LETTER FROM THE DIRECTOR

Dear Fellow New Yorkers,

Despite the significant challenges faced over this fiscal year, the City's commitment to building back a stronger and more equitable food system has never been stronger. We believe access to nutritious food in a dignified manner is a fundamental human right. It is our responsibility as a city to ensure that all residents have the ability and opportunity to access healthy, affordable, and culturally appropriate food.

This past year the City has made significant improvements to its' emergency food network. I am proud to say that for the first-time the City has begun offering fresh produce and increased the variety of culturally appropriate food available through the Pandemic-Food Reserve Emergency Distribution (P-FRED) program. My Office also released our first ever Citywide Goals & Strategy for the Implementation of the Good Food Purchasing initiative, establishing a transparent, clear foundation for tracking the City's food purchasing: who supplies our food, what we serve and to whom, and how we are performing against (5) key values each tied to clear data and metrics: nutrition, support for local economies, a valued food production and delivery workforce, environmental sustainability, and animal welfare.

However, we know the pandemic exacerbated the deep inequities that exist in our food system. That is why in February of this year, my Office released Food Forward NYC, the City's first ever ten-year food policy plan. The implicit charge of Food Forward NYC was to reset food policy in New York City and provide a systems approach that examines all dimensions of issues such as hunger and sustainability. Food Forward NYC provides a comprehensive policy framework to reach a more equitable, sustainable, and healthy food system by 2031 and was especially timely given the impact of the COVID-19 crisis on NYC's food systems.

The Food Metrics Report provides a snapshot of the production, processing, distribution, and consumption of food provided by City agencies to communities across all five boroughs and spotlights the progress the City is making towards building a resilient and equitable food system. As a result of the ongoing impacts of COVID-19, City agencies continue to adapt and identify new and innovative ways to serve New Yorkers. Like last year, in-person programming and meal provision continued to be on pause for many agencies throughout Fiscal Year 2021 (FY 2021). As such, this year's data is not comparable to data prior to 2020. Finally, it should be noted that the Food Metrics Report captures outputs rather than outcomes.

As we as a city begin to shift from emergency towards recovery, we know we must use this moment to truly re-imagine our food system. Together, we are building back an even stronger and more resilient food system.

I would like to thank Mayor Bill de Blasio, our Deputy Mayors, and the many Commissioners and agency staff that support the policies and services that advance our food system to better promote the health of all New Yorkers and our planet.

Sincerely,

A handwritten signature in black ink that reads "Kate MacKenzie".

Kate MacKenzie, M.S., R.D.
Executive Director
The Mayor's Office of Food Policy

FOOD RESPONSE DURING THE COVID-19 PANDEMIC

With the onset of “New York State on Pause” Executive Order on March 22, 2020, all non-essential businesses statewide including restaurants were ordered to close. The Mayor made it clear that no New Yorker should experience hunger as a result of the pandemic. As such, an interagency “Food Czar team,” was assembled to address these challenges head-on. The team involved staff from the Mayor’s Office of Food Policy, Department of Sanitation, Emergency Management, New York City Economic Development Corporation, Department of Transportation, Taxi and Limousine Commission, and many others. This team focused on two distinct problems: 1) the need to combat food insecurity caused by the pandemic, and 2) the need to secure and protect the City’s food supply chain.

On April 15, 2020, Mayor de Blasio and the Food Czar team released the Feeding New York report, outlining the programs put in place to meet the needs of food insecure New Yorkers. Major tenets of the plan included a \$25M investment in the City’s pantry system, the establishment of a \$50 million emergency food reserve, and the creation of GetFood NYC. GetFood NYC included the Department of Education (DOE) Grab & Go Meal program, the Emergency Food Home-Delivered Meal (EFD) program, and increased support and coordination for pantries and other emergency food distribution efforts.

Department of Education Grab & Go Meals

When New York City schools shut down in March 2020, students no longer had consistent access to high quality, nutritious breakfast and lunch every weekday. The Department of Education quickly pivoted to offerings meals to any community member to pick-up at schools and take home. These free Grab & Go meals were available at over 500 school sites all over the city, serving any New Yorker, including adults, no questions asked.

With the return of full-time learning in school on September 13, 2021, the DOE returned to serving universal breakfast and lunch at all school and the Grab & Go community model for adults concluded. Between March 2020 and September 2021, over 130 million meals were distributed to children and adults across New York City.

GetFood Emergency Home Food Delivery Program

For New Yorkers who could not go out, had no one to go out for them, and could not afford private delivery options, the City created the GetFood Emergency Food Home Delivery (EFD) program. This program delivered food directly to New Yorkers in their homes. People who needed it could enroll through 311, an online portal, or an Authorized Enroller Dashboard, which allowed community-based organizations to order meals for clients they already had trusted relationships, as well as manage recurring orders and update individuals’ account information as needed. In addition to a standard meal, vegetarian, Kosher, and Halal options were available. Between March 2020 and October 2021, over 129 million meals were delivered to the homes of New Yorkers.

Coordinating Food and Funds to Food Pantries

New York City's network of soup kitchens and food pantries not only faced extraordinary increases in demand and staff shortages resulting from COVID-19, but also had to quickly implement new operating standards, including social distancing, utilizing PPE, and transitioning to pre-boxed offerings. To support these efforts, the Food Czar team distributed \$25 million in direct funding assistance. Funding could be used for food, operational expenses related to the COVID-19 response; supplies, including PPE and food packaging; staffing; transportation for meal delivery; costs to support pop-up emergency feeding distribution; equipment for expanded operations; technology costs related to COVID-19; and outreach related to benefits enrollment.

Pandemic Emergency Food Reserve

At the start of the pandemic, the City closely monitored the food supply chain. As a precautionary measure, the Mayor called for the creation of a \$50 million emergency food stockpile or "food reserve" to provide immediate access to sufficient, nutritious food supply to support emergency feeding operations resulting from the COVID-19 response in the event of supply chain disruptions, extreme increases in demand, or another emergency event.

Fortunately, real supply chain disruptions never materialized, however, food insecurity rates continued to grow. In August 2020, the Administration made the decision to transition this stockpile into a new program, the Pandemic Food Reserve Emergency Distribution Program, also known as P-FRED. This program provides direct food resources to hundreds of pantries and community organizations across the city that continue to experience high demand as a result of COVID-19.

The most distinct feature of this program is that for the first time, the City began offering fresh, high-quality produce. Other key elements include recipient organizations selecting the produce that they want, when they want it, and serving organizations who are both long-standing food pantries, as well as new operations stood up as a result of the pandemic.

Between the program's launch in September 2020 and November 2021, nearly 30 million pounds of fresh fruits and vegetables and over 10 million pounds of shelf-stable food were distributed to over 400 emergency food providers across the city.

GrowNYC Emergency Food Access Report

During the COVID-19 pandemic, GrowNYC was funded by DSNY to perform essential food access services to protect the health and safety of all New Yorkers. GrowNYC was provided with the resources to operate all their food access programs (Greenmarket, Farmstand, Fresh Food Box) with COVID-19 safety measures such as line control, sanitizing stations, and greater access to free local produce. They also opened more Farmstands and established an Emergency Fresh Food Box program that serviced low income New Yorkers who were unemployed or struggling with the pandemic in high need neighborhoods.

The GrowNYC Emergency Food Access Program achieved the following in FY 2021: Emergency Food Box, 7/1/2020 – 06/30/2021

- 25 Active Sites Operating once/week
- 206,040 Total Boxes Distributed as of 06/30/2021
- 1,546,740 Total Meals Distributed as of 06/30/2021

Greenmarket Program, 7/1/2020 – 06/30/2021

- 41 Greenmarket Sites Operating with COVID-19 safety measures in place
- 2,259 Greenmarkets Open Days
- 70,319 Greenmarket SNAP Transactions

Farmstand Program, 7/1/2020 – 06/30/2021

- 17 Farmstands Operating
- 298 Farmstand Open Days
- 202,071 Pounds Farmstand Produce Distributed
- 252 Donations to Emergency Feeding Programs
- 36,690 Pounds Donated to Emergency Feeding Programs
- 2,011 Farmstand SNAP Transactions

Fresh Food Box Program, 7/1/2020 – 06/30/2021

- 16 Fresh Food Box Distribution Sites Operating
- 317 Fresh Food Box Distributions Days
- 32,517 Fresh Food Boxes Distributed
- 1,379 Fresh Food Box SNAP Transactions

Governors Island Farm Program, 7/1/2020 – 06/30/2021

- 13,572 pounds of GI Produce Distributed (Free)

Transitioning to Recovery

As the City continued to recover and re-open, the administration focused on transitioning from emergency to recovery programming. While the GetFood programs have had a tremendous impact, they were designed to be temporary, emergency relief programs, and were authorized as an emergency rule. At the same time, we know the dramatic rise in food insecurity will not go away any time soon and we are committed to continuing to meet this need and ensuring individuals have access to continued food assistance.

