MESSAGES FROM HIS HONOR THE MAYOR.

The President laid before the Council the following message from his Honor the Mayor:
No. 931.

CITY OF NEW YORK—OFFICE OF THE MAYOR, {
January 24, 1899.

To the Honorable the Council:

I return herewith, without my approval, a resolution adopted by you on October 11, 1898, authorizing and directing the Auditor to audit and the Comptroller to pay certain bills incurred by the Department of Correction in connection with the Kings County Penitentiary.

My objection to this resolution is that it directs the Comptroller's action, and thus deprives him of his power of audit over the claim.

ROBT. A. VAN WYCK, Mayor.

Resolved, That the Auditor be and he is hereby authorized and directed to audit and the Comptroller to pay the accompanying bills of Chandler's Piano and Music Rooms for six dollars, and James J. Farrell for twenty-six dollars and thirty-eight cents, incurred by the Department of Correction of the Borough of Brooklyn, in pursuance of a time-honored custom of giving an entertainment on Washington's Birthday for the benefit of the prisoners confined in the Kings County Penitentiary.

Which was laid over, ordered to be printed in the minutes and published in full in the CITY RECORD.

The President laid before the Council the following message from his Honor the Mayor:
No. 265.

CITY OF NEW YORK—OFFICE OF THE MAYOR, {
January 24, 1899.

To the Honorable the Council:

I return herewith, without my approval, a resolution giving permission to Bernard Stock to keep a watering-trough at the curb on the southwest corner of One Hundred and Fifty-fourth street and Morris avenue, Borough of The Bronx.

My objection to this resolution is that the Commissioner of Water Supply is authorized to supply water for this watering-trough at the expense of the city. The Commissioner of Water Supply reports that the omission of a requirement that the beneficiary shall pay for the water used is a departure from the practice "which has in all cases heretofore" prevailed "where watering-troughs are allowed to be placed in front of business establishments at private expense and in a measure for private benefit." There should be uniformity of action in such cases.

ROBT. A. VAN WYCK, Mayor.

Resolved, That permission be and the same is hereby given to Bernard Stock, to place and keep a public watering-trough for horses at the curb on the southeast corner of One Hundred and Fifty-fourth street and Morris avenue, Borough of The Bronx, and that the Commissioner of Water Supply be authorized to supply water for said public watering-trough, the work to be done at his own expense, under the direction of the Commissioner of Highways; such permission to continue only during the pleasure of the Municipal Assembly.

Which was laid over, ordered to be printed in the minutes and published in full in the CITY RECORD.

The President laid before the Council the following message from his Honor the Mayor:
No. 121.

CITY OF NEW YORK—OFFICE OF THE MAYOR, {

REPORT:

That they held two public hearings, and that, having examined the subject, they believe the proposed ordinance to be necessary, amended as within noted, new matter being underlined and omissions in brackets, to wit: In section 1, paragraph E, the word "twelve" shall be substituted for the words "nine and one-half"; that the entire section 9 be omitted, making the former section 10 the new section 9.

AN ORDINANCE to regulate railroads in The City of New York.

Be it Ordained by the Municipal Assembly of The City of New York, as follows:

Section 1. Each and every passenger railroad car operated within the limits of The City of New York shall be kept in a neat, clean and orderly condition and shall, for the improvement of the service to a degree commensurate with the value of the franchises bestowed on the corporations operating such cars and in the interest of the public using such cars, be provided as follows:

(A)—Signs indicating the destination of each car shall be conspicuously displayed on the outside of the front, rear and both sides of such cars, and these signs shall be illuminated at night. They shall also have the license number conspicuously displayed within the car, together with the certificate of payment of license, as at present ordained, for convenience of inspection by the

proper officers, and the name and office address of the president of each railroad for the convenience of persons desirous of making complaints.

(B)—Each surface car must be provided with electric annunciators within the reach of every passenger and must be completely brought to a standstill to let the passengers off and on.

(C)—The so-called "shuttle" trains or cars must be abolished, and all cars must go through to their indicated destination.

(D)—In case of obstruction by fire or other obstacle on the route, if the stoppage shall exceed five minutes, fares shall be refunded to passengers in the form of "accident" tickets, and these shall at any time, when presented, be good for a continuous ride on any car of the company issuing the same.

(E)—The steps of the surface cars shall not be more than twelve inches from the ground, and fenders shall be used on all surface cars with rollers actually touching the rails so as to absolutely prevent the running over, mangling and destroying of persons who may be overtaken on the track.

Sec. 2. From September 15 of each year to July 1 of the succeeding year each and every surface railroad shall run at least one closed car for every three at the least of all cars operated; and whenever the thermometer shall fall below 55 degrees Fahrenheit the cars of all street railroad companies shall be heated.

Sec. 3. From evening until the following morning the cars of all street railroad companies shall be adequately lighted so as to enable passengers in any part thereof to read with comfort; and the provisions of this section shall take effect within thirty days after the passage of this ordinance.

Sec. 4. In case of accident, cars shall not proceed on their route, but shall remain at the place where the accident occurred until the arrival of the police and until released by proper authority.

Sec. 5. The penalty for the infraction of each and every one of the foregoing sections shall be one hundred dollars (\$100) for each trip, or part of trip, made within the limits of The City of New York, by any car violating the provisions of said sections; and such penalty shall be recovered in the name and for the use of The City of New York.

Sec. 6. Permission to operate express cars and funeral cars not having been conferred upon street railway companies by any franchise hitherto granted by The City of New York or by any of the former municipalities now embraced within the limits of said city, and a penalty of one thousand dollars (\$1,000) being now provided for each and every street railroad car operated for express and funeral purposes, such fine shall be recovered in the name and for the use of The City of New York.

Sec. 7. Arbitrary and unannounced changes of headway or route, and the removal of smoking cars where heretofore used, are hereby prohibited.

Such changes must be subject to the permission of the Municipal Assembly, and when permitted shall be advertised for not less than five days in two newspapers published in each borough of The City of New York, and which shall be designated by the Mayor. The penalty for each and every violation of this ordinance and for each day on which said violation takes place shall be one thousand dollars, and such penalty shall be recovered in the name and for the use of The City of New York.

Sec. 8. During the so-called "rush hours," between 5 o'clock and 7 A. M., and 5 o'clock and 7 P. M., when it may be impracticable with the present facilities for travel to provide seats for all passengers, the fare on all railroad cars shall not exceed three cents.

[Sec. 9. Inspectors to enforce the provisions of this ordinance, and of all other ordinances relative to railroads to which this is supplementary, shall be appointed by the Mayor at suitable salaries and under such regulations as shall insure activity, efficiency and zeal, in remedying abuses long complained of and in providing for the convenience of the public.]

Sec. [10.] 9. This ordinance shall take effect immediately.

They therefore recommend that the accompanying list of names constitutes the selection of the Municipal Assembly for Grand Jurors of the County of Kings.

OFFICE OF COMMISSIONER OF JURORS,

BROOKLYN, December 19, 1898.

To the Honorable the Municipal Assembly:

GENTLEMEN—I herewith transmit the list of persons selected to serve as Trial Jurors during the jury year 1898-99, from which I respectfully request your Honorable Body to select one thousand (1,000) Grand Jurors.

In the opinion forwarded by the Corporation Counsel to me, the following sentence appears: "In answer to your question then I advise you that it is the duty of the Municipal Assembly of The City of New York to provide you with the list from which to select the Grand Jurors."

Respectfully yours,

A. I. MICHAELS, Chief Clerk.

Specially designated pursuant to section 151, chapter 378, Laws of 1897.

LAW DEPARTMENT,
OFFICE OF THE CORPORATION COUNSEL,
NEW YORK, December 13, 1898.

Hon. WILLIAM A. FUREY, Commissioner of Jurors, Kings County:

DEAR SIR—I have received your communication of December 2, which reads as follows:

"It is now necessary to have a list of Grand Jurors for the County of Kings prepared and sent to me. Heretofore this duty was performed by the Supervisors or by the Common Council, as the successors of the Supervisors of this county. Will you please advise me upon whom this duty now devolves; an early reply will be greatly appreciated by me."

In reply thereto I would say that, by various statutes of the State, provision is made for the drawing of Grand Jurors in particular counties. By chapter 557 of the Laws of 1894, as amended by chapter 679 of the Laws of 1896, provision is made for every county, except the County of Onondaga, containing a city of not less than 60,000 nor more than 120,000 inhabitants; and by chapter 369 of the Laws of 1895 provision is made for each county of the State having a population of 300,000 or more, excepting the County of New York and the County of Kings.

This matter is regulated, so far as the County of Kings is concerned, by chapter 322 of the Laws of 1858. This act provides that the selection and summoning of jurors in the County of Kings shall be performed by a person to be appointed by a board consisting of the County Judge, the District Attorney, the Sheriff, the Surrogate and the Justices of the Court of Sessions in Kings County, who shall be known as the Commissioner of Jurors for the County of Kings. The manner of selecting the Grand Jurors is provided by sections 30, 31, 32 and 33 of that act.

Sections 30 and 31 read as follows:

Section 30. At a meeting of the board of supervisors of Kings county, which shall be held on the first Monday of September next succeeding the passage of this act, and on the same day in each year thereafter, the said supervisors shall proceed to select, from the list of all persons duly qualified to act as jurors and not exempt by law, which shall be provided by said commissioner of jurors, the names of such number of persons as shall be equal to five for every thousand of inhabitants in the county at the time the then last census was taken, to serve as grand jurors during the then ensuing year, and until a new selection is made.

Section 31. In making such selection, the said supervisors shall select such persons only as he knows, or has good reason to believe, are possessed of all the qualifications required of persons to serve as petit jurors, and who are, at the time, assessed for personal or real property to the amount of two hundred and fifty dollars. A list of the persons so selected, with their additions and places of residence, verified by the oath of the president or chairman of said board of supervisors, shall be made forthwith and filed in the office of the county clerk, and a copy thereof shall also be served on the said commissioner of jurors.

This act has been amended by chapter 821 of the Laws of 1866, and by chapter 315 of the Laws of 1870; but such amendments do not relate to the point under consideration.

By chapter 954 of the Laws of 1895 the governments of the County of Kings and the City of Brooklyn were consolidated. Section 3 of that act reads as follows:

Section 3. All the powers and duties that now are or hereafter may be conferred or charged upon the board of supervisors of the county of Kings shall, from the date aforesaid, be devolved upon, exercised and performed by the common council of said city as such, subject to the veto upon, exercised and performed by the board of supervisors of said county which can not, under any power conferred by this act or otherwise, be taken in any other manner, such action may be taken by the said common council as the board of supervisors of said county.

Under this section the duties formerly performed by the Board of Supervisors of the County of Kings as to the preparation of lists of jurors were performed by the Common Council of the City of Brooklyn.

