The Messenger is required for important service principally under the direction of the Chairman of the Committee on Buildings and Apparatus.

\$406,000 were asked and \$360,000 allowed for the current year; the increase over the Departmental estimate of last year is mainly in the item "Buildings and Repairs," the amount being \$29,300. The Superintendent of Repairs to Buildings has submitted an estimate in detail of necessary repairs to buildings occupied by the Department, specifying the several kinds of work required and the estimated cost thereof for each building, which aggregates the amount asked therefor. In general it may be said that the appropriations allowed for repairs to buildings have for years been inadequate, and the result is that the houses of the Department are now in a condition requiring very extensive repairs. The remaining increase is upon the following items:

Apparatus and repairs	\$5,000 00
General supplies	5,000 00
Horse-feed and straw	2,000 00
Telegraph supplies and repairs	4,200 00
Repairs to fire steamers	1,000 00

In all cases the additions are rendered necessary by the growth of the Department and the increasing demands upon it.

For Placing Fire-alarm Electrical Conductors Underground. (chap. 499, 1885)

The completion of the subway work now under contract will exhaust the present appropriation, and the amount asked for can be judiciously used during the coming year. It is believed that \$100,000 can be used with much better advantage to the service during one year, than if its expenditure is made to cover two years, as has been the policy heretofore.

The house for Engine Company 18 at No. 132 West Tenth street is old, having been built for the Volunteer Department in 1863, and its condition is such as to make it more economical to build a new one in its place than to expend money in making extensive repairs and alterations to it. The location is a very important one, the house being occupied by a double company.

The new houses are to be erected upon some of the new sites asked for in another part of this estimate, and the necessity for new companies in these localities is set forth under that head.

In a report dated February 11, 1890, the Chief of Department invited attention to the extraordinary growth of the city north of One Hundred and Tenth street, in which section no new companies have been organized since 1874, while the number of fires has increased more than one hundred per centum.

Total..... \$2,414,117 00

The foregoing estimate, amounting to two millions four hundred and fourteen thousand one hundred and seventeen (\$2,414,117) dollars, is adopted as the sum of money which will be required for the expense necessary to the administration and conduct of the Fire Department of the City of New York, for the year 1891.

and custodian of the many and immense interests involved in the City's water supply, to briefly present to
the people of the City the present condition of the
supply, and the extreme necessity for care and economy
in the use of the water.

For a number of years past and up to the present time, the old Aqueduct and the Bronx river conduit have delivered in the City all the water which they are capable of carrying, the supply thus remaining stationary when the City has been constantly growing in population, buildings, manufactures and commerce, creating new and additional demands upon the water service. The consequence is that at certain seasons of the year, notably in extreme cold weather, when the habit of wasting water from faucets to prevent freezing in the pipes prevails, and in warm and dry weather, when various methods of waste are in vogue, the daily consumption exceeds the supply which can by any possibility be received through the old Aqueduct and the Bronx river conduit, the excess of consumption being drawn from the city reservoirs, diminishing the depth of water and the pressure in the distributing mains. There is no possibility of increasing the water supply received in the City until the new Aqueduce is brought into operation, and in the meantime the only reliance for a fair and equal distribution of water throughout the city is care and economy in its use on the part of the people. Already the depth of water in the reservoirs is being diminished at the rate of one inch per day, and if this should continue for any length of time, the pressure in the distributing mains would be so reduced that it would be impossible to deliver water in thousands of houses located on high ground, and in some other locations even in the basements or cellars.

I, therefore, most carnestly appeal to all citizens, residents and people carrying on business in this city to be careful and economical in the use of water, in justice to themselves, to the people at large, and especially to those who are so located as to be already suffering inconvenience from insufficient supply of water.
