

ANNALS OF THE NEW YORK ACADEMY OF SCIENCES

Special Issue: *Advancing Tools and Methods for Flexible Adaptation Pathways and Science Policy Integration*

ACKNOWLEDGMENTS

Acknowledgments

The authors thank the Center for Climate Systems Research at the Earth Institute of Columbia University, the Institute for Sustainable Cities, Hunter College–City University of New York, NASA (Interdisciplinary Research on Earth System Modeling and the Impacts of Climate Change, Award 80NSSC17M0057 and Community Service Funds, WBS 527813.02.01.01.03), and the Consortium for Climate Risk in the Urban Northeast (CCRUN) (NOAA Award NA15OAR4310147) for their contributions of research and staff time toward the development of the NPCC 2019 Report.

Additionally, the authors thank the New York City Department of Environmental Protection and the New York City Emergency Management through the FEMA Cooperating Technical Partners Program (Grant No. EMN-2016-CA-00002) for providing funding support for NPCC3 research.

The authors also thank the collaborative efforts of the New York City Mayor's Office of Recovery and Resiliency, under the leadership of Jaimey Bavishi; in particular, Dana Kochnowier and Katherine Greig were integral to coordinating the co-generation process between scientists and stakeholders for NPCC3.

We acknowledge the excellent research assistance of Ryan Brenner, An-Chi Ho, Eric Jung, and Katherine Towey; and the editorial expertise of George Ropes. Somayya Ali Ibrahim and Amanda Evengaard provided superb support for the NPCC Summit and Celebration, Science and Decision-Making in a Warmer World: 10 Years of the NPCC.

At the New York Academy of Sciences, we thank Douglas Braaten, chief scientific officer (science publications) and editor-in-chief, for his dedication to making the report a timely finished product; Steven E. Bohall, senior editor, for editing and production; and Jennifer Costley for co-organization of the NPCC Summit at the New York Academy of Sciences on March 15, 2019.

We give special thanks to Danielle Manley and Daniel Bader for their tireless efforts during the entire NPCC3 process.

Finally, we dedicate the NPCC 2019 Report to our friend and colleague Stuart Gaffin. The report in many ways reflects a continuing legacy of his work.