By chapter 380 of the Laws of 1897 it is provided that in every county of the State wholly included within the limits of a city, but not comprising the whole of such city, there shall be a Board of Supervisors to be composed of the members of the Municipal Assembly, Board of Aldermen, Common Council or other legislative body of such city who shall be elected as such and also as Supervisors within the territorial limits of the county. It is made the duty of this Board of Supervisors to act as a Board of County Canvassers, and the power is given to it to divide the county into Assembly Districts, as provided by section 5, article III. of the Constitution. And section 3 of this act provides that every such Board of Supervisors shall have no other or further powers of local legislation or administration than these. By section 7 of this act it is provided that each and every Board of Supervisors in existence prior to January 1, 1898, in any county of the State falling within the provisions of section 1 of this act, shall, from and after said January 1, 1898, be abolished; and that all the rights, powers and duties which by law are vested in any such Board of Supervisors prior to said January 1, 1898, are wholly abrogated except as provided in that act.

Section 1586 of the Greater New York Charter reads as follows:

Section 1586. All powers of local legislation and administration in the counties of New York, Kings and Richmond, which are not at the time of the taking effect of this act vested in board of supervisors of said counties by an act entitled: "An Act to provide for boards of supervisors in counties wholly within the limits of a city, but not comprising the whole of such city, and defining the powers and duties thereof," or which are not vested in other county officers required by the constitution of the state to be maintained in said three counties respectively, are hereby vested in the municipal assembly of the city of New York, as constituted by this act, except where otherwise vested by this act in administrative departments or officers of said city.

It is true that at the time the Greater New York Charter went into effect there was no Board of Supervisors in the County of Kings, the powers and duties of such Board having been devolved upon the Common Council of the City of Brooklyn, but this section has the effect of vesting in

the Municipal Assembly of The City of New York all powers and duties of local legislation and administration in the County of Kings except as otherwise provided in that section, and even if this were not so the Municipal Assembly would have succeeded to such powers and duties under section 46 of the Charter.

In answer to your question then I advise you that it is the duty of the Municipal Assembly of The City of New York to provide you with the lists from which to select the Grand Jurors.

Very respectfully yours,
JOHN WHALEN, Corporation Counsel.

The rates or charges for licenses in the various other cities, towns or villages, now included in The City of New York, so far as I have been able to ascertain, are to be found in the ordinances of the Common Council of Long Island City and the charters of the villages of Edgewater, New Brighton, Port Richmond and Tottenville. I have not been able to find any records showing what was actually done under such authority, and what records there are have probably been delivered into the custody of the City Clerk of The City of New York, under the provisions of the Charter, or turned over to the Finance Department of this city, and either the City Clerk or the Comptroller may have the facilities for answering this part of your inquiry.

Second—As to "The amount of the revenues realized therefrom and paid into any of the sinking funds or the general funds thereof."

In the former cities of New York and Brooklyn there were bureaus having charge of licenses, and from these records the following information has been compiled.

The amount of revenues realized in the former City of New York and the appropriation thereof is set forth in the following schedule:

| YEAR. | CITY TREASURY. | | | SINKING FUND. | | |
|-----------|------------------|------------|------------------|---------------|------------------|--------------|
| | No. of Licenses. | Dogs. | Sundry Licenses. | Fines. | Sundry Licenses. | Totals. |
| 1893..... | 33,850 | \$8,893 00 | \$41,674 00 | \$5 00 | \$77,791 50 | \$128,363 50 |
| 1894..... | 25,203 | *298 00 | 37,301 75 | | 76,976 50 | 114,576 25 |
| 1895..... | 27,567 | | 40,844 50 | 160 00 | 82,947 50 | 123,952 00 |
| 1896..... | 29,008 | | 73,964 00 | 895 00 | 80,084 00 | 154,943 25 |
| 1897..... | 29,727 | | 90,389 50 | 5 00 | 113,676 00 | 204,070 50 |

The amount of revenues realized in the former City of Brooklyn is set forth in the following schedule:

| | |
|----------------|-------------|
| Year 1893..... | \$79,442 40 |
| Year 1894..... | 80,484 90 |
| Year 1895..... | 68,763 55 |
| Year 1896..... | 73,939 10 |
| Year 1897..... | 76,293 75 |

All license fees were turned over to the City Treasurer and by him credited to the Revenue Fund of the City of Brooklyn.

The amount of revenues realized from licenses in the various cities, towns and villages, other than above, now comprised in The City of New York, I have not been able to ascertain, although I have used every effort and much diligence to do so.

Third—"As to the detailed estimates of the amounts which will be realized in The City of New York from peddlers' licenses," issued at the rates specified in the Councilmanic resolution, I can only advise you that in the former City of New York in 1897 there were issued, under the ordinances regulating vendors of merchandise licenses, as follows:

| | |
|-------------------------------|-------|
| Fish dealers..... | 440 |
| Wagon licenses..... | 433 |
| Push-cart licenses..... | 2,017 |
| Basket and tray licenses..... | 1,024 |

Licenses to fish dealers are no longer issued, because of the prohibition of the Board of Health in the Sanitary Code, but such should be classed with and in addition to the wagon licenses above mentioned.

In the former City of Brooklyn, in the same year, there were issued 2,402 licenses to peddlers and 2,113 to hawkers.

I have not been able to gather any accurate information as to the number of peddlers in the other cities, towns or villages consolidated into the present City of New York.

By adding together the number of licenses issued to peddlers in the former cities of New York and Brooklyn, the total would probably indicate a number considerably less than the actual number of peddlers in the present City of New York, but how much less I have not been able to find any satisfactory way of ascertaining. Of course, if this number could be definitely determined and distributed fairly into the three classes of licenses mentioned in the third part of the Councilmanic resolution, it would then become a simple matter of arithmetic to ascertain the amounts receivable at the various license fees specified, but in the absence of any more reliable figures further than those already furnished, any estimate would be little more than guess work.

Fourth—As to "A schedule of the lowest estimated rates or charges for licenses affecting any item or source of the revenues of any of the sinking funds of said city, or of the general fund thereof, which, when applied to The City of New York as now constituted, will not tend to a diminution of the receipts from such source or revenue, or either of them."

In answer I can only say that the usual experience of this Bureau has been that an increase in the license fee results in a corresponding increase in the revenue from that class of licenses. For instance, the license fees of peddlers were raised in the former City of New York and took effect during the year 1896, and a comparative statement of the licenses issued in the former City of New York during the year 1895 and the year 1897, preceding and succeeding the raising of the fees by the ordinances of 1896, is shown in the following schedule:

| | | |
|-------------------------------------------------|-------|-------------|
| 1895, Merchandise with vehicle, new..... | 1,636 | \$8,180 00 |
| 1895, Merchandise with vehicle, renewal..... | 4,005 | 2,002 50 |
| 1895, Merchandise without vehicle, new..... | 769 | 769 00 |
| 1895, Merchandise without vehicle, renewal..... | 622 | 155 00 |
| | 7,032 | \$11,107 00 |
| 1897, Fish dealers..... | 440 | \$11,000 00 |
| 1897, Horse and wagon..... | 433 | 10,825 00 |
| 1897, Push-cart..... | 2,017 | 30,255 00 |
| 1897, Basket..... | 1,024 | 5,120 00 |
| | 3,914 | \$57,200 00 |

I am not aware of any instance where the fees have been reduced and consequently have no precedent upon which to base an opinion of the resulting effect upon the revenue therefrom. It is true that the license fees of ticket speculators were reduced one-half in the former City of Brooklyn by an ordinance of the Common Council dated March 29, 1897, but as there were only four or five such speculators licensed, the results of such reduction further than the corresponding decrease in revenue are not apparent. There were four such licenses issued there in 1897.

The Committee on Law Department, to whom was referred the annexed petition in favor of modifying the Tenement-house Law (page 883, Minutes, June 28, 1898), respectfully

REPORT:

That, having examined the subject, they recommend that the said petition be referred to the Commission to prepare the Building Code.

To Hon. RANDOLPH GUGGENHEIMER, President, Municipal Assembly, City of New York:

We, the undersigned, architects and builders in The City of New York, most respectfully petition the Municipal Assembly of The City of New York to enact such modification to that part of section 661 of the act known as the "Tenement-house Law" as relates to window guards, so as to exempt from the provision of the same modern-built tenement-houses, in which the window-sills in all bedrooms and kitchens are three feet above the floor, and in sitting-rooms or parlors two feet above the floors, and to allow where window guards are necessary, the same to be secured to the window frames.

The law as originally prepared and introduced in the Senate and Assembly provided for guards in "all tenement-houses now erected and hereafter to be erected" (like the fire-escape law) and was aimed chiefly at the old altered buildings in lower New York, in which the sills in many cases are less than twelve inches from the floor, and in which so many accidents have happened; but after the law had been approved by the Governor, it was found that the words "now erected" had, for some reason, been omitted, thus making the law not only ridiculous and useless but oppressive, as reliable statistics, obtained from the Health Superintendent and different hospitals, show that within ten years more than 2,000, mostly women and children, were killed and maimed

* NOTE.—Municipal ordinance repealed by Laws 1894, chapter 115, and amendments.

through falls from windows, and that out of that number of accidents not one case was traced to a modern-built tenement. This shows to your Honorable Body that buildings in which guards are required are exempt from the provision of the law, while buildings safe in all respects and requiring no guard must be provided with them.

We also respectfully request your Honorable Body to recommend to the Department of Buildings that the law in question be suspended, or not enforced, pending the consideration of this our petition.

Permission will not be given for the withdrawal of any bid or estimate, and the right is expressly reserved by the Commissioner of Public Works to reject all bids if he shall deem it for the public interest so to do. No bid will be accepted from, or contract awarded to, any person who is in arrears to the Corporation upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the Corporation.

N. B.—No bid will be accepted which does not contain adequate or reasonable prices for each and every item in the estimate.

Bidders are required to state in their estimates, under oath, their names and places of residence, the names of all persons interested with them therein, and if no other person be so interested they shall distinctly state the fact; also that it is made without any connection with any other person making any bid or estimate for the same purpose, and that it is in all respects fair and without collusion or fraud; and also that no member of the Common Council, head of a department, chief of a bureau, deputy thereof or clerk therein, or other officer of the Corporation, is directly or indirectly interested therein, or in the supplies or work to which it relates or in any portion of the profits thereof. Where more than one person is interested it is requisite that the verification be made and subscribed by all the parties interested.

