise to sundown. Conditions like these hold in the cities a great part of that immigrant population which should seek its living in the fields.

In New York State the Department of Agriculture is endeavoring to induce farmers to change this policy; requesting them to hire men and pay them for the year. It is pointed out that farmers should see an advantage in this, as they would have on their farms trained men who would naturally take an interest in their prosperity, at least a deeper interest than the passing laborer. The farmers are also being asked by the Department of Agriculture to increase their facilities for dairy products, not only that they may employ farm-help in winter as well as in summer, but that they may find the experiment profitable.

During the past year the labor agencies of New York placed in positions 15,715 farm laborers and gardeners. Of these 8,427 were sent to places within the State of New York and 7,288 outside of the State. Most of the men placed in New York State were Norwegians, Swedes and Danes. The remainder were Hungarians. Southern Europeans are not acceptable to farmers in the Northern States, but several colonies of Italian farmers have been successfully started in the South.

License Law and Padrones.

The padrone system of obtaining and using unskilled labor is not prolific of the abuses which it formerly generated. The system itself has been radically reformed through Federal legislation; in fact, the old-time padrone system no longer exists, but one can readily imagine the difference in conditions which govern the relations between the Italian labor agents and the immigrants with whom they deal as those conditions exist to-day under strict supervision and as they were up to three years ago, before the present License Law was made effective. The Italian immigrants then were practically at the mercy of the contract labor agencies (the successors of the padrones), and were the victims of misrepresentation (as regards conditions of employment) and extortion in the matter of fees.

There are about 100 Italian labor agents in New York City. Their business is to furnish laborers to contractors. These agents are not themselves contractors, but a great many of them hold what is known as the commissary privilege from the contractors; that is, they are allowed to board and lodge the workmen at the works and get the amount of the board out of the men's wages by arrangement with the employers. When they do not possess the commissary privileges they charge fees to the men for getting the employment and also charge fees to the contractors for furnishing the men.

Their business is profitable. There is no danger of outside competition, because the Italian workmen will not have any dealings with men who do not come from their own towns or provinces in Italy. The labor agent, therefore, imposes his own terms, and his fellow townsmen or fellow villagers trust him unquestionably. Heretofore the chief abuses under the system consisted in the labor agent's taking on plenty of men, charging them fees, boarding them at their own expense for a few days and then getting them discharged from the work to make room for a fresh batch of victims. Perhaps in the course of a few days more the original batch of men were again recruited, but the process of collecting fees and charging extortionate prices at the commissary was repeated.

Italian contract labor agents are now wholly under the Commissioner's supervision. Bringing about this condition of affairs was difficult. Licenses of several agents were revoked within the past license year for illegal practices, and these agents were prevented, by means of criminal court proceedings, from continuing in the business, as they had attempted to do.

The word has spread among the thousands of Italian workmen who are handled by the labor agencies that the Commissioner of Licenses will investigate and rectify abuses practised upon them, provided these abuses come within the scope of the employment agency law (as they generally do). The result is a daily procession of Italian immigrants to this office. Their complaints are investigated by an inspector who has had several years' experience in this kind of work, and who is conversant with all the dialects which make up the language of the Italian people.

Greeks Not Tractable.

About 40,000 Greek immigrants enter this port every year. Until twelve months ago none of them found their way into employment agencies, but the recent trade depression forced many of them to seek the aid of the Italian padrones in getting work. Now hundreds of them have become customers of the labor agencies. They are doing practically the same kind of work as the Italians (railroad construction), but they are not likely to prove formidable competitors because they are not so profitable from the employers' point of view. They are less tractable than the Italians; not so easily imposed upon, and endeavor to get the highest wages going in the labor market.

The labor agents take Greeks only when Italian labor is scarce. The Greeks rarely go a second time to the same agent, while Italians return again and again, unless unusual extortion is practised upon them.

Peonage on the Wane.

