An ambulance was called and the worker was transported to the hospital for evaluation.</li> <li>At around 8:15am an MPI worker was lifting a toilet on the 31st floor when he turned his body, he twisted his left knee and felt pain and had trouble walking. An ambulance was called and the worker was transported to the hospital for evaluation.</li> <li>Worker was on the 11th floor roof working on an elevated structurer around the emergency generator at a high of approximately 8 feet. While using a piece of kindorf to pry 3 pcs of Q-decking sack up to create space to work, the metal grating below slid causing 3'x5' metal grating to slid off it support beam causing it to fall to roof top approximately 8feet causing work to fall.</li> <li>Worker was stripping formwork on the first floor. He was standing on a shoring tower 6 feet above ground tied off to the tower. While he was removing the beam at the top of the showering tower he lost balance and fell to the ground. He hurt his head and right shoulder and was escorted off site by ambulance.</li> <li>The worker was carrying garbage down the stairs when he tripped and fell. The 3rd and 4th floors were being cleaned and the worker fell at the stairs on the 2nd floor while bringing the garbage down to the ground level for removal.</li> <li>Injury/Illness: A worker was discovered laying near a 20-yard container on the ground street level, close to his work area (same level). There was no equipment or material in the area where he was found laying. He was conscious at the time and was taken to the emergency room due to head discomfort. At this time, it is unclear whether the injury is related to a personal health condition the incident is currently under investigation. Worker was admitted to the hospital.</li> <li>An ironworker was using a grinder with a guard to prepare a steel plate for installation when sparks caused his long-sleeve shirt to begin smoldering. An ambulance was called and the worker was transported to the hospital for evaluation.</li> <li>At around 8:15am an MPI worker was lifting a toilet on the 31st floor when he turned his body, he twisted his left knee and felt pain and had trouble walking. An ambulance was called and the worker was transported to the hospital for evaluation.</li> <li>Worker was on the 11th floor roof working on an elevated structurer around the emergency generator at a high of approximately 8 feet. While using a piece of kindorf to pry 3 pcs of Q-decking sack up to create space to work, the metal grating below slid causing 3'x5' metal grating to slid off it support beam causing it to fall to roof top approximately 8feet causing work to fall.</li> <li>Worker was stripping formwork on the first floor. He was standing on a shoring tower 6 feet above ground tied off to the tower. While he was removing the beam at the top of the showering tower he lost balance and fell to the ground. He hurt his head and right shoulder and was escorted off site by ambulance.</li> <li>The worker was carrying garbage down the stairs when he tripped and fell. The 3rd and 4th floors were being cleaned and the worker fell at the stairs on the 2nd floor while bringing the garbage down to the ground level for removal.</li> <li>Injury/Illness: A worker was discovered laying near a 20-yard container on the ground street level, close to his work area (same level). There was no equipment or material in the area where he was found laying. He was conscious at the time and was taken to the emergency room due to head discomfort. At this time, it is unclear whether the injury is related to a personal health condition the incident is currently under investigation. Worker was admitted to the hospital.</li> <li>An ironworker was using a grinder with a guard to prepare a steel plate for installation when sparks caused his long-sleeve shirt to begin smoldering. An ambulance was called and the worker was transported to the hospital for evaluation.</li> <li>At around 8:15am an MPI worker was lifting a toilet on the 31st floor when he turned his body, he twisted his left knee and felt pain and had trouble walking. An ambulance was called and the worker was transported to the hospital for evaluation.</li> <li>Worker was on the 11th floor roof working on an elevated structurer around the emergency generator at a high of approximately 8 feet. While using a piece of kindorf to pry 3 pcs of Q-decking sack up to create space to work, the metal grating below slid causing 3'x5' metal grating to slid off it support beam causing it to fall to roof top approximately 8feet causing work to fall.</li> <li>Worker was stripping formwork on the first floor. He was standing on a shoring tower 6 feet above ground tied off to the tower. While he was removing the beam at the top of the showering tower he lost balance and fell to the ground. He hurt his head and right shoulder and was escorted off site by ambulance.</li> <li>The worker was carrying garbage down the stairs when he tripped and fell. The 3rd and 4th floors were being cleaned and the worker fell at the stairs on the 2nd floor while bringing the garbage down to the ground level for removal.</li> <li>Injury/Illness: A worker was discovered laying near a 20-yard container on the ground street level, close to his work area (same level). There was no equipment or material in the area where he was found laying. He was conscious at the time and was taken to the emergency room due to head discomfort. At this time, it is unclear whether the injury is related to a personal health condition the incident is currently under investigation. Worker was admitted to the hospital.</li> <li>An ironworker was using a grinder with a guard to prepare a steel plate for installation when sparks caused his long-sleeve shirt to begin smoldering.