Each bid or estimate shall be accompanied by the consent in writing of two householders or freeholders in The City of New York, with their respective places of business or residence, to the effect that if the contract be awarded to the person making the estimate, they will, upon its being so awarded, become bound as his sureties for its faithful performance, and that if he shall omit or refuse to execute the same, they will pay to the Corporation of The City of New York any difference between the sum to which he would be entitled upon its completion, and that which the said Corporation may be obliged to pay to the person to whom the contract shall be awarded at any subsequent letting, the amount in each case to be calculated upon the estimated amount of the work by which the bids are tested. The consent above mentioned shall be accompanied by the oath or affirmation in writing of each of the persons signing the same that he is a householder or freeholder in The City of New York, and is worth the amount of the security required for the completion of the contract and stated in the proposals, over and above all his debts of every nature, and over and above his liabilities as bail, surety and otherwise, and that he has offered himself as a surety in good faith and with an intention to execute the bond required by law. The adequacy and sufficiency of the security offered will be determined by the Comptroller after the award is made and prior to the signing of the contract.

The Surveyor's estimate of the work to be done under the above title, by which the bids will be tested, is the furnishing and laying

square yards of Asphalt Pavement, on concrete foundation.
square feet of Bridge-stone.

N. B.—As the above-mentioned quantities, though stated with as much accuracy as is possible in advance, are approximate only, bidders are required to submit their estimates upon the following express conditions, which shall apply to and become part of every estimate received :

(1) Bidders must satisfy themselves by personal examination of the location of the proposed work, and by such other means as they may prefer, as to the accuracy of the foregoing estimate, and shall not, at any time after the submission of an estimate, dispute or complain of such statement or estimate of the Engineer, nor assert that there was any misunderstanding in regard to the depth of the excavation to be made or the nature or amount of the work to be done.

(2) Bidders will be required to complete the entire work to the satisfaction of the Commissioner of Public Works and in substantial accordance with the specifications hereunto annexed. No extra compensation beyond the amount payable for the several classes of work before enumerated which shall be actually performed, at the prices therefor to be specified by the lowest bidder, shall be due or payable for the entire work.

The bidder must deposit with the Commissioner of Public Works, at least (4) four days before the time of making his bid, samples of materials he intends to use, together with certificates and statement, as follows :

- 1st. Specimens of asphalt and asphaltum, with a certificate stating where the specimens were mined.
- 2d. A specimen of the asphaltic cement, with a statement of the elements of the composition of the bituminous cement used in the composition of the paving surface.
- 3d. Specimens of sand intended to be used.
- 4th. Specimens of pulverized carbonate of lime, granite or quartz intended to be used.
- 5th. Any bidder proposing to offer a material for paving, not heretofore used in this city, in addition to the above-mentioned requirements, must file a certificate six full days before the time of making his bid, which certificate must show some other locality where pavement of such material has been laid, its area, the date at which it was accepted, which must have been at least two years previous to the issue of the certificate, and that the said pavement has worn well and satisfactorily; to be signed and acknowledged by the chief municipal officer having charge of such work in the city or cities where such pavement has been laid.
- 6th. A statement of the location and the capacity (in square yards per day) of the works or factory where the paving material is to be prepared.

Specimens must be furnished to the Department of Public Works as often as may be required during the progress of the work. The proportions of different asphaltes, asphaltum, oil, sand and powdered limestone, granite or quartz used, or proposed to be used, must be furnished to the Water Purveyor on the commencement of this contract, with notice of any proposed change in proportions, and specimens of the material used must be furnished when required at all times during the progress of the work.

No bid will be received or considered unless the deposits of materials and statements referred to above are made with the Commissioner of Public Works within the time prescribed, nor unless they conform to the requirements of the specifications and are satisfactory to the Commissioner of Public Works.

Any bid accompanied by a sample of asphalt or asphaltum which does not come up to the standard required by these specifications will be regarded as informal.

No estimate will be received or considered unless accompanied by either a certified check upon one of the National or State banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the security required for the faithful performance of the contract. Such check or money must not be inclosed in the sealed envelope containing the estimate, but must be handed to the officer or clerk of the Department who has charge of the estimate-box, and no estimate can be deposited in said box until such check or money has been examined by said officer or clerk and found to be correct. All such deposits, except that of the successful bidder, will be returned to the persons making the same within three days after the contract is awarded. If the successful bidder shall refuse or neglect within five days after notice that the contract has been awarded to him to execute the same, the amount of the deposit made by him shall be forfeited to and retained by The City of New York as liquidated damages for such neglect or refusal; but if he shall execute the contract within the time aforesaid, the amount of his deposit will be returned to him.

Bidders will state in writing, and also in figures, the price per square yard for the new pavement; the price per square foot for the new bridge-stone; also the number of days required to complete the work, which will be tested at the rate of three and a half dollars per day. It being understood that the time so bid refers to the aggregate time of such inspectors as may be employed

on the work, on days specified as working days according to the terms of the annexed agreement and not to single consecutive days; and that the allowance and deduction as specified in Covenant 16 of the contract will be exacted for each and every day that the said aggregate time of the inspectors who may be employed on the work may exceed the time stipulated for the completion of the whole work.

These prices are to cover the furnishing of all the necessary materials and labor; also the expense of excavating, whether rock or otherwise, and the performance of all the work set forth in the specifications and form of agreement hereto annexed, including new curb-stones where required.

Bidders are particularly cautioned that in no case will they be permitted to use materials either in quantity or quality different from those specified in the annexed form of agreement—see specification (8); and also that a provision in the contract requires the maintenance of the pavement in good condition for the period of five years from the final completion and acceptance thereof.

The right to reject all bids is reserved, if the Commissioner of Public Works shall deem it for the interests of The City of New York so to do.

Bidders are informed that no deviation from the specifications will be allowed, unless a written permission shall have been previously obtained from the Commissioner of Public Works.

The Contractor must notify the Water Purveyor, in writing, forty-eight hours before commencing the work.

Work or materials not specified, and for which a price is not named in the contract, will not be allowed for.

The amount of security required is Dollars for the faithful performance of the contract, and also for the indemnification of the City for infringements of patents (see Section 21).

Blank forms of estimate and further information, if required, can be obtained on application at this office.

The form of agreement, including the specifications for the work, is annexed.

CHARLES H. T. COLLIS, Commissioner of Public Works.

Location of work—

and maintain the said work in good condition, to the satisfaction of the Commissioner of Public Works, his successor or successors, for the period of five years from the final completion and acceptance thereof; all the said work to be done in the manner and under the conditions herein-after specified; and has further agreed that the said Commissioner of Public Works shall be and

Inspection—

is hereby authorized to appoint such person or persons as he may deem necessary to properly inspect the materials to be furnished and the work to be done under this agreement, and to see that the same correspond with the specifications hereinafter set forth, which, with the proposals for estimates hereto prefixed, and the estimates of the Contractor now on file in the Department of Public Works, are to be taken as forming part of this contract.

The party of the second part admits and agrees that the amounts and quantities of materials to be furnished and work to be done, as stated in the proposals for estimates for the said work, are approximate only; that he is satisfied with the foregoing estimate in determining the prices according to which he agrees to do the work required by this contract in accordance therewith, and that he shall not and will not, at any time, dispute or complain of such statement, nor assert that there was any misunderstanding in regard to the depth of the excavation to be made or the quantity of filling that may be required to place the pavement upon the required grade, or the nature or amount of the materials to be furnished or work to be done; and he covenants and agrees that he will complete the entire work to the satisfaction of the Commissioner of Public Works, and in substantial accordance with said specifications, and that he will not ask, demand, sue for or recover for the entire work any extra compensation beyond the amount payable for the several classes of work in this contract enumerated, which shall be actually performed at the prices therefor herein agreed upon and fixed.

The said parties hereto also declare that this agreement is made with reference to the plans for the same now on file in the office of the Water Purveyor, which said plans are to be taken as part and parcel of these presents, and are intended to co-operate, and all technical questions as to their true meaning and intent, concerning the execution of the work in accordance therewith, shall be decided by the Commissioner of Public Works, whose decision shall be final.

It is further agreed that no inspection, approval or acceptance of any part of the work herein contracted for or of the materials used therein, or any payment on account thereof shall prevent the party of the first part from objecting to the acceptance of said work or materials at any time thereafter during the existence of this contract.

SPECIFICATIONS

For Laying an Asphalt Pavement, on Concrete Foundation, in

Work and materials must agree with specifications—

1. All the materials furnished, and all the work done, which, in the opinion of the Commissioner of Public Works, shall not be in accordance with these specifications, shall be immediately removed, and other materials furnished, and work done that will, in the opinion of said Commissioner, be in accordance therewith. Before any materials are placed upon the street or avenue, the Commissioner of Public Works shall approve of the quality and finish of samples of the same which shall be furnished at his office.

Inspectors on subdivisions of work—

2. The work under this agreement is to be prosecuted at and from as many different points in such part or parts of the street or avenue on the line of the work as the said Commissioner may, from time to time, determine, and at each of said points Inspectors may be placed on the day designated for the commencement of the work thereat. Whenever any work is in progress at or from one or more points at a time, an Inspector may be appointed by said Commissioner to supervise each subdivision of the same, whether such subdivision be the culling of the bridge-stones, or the excavation for and preparation of the foundation, or the laying of the pavement, or the laying of the bridge-stones, or otherwise, and the Commissioner of Public Works may appoint such Inspectors as he may deem necessary to supervise the preparation of materials; such Inspectors shall at all times have free access to the works, laboratories and refineries of the Contractor, and shall take such samples therefrom as seems desirable.

Right to construct sewers, etc., prior to laying of pavement—

3. The right to construct any sewer or sewers, or receiving-basins and culverts, or to build up or adjust any manholes, or to reset or renew any frames and heads for sewer or subway manholes, or for Croton water or gas stop-cocks, or to lay gas or water pipes, or to construct necessary appurtenances in connection therewith in said street, or to grant permits for house connections with sewers or with water or gas pipes, or for any underground or subway construction, or to alter, lay or relay railroad tracks and lay crosswalks, at any time prior to the laying of the new pavement over the line of the same, is expressly reserved by said Commissioner; and said Commissioner of Public Works reserves the right of suspending the work on said pavement on any part of the line of said street or avenue at any time during the construction of the same, for the purposes above stated, without other compensation to the Contractor for such suspension than extending the time for completing the work as much as it may, in the opinion of the said Commissioner, have been delayed by such suspension; and said Contractor shall not interfere with, or place any impediment in the way of any person or persons who may be engaged in the construction of such sewer or sewers, or in making connections therewith, or doing other work above specified, or in the construction of any receiving-basins and culverts, or in setting or resetting any curb or gutter stones on the line of the street or avenue.

Contractor to remove incumbrances—

In case there shall be, at the time stipulated for the commencement of the work, any earth, rubbish, or other incumbrance on the line of the work, the same is to be removed at the expense of the Contractor.

