POLICE DEPARTMENT.

REPORT FOR THE QUARTER ENDING JUNE 30, 1907.

Police Department of the City of New York.
Office of the Commissioner, No. 300 Mulberry Street,
New York, July 3, 1907.

His Honor, the Mayor, City Hall, New York City:

Sir—As required by section 1544 of the Greater New York Charter, I have the honor to submit the following report for the quarter ending June 30, 1907:

On June 30 the total Force was 9,402. In addition there were on probation 36 Patrolmen and 3 Doormen.

The effective Force on June 30 was 8,524, 429 being absent with leave, 208 sick, 6 suspended, 3 absent without leave, and 232 detailed.

During the last quarter the losses in the several ranks were as follows:

Retired—Four Captains, 18 Lieutenants (including the former ranks of Sergeant and Detective Sergeant) 1 Sergeant (formerly Roundsman), 38 Patrolmen, 3 Doormen, making a total in all ranks of 64.

Died—One Captain, 3 Lieutenants (including the former ranks of Sergeant and Detective Sergeant), 2 Sergeants (formerly Roundsmen), 18 Patrolmen, making a total in all ranks of 24.

Dismissed—Two Lieutenants (including the former ranks of Sergeant and Detective Sergeant), 21 Patrolmen and 7 Patrolmen on Probation, making a total in all ranks of 30, including Probationary Patrolmen.

Resigned—Twenty-four Patrolmen, 6 Patrolmen on Probation and 1 Doorman on Probation, making a total in all ranks of 31, including Probationary Patrolmen and Doorman.

The legislation designed to secure certain changes in the Force, which was referred to in the preceding quarterly report, became law April 19. As a result the Detective Bureau has been reorganized and the office of Inspector has become a temporary detail from the rank of Captain.

Surgical districts for members of the Force now include members living within certain boundaries, instead of those doing duty within certain boundaries. A member of the Force reporting sick is now treated by the Police Surgeon within whose district he lives, where formerly the Surgeon might have had to traverse the length of the city to reach an officer ill at his home and living far from his precinct. The change is better for the Surgeons and better for the officers.

The annual parade of 1907 took place Saturday, May 11, and was witnessed by your Honor, who was pleased to send the Police Commissioner a complimentary letter upon the performance of the Force, which letter was duly published in general orders. One new feature is worthy of notice. For the first time a body of men in the School of Instruction—the recruits—marched as a separate command. These men performed a fairly difficult drill in front of the grand stand which could not have been better done by veterans, and between their marching and that of the more seasoned men there was practically nothing to choose.

The usual presentations of medals for 1906 were made by his Honor, the Mayor, just before the parade. Contrary to custom, only one medal of honor of the Police Department was awarded for 1906, the desire being to make the award of this medal the highest mark of official approval that can be shown to a member of the Force.

Special attention was paid during the quarter to the arrest of persons carrying concealed weapons, and a number of fruitful raids were made.

There was a strike of longshoremen beginning in the early part of May and lasting for several weeks. It was said that ten thousand men were out. Careful attention was paid to the matter and fortunately but few and slight occasions of violence arose.

The first of May being the time for renewing licenses, all issued by this Department were rigidly scrutinized, and in cases of violation of the law on record during the past year the owners and managers were looked into, their licenses held up for some time, but all were finally issued, with caution for good behavior in the future. There were many complaints by the Society for the Prevention of Cruelty to Children against the five-cent shows of various kinds. Most of these were running under a common show license issued by the License Bureau in the Mayor's office. A great number of them were carefully examined and inspected under my personal direction, and the evidence in each case was submitted to his Honor, the Mayor, with request for revocation of the license. This matter is still under advisement and before the Court. The suppression of these cheap shows which violate the law would be a prominent factor in the betterment of city conditions, and it is earnestly hoped that your Honor will not be lenient in permitting the renewal of these licenses. In every case which was reported this Department is prepared to give corroborative evidence.