Furthermore, the City has allocated additional \$27 million to P-FRED through Fiscal Year 2022. MOFP, in partnership with the Human Resources Administration, is continuing to improve and refine P-FRED, including increasing the variety of produce offered and ensuring even more culturally appropriate foods are available.

Baseline funding for the City's Emergency Food Assistance Program (EFAP) increased by \$3.6M, now bringing the program's annual budget to \$23.8M. The City also invested an additional \$900,000 in equipment grants to build capacity in our City's pantries and \$600,000 to fund technology upgrades for the City's emergency food network, resulting in better data and visibility into the types of food moving across the city.

All these efforts are helping to ensure that we have a healthier, more resilient emergency food network going forward.

PART 1. ADDRESSING FOOD INSECURITY IN NEW YORK CITY

Simply put, food insecurity is the lack of access, at times, to enough nutritionally adequate food for an active, healthy life for all members of a household. Families experiencing food insecurity may worry that food will run out before they have enough money to buy more, eat less than they should to stretch their food dollars, or be unable to afford to eat nutritious, balanced meals. New York City, like many other local, state, and national entities, relies on retrospective data provided by Feeding America to estimate the annual number of food insecure individuals at the county-level.

Indicator: Food Insecurity

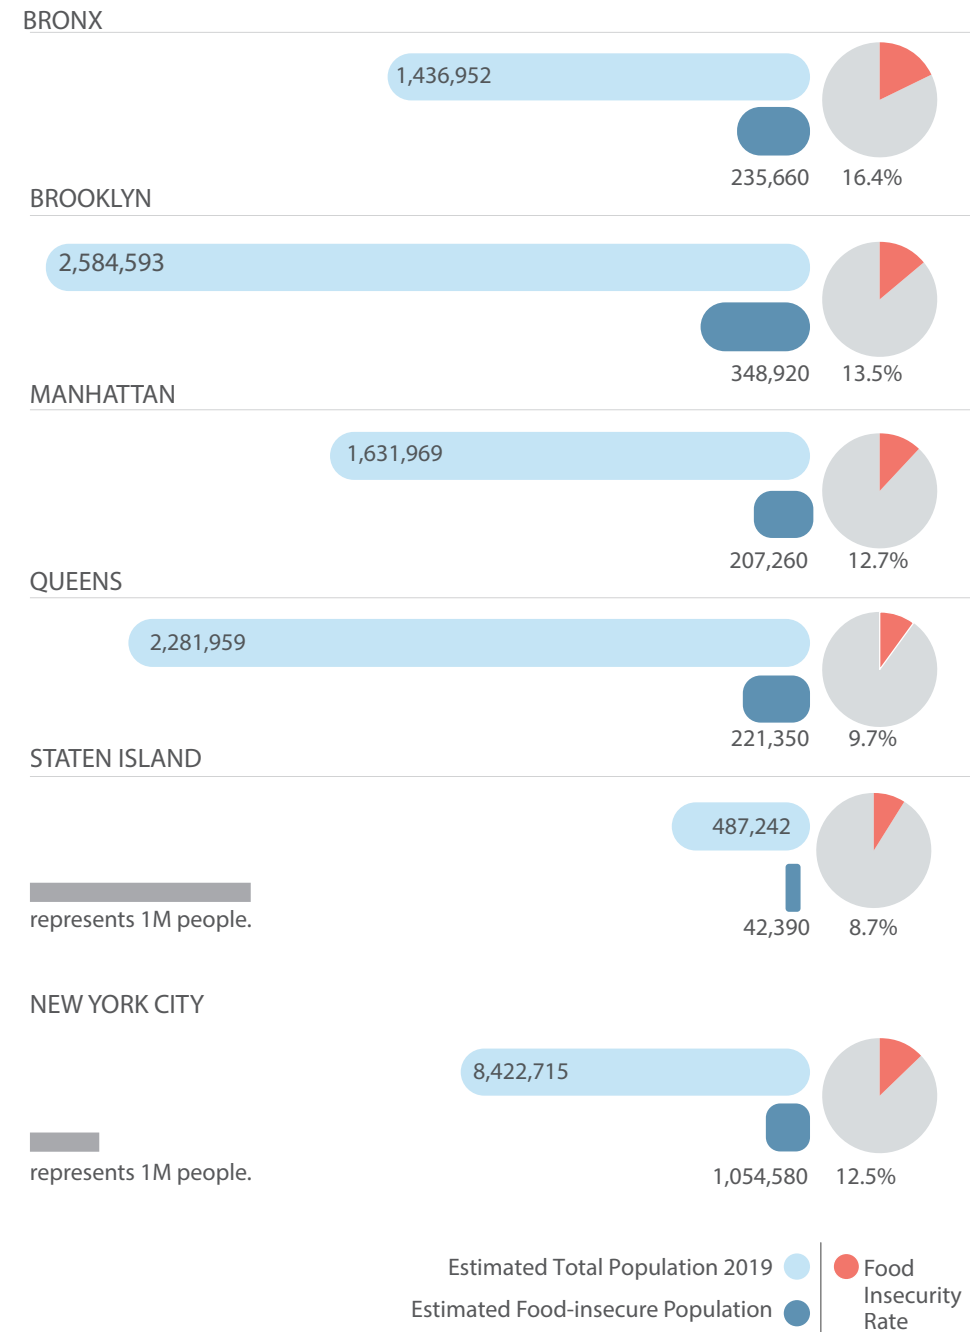

The United States Department of Agriculture (USDA) monitors the extent and severity of food insecurity in U.S. households through an annual, nationally representative survey. Prior to the COVID-19 pandemic, the City's food insecurity rate had steadily declined over the past several years and in 2019 the number of food insecure New Yorkers was just over 1 million individuals. However, much of this progress was upended by the pandemic. During the pandemic, Feeding America developed models to predict changes in food insecurity as a result of COVID-19. *Using these models, the projected number of food insecure New Yorkers in 2021 is approximately 1.4 million individuals.*

Meal Gap

Feeding America has done analyses to project national food insecurity data to the county level and identify where there is a meal gap, the meals missing from the homes of families and individuals struggling with food insecurity. In 2019 (the latest available data), New York City was missing nearly 180 million meals.

Supply Gap

Supply Gap

Several years ago, the Mayor's Office of Food Policy (MOFP) partnered with emergency food providers to develop a more robust metric, the "Supply Gap," that tracks neighborhood-by-neighborhood levels of unmet food need, alongside the various supplies of food going into each neighborhood. At a high-level the Supply Gap is simply the difference between the raw neighborhood need for emergency food and the supply of emergency food going into a neighborhood.

When the pandemic hit, MOFP enhanced the Supply Gap metric to meet the moment, by adding new COVID-specific supplies of food and layering in data on critical nuances, such as real-time neighborhood-level unemployment rates and the presence of undocumented populations that were ineligible for or afraid to access public aid.

The City uses this data to inform policymakers and food distributors about where additional food is most needed, how much is needed, and how incremental deliveries could help to close the gap. The Supply Gap map can be found at nyc.gov/supplygap.

**Darker shading indicates greater unmet need for emergency food*

Emergency Food Assistance Program

The Human Resources Administration's (HRA) Emergency Food Assistance Program (EFAP) seeks to improve the nutrition of New Yorkers who are experiencing food insecurity. It does this by providing nutritious food to emergency food programs (food pantries and community kitchens). Food items meet the NYC Food Standards and are selected based on the nutritional, cultural, and dietary needs of the diverse communities of NYC.

The City of New York has made it a priority to invest City Tax-Levied dollars into an emergency food program, thereby continuing to support the provision of food and funding to providers. We remain committed to supporting the city's emergency food providers with purchases of nutritious food and are working to connect food insecure New Yorkers with food assistance benefits. In Fiscal Year 2021, EFAP distributed 13,767,104 pounds of shelf stable and frozen foods. In the same period, EFAP programs reported serving more than 30,490,881 people (this is a self-reported, duplicated statistic).

Going forward, the City will be factoring in results of the Supply Gap analysis into allocations for pantries participating in EFAP. This will allow for more equitable distribution of emergency food across the city.