Bridge-stones—

4. Bridge-stones.—When new bridge-stones are required, they are to be furnished in conformity with the following description, to wit :

The new bridge-stones to be of the best quality of granite, free from sap, seams or imperfec-

tions. Each stone to be not less than 4 nor more than 8 feet long, except in cases where especially permitted, and 2 feet wide and of a uniform thickness, which may vary from 6 to 8 inches, and dressed to a face on top not varying in evenness by more than $\frac{1}{4}$ of an inch, and on the bottom bedded, with sides square and full, and ends cut to a bevel of 6 inches in 2 feet (the direction of the beveled joints shall not be parallel to the line of vehicle travel), and special cases to such other bevel as shall be directed by the Commissioner of Public Works. The new stones to be in quality and workmanship equal to the pattern at the office of the Department of Public Works, and to be cut so as to lay to a joint not exceeding $\frac{1}{4}$ inch from top to bottom on the ends, and $\frac{1}{2}$ inch on the sides.

The bridge-stones will be carefully inspected after they are brought on the line of the work, and all those which, in quality and dimensions, do not conform strictly to these specifications will be rejected, and must be immediately removed from the line of the work. When required, all old bridge-stones shall be relaid, in accordance with the specifications for laying new bridge-stones, without extra charge therefor.

Heading stones—

Where the new pavement abuts against a stone pavement, the Contractor shall put down heading stones of bluestone or granite, cut to the profile of the street, 5 inches thick, at least 2 feet long and 1 foot deep, on a foundation of 6 inches of concrete, and those heading stones shall be maintained by the Contractor as if they were a part of the surface covered by asphalt.

Manhole-heads—

5. Manhole-heads, etc.—All the frames and heads for sewer manholes and for Croton water or gas stop-cocks, on the line of the work, are to be reset or new ones set if required, on a level with the new pavement, by the Department of Public Works or the gas company. The sewer manholes, if below the grade, will be built up to the proper height by said Department.

Old curb and gutter stones, etc—

6. The curbstones along the line of the work, the pavement in the intersections that may be retained, and the pavements and bridge-stones adjoining, and also the gutters of the adjoining pavements as far as may, in the opinion of the Commissioner of Public Works, be necessary for proper adjustment between the old and new pavement, shall be relaid, readjusted and brought to conform to the grade and lines of the proposed pavement, as and to the extent required, without extra charge therefor. Whenever any new curb-stones are required the Contractor shall furnish them in accordance with the following specification:

Curb-stones—

The new curbstones shall be of bluestone, equal in quality to the best North river bluestone. The curbstones shall be not less than 3 feet in length, 20 inches deep, and shall have a matched width of 5 inches throughout. The top of the stone shall be cut smooth and to a bevel of 1 inch, the front shall be cut to a fair line, to a depth of 14 inches; the ends from top to bottom shall be truly squared, so as to form close and even joints, and the front so laid as to present a fair and unbroken line. Curbstones shall be back-filled, and backed up with at least 1 foot of clean, gritty earth, free from clay and loam.

When directed by the Water Purveyor, the Contractor shall redress and reset the old curb-stones without extra charge therefor.

When the Contractor disturbs the flagging for the purpose of resetting curbstones, he shall restore the flagging to the state in which he found it. This does not require the Contractor to alter the grade of the flag-stones.

Dressed stone—

All stone of any description, except paving blocks and crushed stone, used in the performance of this contract, which is to be worked, dressed or carved, shall be so worked, dressed or carved within the boundaries of the State.

Preparation of foundation—

7. Preparation of Roadbed, etc.—All paving and other stones necessary to be removed shall be taken up and immediately removed from the line of the work; the subsoil or other matter (be it earth, rock or other material) shall then be excavated and removed by the Contractor to the depth of 9 inches below the top line of the proposed asphalt pavement (which shall have a crown not to exceed the rate of 4 inches on a roadway of 30 feet), and 13½ inches below the top of the stone-block pavement adjoining the rails, manhole-heads and stop-cock boxes. Should there be any spongy material or vegetable matter in the bed thus prepared, all such material shall be removed, and the space filled with clean gravel or sand carefully rammed, so as to make such filling compact and solid, and the entire roadbed thoroughly rolled with a roller weighing not less than 10 tons. Should any filling be necessary to lay the pavement at the required grade, the Contractor shall supply the same without any extra compensation therefor; said filling to be composed of good, wholesome earth, free from ashes, garbage or other foreign matter, and placed upon the roadbed, thoroughly rammed or rolled, as the Commissioner shall direct, at any point, in layers of not more than 6 inches in depth, thoroughly compacted. Upon the foundation thus prepared shall be laid a bed of hydraulic cement concrete, 6 inches in thickness, to be made as follows:

Cement—

All cement must be of the best quality, of either fresh-ground best American Portland or Rosendale hydraulic cement, and shall be tested and approved by the Water Purveyor before being used.

Concrete—

Concrete, when Portland cement is used, shall be composed of one part of cement, three parts of clean, sharp sand and seven parts of broken stone, or one part of cement, three parts of clean, sharp sand, four parts of broken stone and three parts of pebbles, by measure.

Concrete, when Rosendale cement is used, shall be composed of one part cement, two parts of clean, sharp sand and three parts of broken stone, or one part of cement, two parts of clean, sharp sand, two parts of broken stone and two parts of pebbles, by measure. The cement and sand shall be mixed dry, the broken stone having been first wet shall be then added and the mass turned over, with the addition of the necessary water, and worked until the broken stone is incorporated completely.

The concrete shall be placed in proper position and there rammed with wooden rammers until thoroughly compacted, which surface shall be 3 inches below the grade of the top of the finished pavement and exactly parallel thereto.

The pebbles shall be hard, clean, free from sand, screened and washed and of a size that has passed a sieve of 1½-inch mesh and rejected by a ¾-inch mesh.

The broken stone shall be solid trap, limestone or granite, free from dust or dirt, and of a graded size not larger in any dimension than will pass through a 2-inch ring, and shall be crushed and screened before being brought upon the work, and no crushing shall be done on the work.

The concrete shall be mixed in batches which shall consist of not more than one barrel of cement and the required quantities of sand and broken stone.

The concrete foundation shall be capable of sustaining such test as the Commissioner of Public Works shall deem necessary.

No carting or wheeling will be allowed on the concrete until it is sufficiently set, and then only on planks laid down for the purpose.

The whole operation of mixing and laying each batch, which shall not contain more than one barrel of cement, must be performed as expeditiously as possible, by the employment of a sufficient number of skilled men, and, if necessary, must be protected from the action of the sun and wind until set. No concrete will be allowed to be used which has been mixed more than thirty minutes.

Upon this foundation must be laid a fine bituminous concrete or binder, to be composed of clean broken stone not exceeding 1½ inches in their largest dimensions, thoroughly screened, and either coal-tar residuum, commonly known as No. 4 paving composition, or the same bitumen used in the body of the pavement.

The stone must be heated by passing through revolving heaters, and thoroughly mixed by machinery with the paving composition in the proportion of one (1) gallon of paving composition to (1) cubic foot of stone.

This binder must be hauled to the work and spread with hot iron rakes in all holes or inequalities and depressions below the true grade of the pavements, to such thickness that, after being thoroughly compacted by tamping and hand-rolling, the surface shall have a uniform grade and cross-section, and the thickness of the binder at any point shall be not less than ¾ of an inch. No binder shall be laid during a rain, nor shall any binder be laid that is too cold to be manipulated easily; overheated binder shall be taken entirely off the work.

The upper surface shall be exactly parallel with the surface of the pavement to be laid.

Upon this foundation must be laid the wearing surface, or paving proper, the basis of which, or paving cement, must be pure asphaltum, unmixed with any of the products of coal tar.

The wearing surface will be composed of:

1. Refined asphaltum.
2. Heavy petroleum oil.
3. Fine sand, containing not more than one per centum of hydro-silicate of alumina.
4. Fine powder of carbonate of lime, granite or quartz.
5. The heavy petroleum oil must be freed from all impurities and brought to a specific gravity of from 18 to 22 degrees Baumé, and a fire-test of 250 degrees Fahrenheit, or, if the formula of Contractor requires it, the powdered carbonate of lime may be omitted, and the heavy petroleum oil may be replaced by sufficiently fluid natural bitumen.

The asphaltum used must be equal in quality to that mined from the Pitch Lake on the Island of Trinidad, or from the Alcatraz mine, Santa Barbara County, California, specially refined and brought to a uniform standard of purity and gravity, of a quality to be approved by the Commissioner of Public Works.

From these two hydro-carbons shall be manufactured an asphaltic cement which shall have a fire-test of 250 degrees Fahrenheit, and, at a temperature of 60 degrees Fahrenheit, shall have a specific gravity of 1.19, said cement to be composed of 100 parts of pure asphalt, and from 15 to 20 parts of heavy petroleum oil.

The asphaltic cement being made in the manner above described, the pavement mixture must be formed of the following materials, and in the proportions stated:

| | |
|------------------------------------------------------|---------------|
| Asphaltic cement..... | from 12 to 15 |
| Sand..... | from 83 to 70 |
| Pulverized carbonate of lime, granite or quartz..... | from 5 to 15 |

The sand and asphaltic cement are to be heated separately to about 300 degrees Fahrenheit. The pulverized carbonate of lime, granite or quartz, while cold, shall be mixed with the hot sand in the required proportions, and then mixed with the asphaltic cement at the required temperature and in the proper proportion, in a suitable apparatus, which will effect a perfect mixture.

The pavement mixture prepared in the manner thus indicated must be brought to the ground in carts, at a temperature of about 250 degrees Fahrenheit, and if the temperature of the air is less than 50 degrees, iron carts, with heating apparatus, shall be used in order to maintain the proper temperature of the mixture; it shall then be carefully spread by means of hot iron rakes, in such manner as to give a uniform and regular grade. The surface shall then be compressed by hand-rollers, after which a small amount of hydraulic cement shall be swept over it, and it shall then be thoroughly compressed by a steam-roller weighing not less than 250 pounds to the inch run, the rolling to be continued for not less than five hours for every 1,000 yards of surface. After having received its ultimate compression the pavement must have a thickness of not less than two inches.

The powdered carbonate of lime, granite or quartz shall be of such degree of fineness that 5 to 15 per centum by weight of the entire mixture for the pavement shall be of an impalpable powder of limestone, and the whole of it shall pass a No. 26 screen. The sand shall be of such size that none of it shall pass a No. 80 screen and the whole of it shall pass a No. 10 screen.

The gutters for a width of 12 inches next the curb must be coated with hot, pure asphalt, and smoothed with hot smoothing-irons in order to saturate the pavement to a depth to be directed by the Water Purveyor with an excess of asphalt.