Complaints of the peonage system which existed in the South have become few; indeed, for the past few months they have ceased. The Commissioner of Licenses has done what lay in his power to stamp out the system as far as labor agencies in New York have participated in its perpetuation. While he had no authority over the principals, he exercised what limited authority the law gave him to prevent labor agencies sending out men under conditions which might lead them to fall into debt with the Southern contractors, thus permitting them to be kept in bondage until the debt was discharged, a condition which usually held the workmen in the power of the contractor or employer until they were incapacitated for further work.

The Commissioner co-operated with agents of the Federal Government who were engaged in the work of suppressing peonage and furnished them with data relative to the shipments of men out of New York. The books and records of this office were placed at the disposal of employees of the Department of Justice to enable them to trace the persons required as witnesses. Several indictments were found and convictions obtained in the Southern States, and these had the effect of disintegrating the system.

This office also co-operated with Federal immigration officers in the prosecution of unlicensed labor agents who swindled foreigners by taking fees from them to get employment and then shipped them out of the State to places where no employment existed. In these cases the men were stranded, and often had to be taken care of by the Federal authorities. In such instances, where the crime appeared to be one rather in violation of the immigration laws than against the Employment Agency Law, the evidence was turned over to the Federal court, where the prosecutions took place. During the past month two Greeks were thus convicted on a charge of swindling their fellow countrymen, and the evidence upon which the convictions were obtained was furnished mainly by this office.

All labor agents have been warned that before men are sent out of the city to work as contract laborers they must be furnished with statements, written in languages which they can understand, giving full details of the nature of the work, wages, destination, transportation expenses, etc. When agents have failed to do this their licenses have been revoked and the License Inspectors have prevented them from continuing in business. Several attempts have been made by these labor agents to continue their business clandestinely after their licenses were taken away, but their efforts resulted in their being arraigned in the criminal courts and in fines or imprisonment being inflicted.

The attention of the State authorities in some of the Southern States has been called by this office to peonage complaints against certain Southern contractors. All these efforts and precautions have had an important part in minimizing the evils of the peonage system.

References of Servants.

No more important branch of the work of regulating employment agencies is found than that of compelling them to obey the law in regard to references of persons sent to work in private families or to employment in a fiduciary capacity. The larger agencies have always been careful and systematic in this respect because their business success demanded it, but the smaller agencies were, until the present law became operative, utterly unreliable on this point. Some of them did not scruple to furnish fictitious references for employees who had none.

Even under the present law many agencies paid little or no attention to the question of references until they were compelled to do so. The law says that it shall be the duty of the agent to communicate with at least one of the persons mentioned as references by the applicant for employment, and to record the result of such communication upon the agency's books. But it was soon discovered that the "results" recorded by some of the agencies were purely imaginary. It was found necessary to instruct the License Inspectors to investigate the honesty of the agencies by going to the persons whose names were recorded as references and inquiring whether or not any attempt at investigation had been made. The number of negative replies received was surprisingly large.

Some strict discipline had to be enforced before the smaller class of agencies were made to understand that this part of the law relating to references was required to be observed. At least a dozen licenses have been revoked because of failure to investigate references.

But the agencies are not compelled to investigate references in the cases of all servants furnished by them. If the employer desires to waive the question of references altogether, the agency may accept such waiver in lieu of investigation, but the waiver must be signed by the employer and kept on file in the office of the agency. If the servant is an immigrant and not possessed of references, the fact must be stated to the

prospective employer, and the name of the steamship (with date of entry into port) on which the girl arrived here must be recorded on the books.

In connection with the standard of servants furnished it is worthy of note that agents report that servants are better cared for in private families than in the big hotels, where many women are employed. This may appear contrary to popular opinion. In some of the largest and most prosperous hotels in the city servants are relegated to sleeping quarters resembling the steerage compartments of the ocean steamships; in fact in some instances the servants' sleeping quarters are modelled on the same plan; that is, the beds are placed in tiers, one above the other, as are the berths in the steamships. Our information is that in one of the largest hotels of this city fifty girls, many of them under twenty years of age, are crowded into one open room of the dormitory filled with shelf-like bunks, without the least privacy.