SNAP

The Supplemental Nutrition Assistance Program (SNAP) program serves over 1.6 million New York City, or 20 percent of the population on average each month.

SNAP Benefits for Older Adults

Since September 2014, the Benefits Data Trust (BDT) and the Department of Social Services (DSS) partnership has sought to create systemic changes for public benefits access, focusing on widely available benefit programs across the five boroughs of NYC and those that research has shown improve health, education, employment and/or mobility. While the program has expanded to support people of all ages with SNAP application assistance, the focus of helping low-income, older New Yorkers access multiple benefits such as health insurance, rent freeze programs and heating assistance, remains a priority. Using sophisticated data-matching analytics and technology, paired with a contact center model, this program has sent 305,000 mail-based outreaches to likely-eligible older adult (60+) households. More than 51,700 applications for multiple public benefits have been submitted on behalf of older adult households, including 41,600 SNAP applications on ACCESS HRA. BDT has responded to the COVID-19 public health emergency by fielding a higher volume of calls resulting from referrals from other groups and agencies across the City. Since mid-March, BDT has received 1,500 referral calls and submitted 1,260 SNAP applications as a result of these calls.

THE 2019 SNAP PARTICIPATION RATE FOR OLDER ADULTS WAS 75.6%

The Department for the Aging (DFTA) also includes a SNAP evaluation in their intake form. The average monthly number of SNAP recipients age 65 and older for FY 2021 is 354,419. The 2019 SNAP participation rate (the percent receiving benefits among those who were eligible) for older adults (ages 60+) in NYC was 75.6%. The national participation rate for older adults as of 2018 was 48%.¹

SNAP Outreach Programs

HRA's Supplemental Nutrition Assistance Program (SNAP) Support Services educates the public about SNAP benefits to maximize the City's use of available federal programs to increase the purchasing power of low-income New Yorkers. SNAP Support Services provides SNAP trainings and presentations, prescreens potentially eligible applicants, and assists with the SNAP application process.

¹USDA Food and Nutrition Service, 2021; Accessed August 30, 2021 at <https://fns-prod.azureedge.net/sites/default/files/resource-files/Trends2016-2018.pdf>

In FY 2021, SNAP Support Services conducted virtual outreach at 165 community sites. In previous years, SNAP Support Services also conducted outreach at three SNAP facilitated enrollment programs, but this outreach was suspended due to the COVID-19 pandemic. In previous years, this program also conducted presentations at various community-based, human services, and government organizations, and monitored SNAP outreach activity at community-based organizations. These outreach activities were also suspended due to the COVID-19 pandemic. The budget for the SNAP Outreach Services Program for FY 2021 was \$1.1 million.

HRA has worked to make applying for benefits programs easy and accessible to all New Yorkers through the ACCESS HRA (AHRA) initiative. Clients and members of the public interacting with HRA and the Department of Social Services (DSS) can access information and services in multiple languages online, in person, or telephonically. The Access HRA mobile app is also available in seven languages and provides access to clients' HRA cases.

The Department of Social Services (DSS) Office of Advocacy and Outreach (OAO) conducts targeted outreach campaigns to organizations serving specific populations, including older adults, LGBTQI, persons with disabilities and immigrant communities, to expand benefits access to SNAP benefits through ACCESS HRA. OAO conducts presentations and attends resource fairs, farmers markets, and other events to promote SNAP awareness and increase engagement. In Federal FY 2020, OAO facilitated AHRA trainings for 4,132 Community Based Organization (CBO) staff who provide SNAP enrollment services to their clients. Three-quarters of those (3,025 staff) were trained between April and June 2020 to support clients experiencing food insecurity during the COVID-19 crisis. ACCESS HRA trainings cover topics including SNAP applications, recertifications, mobile document upload, and/or case management through the AHRA Provider Portal. By the end of FY 2020, there were more than 300 CBOs enrolled in the Provider Portal. OAO also collaborates with selected partner CBOs and City agencies, to provide additional information about benefits and to provide enrollment assistance via AHRA at these locations. On-site support was suspended in March 2020 and continued to be suspended throughout FY 2021.

Footnote: The SNAP Outreach Program follows the Federal Fiscal Year calendar (10/01/19-09/30/20)

PART 2. IMPROVING CITY FOOD PROCUREMENT AND SERVICE

Agency Meals and Food Standards

Each year New York City spends approximately half a billion dollars on food expenditures. New York City uses the scale of its food procurement and food service programs to purchase and provide food that meets high nutrition standards, and where possible, is sourced regionally.

The Mayor's Office of Food Policy oversees the Good Food Purchasing initiative for City agencies that procure and serve food to improve the institutional plate through the values set forth in the Good Food Purchasing framework. The categories for procurement action include nutrition, environmental sustainability, valued workforce, animal welfare, and local economies. New York City has existing frameworks, including the NYC Food Standards, through which City agencies are already advancing healthy procurement practices. The Good Food Purchasing framework continues to be integrated into ongoing procurement strategies in order to further advance our values of healthy food for people and the planet through procurement and provision to New Yorkers.

The Agency Standards for Meals/Snacks Purchased and Served (Food Standards) were established by Mayoral Executive Order 122 of 2008 and set nutrition requirements for the foods purchased and meals and snacks served by City agencies and their sub-contractors. The Food Standards are an integral part of the City's effort to increase access to healthy foods by improving the nutritional quality of food served in City programs. They help to combat some of the structural inequities that make healthy eating inaccessible for those with limited resources by ensuring that any New Yorker accessing meals or snacks from City agencies and their sub-contractors will be served more nutritious foods. To keep abreast with emerging guidelines, research and nutritional science, the Food Standards are reviewed and revised at least once every three years. Due to the COVID-19 pandemic, the revision process is delayed, and the City expects to release the latest revisions in 2022.

Prior to the COVID-19 pandemic, the Standards applied to approximately 230 million meals and snacks served per year in 11 City agencies, and across a variety of settings, including schools, older adult centers, homeless shelters, public hospitals and care facilities, childcare centers, after school programs, and correctional facilities. From July 2020 to June 2021, 10 City agencies served over 151 million meals and snacks including more than 105 million meals and snacks in schools. Due to COVID-19, program closures and shifts in meal service were consistently reported across agencies. As a result, the number of meals and snacks served continues to be lower than prior to the pandemic. Emergency meals served through GetFood NYC programs are not included in the total number of meals and snacks served.

From July 2020 through June 2021, agencies had an average compliance of 95% with the Food Standards. See Appendix G for full data on Agency Food Standards.

2 For this reporting period, compliance for each agency is calculated by summing the number of programs compliant with each standard and dividing by the sum of the number of programs to which each standard applies. Average agency compliance is weighted by the proportion of meals/snacks served by each agency.

DOE Food Procurement

The New York City Department of Education (NYCDOE)'s Office of Food and Nutrition Services (OFNS) operates the largest school food service program in the United States, spending more than \$200 million annually on food, and serving, in a typical year, more than 950,000 meals daily. As in FY 2020, however, FY 2021, the term covered by this report, was not a typical year.

As New York City managed the ongoing effects of the COVID-19 pandemic, OFNS was a key part of the City's food relief efforts aimed at ensuring food security for all New York City residents. The City welcomed students back to school in September 2020, although most received instruction remotely and only about 30 to 40% of students reported to buildings for instruction, and offered take-out breakfasts and lunches for students receiving remote instruction and for adults of the general public as well. During FY 2021 NYCDOE served over 75 million meals to children and over 30 million meals to adults.

OFNS continues to be committed to innovative meals that help students make better food choices. In addition to promoting local foods, NYCDOE expanded meatless only options on both Mondays and Fridays in the spring of 2021. Increasing the number of meatless options is an important sustainability and health initiative. In FY 2022, OFNS plans to code school menus to identify vegan and vegetarian items for students citywide to expose students to the benefits of a vegetarian diet

OFNS is committed to realizing the City's mission that no one in our City should go hungry, even when school is not in session. OFNS supported enrichment programs in schools during school holiday and during the weekend as well as summer meals during a typical year. As mentioned earlier, NYCDOE did not stop serving the community meals throughout the COVID-19 crisis, and continues to offer meals to students in schools, as well as to children attending school remotely.

Investments have been made in infrastructure and technology to drive student engagement and improve the student dining experience. OFNS has committed to improving the cafeteria experience of each child, investing in menu research and development, cafeteria décor, and incorporating student voices into menu decisions.