After numerous and vexatious delays, considerable progress has been made in obtaining sites and beginning work on the plans for new station houses in the lower part of Manhattan to replace some of the old and unsanitary station houses. Owing to the high price of land in Manhattan it has not been possible to accomplish as much with the appropriation as was at first hoped for, and request has been made to the City authorities for a second installment of two million dollars for this purpose. I cannot too urgently press the necessity for this reconstruction of old station houses. The conditions are truly horrible in some of them, not only for prisoners, but also for the men themselves. Some of the sleeping quarters are hardly better than kennels, and I believe that new station houses will assist greatly in raising the tone of the Police Force.

While the Police Department nominally has seven launches for patrolling the waters of the City, as a matter of fact none of them is fit for use. Only two of them can be kept in commission for a week or two at a time. Plans have been drawn and bids called for for the construction of two new launches of proper design. So urgent is the need for new launches that the Department has already asked for the issue of bonds for the construction of two more at once. The Department should have eight of these launches.

Considerable work has been done towards the compilation of a new Police Manual of Rules and Regulations. The Department is so short of these manuals that it has been impossible to supply several hundred new recruits with copies to which they are entitled, but the cost of the eleven thousand is so great that it has been deemed advisable to revise the whole book, which has been a pressing need for some time.

Considerable progress has been made in systematizing the work of the Detective Bureau under the new organization. This work naturally progresses slowly and must be carefully conducted. It is the endeavor so to plan whatever is done that it will last for many years and prove a broad foundation for the great growth in this Department which must naturally come with time.

Instead of telephoning out a mass of "general alarms" to look for missing persons, stolen articles, etc., these are now printed daily and furnished to the Force in pamphlet form, except in cases of extreme urgency, when the use of the telephone is imperative. This saves the time of the Lieutenants on desk duty in the several station houses, who were formerly obliged to take these "alarms" from the telephone, and it also furnishes the "alarms" in better shape for use and preservation.

The method of rendering service to persons looking for missing relatives or friends has also been put on a better basis.

Having in mind the general lack of knowledge on the part of the public of the mechanism of the Department, and of the proper action for prompt relief in emergencies and in cases of police inefficiency, discourtesy, etc., a pamphlet was prepared for general distribution, containing such brief instructions as it was thought would bring about more effective co-operation between the public and this Department and a better understanding of the Department's facilities for efficient service. These booklets have been eagerly sought, and I am satisfied that they will accomplish their purpose.

The following schedules give, for the quarter ending June 30, 1907, the statistics customarily reported:

The time allowed to complete the work in each school will be two weeks, calendar time, from date of order in each case.

The amount of security required is Two Thousand Dollars (\$2,000).

The State Commission of Prisons has the right under the provisions of the Law to furnish these grates, but in many cases they cannot furnish them within the time limit allowable, and therefore issue a certificate or release permitting of goods being purchased in the open market. Immediately upon receipt of such certificate the Superintendent of School Buildings will issue an order to the contractor under this contract, and said contractor shall then proceed at once to install the grates covered by such certificate, and shall complete the installation of such grates within the above specified contract time.

The probable quantity of such grates needed by this department within the year will be about 1,500 square feet, but owing to the above stated law allowing the State Commission of Prisons to furnish all, or such part as they can, of such grates, no exact amount of grates to be furnished under this contract can be stated or determined.

Bids will be received upon the basis of an estimate per square foot for full sets of grate surface set in place.

Bids will also be received upon the basis of cost per pound for repair parts which also shall be inclusive of cost of setting in place, complete, inclusive of freight and cartage to the schools wherever located. Also all alterations, connecting and repairing, etc., of fronts and masonry necessary in the setting of the grates.

The Department of Education will furnish and set front and rear bearing bars ready for the reception of grates.

The grates shall be of approved pattern of loose-leaf shaking and dumping grates for steam boilers, weighing at least 90 pounds per square foot.

PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department. No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