This condition of affairs gives rise to complaints which reflect upon the employment agencies, who are really not to blame; the fault resting with the hotel management, who sacrifice the comfort of the employees in a desire to economize space.

Punishment for Shipping Agents.

Among the shipping agents—those who send cattlemen on board ships to work for free passage across the Atlantic—one very serious abuse existed, which has been satisfactorily eliminated.

The custom of these agents was to send the men to Boston, and other ports, to get positions on cattle steamships, for which service they charged a fee. The Commissioner of Licenses was able to regulate such shipments in New York because the Employment Agency Law was effectively operative here, but in foreign ports conditions were different. New York employment agencies took advantage of this and sent ten times more men to Boston than were needed. The result was that hundreds of men were stranded there, and few of them were able to find their way back to make complaints against those who had swindled them. If an agent received an order from Boston to send "several cattlemen," he sent as many men as he could collect, and who were able to pay him a fee.

A representative of this office thoroughly investigated conditions in Boston, and induced shippers there to send orders only to the most reliable agents in New York, and then to specify exactly the number of men required. By compelling the agents here to exercise discrimination and to send only the sort of men who would be acceptable to the shippers, the stranding of men in Boston and other places was stopped. By this means, and the revocation of the licenses of the worst offenders, the abuses which had existed for years were ended. Men on their way to places in Hungary, Germany and Russia are no longer given bogus railroad tickets, to be stranded in Liverpool, and other foreign cities, since the unprincipled shipping agents have been driven out of the business. Now the licensed agents supply genuine railroad tickets to these cattle attendants, who are sure of getting to their European homes beyond the seaports to which the cattle ships carry them.

Suppression of False Advertisements.

A condition of affairs which gives annoyance to persons having dealings with employment agencies is caused by misleading advertising. Many agencies, especially those who obtain positions for stenographers, insert advertisements in newspapers, offering attractive situations, and when the applicants call at the place indicated they find that instead of a position awaiting them they are invited to pay a fee to have their names enrolled upon the agency's books. The Commissioner took vigorous methods some time ago to put an end to this scheme and found that he was confronted with another and more difficult one to deal with.

Some ingenious persons hit upon the plan of inserting alluring advertisements in the newspapers offering good positions to stenographers out of work, and receiving replies at a post office lockbox. The replies, especially recently, were received by the thousand, and the person who received them sold the letters to the employment agents. In this way the agencies got into communication with the applicants for work, and succeeding in enrolling a large number of them upon their books. This office has undertaken to prevent agencies taking fees from persons for positions unless they have bona fide orders for such positions.

Other agents advertise from their residences and then send the applicants to the agencies. Others again get outsiders, over whom this office has no jurisdiction, to advertise for them. Still other agencies omit from their advertisements the fact that they are employment agencies and delude applicants for help or work into belief that they are dealing directly with the principals.

In general this false advertising has been suppressed. It occurs now in but few instances. Newspaper advertisements are read in this office every day, and when an agency is found to be more than an occasional offender in this respect the license is revoked. There is no objection to employment agencies advertising as much as they wish, but they are compelled to advertise as agencies, so that the public shall not be deceived.

Theatrical Agencies.

More theatrical agencies are licensed this year than last year, and the number of complaints against them is less. The principal theatrical agencies are co-operating with this office in the stricter enforcement of the law, and their co-operation has been found valuable. A result of it is that the abuses existing because of the unlicensed "club agents" have been reduced to a minimum, these "club agents" having been forced either to take out licenses or to do their business through regular licensed agents—a condition which redounds to the advantage, not only of the performers engaged, but to the persons to whom they are furnished.

It is now a fact that a young woman seeking an engagement on the stage can transact business with any licensed theatrical agent in the City with the full assurance that her rights are protected and that the employment to which she may be sent is thoroughly reputable.

Estimated cost, \$4,897; assessed valuation of property affected, \$647,500.