Photo Credit: Mayor's Office of Food Policy

Salad Bars in Hospitals

Prior to COVID-19, NYC Health + Hospitals offered prepackaged and prepared salads to order at on-site food vendors in nine facilities: in Manhattan Hospital Center, Bellevue, and Henry J. Carter Post-Acute; in the Bronx at Jacobi Hospital; in Queens at Queens and Elmhurst Hospitals; in Brooklyn at Kings County, Coney Island, and Woodhull Hospitals; and in Staten Island at Seaview Hospital. Due to COVID-19, salad bars are not currently operating, however, Health + Hospitals has begun offering packaged salad options.

Bottled Water Expenditures

DCAS purchases bottled water primarily for routine service to agency offices in multiple City-owned or leased facilities throughout the city. DCAS expenditures on water for FY 2021 were \$359,159 for bottled water in 5-gallon demijohn (including cooler rental) and \$65,122 for single serve bottles.

PART 3. INCREASING HEALTHY FOOD ACCESS AND AWARENESS

Historical and ongoing racist and discriminatory policies and practices on the part of government among others, have created deep inequities that shape where New Yorkers live and go to school, what jobs they have, and what their neighborhoods look like, including their access to affordable healthy food. This inequitable distribution of resources and opportunities for health influences New Yorkers' consumption of fruits, vegetables, and sugary drinks, contributing to unfair differences in diet-related disease outcomes among the New York City population. The COVID-19 pandemic may have further exacerbated differences in consumption during 2020 and 2021. New York City's work to improve healthy food access and lower consumption of unhealthy products like sugary drinks aims to address the differences in health outcomes and opportunities between neighborhoods and groups of people.

Indicator: Fruit and Vegetable Consumption

The City's work to improve access to nutritious food includes initiatives to increase healthy options at retail stores, increase New Yorkers' purchasing power for fruits and vegetables at farmers markets and grocery stores, and provide education and resources for preparing balanced meals at home. Eating fruits and vegetables every day can lower your risk of heart disease and possibly some cancers. The City's goal, established in OneNYC in April 2015, is to increase the average daily adult consumption of fruits and vegetables by 25 percent by 2035. In 2020, mean adult fruit and vegetable consumption was 2.2 servings in a day, about the same as the 2016 mean of 2.3 servings.³ Cost remains one of the biggest barriers to shopping for and preparing foods that are part of a healthy diet for people with lower incomes.⁴ New York City adults residing in households with the highest income levels (400+% of the federal poverty level [FPL]) consumed significantly more fruits and vegetables (2.6 servings) than those residing in households with lower income levels (200-399% FPL: 2.2 servings; <200% FPL: 1.9 servings).⁵

Indicator: Sugary Drink Consumption

The New York City Department of Health and Mental Hygiene (DOHMH) has implemented many strategies aimed at reducing sugary drink consumption among New Yorkers, including media campaigns, nutrition education, programs to make healthy beverages more accessible and unhealthy beverages less ubiquitous, and policies to ensure sugary drinks are not served to children in schools and child care centers.⁶ While DOHMH had an immense focus on addressing the COVID-19 pandemic during FY 2021, the National Salt and Sugar Reduction Initiative, a national partnership of over 100 organizations and local and state health authorities convened by DOHMH, released voluntary sugar reduction targets for fifteen categories of foods and beverages that contribute the most added sugar to the diet, including sugary drinks, in an effort to encourage food and beverage manufacturers to provide healthier options. Sugary drink consumption is associated with dental cavities, weight gain, and increased risk of chronic diseases, such as type-2 diabetes and heart disease.

³ NYC Department of Health and Mental Hygiene, Community Health Survey, 2016 and 2020. Note: In 2016 and 2020, fruit and vegetable consumption was assessed via a single-item measure, while in 2017-2019, it was assessed via two separate items; therefore, 2016 estimates are being used for comparison to 2020.

⁴ Maeve Gearing, Sujata Dixit-Joshi, and Laurie May. Barriers that Constrain the Adequacy of Supplemental Nutrition Assistance Program (SNAP) Allotments: Survey Findings. Report prepared by Westat, Inc. for the U.S. Department of Agriculture, Food and Nutrition Service, June 2021. Project Officer Rosemarie Downer. Available online at www.fns.usda.gov/research-and-analysis

⁵ New York City Department of Health and Mental Hygiene, Community Health Survey, 2020 (unpublished).

⁶ Adjoian T, Lent M. Sugary Drink Consumption among New York City Adults, Youth and Children. NYC Vital Signs 2017, 16(4): 1-4; New York City Department of Health and Mental Hygiene, Community Health Survey, 2019

As part of Take Care New York 2020, the DOHMH set a goal to reduce the percent of adult New Yorkers who consume one or more sugary drinks per day to 19% by 2020. Among New York City adults, there was a steady decline in sugary drink consumption (defined as one or more per day) between 2007 (36%) and 2013 (23%); however, the prevalence stagnated in more recent years (22% in 2020).⁷ Sugary drink consumption is influenced by a variety of systemic practices including disproportionate, targeted marketing of unhealthy foods and beverages to Black and Hispanic populations and policies that divest money from communities of color and result in unequal access to healthy foods. Together these racist, unjust, and avoidable practices and policies create environments that disproportionately advantage white and higher income populations in opportunities to achieve and maintain health and contribute to inequities in consumption. Sugary drink consumption was higher among Black and Latino adult New Yorkers than among White and Asian/Pacific Islander residents every year from 2007-2020 (in 2020, Black: 30%, Latino: 30%, White: 14%, Asian/Pacific Islander: 15%).^{5,6} Among children ages 6 to 12, the prevalence dropped between 2009 and 2019 (44% vs. 19%). Despite an overall decline among NYC children ages 6 to 12, sugary drink consumption remains higher among Black and Latino children than White children (In 2019, Black: 28%, Latino: 23%, White: 10%). Among the youngest New Yorkers (ages 1 to 5 years), Black and Latino children had about five times higher rates of sugary drink consumption than white children (In 2019, Black: 18%, Latino: 15%, White: 3%).⁸

These differences in fruit and vegetable and sugary drink consumption, as well as inequities in associated diet-related diseases are not the result of personal responsibility alone. Racist and socially unjust policies and practices shape the food supply and environment and thus the resources for healthy eating to which New Yorkers have access.

CITY-SPONSORED NUTRITION EDUCATION PROGRAMS

The New York City Department of Health and Mental Hygiene (DOHMH) aims to promote and make easier healthy dietary behaviors, particularly in communities at risk for poorer health outcomes. DOHMH's programs combine direct education to build on New Yorkers' nutrition and culinary knowledge and skill with environmental supports to make choosing healthy foods easier.

Farmers Market Based Nutrition Education

DOHMH's Stellar Farmers Market program provides free, bilingual nutrition workshops and cooking demonstrations for adults at select farmers markets that serve communities with low-incomes across the City. These activities promote the benefits of a diet rich in fruits and vegetables and provide information about how to prepare healthy meals using fresh produce. Over 16,275 workshops and cooking demonstrations have been held, reaching over 387,900 participants since the program's inception in 2009. In 2020, all in-person workshops at farmers markets were cancelled due to the COVID-19 pandemic. In place of in-person programming during 2020 the Stellar Farmers Market program conducted 93 nutrition workshops and cooking demonstrations virtually in FY 2021.

Stellar Farmers Market program funding for FY 2021 was \$487,535 and was provided by the United States Department of Agriculture's (USDA) SNAP Nutrition Education and Obesity Prevention program (SNAP-Ed), through a contract with the New York State Department of Health.

In addition, to build capacity among community-based organizations for conducting nutrition education programming, DOHMH provided support and technical assistance to community organizations to conduct nutrition education at farmers markets. Three community organizations conducted 60 virtual workshops collectively for over 3,275 participants. \$37,500 in funding for this program was obtained through City Tax Levy dollars.

Child Care-Based Nutrition Education

Eat Well Play Hard in Child Care Settings (EWPHCCS) employs registered dietitians from DOHMH to support childcare centers with creating and enhancing environments that support healthy eating and physical activity practices. Dietitians provide technical assistance on menu improvements and nutrition policy development. They also provide nutrition training and workshops to childcare staff, parents, and children in centers serving families with low-incomes. EWPHCCS has worked with 596 childcare centers and has reached over 99,880 children, parents, and staff since its inception in 2008. Funding for FY 2021 was \$1,288,800 and was provided by the United States Department of Agriculture's (USDA) SNAP Nutrition Education and Obesity Prevention program (SNAP-Ed), through a contract with the New York State Department of Health.

