BRIDGES OVER THE EAST RIVER.

No. 1—Brooklyn Bridge.

During the quarter the train and car service over the bridge has been maintained free from serious delay or accident. It is estimated that over twenty million passengers were transported in trains on the bridge railway and about ten millions in surface cars.

The operation of the surface trolley cars over the bridge has been bettered by the installation of signals by which the motormen may determine the position and proper spacing of their cars.

In the Manhattan terminal an additional stairway has been constructed from the easterly side of William street to the bridge promenade.

Inclosing sashes and movable doors have been erected across the westerly end of the Manhattan terminal for the protection and comfort of people waiting for surface cars.

The number of surface car round trips for the quarter is shown in the following statement:

January	115,294
February	93,560
March	113,977
Total	322,831

Vehicle Traffic.

	Single Horses.	Single Vehicles.	Double Vehicles.	Total Vehicles.	Receipts.
January	1,072	51,721	37,250	88,971	\$6,342 21
February	2,307	38,056	35,490	73,546	5,521 01
March	1,645	53,809	38,417	92,226	6,581 50
Totals	5,024	143,586	111,157	254,743	\$18,444 72

The plans for the contemplated improvement at the Manhattan terminal are well advanced and bids for the first part of the work to be done under this improvement, namely, the construction of a temporary extension, will be immediately advertised for.

No. 2—Williamsburg Bridge.

Traffic on the bridge has been handled without special incident. On January 28, 1907, a new line of New York City surface cars was put in operation over the bridge, between the Grand Central Station at Forty-second street and the Brooklyn plaza of the bridge.

In connection with the work to be done in order to open the bridge to elevated railway traffic, work on the construction of the sub-surface station in Manhattan has progressed as rapidly as the weather has permitted.

A contract for the construction of the elevated railroad connection on the Brooklyn plaza was awarded to the Cooper & Evans Company on February 25, 1907, and a contract for the alteration of the Manhattan steel viaduct and masonry approach and the construction of the tunnel entrance to the sub-surface station in Manhattan was awarded on March 25, 1907, to the F. W. Carlin Construction Company.

A contract for the construction of a shelter house on the Brooklyn plaza was awarded March 28, 1907, to H. A. Rutan.

No. 3—Manhattan Bridge.

Work on the anchorages, laying the various classes of masonry and the placing of the steel required for the anchor chains has progressed during favorable weather.

The rate of progress in the mills and shops where the steel required for the towers and suspended superstructure is being manufactured has been quite satisfactory.

No. 4—Blackwell's Island Bridge.

The construction of the river and island spans of the bridge has been continued without interruption. The work on the construction of the steel viaduct of the Queens approach is under way. Contract for this work was awarded to the Buckley Realty Construction Company on January 8, 1907.

Borough Bridges.

The borough bridges in maintenance have been operated, cleaned, painted and repaired by the usual forces in the employ of the Department for such purposes, with very little assistance from outside of the Department, except for repairs of extraordinary or emergency nature.

The construction of approaches to a temporary bridge over the Harlem river at Madison avenue is practically completed. The present draw span of the Madison Avenue Bridge now in use will be moved down to the site of these approaches for use as a temporary bridge during the construction of a new permanent bridge. The temporary bridge will not be put into commission until such time as work on the construction of the new bridge is ready to be begun.

The construction of the University Heights Bridge over the Harlem river has made such progress as weather permitted, and it is expected that this bridge will be opened to the public before the close of the year.

Borings at the proposed site of the Henry Hudson Memorial Bridge over the Harlem Ship Canal have been practically completed, and sufficient data collected to enable beginning now the preparation of plans for the proposed structure.

In the Borough of The Bronx work is in progress on the superstructure and masonry approaches of the Pelham Bridge.

Plans for a new bridge at the crossing of Boston Post road and Hutchinson river are being prepared.

In the Borough of Queens the construction of the new bridge over Dutch Kills, at Borden avenue, continues.

No new bridge construction is under way in either the Borough of Brooklyn or the Borough of Richmond.

Respectfully submitted,
JOHN H. LITTLE,
Deputy and Acting Commissioner of Bridges.

Submission 571.

The Committee on Hell Gate Bridge presented the following report upon designs submitted to the Commission by the New York Connecting Railroad Company under the franchise granted by The City of New York:

"To the Art Commission:

"The proposed Hell Gate Bridge is a monumental structure, which will be visible from far and wide. It furnishes an unusual opportunity for artistic treatment. The plans have been prepared by a distinguished engineer, Mr. Gustav Lindenthal. Had these plans been purely structural, and had the treatment of this bridge in all its parts been strictly utilitarian, your committee would nevertheless have recommended the approval of the plans, though they would have regretted that this opportunity for artistic treatment had not been availed of. They are quite ready to accept the judgment of Mr. Lindenthal on all engineering or structural questions.