The following resolution was introduced by Alderman McDonald:

Whereas, A petition for a local improvement described below has been received by the President of the Borough of Manhattan; and

Whereas, He has appointed a time for a meeting of this Local Board not more than fifteen days after the receipt by him of the said petition, at which meeting the said petition would be submitted by him to the said Local Board, and he has caused a notice to be published in the CITY RECORD that said petition has been presented to him and is on file in his office for inspection, and of the time when and the place where there would be a meeting of this Local Board, at which the said petition would be submitted by him to the said Board, which time was not less than ten days after the publication of this notice; and

Whereas, The said petition was duly submitted thereafter to the said Local Board, which did duly consider the same and give a full hearing thereon; now therefore it is

Resolved, by the Local Board of the Washington Heights District, pursuant to titles 2 and 3 of chapter 10 of the Greater New York Charter, That the said petition be and the same hereby is granted; and it is hereby

Resolved, That this Board does hereby initiate proceedings for the said local improvement, to wit:

To pave with asphalt block pavement on concrete foundation, curb and recurb West One Hundred and Seventy-second street, from Amsterdam to Audubon avenue; and it is hereby further

Resolved, That a copy of this resolution be transmitted forthwith to the Board of Estimate and Apportionment for its approval.

The Acting President presented for the Board's consideration the matter of alteration of the map or plan of The City of New York by including within the lines of West One Hundred and Fifty-seventh street a triangular plot of ground at the intersection of Broadway, Audubon place and West One Hundred and Fifty-seventh street.

Mr. J. N. Butterly appeared in opposition to taking the property for street purposes, and requested in the event of that being done that the Board of Estimate and Apportionment direct that one-half the cost be borne by the City.

The Engineer of Street Openings reported verbally that the property in question was already laid out as part of the street system upon the City map. The Board thereupon directed the Secretary to insert the proper notice in the CITY RECORD and to present the matter of acquiring title for the consideration of the Board at the meeting to be held on May 12, 1908.

period be applied by the City to the cost of completing any of the work required under the contract but unfinished at the expiration of the contract period.

All the material of the buildings, sheds, walks, structures and cellars of whatsoever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the sidewalk and curb in front of said buildings extending within the described area and down to the level of the cellar bottom, shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than 2 feet below the curb opposite that point; also the foundation walls of all classes shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street, and the opening of the main sewer in street shall be properly closed, in compliance with the directions of the Bureau of Sewers, Borough of The Bronx, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed.

The permit for all openings in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances or any part thereof within sixty days from the day of the sale will work forfeiture of ownership of such buildings, appurtenances or portion as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and The City of New York will, without notice to the purchaser, cause the same to be removed and the costs and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner and must be completed within sixty days from the day of sale, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furrings, plaster, chimneys, projecting brick, etc., on the faces of such party walls, are to be taken down and removed. The walls shall be made permanently self-supporting, beam-holes, etc., bricked up, and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs of adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the contractor.

The Comptroller of The City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids. And it is further

Resolved, That, while the said sale is held under the supervision of the Commissioners of the Sinking Fund, the Comptroller is authorized to cause the sale to be advertised and to direct the sale thereof as financial officer of the City.

PROPOSALS FOR CONSTRUCTION OF RAPID TRANSIT LINES IN BROOKLYN.

INVITATION TO CONTRACTORS.

(FLATBUSH AVENUE EXTENSION, NASSAU STREET TO WILLOUGHBY STREET, MANHATTAN BRIDGE, NO. 1.)

THE City of New York, acting by the Public Service Commission for the First District, by this advertisement invites proposals to construct that part of the proposed Fourth Avenue Subway in the Borough of Brooklyn which begins at the northern side of Nassau Street and runs thence under said Flatbush Avenue Extension to a point about 20 feet north of the center line of Willoughby Street.