EWPHCCS also implements the Farm to Preschool Program, which connects childcare centers to sites selling fresh, locally grown fruits and vegetables. This allows families to purchase local produce and gives childcare centers the opportunity to purchase local produce wholesale to incorporate into meals and snacks served to children more easily. The program also helps young children develop healthy eating habits early on, by supporting gardening at the centers and by providing on-site nutrition education and cooking demonstrations for parents, staff, and community members. In FY 2021, DOHMH provided over 200 virtual workshops to 452 participants. Eight preschools participated from across the City in FY 2021.

Neighborhood-Based Nutrition Education

Funding for the Bronx Neighborhood Action Centers in FY 2021 was \$120,328.
Funding for the Brooklyn Neighborhood Action Centers in FY 2021 was \$70,052.
Funding for the Harlem Neighborhood Health Action Centers in FY 2021 was \$126,251.

Nutrition Programs for Older Adults, DFTA

The NYC Department for the Aging (DFTA) funds 249 older adult centers, 30-plus affiliated sites, and 23 home delivered meal programs, which became 15 home delivered meal programs after new consolidated contracts were awarded in January 2021. DFTA nutritionists review and approve menus served at these programs, ensuring that meals are nutritious and compliant with city, state, and federal nutrition guidelines. DFTA nutritionists also oversee the food safety of meals served at these programs and provide technical assistance. Due to COVID-19, older adult center facilities were closed July 2020 through June 2021 during FY 2021. During this time, older adult centers provided virtual programming and conducted wellness calls. Reopening of older adult center facilities at partial capacity began on June 14th, 2021 and continued into the next fiscal year. DFTA nutritionist worked with older adult centers upon reopening to ensure that healthy meals were provided safely.

From July 1st, 2020 to June 30th, 2021 DFTA nutritionists provided more than 70 virtual nutrition education sessions to DFTA-funded older adult center clients. In addition, DFTA provides individual nutrition counseling to clients referred by DFTA-funded older adult centers and home delivered meal programs. From July 1st, 2020 to June 30th, 2021, over 1,000 hours of nutrition counseling were provided via telephone.

In July 2020, through its partnership with NYS Department of Agriculture Senior Farmer Market Nutrition Program (SFMNP), DFTA pivoted from in-person distribution to an online application process to mail out coupon booklets and nutritional information to approximately 45,000 older adults. To further ensure older adults were able to access fresh produce and fruit from their local farmers market or stand, DFTA partnered with the NYPD Explorers program. This was an intergenerational approach to introduce the SFMNP program to young adults, DFTA nutritionists provided virtual training on identifying various produce and their nutritional value, as well as have Explorers shop for homebound older adults.

DFTA was awarded the SNAP-Ed (SHINE) Grant for the 4th year. The grant year runs from October 1, 2020 to September 30, 2021. As of June 2021, a total of 117 virtual nutrition education workshops were provided with a total participation of 1069, and unduplicated participation of 463. In addition, the grant implemented a Food Box Distribution programs (Farm Share), with 105 older adults receiving farm shares 1 to 2 times per week, as well as nutrition education and recipe cards. In April, the grant launched a monthly newsletter which are distributed to all DFTA providers and members. Topics included health benefits of eggs, hydration, and potassium. In the summer, the grant plans to launch a Pot Gardening Project whereby 1,200 older adults will receive an herbal plant to grow at home and attend virtual workshops to learn how to grow and use the plant for healthy cooking.

In September of 2020, DFTA received a 3-year grant award from the Administration for Community Living (ACL) for innovative programming. Services of the Virtual Smart Living Initiative include virtual individual and group nutrition counseling, virtual live cooking demonstrations and nutrition education workshops, Senior Tech Watch (a virtual group which teaches older adults how to use technology to manage their health and to lead a healthy lifestyle) and Do More Feel Better (a virtual mental health intervention led by peer coaches). To date, a total of 140 virtual individual nutrition counseling sessions were provided to 118 unduplicated clients. Ten older adults are enrolled in a virtual multi-session group nutrition counseling. Six clients participated in the virtual Do More Feel Better program. A total of 3 virtual nutritional workshops and 5 live cooking demonstrations were held with a total of 313 live participants.

Farmers Markets

Farmers markets play an important role in addressing inequities in access to healthy foods by providing an additional healthy retail outlet in the neighborhoods they serve. They connect consumers to local and regional farmers and producers that provide farm fresh produce, dairy, meats, and other goods.

In New York City, there are a number of programs that help consumers increase their purchasing power at farmers markets, such as SNAP, WIC, the Senior Farmers Market Nutrition Program at the federal level, and Health Bucks at the local level. There were over 125 farmers markets across the five boroughs in FY 2021. Approximately 120 of these markets accepted EBT. The number of farmers markets in New York City has grown from 79 in 2007 to over 125 in 2020. Fewer farmers markets operated in 2020 compared to 2019 and 2021 due to challenges related to the COVID-19 pandemic.

GrowNYC is the largest operator of farmers markets in the city. Its 48 Greenmarkets are located throughout the five boroughs, with 24 markets open year-round. In FY 2021 customers spent over \$1.8 million in SNAP benefits at GrowNYC Greenmarkets, FarmStands, and Fresh Food Box sites.

GrowNYC also operates Farmstands (formerly named Youthmarket farm stands) to employ neighborhood youth, providing them with jobs and business skills. In FY 2021, 30 young people were employed at a Youthmarket. There are currently 15 GrowNYC Farmstands in the city. For a list of the number of Greenmarkets in NYC, as well as the average number of producers at each market sorted by borough, see appendix J.

Photo Credit: Mayoral Photography Office

Footnote: The total number of open markets fluctuates throughout the season

Health Bucks

Health Bucks are two-dollar coupons that are redeemable for fresh fruits and vegetables at all NYC farmers markets year-round. They provide New Yorkers with low incomes additional purchasing power to buy fresh, locally-grown produce at all 143 farmers markets across NYC. Health Bucks are distributed as a SNAP incentive – for every \$5 spent in SNAP benefits (formerly known as food stamps) at the market, beneficiaries receive a \$2 Health Bucks coupon – and through community-based organizations as part of nutrition and health programming, as part of a fruit and vegetable prescription program, and by elected officials and organizations that purchased the coupons.

In 2020, over 316,000 Health Bucks were distributed at 118 farmers markets as a SNAP incentive, over 114,000 Health Bucks were distributed by more than 470 programs at community-based organizations and over 72,000 Health Bucks were distributed through a pharmacy-based fruit and vegetable prescription pilot program. Over 97,000 Health Bucks were purchased and distributed by 22 organizations and elected officials. In total, over 600,000 Health Bucks, worth more than \$1,200,000 in fruits and vegetables, were distributed, putting fresh, locally grown produce into the hands of thousands of New Yorkers with low-incomes. Health Bucks have continued to be distributed as a SNAP incentive at participating farmers markets since the beginning of and throughout the COVID-19 pandemic in NYC.

Get the Good Stuff

The Get the Good Stuff program offers a dollar-for-dollar match on purchases of eligible fruits, vegetables, and beans by New Yorkers with SNAP benefits at participating stores. For every \$1 spent in SNAP benefits on eligible fresh, frozen, canned, and dried fruits, vegetables, and beans, customers enrolled in the program get \$1 added to a program loyalty card, to purchase more eligible foods. In FY 2021, customers participating in the program redeemed over \$1,090,000 worth of fruits, vegetables, and beans.

Green Carts

Green Carts are mobile vending carts that sell fresh fruits and vegetables in low-income neighborhoods with low rates of fruit and vegetable consumption. As of August 2021, there were 243 Green Carts with active permits, of which 8 may be using EBT machines. For a full list of information on Green Cart permits and EBT machines, see Appendix H. For a list of information on Green Cart violations by location, see Appendix I.

FRESH

The Food Retail Expansion to Support Health program (FRESH) was established in 2009 and is administered by the New York City Economic Development Corporation (NYCEDC) and the Department of City Planning.

Every New Yorker deserves access to affordable, healthy food and it is an essential component of neighborhood development. However, many low-income areas continue to be underserved by full-scale grocery stores, due to high acquisition, development, and operating costs. The FRESH program can mitigate costs by providing zoning and/or financial incentives to eligible grocery store operators and developers.

Between 2009 and July 2021, a total of 43 FRESH projects have been approved, comprised of 19 projects receiving financial incentives, 20 projects receiving zoning incentives, and 4 projects receiving both financial and zoning incentives. A total of 34 of these projects have been completed and are now open to the public. These approved projects provide, or will provide, over one million square feet of new or renovated grocery store space to New York City. In FY 2021, FRESH supermarkets receiving financial benefits had 1,714 full time equivalent employees. For a full list of stores receiving financial benefits through FRESH, see Appendix F.