"It has been attempted, however, to give decoration to the towers and to the bases of the towers. This attempt has not, in the opinion of your committee, been satisfactory from an artistic point of view. Your committee cannot approve these decorative features, as they would have been ready to approve a strictly utilitarian construction, or better still, a scheme of ornamentation which would seem to them artistic and appropriate.

"They therefore recommended disapproval of the plans without prejudice to their resubmission, with a different treatment of the towers and their bases."

Commissioner Cook recommended that the plans be approved.

On motion, the following resolution was adopted, Commissioner Healy not voting because he had not had sufficient opportunity to examine the designs carefully.

Certificate 594.

Resolved, That the Art Commission hereby disapproves the designs of the Hell Gate Bridge, represented by Exhibits "281-A," "281-B," "281-C," "281-D," "281-E," "281-F," "281-G," "281-H" and "281-I," of record in this matter; and that the action of the Commission be certified, with return of duplicates of exhibits herein noted, to the New York Connecting Railroad Company.

FRANCIS K. PENDLETON, Corporation Counsel.

BOARD OF EXAMINERS.

New York, July 1, 1907.

Present—Messrs. Warren A. Conover, Charles G. Smith, Lewis Harding, Edward F. Croker, Charles Buck, Henry R. Marshall and George A. Just, Chairman.

Meeting called to order at 2 p. m.

On motion, minutes approved as read.

Mr. Smith was excused by the Chairman.

The Chairman presented and read a letter from Mr. Peter J. Collins, relative to Appeal No. 36, under date of July 1, 1907, which was, on motion, ordered on file. Appeal No. 36, of 1907, new building of 1907, premises northwest corner of Ralph avenue and Quincy street, Brooklyn, Herbert R. Brewster, appellant. Laid over at last meeting.

Mr. H. R. Brewster appeared before the Board.

On motion, approved on condition that the steps and risers and terraces on balcony and gallery be made fireproof.

Appeal No. 38, of 1907, new building 551, of 1907, premises west side of Brook avenue, 151 feet north of One Hundred and Sixty-third street, The Bronx. George N. Reinhardt per Michael J. Garvin, architect.

Referred to Chief Croker for examination and report.

Appeal No. 39, of 1907, new building 443, of 1907, premises south side of One Hundred and Eighth street, 190 feet east of First avenue, Manhattan, George Haiss Manufacturing Company, appellants.

No. 1. Frame structure, unlawful within the fire limits.

The Code makes no direct provisions for such structures, the nearest reference thereto being for grain elevators, on tide water or adjacent to the river front.

That the rules and regulations of the President of the Borough and the provisions of the law do not apply.

That the Superintendent of Buildings, in view of the fact that the Code makes no direct provisions for such buildings, erred in rejecting the above cited application.

That as to the mode, manner of construction and material to be used, the Superintendent of Buildings erred in rejecting the above cited application.

That the provisions of the Code may be so far modified as to permit the erection of this practically semi-fireproof building for the purposes set forth.

The location of this coal pocket is in a place wholly devoted to manufacturing and commerce and is isolated from any residences.

That it is to be located in close proximity to the East river, a water way for handling the coarser and heavy freights.

That the construction of other than heavily timbered coal pockets is practically prohibitive by reason of excessive cost, and further by reason of the short lived nature of such buildings.

In this case the granting of this permit will operate to the interest of the public, and this, in connection with the fact that the competition is fierce from adjacent cities where there are no restrictions, and that coal is handled at a close margin, makes it important to grant this permit.

On motion, referred to Chief Croker for examination and report.

Appeal No. 40, of 1907, alteration 620, of 1907, premises No. 254 Fifth avenue, Manhattan, Henry A. Smith, appellant.

1. Walls are of unlawful thickness for store and office building.

2. The provisions of the law or ordinances do not apply.

The thickness of the existing walls as apply to the occupancy of this building by stores and offices.

(1) The span between the walls is short.

(2) The walls and floors, as existing, are very well built and capable of sustaining the weight to be imposed thereon.

The building is not to be increased in height.

(3) The building is occupied by open lofts on the first and second floors at present, with living rooms, partitions on the third, fourth and fifth floors, which are to be removed under the alteration, thereby relieving the first and second floors from the weights transmitted from above and correspondingly upon the walls.

(4) If this building were to be considered under the same law as would apply to a new building, an undue hardship would be imposed upon the present occupants, because of a lease for a long term of years.

Mr. Henry A. Smith appeared before the Board.

On motion, approved.

Adjourned.

EDWARD V. BARTON, Clerk.

Every bidder, as a condition precedent to the reception or consideration of his proposal, shall deposit with the Comptroller in money, or by a certified check drawn to the order of said Comptroller upon a solvent banking corporation, two per cent. of the par value of the bonds or stock bid for in said proposal.