8. If rock asphalt be used, and the material shall be an amorphous limestone naturally, thoroughly and uniformly impregnated with bitumen: (1) From the Sicilian mines at Ragusa and Verwöhle, equal in quality and composition to that mined by the United Limmer and Verwöhle Rock Asphalt Company, Limited. (2) From the Swiss mines at Val de Travers, equal in quality and composition to that mined by The Neuchatel Asphalt Company, Limited. Or (3) from the French mines at Seyssel, Mons, and Sicilian mines at Ragusa, equal in quality and composition to that mined by the Compagnie Générale des Asphaltes de France, Limited, and it shall be prepared and laid as follows:

(1) The rock shall be finely crushed and pulverized; the powder shall then be passed through a fine sieve. Nothing whatever shall be added to or taken from the powder obtained by grinding the bituminous rock. The powder shall contain 9 to 12 per cent. natural bitumen, 88 to 91 per cent. pure carbonate of lime, and must be free from quartz, sulphates, iron pyrites or aluminum. (2) This powder shall be heated in a suitable apparatus to 200 to 250 degrees Fahrenheit, and must be brought to the ground at such temperature, in carts made for the purpose, and then carefully spread on the binder foundation previously prepared to such depth that after having received its ultimate compression, it will have a thickness of not less than 2 inches. (3) The surface to be rendered perfectly even by heated rammers and smoothers, and to be rolled with a steam roller weighing not less than 250 pounds to the inch run, the rolling to continue for not less than five hours for each 1,000 yards of surface in the case of Trinidad asphalt; in the case of rock asphalt pavement the ultimate compression may be by heated pilons.

But rock asphalt shall not be used in any case without written permission from the Commissioner of Public Works.

Sanding the pavement—

After completion, whenever the Commissioner shall so direct, the surface of the pavement must be sprinkled with clean sharp sand.

Paving-blocks each side of tracks—

On each side of the rails of the car-tracks, around all manholes and stop-cock boxes, the contractor, when required, shall lay a line of granite or syenite paving-blocks, as headers, long and short stones alternating and toothing into pavement, laid on a foundation of 6 inches of concrete, which must extend to the depth of the cross-ties and beneath and around the girders and stringers, on which shall be laid a bed of fresh cement mortar, 2 inches in thickness; on the mortar so laid shall be laid the stone blocks, the top surface of which shall conform to the grade of the pavement. The joints of the blocks to be filled with paving cement, as hereinafter described.

The space within the car-tracks shall, whenever required by the Commissioner of Public Works, be paved with granite or syenite paving-blocks, in accordance with specifications of this Department for such work.

Quality and dimensions of stone blocks—

The stone blocks are to be of a durable, sound and uniform quality, each measuring not less than 8 nor more than 12 inches in length, and not less than 3½ nor more than 4 inches in width, and not less than 7 nor more than 8 inches in depth. All of the stone shall be of the same quality as to hardness, color or grain; no outcrop, soft, brittle or laminated stone will be accepted. The stones from each quarry shall be piled and laid in separate sections of the work, and in no case shall the stones from the different quarries be mixed. The blocks to be split and dressed so as to form, when laid, close end joints and side joints top and bottom, with fair and true surfaces on top, bottom and ends, and are to be in all respects equal to the specimen blocks deposited at the office of the Commissioner of Public Works, and to be laid as may be directed by the Water Purveyor, and the joints filled with paving cement.

To be carefully culled—

The stones will be carefully inspected after they are brought on the line of the work, and all blocks which, in quality and dimensions, do not conform strictly to these specifications, will be rejected, and must be immediately removed from the line of the work. The Contractor will be required to furnish such laborers as may be necessary to aid the Inspector in the examination and culling of the blocks; and in case the Contractor shall neglect or refuse so to do, such laborers as in the opinion of the Commissioner of Public Works may be necessary, will be employed by said Commissioner, and the expense thus incurred by him will be deducted and paid out of any moneys then due or which may thereafter grow due to the said Contractor under this agreement.

Over rail-ties and other places—Between, in and 1 foot outside of railroad tracks, over vaults, around manhole frames, and in such other places as the Commissioner of Public Works shall direct, the Contractor shall use for the pavement granite or syenite paving-blocks of such dimensions and concrete foundation of such thickness as the said Commissioner shall direct.

Paving cement to be used in joints of blocks—

Paving Cement to be used in Joints of Blocks.—There shall then be poured into the joints, while the gravel is still hot, boiling paving cement as hereinafter described, heated to a temperature of 300 degrees Fahrenheit, until the joints are full and will take no more and are filled flush with the top of the blocks. Dry, hot gravel of proper size, heated in pans specially provided by the Contractor for that purpose, must be then poured along the joints, filled with paving cement, as above described, and consolidated by tamping with a light rammer or otherwise. Should the gravel in the joints become cold or damp, the pavement must be taken up and relaid, so as to allow the paving cement to be poured while the gravel is hot.

Description of paving cement—

The paving cement to be used in filling the joints between the paving blocks and between the crosswalk stones, as herein provided, shall be composed of 20 parts of refined Trinidad asphalt, of a quality to be approved by the Commissioner of Public Works, and 3 parts of residuum oil, mixed with 100 parts of coal-tar, which shall be obtained from the direct distillation of coal-tar, and shall be the residuum therefrom, and shall be such as is ordinarily numbered 4 at the manufactory, the proportions to be determined by weight. It shall be delivered on the work in lots at least one week before being used, in order that the necessary analysis and examinations may be made by the Water Purveyor. In addition to this the Contractor must furnish the Water Purveyor with the certificate of the manufacturer or refiner that the materials are of the kind specified. The coal-tar oil and asphalt must be heated and mixed in the proportions named on the work, as needed for immediate use, or the contractor may use the paving cement above described.

Laying crosswalks—

9. Laying the crosswalks, etc.—The crosswalks adjoining the new pavement are to be laid, or the present bridge-stones shall be relaid, as the said Commissioner of Public Works may direct, in which last case they shall be dressed or re-dressed so as to form ¼ of an inch joints from top to bottom when laid. All the new bridge-stones, and such of the present bridge-stones as may be retained, are to be well and firmly bedded on a foundation of sand or gravel, not less than 6 inches in thickness, and laid with joints not exceeding ¼ of an inch in width from top to bottom on the ends. The courses to be so laid that the transverse joints must be broken by a lap of at least 1 foot. The pavements adjoining, and also the gutters of the adjoining pavements, as far as in the

opinion of the said Commissioner may be necessary to obtain proper drainage, must be taken up, brought to the grade of the new pavement and relaid, without extra charge therefor. The contractor shall lay one row of paving-blocks between the courses of bridge-stone when directed so to do by the Water Purveyor.

During the prosecution of the work any materials that it may be necessary to place on the sidewalk shall be piled in neat piles not obstructing over one-half the footway, and the contractor shall keep the unobstructed portion clean by sweeping. When such material is removed the sidewalk shall be immediately swept clean by the Contractors, and when public or local inconvenience is likely to arise from dust the Contractors are to water any piles or surfaces of earth or dirt when and where necessary, or whenever required by the Water Purveyor or Inspectors to do so.

Old materials—

10. Old Materials—All old materials which it becomes necessary to remove, excepting the sewer or subway manhole-heads, and the frames and heads to Croton water or gas stop-cocks, and such gutter-stones as the Commissioner of Public Works may deem it advisable to save, shall be considered the property of the Contractor, and shall be immediately removed by him from the line of the work. The old bridge-stone must be delivered where directed by the Water Purveyor, except also that the gutter bridge-stone now in use shall belong to the owner or occupant of the premises opposite to which it is placed, and shall be removed and deposited upon the sidewalk without any extra compensation therefor.

Removal of surplus materials, rubbish, etc.—

11. Clearing up.—All surplus materials, earth, sand, rubbish and stones, except such stones as shall be retained by order of the Water Purveyor, are to be removed from the line of the work, block by block, as rapidly as the work progresses. At any time within one month after the completion of the pavement of each block, or of the entire work, if so required by the Commissioner of Public Works, all material, except building material, covering the pavement shall be swept into heaps and immediately removed from the line of the work; and unless this be done by the Contractor within twenty-four hours after being notified so to do, by a written notice to be served upon the Contractor, either personally or by leaving it at his residence or with any of his agents in charge of the work, or employees found upon the work, to the satisfaction of said Commissioner, the same shall be removed by the said Commissioner of Public Works, and the amount of the expense thereof shall be deducted out of any moneys due or to grow due to the party of the second part under this agreement.

Loss or damage to be sustained by Contractor—

12. It is further agreed that all loss or damage arising out of the nature of the work to be done under this agreement, or from any unforeseen obstructions or difficulties which may be encountered in the prosecution of the same, or from the action of the elements, or from incumbrances on the line of the work, shall be sustained by the said contractor.

In case any injury is done along the line of the work in consequence of any act or omission on the part of the Contractor or his employees or agents in carrying out any of the provisions or requirements of this contract, the Contractor shall make such repairs as are necessary in consequence thereof, at his own expense, and to the satisfaction of the Commissioner of Public Works, and in case of failure on the part of the Contractor to promptly make such repairs, they may be made by the Commissioner of Public Works, and the expense thereof shall be deducted out of any moneys to grow due to, or retained from, the party of the second part under this contract.

Work may be suspended—

13. The prosecution of the work shall be suspended for such periods as the Commissioner of Public Works may from time to time determine; no claim or demand will be made by the Contractor for damages by reason of such suspensions in the work, but the period of such suspensions, to be determined in writing by the said Commissioner, will be excluded in computing the time hereinafter limited for the completion of the work. During such suspensions all materials delivered upon, but not placed in the work, shall be neatly piled or removed, so as not to obstruct public travel.

"Contractor," etc., to mean—

14. Wherever the word "Contractor," or the words "party of the second part," or a pronoun in the place of either of them, is used in this contract, the same shall be considered as referring to and meaning the party or parties, as the case may be, of the second part of this agreement.

Citizenship—

All mechanics, workmen and laborers employed in the performance of this contract shall receive not less than the prevailing rate of wages in the respective trades or callings in which such mechanics, workmen and laborers are employed in this locality.

Repairs—

14a. And it is further agreed, that if, at any time during the period of five years from the date of the acceptance by said Commissioner of the whole work under this agreement, the said work, or any part or parts thereof, in the opinion of said Commissioner, require repairs or sanding, as provided for in section 8, or the surface of the pavement shall have any cracks, bunches, holes or depressions that shall measure more than 1/2-inch from the under side of a straight edge 4 feet long laid on the surface, and the said Commissioner shall notify the said party of the second part to make the repairs or do the sanding as required, by a written notice to be served on the Contractor either personally or by leaving said notice at his office or residence or with any of his agents in charge of the work, or employees found on the work, the said party of the second part shall immediately commence and complete the same to the satisfaction of said Commissioner; and in case of failure or neglect on his part so to do within twenty-four hours from the date of the service of the aforesaid notice, then the said Commissioner of Public Works shall have the right to purchase such materials as he shall deem necessary, and to employ such person or persons as he may deem proper, and to undertake and complete the said repairs or sanding, and to charge the expense thereof to the said party of the second part; and the said party of the second part hereby stipulates and agrees to pay all such expense to which the said parties of the first part may have been put by reason of the neglect of the said party of the second part to make such repairs or do the sanding as aforesaid.