PART 4. SUPPORTING A JUST AND SUSTAINABLE FOOD SYSTEM

In 2015, New York City committed in One New York: The Plan for a Strong and Just City (OneNYC) to build a more sustainable, resilient, and just food system, in which more of our food comes from regional and local growers, producers, and manufacturers. Food Forward NYC built upon OneNYC and laid out specific strategies to further advance the City's sustainability goals. To achieve those goals, we are investing in infrastructure to strengthen our regional food system, supporting community-based gardening and greening efforts, healthy eating, community development, and encouraging the growth of local food producers and manufacturers to create good job opportunities in the food sector.

NYC Watershed Agricultural Program

Much of New York City's drinking water comes from basins in upstate watersheds that include productive farmland. To preserve the quality of its source water, the City's Department of Environmental Protection (DEP), in partnership with the Watershed Agricultural Council (WAC), promotes the planning and implementation of agricultural best management practices (BMPs) on farms throughout the watershed. The goal of the Watershed Agricultural Program (WAP) is to support well-managed family farms through the development of Whole Farm Plans (WFP) and the implementation of BMPs that advance water quality protection while also promoting rural, economic viability.

Since 1992, the program has developed more than 460 WFPs on watershed farms and implemented over 8,500 BMPs on farms that reduce runoff from agricultural pollution to protect water quality. These management practices are funded by the City in the form of technical and financial assistance to watershed farmers. In FY 2021, farmers received approximately \$2.8 million in City financial support, which was used to fund the installation of BMPs such as covered barnyards, manure storage facilities and fencing used to exclude livestock from watercourses on 77 farms covering approximately 22,485 acres of watershed farmland across eight counties. For a list of participating farms by county and type, see Appendix B.

Hunts Point Food Distribution Center

Hunts Point is home to the Hunts Point Food Distribution Center (FDC), which dispenses over 4.5 billion pounds of food each year to the New York metropolitan region and supports 8,500 direct jobs. The FDC is comprised of over 130 public and private wholesalers, including the Hunts Point Terminal Produce Market, the Cooperative Meat Market, and the New Fulton Fish Market. A food supply study completed by NYCEDC and MOR in 2016 found that the FDC is the largest single geographic cluster of food distribution in NYC by volume. Twenty-five percent of New York City's produce, 35% of the city's meat and 45% of the city's fish pass through the FDC annually and arrive in independent restaurants, supermarkets, bodegas, and food markets across the five boroughs. The City and NYCEDC are committed to continuing to grow the Hunts Point FDC as a competitive 21st century industrial hub, delivering healthy food and living wage jobs to the city.

NYCEDC, in partnership with the Mayor's Office of Resiliency (MOR) and the U.S. Department of Housing and Urban Development (HUD), is investing \$71 million to protect a critical part of the City's food supply and increase social resiliency in Hunts Point. The Hunts Point Energy Resiliency project will provide reliable, dispatchable, and sustainable power to critical FDC facilities in Hunts Point through a combination of energy generation and storage solutions. To expand benefits to the surrounding community, the project also includes the installation of solar panels and storage at two neighborhood schools, providing year-round renewable energy as well as establishing a community gathering space during emergency events.

In March 2021, the City and NYCEDC kicked off Hunts Point Forward, a community-driven effort to create a comprehensive plan for Hunts Point that will represent the key priorities of the residential community and neighboring industrial area to guide future action. Improving residential access to affordable, healthy, and fresh food and connecting FDC businesses to job seekers have been identified as key priorities. Hunts Point Forward will include strategies to mitigate these challenges.

Community and School Gardens

GreenThumb

Established in 1978, NYC Parks GreenThumb is proud to be the nation's largest urban gardening program, assisting over 550 gardens and tens of thousands of volunteer community gardeners throughout New York City. GreenThumb supports and educates community gardens and urban farms through the provision of free land access, materials, technical assistance, public programming, and community engagement while preserving 100 acres of open space across the five boroughs. GreenThumb also serve thousands of New Yorkers who are interested in community-led environmental stewardship through public programming, as well as hundreds of thousands of annual visitors to GreenThumb gardens who enjoy these cherished public open spaces.

The continued success of NYC Parks' community gardens is at the forefront of our mission at GreenThumb, and we are proud to have supported our gardens during the ongoing global pandemic. In 2020, GreenThumb supported greater food access for New Yorkers by helping create one brand new community garden, reactivating four gardens, renovating 15 community gardens, delivering over 2,000 cubic yards of compost and soil and 110,000 plant starts (including 45,000 food producing plants), and installing over 375 raised garden beds and two chicken coops. Many community gardens also supported mutual aid networks and the distribution of food and locally-grown fresh vegetables and fruits during the pandemic.

Our community gardens are protected, thriving community focal points, and NYC Parks continues to champion their success now and into the future in partnership with our volunteer gardeners.

For a list of registered GreenThumb community gardens, see Appendix C. Information about the size of each garden and whether or not it engages in food production is included to the extent it is available.

GrowNYC School Gardens

GrowNYC School Gardens, in partnership with NYC Parks GreenThumb and the Department of Education, inspires, facilitates, and promotes the creation of a garden in every public school in New York City. Schools work directly with GrowNYC School Gardens to ensure that their garden programs are sustainable, responsive to their communities, and transformative for student learning in the cafeteria, the classroom and beyond. The citywide school garden initiative provides material and financial support to get schools growing, provides technical and professional development support to school gardeners, and makes the scale of New York City manageable by bringing together partnerships and resources into one convenient central location. In FY 2021, 824 schools had garden projects with GrowNYC School Gardens. For a list of registered GrowNYC School Gardens, see Appendix D.

New York City Farm to School

With the support of the NYC DOE's Office of Food and Nutrition Services, the NYC Farm to School Program (NYCFTS), formerly Garden to Café, helps develop a student's curiosity about food, nutrition, and the various ways food can be grown, through school gardens, lunchtime tastings, and classroom lessons. The program currently has over 140 schools registered, serving 73,517 students. Farm to School works with NYC's public and charter schools in all five boroughs, from elementary to high school, including students with special needs (D75) and those who are at-risk (D79).

Our work with the American Farmland Trust's Farm to Institute New York State has also supported us with the creation of a Farm to School team with the NYC Department of Education. The goals of the FTS team include: 1) increasing the volume and variety of local farm products procured by the Office of Food and Nutrition Services; 2) encouraging an ever-increasing demand of fresh fruits and vegetables from our students citywide; and 3) continue building a learning connection and partnerships between NYS farmers and NYC schools.

Farms at NYCHA

Farms at NYCHA is an urban agriculture initiative grounded in public housing resident leadership and community partnership. Since 2013, NYCHA has collaborated with the Mayor's Office of Criminal Justice, Green City Force, and other public and private partners on this cross-cutting initiative that expands healthy food access, provides youth workforce and leadership development, and helps create more sustainable and connected public housing communities.

FOOD SYSTEMS

Five of the seven farms are operated by 18-to 24-year-old NYCHA residents who are Green City Force (GCF) AmeriCorps Members serving on sites GCF operates as Eco-Hubs promoting sustainability and health. Additional community-based farm partners Red Hook Initiative and East New York Farms! also activate youth and other community leaders to advance local sustainable agriculture and food justice. The seven Farms at NYCHA sites have provided food security support throughout the pandemic. In 2021, mid-season farm achievements include the distribution of over 17,000 pounds of free, fresh produce grown by and for residents at farm sites, and collection of nearly 3,000 pounds of food scraps for composting.

Through partnerships, NYCHA will expand the number of farm sites to 15 within five years, with the goal of at least two farms in each borough, starting with the creation of the first Farms at NYCHA site in Queens in 2022. NYCHA is deepening work with backbone partner Green City Force and collaborating to explore new farm models, including those that incorporate entrepreneurship, composting, and greenhouses.

The farms are also a prominent example of NYCHA's award-winning Connected Communities Initiative that consolidates the Authority's urban design and community engagement priorities for reshaping the more than 2,400 acres of open space NYCHA oversees throughout the five boroughs. In October 2021, NYCHA released an Open Space Masterplan offering a comprehensive vision for what open space can look like in the densest city in the country.

Food Manufacturing

NYCEDC supports the role of the food importing, manufacturing, and distribution sectors in growing and diversifying New York City's economy. With a huge market base and the world's largest food distribution center, these sectors create job opportunities for New Yorkers and are a vital part of our economy. The Brooklyn Army Terminal's 4 million square foot modern industrial campus is home to established and growth-stage food companies, such as Jacques Torres Chocolate, The Konery, MOMO Dressing, City Saucery, Green Mustache, Luxury Gourmet Sweets, Saedico, Granola Labs, We Are the New Farmers and RIND.