The general plan of construction calls for a four-track subsurface Railroad, but the Contractor will not be required under the contract proposed to provide or lay tracks, ties or ballast. A station between Tillary Street and Johnson Street will be constructed; and suitable cross-overs, turn-outs and sidings are also to be provided, all as indicated on the detailed plans of construction. The tunnels are to have a height of not less than thirteen (13) feet in the clear, and a maximum width of fifteen (15) feet for each track, except at curves, etc., where the width may be increased. The roof of the tunnels is generally to be as near the surface of the street as street conditions and grades will permit. The roof and sides of the tunnels will be of iron or steel and masonry. Entrances to the station are intended to be placed within private property, rights in which will be acquired for the purpose, or on the streets, or on the sidewalks adjacent to private property, as indicated on the plans.

The manner of construction shall be by open excavation unless otherwise provided in the contract or directed by the Commission; such portions of the street, however, where the work may not be completed and the backfill is not placed at the expiration of fifteen months from the time of executing the contract, must be substantially boarded over to permit freedom of traffic, if so ordered by the Commission.

In the detailed plans for construction, provisions for pipe galleries along the line of the tunnel are included. Bids for the construction of the railroad must be accompanied by a separate bid for the construction of the pipe galleries above referred to, as it is essential for the City to separate the cost of the railroad from the cost of the pipe galleries. The Commission reserves the right to accept a bid for construction of the railroad and at the same time to reject the accompanying bid for pipe galleries.

Bidders must visit the location of the railroad and station to be built under this contract and note the present conditions along the line of the proposed railroad. The buildings standing within the line of the said Flatbush Avenue Extension are being, or are to be, demolished and the materials removed by other contractors.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated in the printed form of contract now on file in the office of the Commission, No. 154 Nassau Street, in the Borough of Manhattan, and in the detailed drawings therein referred to, at which office copies of the contract and of the form of bond and contractor's proposal may be had on application. The contract drawings may be inspected at the same office. The printed form of contract and the detailed drawings are to be deemed a part of this invitation.

Partial payments to the contractor will be made monthly as the work proceeds, as provided in the form of contract.

The work of construction (including pipe galleries) is to be completed as soon as practicable, and within twenty-four months from the date of delivery of the contract.

Sealed bids or proposals will be received at the said office of the Commission, at No. 154 Nassau Street, in the Borough of Manhattan, The City of New York, until

FRIDAY, THE 8TH DAY OF MAY, 1908, at 12 o'clock noon, at which time or at a later date to be fixed by the Commission the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

The proposal must contain a statement, in the form prescribed, of the quantities and unit values upon which the bid is based. Such statement shall be merely for the information of the Commission to enable it to determine upon what basis the proposal is made and for no other purpose whatsoever, and the Commission shall not be bound in any way to make payments or value work done, upon the basis of such quantities and unit values contained in such statement.

No proposal will be allowed to be withdrawn for any reason whatever after it shall have been deposited with the Commission.

The award of the contract or contracts (if awarded) will be made by the Commission within twenty days after the opening of the proposals. The bidder whose proposal shall be accepted shall in person or by duly authorized representative attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment; and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the contractor will be required to furnish security to the City by giving a bond in the penalty of one hundred and fifty thousand dollars. At the option of the successful bidder cash or approved securities may be deposited instead of giving a bond. If securities are deposited in place of a bond under this contract, they must be of the character of securities in which Savings Banks may invest their funds and must be approved by the Commission. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten per cent. of each amount certified from time to time to be due to the contractor will be retained until the work is fully completed.

Bidders whose proposals are otherwise satisfactory to the Commission may, in case the sureties or securities named by them are not approved by the Commission, substitute in their proposals the names of new sureties or a different schedule of securities approved by the Commission; but such substitution must be made within five days after notice of disapproval by the Commission, unless this period is extended by the Commission.

In case of failure or neglect to execute and deliver the contract or to make the required deposit or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract.

In the latter case the Commission will give notice thereof to the defaulting bidder. And the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interest of the City to contract with, or may by new advertisement invite further proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other contractor over the amount of the bid of such defaulting bidder.