The Contractor shall have the right in case of ditches to provide against settlement by covering the surface of the cut with broken stones and maintaining the surface for six days, and during extreme winter weather any hole in the pavement may be filled and maintained with broken stone or asphalt mastic.

The party of the second part further agrees that during the said period of five years he will lay and restore, after forty-eight hours' notice, the pavement over trenches made for laying water and gas pipes, sewers, or for other purposes permitted by the Commissioner of Public Works, and over breaks the result of accidents, at the contract price, and when once so laid and restored, maintain the same in the same state of repair as agreed to for the other parts of the pavement. He further agrees not to demand additional or further payment on account of injury or sinking of the pavement so laid and restored. In case the Contractor fails to lay and restore the pavement as aforesaid the Commissioner of Public Works shall, without further notice, procure labor and materials and lay and restore the pavement at the expense of the Contractor.

Measurement—

15. The said party of the second part further agrees that the return of the Surveyor appointed by the Commissioner of Public Works to survey the work shall be the account by which the amount of work done shall be computed.

Work to commence—

16. The party of the second part hereby further agrees that he will commence the aforesaid work on such day and at such point or points as the Commissioner of Public Works may designate, and progress therewith so as to fully complete the same in accordance with this agreement, on or before the expiration of _____ days next

Time of completion—

_____ thereafter, and, that in the computation of said days, the time (aggregated in days or parts of days) during which the work required by this contract has been delayed in consequence of the condition of the weather, or by any act or omission on the part of the parties of the first part (all of which shall be determined by the said Commissioner of Public Works, who shall certify to the same in writing), and also Sundays and holidays on which no work is done, and days on which the prosecution of the whole work is suspended by written order of said Commissioner, shall be excluded.

But neither an extension of time, for any reason, beyond the date fixed herein for the completion of the work, nor the doing or acceptance of any part of the work called for by this contract, shall be deemed a waiver by the said Commissioner of the right to abrogate this contract for abandonment or delay in the manner provided for in paragraph 18 of this agreement.

Damages for non-completion—

In case the said party of the second part shall fail to fully and entirely and in conformity to the provisions and conditions of this agreement perform and complete the said work, and each and every part and appurtenance thereof within the time hereinbefore limited to such performance and completion, or within such further time as in accordance with the provisions of this agreement shall be fixed or allowed for such performance and completion, the said party of the second part shall and will pay to the said parties of the first part the sum which shall accrue and become due for the Inspectors' wages for each and every day the aggregate time of all the Inspectors employed upon said work may exceed the time stipulated for its completion, or such stipulated time as the same may be increased as hereinbefore provided, which said sum

is hereby agreed upon, fixed and determined by the parties hereto as the damages which the party of the first part will suffer by reason of such default, and not by way of penalty. And the said parties of the first part shall and may deduct the same out of the moneys which may be due or become due to the said party of the second part under this agreement.

Personal attention—

17. The said party of the second part hereby further agrees that he will give his personal attention constantly to the faithful prosecution of the said work; that he will not sublet the aforesaid work, or any part thereof, without the previous written consent of the Commissioner of Public Works, indorsed on this agreement, but will keep the same under his own control; that he will not assign, by power of attorney or otherwise, any of the moneys payable under this agreement, unless by and with the like consent, to be signified in like manner; that no right under this contract, nor to any moneys to become due hereunder, shall be asserted against the Mayor, Aldermen and Commonalty of The City of New York, or any department, bureau or officer thereof, by reason of any so-called assignment, in law or equity, of this contract, or any part hereof; that no person other than the party signing this agreement as the party of the second part has now any claim hereunder; that no claim shall be made excepting under this specific clause, or under paragraph 19 of this agreement; and that he will punctually pay the workmen who shall be employed on the aforesaid work in cash current, and not in what is denominated store-pay. If at any time any overseer or workman employed by the Contractor shall be declared by the Water Purveyor to be unfaithful or incompetent, the Contractor, on receiving written notice, shall forthwith dismiss such person, and shall not again employ him on any part of the work.

Contract may be declared annulled for violation, etc.—

18. The said party of the second part further agrees that if at any time the Commissioner of Public Works shall be of opinion, and shall so certify in writing, that the said work or any part thereof is unnecessarily delayed, or that the said Contractor is willfully violating any of the conditions or covenants of this contract, or is executing the same in bad faith, or if the said work be not fully completed within the time named in this contract for its completion, he shall have the power to notify the aforesaid Contractor to discontinue all work, or any part thereof, under this contract, by a written notice to be served upon the Contractor, either personally or by leaving said notice at his residence or with his agent in charge of the work, and thereupon the said Contractor shall discontinue said work, or such part thereof, and the Commissioner of Public Works shall thereupon have power to place such and so many persons as he may deem advisable, by contract or otherwise, to work at and complete the work herein described, or such part thereof, and to use such materials as he may find upon the line of said work, and to procure other materials for the completion of the same, and to charge the expense of said labor and materials to the aforesaid Contractor, and the expense so charged shall be deducted and paid by the party of the first part out of such moneys as may be then due, or may at any time thereafter grow due to the said Contractor, under and by virtue of this agreement or any part thereof; and in case such expense is less than the sum which would have been payable under this contract if the same had been completed by said Contractor, he shall forfeit all claim to the difference; and in case such expense shall exceed said sum he shall pay the amount of such excess to the parties of the first part.

Claims for labor, etc.—

19. And it is further agreed, by and between the parties hereto, that if at any time before or within thirty days after the whole work herein agreed to be performed has been completed and accepted by the parties of the first part, any person or persons claiming to have performed any labor or furnished any materials toward the performance or completion of this contract shall file with the said Department of Public Works, or with the bureau having charge of said work, and with the head of the Finance Department of the said City of New York, any such notice as is described in the Act of the Legislature of the State of New York, passed May 22, 1878, entitled "An Act to secure the payment of laborers, mechanics, merchants, traders and persons furnishing materials toward the performing of any public work in the cities of the State of New York," then and in every such case the said parties of the first part shall retain, anything herein contained to the contrary thereof notwithstanding, from the moneys under their control and due or to grow due under this agreement, so much of such moneys as shall be sufficient to pay off, satisfy and discharge the amount in such notice alleged or claimed to be due to the person or persons filing such notice, together with the reasonable costs of any action or actions brought to enforce such claim or the lien created by the filing of such notice. The moneys so retained shall be retained by the said parties of the first part until the lien thereon created by the said act and the filing of the said notice shall be discharged pursuant to the provisions of the said act.

And the said party of the second part hereby further agrees that he will furnish said Commissioner with satisfactory evidence that all persons who have done work or furnished materials under this agreement, and who may have given written notice to the said Commissioner at any time within ten days after the completion of the work aforesaid, that any balance for such work or materials is still due and unpaid, have been fully paid or satisfactorily secured.

Amounts claimed retained—

And in case such evidence be not furnished as aforesaid, such amount as may be necessary to meet the claims of the persons aforesaid shall be retained from any moneys due the said party of the second part under this agreement, until the liabilities aforesaid shall be fully discharged or secured, or such notice be withdrawn.

Indemnification of City—

20. And the said party of the second part further agrees that during the performance of said work he will place proper guards upon and around the same for the prevention of accidents, and at night will put up and keep suitable and sufficient lights, and that he will indemnify and save harmless the parties of the first part against and from all suits and actions, of every name and description, brought against them, and all costs and damages to which they may be put for or on account or by reason of any injury or alleged injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper materials used in its prosecution, or by or on account of any act or omission of the said party of the second part or his agents; and the said party of the second part hereby further agrees that the whole or so much of the moneys due by the Commissioner of Public Works, shall and may be retained by the said parties of the first part until all such suits or claims for damages as aforesaid shall have been settled, and evidence to that effect furnished, to the satisfaction of the said Commissioner.

20a. And the party of the second part further agrees to hold responsible for any claims made against the parties of the first part for any infringement of patents, by the use of patented articles in the construction and completion of the work, or any process connected with the work agreed to be performed under the said contract, or of any material or materials used upon said work; and further agree to save harmless and to indemnify the parties of the first part for all costs, expenses and damages which the said parties of the first part shall be obliged to pay by reason of any infringement of patents used in the construction and completion of the said work.

21. And the said party of the second part hereby agrees to indemnify and save harmless the parties of the first part against and from all suits and actions of every nature and description arising out of the claim or claims of any person or persons claiming to be patentees of any process connected with the work herein agreed to be performed, or of any material or materials used upon said work. And the said party of the second part hereby further agrees that the bond, in the sum of _____ dollars, attached to this agreement, of _____ shall contain a provision for the indemnification of the parties of the first part against and from all such suits and actions as aforesaid, as well as for the performance and completion of this contract and compliance with all the terms thereof.

Prices for work—

22. And the said party of the second part hereby further agrees to receive the following prices as full compensation for furnishing all the materials, including new curbstones, and performing all the labor which may be required in the prosecution of the whole of the work to be done under this agreement, and in all respects performing and completing the same, to wit:

For the completed asphalt pavement, with concrete foundation, per square yard, the sum of _____

For the new bridge-stone, per square foot, the sum of _____

It being expressly understood that the measurements shall be taken after the laying or setting of the pavement and bridge-stones and that the aforesaid prices cover the furnishing of all the different materials and all the labor, the maintaining of said pavement in good order, for the period of five years, and the performance of all the work mentioned in this specification and agreement.

Surveyor the agent of Contractor—

A City Surveyor will be employed by the parties of the first part to see that the work is completed in conformity to the profile, and to ascertain and certify the quantity of work done. Said Surveyor, at the request of the Contractor, will be directed to designate and fix grades for his guidance during the progress of the work without charge, provided that the said parties of the first part shall not be liable for any delay or for any errors of said Surveyor in giving such grades, and said Surveyor shall be considered as the agent of the Contractor so far as giving such grade is concerned, and not the agent of the City of New York.

Examinations—

After the completion of the work, should the Water Purveyor require it for his more perfect satisfaction, the Contractor shall make such openings and to such extent, through such part or parts of the said work as the Water Purveyor shall direct, and he shall make the same good again to the satisfaction of the Water Purveyor. Should any work be found defective or improperly done, such defective or improper work shall be taken up and relaid or otherwise remedied to the satisfaction of the Water Purveyor, and should the Contractor refuse or neglect to correct such defective work when notified to do so, or by a written notice to be served on the Contractor either personally or by leaving it at his residence or with any of his agents on the work or employees found on the work, then the Commissioner of Public Works shall employ the necessary men and materials to do the work, and the expense thereof shall be deducted from any moneys that may be due the Contractor on account of this contract.