In addition, NYCEDC provides financial incentives to businesses operating in the food importing, manufacturing, and distribution sectors through the New York City Industrial Development Agency (NYCIDA) and the Accelerated Sales Tax Exemption Program (ASTEP).

These programs lower the cost of real estate and/or the purchasing of equipment and furnishings, allowing businesses to gain a foothold in the competitive New York market or expand their existing operations. For example, in FY 2021, the NYCIDA supported an Industrial Program Project to facilitate the acquisition, renovation, furnishing and equipping of an approximately 56,000 square foot facility in Jamaica, Queens, operated by Bartlett Dairy, Inc., a minority- and family-owned dairy and food distribution business. Bartlett Dairy, Inc. was founded in 1963 to deliver dairy across Queens. Today, the commercial business has 60 trucks and 40 tractor trailers operated by nearly 200 drivers. Bartlett Dairy Inc.'s dairy is sourced from farms in Pennsylvania and the Catskill region of New York, and the company also distributes other perishable food items. The new facility in Queens allows Bartlett Dairy, Inc. to expand its operations and better serve the company's customers in the five boroughs. The facility is projected to employ 182 full-time equivalent employees by its third year of operations. During FY 2021, NYCEDC also authorized Accelerated Sales Tax Exemption Program (ASTEP) benefits to Kitchen Commons, Inc, d/b/a eTerra Kitchen, a shared commercial kitchen operator. These benefits allowed eTerra Kitchen to save on sales and use taxes for purchases made towards the furnishing and equipping of a 5,100 square foot space in East Harlem, which will serve as a flexible hub for food entrepreneurs and delivery-based restaurant concepts.

During FY 2021, the NYCIDA directly supported 24 companies in the food and beverage manufacturing, distribution, and importing sectors, employing workers. These projects represent \$106,387,956 of private investment into New York City. For a full list of projects, see Appendix E.

Photo Credit: Mayoral Photography Office

NYCHA Food Business Pathways

The New York City Housing Authority's (NYCHA) Food Business Pathways program (FBP) is a free business training program that helps NYCHA and NYCHA Section 8 residents start and grow food businesses in New York City. FBP is a collaboration between NYCHA's Office of Resident Economic Empowerment & Sustainability (REES), the Fund for Public Housing and NYC Small Business Services (SBS). Residents who are accepted into FBP receive a free, intensive 10-week business course tailored specifically to meet the needs of NYCHA entrepreneurs. The program offers free licenses and permits, group and one-on-one business coaching designed to move their businesses forward, and assistance securing commercial kitchen space to operate their food businesses. Food Business Pathways has awarded free commercial kitchen incubator space grants to 42 businesses. Since the program's launch in January 2015, 271 NYCHA public housing residents and Section 8 voucher holders graduated from the program across nine cohorts and have created 189 registered businesses.

In August 2019, NYCHA and its partners launched Catering Business Pathways which provides immersive business education to catering businesses in the food sector. Throughout the 10-week course enrollees receive education on how to lead a profitable food catering company, learn business planning, menu design, pricing for profit and receive mentorship, professional coaching opportunities and assistance to obtain needed business licenses. The first cohort of Catering Business Pathways graduated in March 2020 with 24 NYCHA residents. Of those graduates, 15 registered their businesses by the end of the program.

While the program provides comprehensive business education on marketing, NYCHA REES also focuses on providing market access opportunities for program graduates. In 2021, NYCHA partnered with the Trust for Governor's Island to have three FBP graduates operate a food container on Governor's Island starting in May 2021. Past market access opportunities have been partnering with the Brooklyn Navy Yard, Grow NYC, and City Parks SummerStage.

Food & Beverage Industry Partnership

The NYC Food & Beverage Industry Partnership, at NYC Department of Small Business Services, works directly with the leading industry employer members of its NYC Hospitality Council, its Food & Beverage Small Business Roundtable, and industry associations to ensure alignment of strategies and initiatives to improve workforce development and business stability and growth in the sector.

Throughout the pandemic, the Food and Beverage Industry Partnership shaped policy and led coordination between government and industry to ensure the continuity of NYC food service businesses in one of the hardest hit sectors by COVID-19. The Partnership assisted business owners adapt to new methods of generating income, helped lead an interagency restaurant recovery working group that included the development Open Restaurants, and contributed to Food Forward, NYC the City's 10-Year Food Policy Plan highlighting key solutions to address the need to strengthen and prioritize the sustainability of NYC food service businesses in the long term.

Sidelined during the COVID-19 pandemic, the FIRST COURSE NYC line cook apprenticeship training program will re-start in FY 2022. The program provides access to high-quality training and good jobs and careers in the food service sector to low-income New Yorkers. The program addresses the critical shortage of skilled line cooks by developing the qualified talent restaurants require and drives improvements in talent management and workplace culture to reduce the high turnover rates that are the norm in the food service industry.

Zero Waste

In April of 2021, Mayor de Blasio announced the return of Curbside Composting on an optional basis in districts that had previously had service. In addition, the Mayor announced that the City would be doubling the number of food scrap drop off sites to provide more opportunities for New Yorkers to compost. Food scraps and yard waste continue to make up about a third of NYC's waste and tackling this piece of the pie is critical to reaching our zero waste goals. To fulfill this vision, the NYC Department of Sanitation (DSNY) is working to expand opportunities for food scrap and yard waste diversion for residents, schools, city agencies, and businesses.

Residential Curbside Composting

On March 12, 2020, Mayor de Blasio declared a state of emergency in New York City in response to the global pandemic of COVID-19. The City had to divert resources to aid in the COVID-19 relief efforts. This crisis, and the resulting decrease in economic activity, forced the City to make significant budget cuts to maintain emergency services and core municipal services. The New York City Department of Sanitation (DSNY) was required to temporarily suspend curbside composting service on Monday, May 4, 2020 to allow the City to divert resources to emergency COVID-19 response efforts.

More recently, in April 2021, the Mayor announced the return of curbside composting and a doubling of food scrap drop off sites. The Department of Sanitation (DSNY) reactivated all of the NYC Compost Project mid-scale compost educational facilities and worked to reopen some local food scrap drop-off sites throughout all five boroughs. These community composting programs were implemented by DSNY's eight community partners - Brooklyn Botanic Garden, The New York Botanical Garden, Queens Botanical Garden, Snug Harbor Cultural Center & Botanical Garden, Big Reuse, Earth Matter, GrowNYC and the LES Ecology Center.

The following NYC Compost Project mid-scale compost educational facilities were brought back into operation: the Big Reuse Salt Lot and Queensbridge Compost Sites, Earth Matter's Compost Learning Center, and the Lower East Side Ecology's Center Compost Yard. These community compost sites processed food scraps and yard waste from the drop-offs.

By the end of FY 2021, DSNY's community partners had opened or were supporting 142 Food Scrap Drop-Off sites citywide serving at least 52 of NYC's 59 Community Boards. DSNY plans to expand this program in FY 2022 with the goal of 200 Food Scrap Drop-Off sites by November 1, 2021. And, with the goal of 1 Food Scrap Drop-Off site/50,000 residents per borough by June 30, 2022 to retain equity of access for all New Yorkers.

Schools

DSNY's Zero Waste Schools (ZWS) program, which aims to divert all recyclable and compostable waste in participating schools, has reached more than 140,000 students and over 10,000 teachers, administrators and kitchen and custodial staff. Due to COVID-19, school organics was suspended for the 2020-2021 School Year.

In the face of economic hardship, and to ensure the City can continue to devote resources to essential safety, health, and shelter, and food security needs, the New York City Department of Sanitation announced the temporary suspension of School Organics Collection (Curbside Composting), beginning November 9, 2020. During this suspension, schools discarded food scraps, food-soiled paper, compostable utensils, and yard waste, with their trash. School Organics Collection will be restored in the 2021 – 2022 school year.

Also hosted on the ZWS Website is the Green Team Mini Grant Program. DSNY has partnered with Citizens Committee for New York City to create this grant program, awarding up to \$2,500 to school green teams. During the 2020-2021 school year, 10 schools received Green Team Grant funding. These schools were able to adapt their projects to remote learning models and found creative ways to further sustainability goals while adhering to COVID-19 restrictions. DSNY is providing Green Team Mini Grants to schools, with the 2021-2022 grant cycle opening in December 2021.