No proposal will be received or considered which is not accompanied by such deposit. All such deposits shall be returned by the Comptroller to the persons making the same within three days after the decision has been rendered as to who is or are the highest bidder or bidders, except the deposit made by the highest bidder or bidders.

4. If said highest bidder or bidders shall refuse or neglect, within five days after service of written notice of the award to him or them, to pay to the City Chamberlain the amount of the bonds or stock awarded to him or them at its or their par value, together with the premium thereon, less the amount deposited by him or them, the amount or amounts of deposit thus made shall be forfeited to and retained by said City as liquidated damages for such neglect or refusal, and shall thereafter be paid into the Sinking Fund of The City of New York for the Redemption of the City Debt.

5. Upon the payment into the City Treasury by the persons whose bids are accepted, of the amounts due for the bonds or stock awarded to them respectively, certificates thereof shall be issued to them in such denominations provided for by the Charter as they may desire.

6. It is required by the Charter of the City that "every bidder may be required to accept a portion of the whole amount of bonds or stock bid for by him at the same rate or proportional price as may be specified in his bid; and any bid which conflicts with this condition shall be rejected, provided, however, that any bidder offering to purchase all or any part of the bonds offered for sale at a price at par or higher may also offer to purchase all or none of said bonds at a different price, and if the Comptroller deems it to be in the interests of the City so to do, he may award the bonds to the bidder offering the highest price for all or none of said bonds; provided, however, that if the Comptroller deems it to be in the interests of the City so to do, he may reject all bids." Under this provision, the condition that the bidder will accept only the whole amount of bonds or stock bid for by him, and not any part thereof, cannot be inserted in any bids, except those for "all or none" offered by bidders who have also bid for "all or any part" of the bonds or stock offered for sale.

7. Bonds or stock issued in Coupon form can be converted at any time into Registered Bonds or Stock, and bonds or stock issued in Registered form can be converted at any time into Coupon Bonds or Stock in denominations of \$1,000.

8. The proposals, together with the security deposits, should be inclosed in a sealed envelope, indorsed "Proposals for Bonds of The City of New York" and said envelope inclosed in another sealed envelope, addressed to the Comptroller of The City of New York. (No special form of proposal is required, therefore no blanks are furnished.)

The policy shall provide for the full indemnification of all salvage expenses and loss, damage, detriment or hurt to said vessels for which the insurers are liable against the perils of the harbor, bay or rivers as above named, lightning and fires that shall occur to the hurt, detriment and damage of said vessels or either of them, or any part thereof, and for all damage which may be done by the vessels insured to any other vessel or property.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope, addressed to the Commissioner of Docks, or submitted personally upon the presentation of the bid or estimate.

The bidders shall state a rate per cent. at which they will insure or contract for insurance for the ferryboats, as specified above, in accordance with the terms of this advertisement, and also in accordance with the form of policy submitted, which shall be considered in connection with and form part of the bid.

No. 17. FOR FURNISHING AND INSTALLING LOOSE-LEAF SHAKING AND DUMPING GRATES FOR STEAM BOILERS IN SCHOOLS IN ALL BOROUGHES.

The time allowed to complete the work in each school will be two weeks, calendar time, from date of order in each case.

The amount of security required is Two Thousand Dollars (\$2,000).

The State Commission of Prisons has the right under the provisions of the Law to furnish these grates, but in many cases they cannot furnish them within the time limit allowable, and therefore issue a certificate or release permitting of goods being purchased in the open market. Immediately upon receipt of such certificate the Superintendent of School Buildings will issue an order to the contractor under this contract, and said contractor shall then proceed at once to install the grates covered by such certificate, and shall complete the installation of such grates within the above specified contract time.

The probable quantity of such grates needed by this department within the year will be about 1,500 square feet, but owing to the above stated law allowing the State Commission of Prisons to furnish all, or such part as they can, of such grates, no exact amount of grates to be furnished under this contract can be stated or determined.

Bids will be received upon the basis of an estimate per square foot for full sets of grate surface set in place.

Bids will also be received upon the basis of cost per pound for repair parts which also shall be inclusive of cost of setting in place, complete, inclusive of freight and cartage to the schools wherever located. Also all alterations, connecting and repairing, etc., of fronts and masonry necessary in the setting of the grates.

The Department of Education will furnish and set front and rear bearing bars ready for the reception of grates.

The grates shall be of approved pattern of loose-leaf shaking and dumping grates for steam boilers, weighing at least 90 pounds per square foot.

Blank forms may be obtained or seen at the office of the Superintendent at Estimating Room, ninth floor, Hall of the Board of Education, Park avenue and Fifty-ninth street, Borough of Manhattan.

PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be enclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