To prevent all disputes and litigation it is further agreed by and between the parties to this contract that the Engineer shall in all cases determine the amount of the quantity of the several kinds of work which are to be paid for under this contract, and he shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide every question which may arise relative to the execution of this contract on the part of the said contractor, and his estimate and decision shall be final and conclusive upon said contractor; and such estimate and decision, in case any question shall arise, shall be a condition precedent to the right of the party of the second part to receive any money under this agreement.

Payments, when made—

23. And the said party of the second part further agrees that he shall not be entitled to demand or receive payment for any portion of the aforesaid work or materials, until the same shall be fully completed in the manner set forth in this agreement, and such completion shall be duly certified by the Surveyor, Inspector and Water Purveyor in charge of the work, and until each and every of the stipulations hereinbefore mentioned are complied with, and the work completed to the satisfaction of the Commissioner of Public Works, and accepted by him; whereupon the parties of the first part, under section 4, chapter 580 of the Laws of 1872, will pay, and hereby bind themselves and their successors to pay, to the said party of the second part, in cash, on or before the expiration of thirty days from the time of the completion of the work and the acceptance of the same by the Commissioner of Public Works, the whole of the moneys accruing to the said party of the second part under this agreement, excepting such sum or sums of money as may be lawfully retained under any of the provisions herein contained for that purpose, or in any law of the State, or under any ordinance of the Common Council passed prior to the date of this agreement and now in force.

Seventy per cent. payments—

But in case the amount payable under this contract shall be five thousand dollars or over, payment will be made to the said party of the second part, in conformity with and subject to the terms and conditions of chapter 7 of the Revised Ordinances of 1880, by monthly installments of seventy per cent. on the amount of work performed, and also on the quantities of materials furnished and delivered, should the Commissioner of Public Works deem it advisable so to do, in which case, however, the quantity returned shall be such that the amount paid will be fairly due and in accordance with the provisions and stipulations of this agreement; provided, the amount of work done on each installment shall not be less than fifteen hundred dollars; and provided, that the parties of the first part may at all times reserve and retain out of said installments, or any of them, all such sum or sums as by the terms hereof, or of any act of the Legislature of the State of New York, or of any ordinance or resolution of the Common Council of The City of New York, passed prior to the date hereof, they are or may be authorized to reserve or retain; and provided, that nothing herein contained be construed to affect the right hereby reserved of the said Commissioner to reject any return or certificate of the Engineer or Inspector having charge of the work, should such return or certificate be, in the opinion of the Commissioner of Public Works, not in accordance with the facts of the case, or the requirements of this agreement, or be otherwise improperly given, and to reject the whole or any portion of the aforesaid work, should the same or any part thereof not be in accordance with the requirements of this contract; and provided also, that where the contractor, although the lowest bidder in the gross calculation, is to receive unusual or extraordinary prices for the different items, or any of them, of the work when considered separately, nothing herein contained shall be construed to affect the right of the Commissioner hereby retained to determine the amount that may be due, from time to time, not necessarily by the rates agreed upon in this contract, but by causing an estimate to be made of the value of the work done, taking as a basis of the calculation the whole amount of money that will have become due, according to the terms of this contract, when the whole work shall be completed.

24. It is hereby expressly understood and agreed by and between the parties hereto, that the action of the Engineer or Surveyor by which the said contractor is to be bound and concluded according to the terms of this contract, shall be that evidenced by his final certificate; all prior certificates upon which seventy per cent. payments may be made being merely estimates, and subject to the corrections of such final certificate, which may be made without notice to the contractor thereof, or of the measurements upon which the same is based.

Surveyor's certificate—

25. And the said party of the second part hereby further agrees that the Commissioner of Public Works shall pay to the Surveyor the sum of ten dollars for each and every seventy per cent. certificate he may return on the work done under this agreement; and that the said Commissioner of Public Works shall deduct such amount from any moneys due or to grow due under this agreement.

26. And it is hereby expressly agreed and understood by and between the parties hereto, that the said parties of the first part, their successors and assigns, shall not, nor shall any department or officer of The City of New York be precluded or estopped by any return or certificate made or given by any Engineer, Inspector, or other officer, agent, or appointee of said Department of Public Works or said parties of the first part, under or in pursuance of anything in this agreement contained, from at any time showing the true and correct amount and character of the work which shall have been done and materials which shall have been furnished by the said party of the second part, or any other person or persons under this agreement.

In witness whereof, The Commissioner of Public Works has hereunto set his hand and seal on behalf of the said parties of the first part, and the said party of the second part has also hereunto set his hand and seal; and said Commissioner and party hereto of the second part have executed this agreement in triplicate, one part of which is to remain with the said Commissioner, one other to be filed with the Comptroller of The City of New York, and the third to be delivered to the said party hereto of the second part, the day and date herein first above written.

Rule 36. Any matter may be committed to the Committee of the Whole by the assent of two-thirds of the members present, and the Council may go into the Committee of the Whole on the assent of three-fourths of the members present and voting. When the Chairman named by the President has taken the chair, the Clerk shall announce the subject for consideration. The same rules shall be observed in the Committee of the Whole as in the Council, so far as the same are applicable, except limiting the number of times of speaking and except that the ayes and noes shall not be taken. A motion to rise and report progress shall always be in order, and shall be decided without debate. If at any time when in Committee of the Whole Council it be ascertained that there is not a quorum present, the Chairman shall immediately report the fact to the President.

CHAPTER XI.

Motions and their Precedence.

Rule 37. When a question is before the Council, only the following motions shall be received, and such motions shall have precedence in the order stated here, viz.:

1. For an adjournment.
2. For a call of the Council.
3. To lay on the table.
4. To postpone indefinitely.
5. To postpone to a certain day.
6. To refer to a standing committee.
7. To refer to a special committee.
8. To commit to the Committee of the Whole.
9. To amend.

The motion to adjourn, or for a call of the Council, or to lay on the table, shall be decided without debate, and shall always be in order, except as provided in Rule 43.

Rule 38. All motions shall be reduced to writing if desired by the President or any member of the Council, delivered to the Clerk and read before the same shall be debated; any motion may be withdrawn at any time before decision or amendment.

If the question in debate contains several points, a member of the Council may have the same divided, provided the division called for embodies a distinct principle or statement of fact. A motion to postpone, commit or refer, until it is decided, shall preclude all debate of the main question.

When a blank is to be filled, and different sums and time shall be proposed, the question shall be first taken on the highest sum and the longest time.

Rule 39. When a question has once been put and decided, it shall be in order for any member of the Council who voted in the majority to move for the reconsideration thereof; but no motion for the reconsideration of any vote shall be in order after the proposed ordinance, legislative resolution, message, report, amendment or motion upon which the vote was taken shall have gone out of the possession of the Council; nor shall any motion for reconsideration be in order unless made on the same day on which the vote was taken, or on the legislative day next succeeding. Nor shall any question be considered more than once. But when a proposed ordinance or legislative resolution shall have been recalled from the Mayor or from the Board of Aldermen, a motion for reconsideration may be made at any time thereafter while the same is in the possession of the Council, and all resolutions recalling a proposed ordinance or legislative resolution from the Mayor or Board of Aldermen shall be regarded as privileged. No vote shall be reconsidered upon either of the following motions:

- To adjourn.
- To lay on the table.

CHAPTER XII.

Questions of Order.

Rule 40. All questions relating to priority of business shall be decided by the presiding officer without debate.

When the reading of a paper is called for, except petitions, and the same is objected to by any member of the Council, it shall be determined by a vote of the Council, without debate.

Rule 41. When a member of the Council shall be called to order, he shall take his seat until the President shall have determined whether he is in order or not; and if decided to be out of order, he shall not proceed without the permission of the Council; and every question of order shall be decided by the President, subject to an appeal to the Council by any member of the Council. No second appeal shall be determined until the original appeal shall be decided; and if a member of the Council shall be called to order for words spoken, the words excepted to shall be immediately taken down in writing.

CHAPTER XIII.

Attendance of Quorum—Call of the Council.

Rule 42. If at any time during the session of the Council a question shall be raised by any member of the Council as to the presence of a quorum, the presiding officer shall forthwith direct the Clerk to call the roll, and shall announce the result, and such proceedings shall be without debate; but no member of the Council while speaking shall be interrupted by any other member of the Council raising the question of a lack of a quorum, and the question as to the presence of a quorum shall not be raised oftener than once in every hour unless the lack of a quorum shall be disclosed upon a roll-call of the ayes and noes. Whenever upon a roll-call any member of the Council who is upon the floor of the Council Chamber refuses to make response when his name is called, it shall be the duty of the presiding officer, either upon his own motion or upon the suggestion of any member of the Council, to request the member of the Council so remaining silent to respond to his name, and if such member of the Council fails to do so, the fact of such request and the refusal shall be entered in the journal, and such member of the Council shall be counted as present for the purpose of constituting a quorum.

Rule 43. For the purpose of securing the attendance of members of the Council, a call of the Council may be ordered at any time, but such call shall not be in order when the voting on any question has begun, nor when the second reading of a proposed ordinance or legislative resolution has been completed, unless it shall appear upon an actual count by the President that a quorum is not present.

CHAPTER XIV.

Miscellaneous Provisions.

Rule 44. A rule of the Council shall not be altered, suspended or rescinded without a vote of a majority of all the members of the Council elected, and a motion to suspend, alter or rescind any such rule, or any joint rule of the Municipal Assembly, shall not be in order without the unanimous consent of the Council, unless one day's previous notice thereof in writing shall be

given, specifying the purpose of the proposed suspension, alteration or rescission, provided that nothing in this rule shall limit the provisions of Rule 5.

Rule 45. Whenever a claim is referred to a committee, and the committee reports that the claim ought not to be allowed, and the report is adopted by the Council, it shall not be in order to move to take the papers from the files for the purpose of subsequent introduction, unless the claimants shall present a memorial for that purpose, stating in what manner the committee have erred in their report, or that new evidence had been discovered since the report, and setting forth the same in the memorial.

Rule 46. The following persons only shall be admitted to the floor of the Council Chamber during its sessions:

1. The Mayor, his Private Secretary and Chief Clerk.

Rule 47. The rules of parliamentary practice comprised in "Jefferson's Manual" shall govern the Council in all cases to which they are applicable, and in which they are not inconsistent with the standing rules and orders of the Council.

Which was ordered on file.

The President laid before the Board the following message from his Honor the Mayor:
No. 1341.

CITY OF NEW YORK—OFFICE OF THE MAYOR, }
January 24, 1899.

