What authorizes the DEP to make this rule? Section 1043 of the City Charter and sections 24-204, 24-219 and 24-221 of the Administrative Code authorize DEP to make this proposed rule. This proposed rule was included in DEP's regulatory agenda for this fiscal year.

Where can I find DEP's rules? DEP's rules are in Title 15 of the Rules of the City of New York.

What rules govern the rulemaking process? DEP must meet the requirements of Section 1043(c) of the City Charter when creating or changing rules. This notice is made according to the requirements of section 1043(b) of the City Charter.

Statement of Basis and Purpose of Proposed Rules

On December 29, 2005, Local Law 113 for the year 2005 became effective. The law amended the Administrative Code of the City of New York in relation to the Noise Control Code. Specifically, the law established standards and procedures to reduce noise from construction, and established sound level standards and procedures for specific noise sources. Pursuant to section 24-219 of the Noise Code, in 2007, DEP promulgated rules that prescribe the methods, procedures, and strategies that must be used whenever there is a construction site that will utilize certain construction devices or activities.

For after-hours construction, section 24-221 of the Noise Code authorizes the Commissioner to grant an approval for an alternative noise mitigation plan if the alternative noise mitigation strategies, methods, procedures or equipment proposed are consistent with the purposes and policies of the Noise Code. The proposed amendment would require the use of noise monitoring devices as part of such a plan in order to help regulate construction noise.

Specifically, this proposed amendment would require the use of noise monitoring devices at construction sites 200,000 or more square feet that are located within 50 feet of a residential receptor and that will have ongoing after-hours construction for 30 days or longer.

The City's 311 system received over 20,000 complaints for afterhours construction noise in 2023. This rule would require the party responsible for a construction site to perform noise monitoring of the site. The data collected would identify any times when the sound levels exceeded those allowed by the Noise Code and the Alternative Noise Mitigation Plan (ANMP). This data would inform whether additional mitigation strategies are needed, or whether the hours that the work is permitted should be reduced or changed. Monitoring would also enable DEP to better advise the responsible party about what needs to be done to stay within prescribed noise levels. Appropriate noise attenuation is expected to reduce noise complaints.

The proposed rule is authorized by section 1043 of the Charter of the City of New York as well as sections 24-204, 24-219 and 24-221, of the Administrative Code of the City of New York.

The text of the rule follows. New matter is underlined.

Proposed Rule Change

Section 1. Subdivision o of section 28-101 of chapter 28 of Title 15 of the Rules of the City of New York is relettered as subdivision s, and new subdivisions o, p, q and r are added, to read as follows:

o. Noise Monitoring at Construction Sites

1. When a new building construction project requires an Alternative
Noise Mitigation Plan (ANMP) pursuant to Section 24-221, the
duration of that ANMP is for 30 days or longer, the project's square
footage is 200,000 or more, and the work site is within 50 feet of a
residential receptor; at least one noise monitoring device must be
placed facing the nearest sensitive receptors, as defined in 15 RCNY
28-101(i), or the nearest residential receptor, whichever is closer. The
application for the ANMP shall include a map identifying the sensitive
and residential receptors within a 75 foot radius of the site that are
shown on the Department of City Planning's ZoLa Map, which can be
accessed at ZoLa | NYC's Zoning & Land Use Map¹, and the map shall
show the proposed location of the noise monitoring device(s). The
ANMP application shall also provide the number and locations of
monitoring devices, and the responsible party's name and contact
information.

- 2. The noise monitoring device(s) must be installed on the construction site and collect data for the duration of the project, until the construction activities taking place at the site are limited to minimal noise impact construction activities, as set forth in 15 RCNY§ 30-102, and interior renovation work, as defined in 15 RCNY§ 28-110.
- 3. Readings must be measured in A-scale. The responsible party must transmit the data collected by the monitoring device(s) to DEP via the designated public API endpoint using the required API payload specifications. The data provided must include the GPS location of the monitoring device, including latitude and longitude, the recorded decibel level, the date and time of the reading, and Lmax as defined in section 24-203 of the Noise Code, across a 1-minute sampling interval and recorded every minute during the duration of the project. Such data shall be transmitted every hour.

¹ https://zola.planning.nyc.gov/about#9.72/40.7125/-73.733.

- p. Noise Monitoring device installation and maintenance is required as
- 1. Noise monitoring devices must be mounted approximately 8-10 feet off of the ground, either on a wall or on a pole. Each device must be equipped with an outdoor microphone with wind and rain protection that is at least a class 2 type microphone and conforms to IEC 61672-1. If wall-mounted, the device must be installed with the outdoor microphone at least one foot away from the nearest surface to avoid sound reflection.

2. The windscreens on each monitoring device must be checked at least once a month and replaced if there is any damage to the foam surface or other defect.

3. Noise monitoring devices can be powered via an external source or a rechargeable solar platform.

q. Subdivisions o and p of this section do not apply to:
(1) the construction of a building in which all of the dwelling units will be affordable housing units as defined in section 26-2201 of the Administrative Code; or

(2) emergency work as defined in section 24-223(e)(1) of the Administrative Code.

r. DEP may maintain an "Approved Devices" list in order to facilitate compliance with this rule. In order for a noise monitoring device to be added to the list, the device must satisfy the criteria set forth in subdivision o of this section. A device may be removed from the Approved Devices list at any time if the department determines that it does not meet such criteria. The Approved Devices list shall be posted on the department's website at www.nyc.gov.