Every proposal must, when submitted, be inclosed in a sealed envelope endorsed "PROPOSAL FOR CONSTRUCTING RAPID TRANSIT RAILROAD—FLATBUSH AVENUE EXTENSION, NASSAU STREET TO WILLOUGHBY STREET," and must be delivered to the Commission or to its Secretary; and in the presence of the person offering the proposal it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a certified check drawn upon a National or State Bank or Trust Company within The City of New York and satisfactory to the Commission, payable to the order of the Comptroller of The City of New York, for the sum of twelve thousand five hundred dollars.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the bond with sureties, or to make deposit in cash or securities, then this invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damages by it sustained by reason of such failure; and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions as to security are complied with.

INVITATION TO CONTRACTORS.

WILLOUGHBY STREET TO ASHLAND PLACE.

THE City of New York, acting by the Public Service Commission for the First District, by this advertisement, invites proposals to construct that part of the proposed Fourth Avenue Subway in the Borough of Brooklyn which begins at a point about 20 feet north of the center line of Willoughby Street and runs through Flatbush Avenue Extension, private property and Fulton Street to and under Ashland Place to a point about 40 feet south of the south line of Fulton Street.

A station at DeKalb Avenue will be constructed; and suitable cross-overs, turnouts and sidings are also to be provided, all as indicated

on the detailed plans of construction. Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

The proposal must contain a statement, in the form prescribed, of the quantities and unit values upon which the bid is based. Such statement shall be merely for the information of the Commission to enable it to determine upon what basis the proposal is made and for no other purpose whatsoever, and the Commission shall not be bound in any way to make payments or value work done, upon the basis of such quantities and unit values contained in such statement.

No proposal will be allowed to be withdrawn for any reason whatever after it shall have been deposited with the Commission.

The award of the contract or contracts (if awarded) will be made by the Commission within twenty days after the opening of the proposals. The bidder whose proposal shall be accepted shall in person or by duly authorized representative attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment; and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the contractor will be required to furnish security to the City by giving a bond in the penalty of two hundred thousand dollars. At the op-

tion of the successful bidder cash or approved securities may be deposited instead of giving a bond. If securities are deposited in place of a bond under this contract, they must be of the character of securities in which Savings Banks may invest their funds and must be approved by the Commission. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten per cent. of each amount certified from time to time to be due to the contractor will be retained until the work is fully completed.

Bidders whose proposals are otherwise satisfactory to the Commission may, in case the sureties or securities named by them are not approved by the Commission, substitute in their proposals the names of new sureties or a different schedule of securities approved by the Commission; but such substitution must be made within five days after notice of disapproval by the Commission, unless this period is extended by the Commission.

In case of failure or neglect to execute and deliver the contract or to make the required deposit or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case the Commission will give notice thereof to the defaulting bidder. And the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the City to contract with, or may by new advertisement invite further proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other contractor over the amount of the bid of such defaulting bidder.

Every proposal must, when submitted, be enclosed in a sealed envelope endorsed "PROPOSAL FOR CONSTRUCTING RAPID TRANSIT RAILROAD—FOURTH AVENUE AND ASHLAND PLACE FROM FULTON STREET TO SACKETT STREET" and must be delivered to the Commission or to its Secretary; and in the presence of the person offering the proposal it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a certified check drawn upon a National or State Bank or Trust Company within The City of New York, and satisfactory to the Commission, payable to the order of the Comptroller of The City of New York, for the sum of fifteen thousand dollars.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, or make a deposit in cash or securities, then this invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damages by it sustained by reason of such failure; and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions as to security are complied with.

PROPOSALS FOR CONSTRUCTION OF RAPID TRANSIT LINES IN BROOKLYN.

INVITATION TO CONTRACTORS.

(FOURTH AVENUE, SACKETT STREET TO TENTH STREET.)

THE City of New York, acting by the Public Service Commission for the First District, by this advertisement invites proposals to construct that part of the proposed Fourth Avenue Subway in the Borough of Brooklyn between points on Fourth Avenue 60 feet north of the north line of Sackett Street and 10 feet north of the north line of Tenth Street.