Businesses

After conducting a survey of regional processing facilities in 2019, DSNY determined that sufficient processing capacity exists to manage the organic waste of the remaining businesses to be covered by rule under Local Law 146 of 2013. DSNY subsequently proposed new rules that were adopted on January 31, 2020. Beginning July 31, 2020, the following NYC businesses are required to source separate their organic waste.

- Food Service Establishment (such as restaurants, delis, coffee shops, cafeterias, etc.)
 - Food Service Establishments having 7,000 to 14,999 square feet
 - Chain Food Service Establishments of 2 to 99 NYC locations with combined floor area 8,000 square feet or more
 - Food Service Establishments in Hotels having 100 to 149 guest rooms
 - Food Service Establishments with combined floor area 8,000 square feet or more in the same building or location
- Retail Food Stores (such as supermarkets and grocery stores)
 - Retail food Stores having 10,000 to 24,999 square feet
 - Chain Retail Food Stores of 3 or more NYC locations with combined floor area 10,000 square feet or more
- Food Preparation Locations having 6,000 square feet or more
- Catering Establishments hosting on-site events to be attended by more than 100 people
- Temporary Public Events to be attended by more than 500 people

July 31, 2020 marked the beginning of a warning period for these additional businesses. Due to the COVID-19 public health crisis, the warning period was extended by a year and Notices of Violation (NOVs) will not be issued until July 31, 2022. The first two sets of rules are already in effect and continue to be enforced.

DonateNYC Food Portal

In March 2019, the Department of Sanitation's donateNYC program launched its food donation portal, the first municipally developed food recovery platform of its kind. The donateNYC Food Portal aims to reduce the amount of edible food sent to landfill by facilitating donations to organizations that serve their community.

As of June 2021, the donateNYC food portal had 730 business, nonprofit, and agencies registered to donate or receive food on the Food Portal. In that time donateNYC facilitated 62.3 total tons of food donations to organizations across the City.

Additionally, donateNYC is part of the City's disaster response plan, preventing unsolicited donations from going to landfill and providing donation coordination to agencies and nonprofits engaged in emergency response. From mid-March 2020 through the end June 2021, donateNYC facilitated 6,503 tons of food to organizations through the City's GetFoodNYC Program.

About NYC Food Policy

The Office of the Director of Food Policy works to advance the City's efforts to increase food security, promote access to and awareness of healthy food, and support economic opportunity and environmental sustainability in the food system. To do this, the office coordinates multiple City agencies and offices that work on food programs or policies, as well as partners with the many advocates and nonprofit organizations working in food. For more information about NYC Food Policy, visit nyc.gov/nycfood

Water is always available	56	0	33	-	-	-
Average Agency Compliance***		100%				

¹While the Department of Citywide Administrative Services (DCAS) participates in the implementation of the Standards as purchaser of food for numerous agencies, it does not submit a compliance report as information on items procured by DCAS is captured in the reports of other agencies

²To report on compliance, agencies are asked to submit information based on a review of food and beverages purchased and a one month sample of menus and nutrition analysis from any month in the year prior to the report's publication. Specifics about each agency's data source and collection are indicated by footnotes assigned.

³The average agency compliance is 95%. Compliance for each agency is calculated by summing the number of programs compliant with each standard and dividing by the sum of the number of programs to which each standard applies. Average agency compliance is weighted by the proportion of meals/snacks served by each agency.

1 Compliance data based on a combination of self-report survey and field visits or data collection coordinated by agency staff.

2 Compliance data normally based on field visits but, due to COVID, assessments were conducted virtually. Menu reviews were conducted by agency nutritionists.

3 During the data collection period, programs were closed due to COVID-19 and did not serve any meals and/or snacks.

4 Compliance data largely based on information submitted by agency program sites and/or program caterer from a self-report survey tool and is not verified; agencies continue to work to enhance processes to assess accuracy of program site and/or caterer self-report and to improve data quality going forward.

5 All field visits were suspended due to COVID-19. Surveys were sent to providers purchasing and/or serving meals and/or snacks.

6 Agency utilizes centralized menu and food ordering process; information for all locations based on agency assessment of products purchased and menu analysis conducted by agency nutritionists.

7 Programs did not report on the following standard "Programs serving a majority of children age 4 – 18. All flavored milk or flavored milk substitutes are ≤ 130 calories per 8 ounces".

8 Agency purchases food only

9 Agency serves snacks only.

APPENDIX K LOCAL LAW 2013

INT. NO. 1194-A

By Council Members Palma, Cabrera, Chin, James, Koppell, Brewer, Eugene, Vacca, Van Bramer, Levin, Rodriguez, Gentile and Gennaro

A Local Law to amend the New York city charter and the administrative code of the city of New York, in relation to assessing food security.

Be it enacted by the Council as follows:

Section 1. Section 20 of the New York city charter is amended by adding a new subdivision j to read as follows:

j. The director or the director's designee, in consultation with the commissioner of the department of health and mental hygiene, the commissioner of the department of social services/human resources administration, or their respective designees, and community based organizations and service providers with relevant expertise and such other individuals as the director shall designate, shall establish a set of indicators to measure food security. Such indicators shall include but need not be limited to an analysis of existing federal data on food security and the use and impact of governmental nutrition assistance programs. The director, or the director's designee, shall prepare and present a report on such indicators to be included in the annual city foodsystem metrics report required pursuant to section 3-120 of the code.

§ 2. Subdivision a of section 3-120 of the administrative code of the city of New York, as added by local law 52 for the year 2011, is amended to read as follows:

§ 3-120 Annual city food system metrics report. a. No later than September first, two thousand twelve, and no later than every September first thereafter, the office of long-term planning and sustainability shall prepare and submit to the mayor and the speaker of the city council a report regarding the production, processing, distribution and consumption of food in and for the city of New York during the previous fiscal year. Such report shall include:

1. the number, size in acres, county and type of production of, and annual dollar amount of city financial support received by, farms participating in the watershed agricultural program;

2. the total dollar amount of expenditures by the department of education on milk and other food products that are subject to the United States department of agriculture country of origin labeling requirements, disaggregated and sorted by the product and country of origin in which the essential components of such food products were grown, agriculturally produced and harvested, to the extent such information is reported to the department of education. For any such product where there are multiple countries of origin, the total dollar amount of expenditures, disaggregated by product, shall be separately listed, to the extent such information is reported to the department of education. If the country of origin of milk or fresh whole produce is the United States, for the report due no later than September first, two thousand thirteen, and in every report thereafter, and to the extent such information is reported to the department of education, such report shall include the total dollar amount of expenditures on such milk or fresh whole produce that is local or regional. For purposes of this paragraph, milk or fresh whole produce shall be considered "local" if grown, agriculturally produced and harvested within New York state, and shall be considered "regional" if such food products were grown, agriculturally produced and harvested within the states of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia or West Virginia;

3. the location, sorted by community board and size in square feet, of each community garden located on city-owned property that is registered with and licensed by the department of parks and recreation, and whether each such garden engages in food production;

4. the number of food manufacturers receiving monetary benefits from the economic development corporation or industrial development agency and the annual dollar amount of such benefits per food manufacturer. For purposes of this paragraph, "food manufacturer" shall mean any natural person, partnership, corporation or other association that processes or fabricates food products from raw materials for commercial purposes, provided that it shall not include any establishment engaged solely in the warehousing, distribution or retail sale of products;

5. the daily number of truck and rail trips to or through Hunts Point Market for the purpose of delivering food to Hunts Point Market, to the extent such information is available. For purposes of this paragraph, "Hunts Point Market" shall mean the food distribution center located in Hunts Point in the borough of the Bronx, and shall include the meat, fish and produce markets operating at such location;

6. for the report due no later than September first, two thousand thirteen, and in every fifth report thereafter, the amount of grocery store space per capita, sorted by community board, and the number of grocery stores that opened during the past five calendar years, sorted by community board, to the extent such information is available. The office of long-term planning and sustainability shall request such information, as necessary, from the New York state department of agriculture and markets;

7. the number, community board, and number of employees, of grocery stores receiving financial benefits under the food retail expansion to support health program;

8. the number of establishments participating in the healthy bodega initiative administered by the department of health and mental hygiene, sorted by borough;

9. the number of job training programs administered by the department of small businesses services or the workforce investment board to aid individuals seeking work in food manufacturing, food supply, food service or related industries, sorted by borough;

10. the total number of meals served by city agencies or their contractors, including but not limited to meals served in public schools, hospitals, senior centers, correctional facilities, and homeless shelters, and not including food sold in vending machines or by a concessionaire, sorted by agency;
