Hon, Louis F. Harren, President, Horough of The Rooms.

DEAR Stu-L am desirous of having built, in consection with the archon motor the Brows river, which is a part of the nutler sewer through the as Park for the Wittensteinder Sever System, a series of catch-pits north of this appear to rolled the honey deposit which how certies in the siphur.

the settling of this heavy untertal in the septem, and diplical heliog nearly 300 for long, with openings only at each end, makes it necessary to us an clear this septem several times a year, and each cleaning necessitates the pumping dry of this septem, the deverting of the flow of the sewer at a point above the siphon into the Bronx over and then practically digging this material out of the siphon, which can readily be understood a no expensive piece of work.

So, in order to avoid this, I wish, as I have setted source, to take up about one hundred fact of the sewer north of this alphon and depress it about four feet and make it a twin sewer throughout this depression and divide this depressed sewer land about ten except, with wirable manhole openings above them.

manhole openings above them-

The twin sewer is advisable, so that the flow can be diverted by gates into one while the other is being cleaned, and then the flow diverted into the clean one until the same becomes filled up and so on.

The approximate estimate of cost, to accomplish this alteration and improvement, will be five thousand dollars (55,000).

I would therefore respectfully request the Local Board to pass a resolution providing for the altering and improving of about 100 feet of sewer north of the siphon across the Brons river, in Brons Park, in order to prevent the filling up of this siphon.

Respectfully,

J. H. FITCH, Engineer-in-Charge.

The Securiary was directed to inquire, from the Department of Sewers, Borough of The Brons, as to how the improvement was to be paid for, and, if by assessment, as to how large an area could be as a seed.