The general plan of construction calls for a four-track subsurface Railroad, but the Contractor will not be required under the contract proposed to provide or lay tracks, ties or ballast. Two stations, one between Union Street and President Street, and one between Eighth Street and Ninth Street, will be constructed; and suitable cross-overs, turnouts and sidings are also to be provided, all as indicated on the detailed plans of construction. The tunnels are to have a height of not less than thirteen (13) feet in the clear, and a maximum width of fifteen (15) feet for each track, except at curves, etc., where the width may be increased. The roof of the tunnels is generally to be as near the surface of the street as street conditions and grades will permit. The roof and sides of the tunnels will be of iron or steel and masonry. Entrances to the stations are intended to be placed within private property, rights in which will be acquired for the purpose, or on the streets, or on the sidewalks adjacent to private property, as indicated on the plans.

The manner of construction shall be by excavation under cover, unless otherwise provided in the contract or directed by the Commission.

In the detailed plans for construction, provisions for pipe galleries along the line of the tunnel are included. Bids for the construction of the railroad must be accompanied by a separate bid for the construction of the pipe galleries above referred to, as it is essential for the City to separate the cost of the railroad from the cost of the pipe galleries. The Commission reserves the right to accept a bid for construction of the railroad and at the same time to reject the accompanying bid for pipe galleries.

Bidders must visit the location of the railroad and stations to be built under this contract and note the present conditions along the line of the proposed railroad.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated in the printed form of contract now on file in the office of the Commission, No. 154 Nassau Street, in the Borough of Manhattan, and in the detailed drawings therein referred to, at which office copies of the contract and of the form of bond and contractor's proposal may be had on application. The contract drawings may be inspected at the same office. The printed form of contract and the detailed drawings are to be deemed a part of this invitation.

Partial payments to the contractor will be made monthly as the work proceeds, as provided in the form of contract.

The work of construction (including pipe galleries) is to be completed as soon as practicable, and within twenty-four months from the date of delivery of the contract.

Sealed bids or proposals will be received at the said office of the Commission, at No. 154 Nassau Street, in the Borough of Manhattan, The City of New York, until

FRIDAY, THE 8TH DAY OF MAY, 1908,

at 12 o'clock noon, at which time or at a later date to be fixed by the Commission the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

The proposal must contain a statement, in the form prescribed, of the quantities and unit values upon which the bid is based. Such statement shall be merely for the information of the Commission to enable it to determine upon what basis the proposal is made and for no other purpose whatsoever, and the Commission shall not be bound in any way to make payments or value work done, upon the basis of such quantities and unit values contained in such statement.

No proposal will be allowed to be withdrawn for any reason whatever after it shall have been deposited with the Commission.

The award of the contract or contracts (if awarded) will be made by the Commission within twenty days after the opening of the proposals. The bidder whose proposal shall be accepted shall in person or by duly authorized representative attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment; and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the contractor will be required to furnish security to the City by giving a bond in the penalty of one hundred and fifty thousand dollars. At the option of the successful bidder cash or approved securities may be deposited instead of giving a bond. If securities are deposited in place of a bond under this contract, they must be of the character of securities in which Savings Banks may invest their funds and must be approved by the Commission. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten per cent. of each amount certified from time to time to be due to the contractor will be retained until the work is fully completed.

In case of failure or neglect to execute and deliver the contract or to make the required deposit or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case the Commission will give notice thereof to the defaulting bidder. And the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interest of the City to contract with, or may by new advertisement invite further proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other contractor over the amount of the bid of such defaulting bidder.

Every proposal must, when submitted, be enclosed in a sealed envelope endorsed "PROPOSAL FOR CONSTRUCTING RAPID TRANSIT RAILROAD—(FOURTH AVENUE, SACKETT STREET TO TENTH STREET)" and must be delivered to the Commission or to its Secretary; and in the presence of the person offering the proposal it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a certified check drawn upon a National or State Bank or Trust Company within The City of New York, and satisfactory to the Commission, payable to the order of the Comptroller of The City of New York, for the sum of twelve thousand five hundred dollars.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, or make a deposit in cash or securities, then this invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damages by it sustained by reason of such failure; and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