To the Honorable the Board of Aldermen:

I return herewith, without my approval, a resolution adopted by you on November 29, 1898, giving permission to Cornelius J. Singleton to give stereopticon exhibitions from a wagon in the streets of the Borough of Manhattan.

My objection to this resolution is, that it contemplates and provides for an illegal use of the public streets within an opinion of the Corporation Counsel, dated June 11, 1898, and printed in the minutes of the Council of June 14, 1898.

ROBT. A. VAN WYCK, Mayor.

Resolved, That permission be and the same is hereby given to Cornelius J. Singleton to give stereopticon exhibitions from a wagon in the streets of the Borough of Manhattan, provided the same shall not be an obstruction to pedestrians or vehicles, the work to be done at his own expense, under the direction of the Chief of Police; such permission to continue only during the pleasure of the Municipal Assembly.

Which was laid over, ordered to be printed in the minutes and published in full in the CITY RECORD.

The President laid before the Board the following message from his Honor the Mayor:
No. 1636.

CITY OF NEW YORK—OFFICE OF THE MAYOR, }
January 24, 1899.

To the Honorable the Board of Aldermen:

I return herewith, without my approval, a resolution adopted by you on December 18, 1898, giving permission to John Houlahan to keep a stand for the sale of newspapers and periodicals under the elevated railroad stairs on the northeast corner of Sands and Fulton streets, in the Borough of Brooklyn.

My objection to this resolution is, that, whereas by its terms the stand is "to be erected to conform in all respects with the provisions of the ordinance in such case made and provided," yet it is reported to me by the Deputy Commissioner of Highways in the Borough of Brooklyn that there is no ordinance "now in force which would permit the erection of the news-stand provided for in the resolution," and that the erection of the news-stand "would be a direct violation" of the ordinances now in force in the Borough of Brooklyn.

ROBT. A. VAN WYCK, Mayor.

Resolved, That permission be and the same is hereby given to John Houlahan to place and keep a stand for the sale of newspapers and periodicals under the elevated railroad stairs, on the northeast corner of Sands and Fulton streets, Borough of Brooklyn, provided said stand shall be erected to conform in all respects with the provisions of the ordinance in such case made and provided, the work to be done at his own expense, under the direction of the Commissioner of Highways; such permission to continue only during the pleasure of the Municipal Assembly.

Which was laid over, ordered to be printed in the minutes and published in full in the CITY RECORD.

The President laid before the Board the following message from his Honor the Mayor:
No. 1788.

CITY OF NEW YORK—OFFICE OF THE MAYOR, }
January 24, 1899.

To the Honorable the Board of Aldermen:

I return herewith, without my approval, an ordinance adopted by you on December 20, 1898, entitled: "An ordinance in relation to advertising theatrical performances or public entertainments."

My objection to this resolution is that it has not been approved by the Board of Public Improvements as required by the provisions of the Charter. I express no opinion as to the merits or phraseology of the ordinance.

ROBT. A. VAN WYCK, Mayor.

AN ORDINANCE in relation to advertising theatrical performances or public entertainments. Be it Ordained by the Municipal Assembly of The City of New York, as follows:
Bill-boards or signs (not exceeding two in number), to advertise theatrical performances or public entertainments, may be placed upon or over the sidewalks of the streets or avenues, on the consent of the person entitled to the possession of the premises adjacent on that side of the street or avenue where such bill-board or sign is placed; said bill-boards or signs shall not occupy a space across the street of more than nine (9) inches, nor more than three (3) feet in width, to be placed adjacent to the curb and parallel with the street, and at least fifteen (15) feet apart.

Which was laid over, ordered to be printed in the minutes and published in full in the CITY RECORD.

No. 1320.—(G. O. 195.)

NEW YORK, January 24, 1899.

To the Honorable the Board of Aldermen:

On October 4, 1898, the following proposed ordinance was referred to the undersigned, the Committee on Railroads:

AN ORDINANCE to compel railroad companies to vestibule or inclose the front platform of cars in The City of New York.

Be it Ordained by the Municipal Assembly of The City of New York, as follows:

Section 1. Each and every railroad corporation or company operating cars in The City of New York by electricity, cable, compressed air, or any other motive power, except steam or horse power, shall on and after November 15, 1898, cause the front platform of each and every car so operated by them to be vestibuled and inclosed so that no passenger shall be permitted to ride thereon, under a penalty of twenty-five dollars for each and every violation of this section.

Sec. 2. All ordinances or parts of ordinances inconsistent or conflicting with the provisions of this ordinance are hereby repealed.

We have given careful consideration to the subject, and have had public hearings thereon.

No one has appeared in advocacy of the ordinance, excepting the introducer thereof, Alderman Gledhill. Representatives of railroad companies have appeared in opposition.

The humane purpose of the measure is fully appreciated by the members of the committee, who are in full sympathy with our Vice-President, as to the necessity of devising some means to relieve gripmen, motormen, drivers, etc., from the severe hardships of storm and weather.

We feel, however, the remedy proposed is impracticable in this city, and that if applied, life and limb of pedestrians would be in jeopardy, while truckmen and others in charge of vehicles of all kinds would be in constant peril.

We have taken from the stenographer's report, and make as part hereof, the logical argument presented by one of the counsel at our hearings, to wit:

"It is really impossible to put vestibules on cars operated in the city, because, in case of a snow-storm, rain or sleet, or storm of any kind, unless the motorman drops the front glass, it is impossible for him to see more than a few feet ahead of him; and after he has gone a mile in a storm such as I have described, it would be impossible for him to see anything outside of the glass."

"* * * * It may be true that it might be tried with success in other cities, it is equally true that it would not do for traffic in The City of New York. The congested traffic in The City of New York would not allow it, in the first place. * * * Take a snow storm like we had last week, and you would find it would be absolutely impossible for a motorman to run a car even a single block with glass up in front of him. He could not run his car even at a snail's pace without striking something. You must remember that a motorman has an awful lot to do. He has got to attend to his brake. He has got to set the car in motion. He has got to start the car and stop it. He has got to listen to the bell signals. He has got to look out for parties on both sides of the street. He has got to watch the track on the surface of the street in front of him. He has got to look out for small objects on the track as well as large objects, such as trucks and carriages. He has got to be alert every minute. He has got to look out for the people standing on the sidewalks wanting to get on, and he has got to listen for the conductor's bell for people wanting to get off. He has got to look out at the corner of every street for people wishing to cross the streets. He could not possibly attend to all of these things if he was enclosed in a glass case."

"* * * * Another of counsel presented the following valuable opinion:

"I have heard the statement that in other cities they have tried the vestibule with success. I know they use it in Buffalo, and I have a letter in answer to one which I wrote to the Manager of the Buffalo Railroad, Mr. H. H. Littell, one of the best railroad men in this country, to whom I propounded certain questions on the subject of this proposed ordinance, to wit:

"Do you operate vestibule cars on your road?"

"Answer. We have about one-fifth of our cars equipped with vestibules.

"Do you consider the danger of accidents to the public using the streets is increased by the use of vestibule cars in crowded cities where the climate is cold and stormy during the winter months?"

"Answer. We find the percentage of accidents very much greater where vestibules are used than we do where they are not. They obstruct the view of the motorman when he most needs the protection afforded by the vestibule, and he is compelled to throw open the front glass in order to see. We find that during rain, sleet and soft snow it adheres to the glass and prevents him from seeing. In such cases he is forced to open the vestibule and stand in a draught which results in severe colds and sickness."

In other words, Mr. Littell claims that it creates a special draught, and is liable to be an injury to the motorman. He then goes on to answer the following questions:

"Do you think an ordinance of this character would benefit the public, irrespective of the railroad's interests?"

"Answer. I do not see how the public could be benefited by an ordinance requiring vestibules. On the contrary, I think that vehicles and pedestrians would be subjected to a great deal more danger from vestibuled cars than from open platform cars that obstruct the view."

"We look at this thing in exactly the same light as Mr. Littell. I am the engineer of the Nassau Electric Railroad of Brooklyn, and I know it is not a question of expense with the Company that I represent in the slightest degree. Our streets in Brooklyn are narrow, as you all know; they are crowded, and they are used by a great many vehicles. We have to run our cars on a certain schedule time, in order to give any rapid transit at all; and if we were to put these vestibules on our cars, I do not see how we could make time, without running the risk of a greater number of accidents than we have now. We have accidents enough now, as everybody knows, and we certainly do not want to increase the number."

The following from "The Municipal Record and Advertiser," of February 26, 1898, on the subject of Vestibules, sustains fully the views heretofore quoted, and has had much weight in influencing your committee to report adversely hereon, i. e.:

"The street car vestibule is, comparatively speaking, a new product in the street railway industry; as it has only been during the last four winters that it has been used to any extent. By the laws of many States the railroads are compelled to use them, and there is also a growing sentiment among managers in favor of it, even where there are no laws compelling its use. But there are also managers who will not think of adopting the vestibule, unless they are finally driven to it by the Courts. * * * The serious objection is the danger of running down pedestrians and running into other vehicles."

"The vestibule is simply put on the ends of the cars as a protection to the motorman, who has to face the storm, and in consequence must, in certain weather, suffer considerably; but, if he is unprotected, he is in a position to see whatever is in front of him on the street, and can manage his car accordingly. With the vestibule, at best, he can only see in front of him, and at certain angles, at the sides, as the woodwork of the vestibule shuts off his view to a great extent. In storms and snows, just when he needs the protection, he has to open the front window and stand with his face to the storm, as of old, or his view will be entirely cut off, and accidents absolutely certain to occur. If he keeps the window closed, the snow or rain will accumulate on the glass, and render the operation of the car impossible. As it is, even with his face exposed, the accident possibilities are greatly increased, as the side windows are rendered nearly useless in any kind of snow storm. Again, in very cold weather, if the windows of the vestibules are not made double, but in single panes of glass, the different temperatures of the outside and inside surfaces of the glass will cause a frosting, or thin sheet of ice, to form on the glass, through which it is impossible to see. And even if the windows are put in double, in a snow storm, where the flakes of snow are large and damp, the snow will stick to the outer glass, and impair the view of the motorman."

"This one objection, on account of the greatly increased possibilities for serious accidents to the public in general, is sufficient to condemn the use of vestibules in climates that are subject to very cold and stormy weather. The benefit is only for the few employees of the road, but the danger is for the whole public at large. This danger has been considered by railroad men to be so great that many roads have refused to equip their cars with vestibules, even though the law demands it, and they are going to let the law take what steps it may, and then fight the question out in the Courts."

The importance of this subject and the desire to afford relief to the men at the front end of our cars prompted one of our members, Alderman John T. McCall, while recently at Springfield, Mass., and at Hartford, Conn., where vestibule cars are being operated, to inquire from railroad men whether they were beneficial and practicable. The responses were in the negative and the views expressed conformed absolutely to those hereinbefore quoted.

We offer the following:

Resolved, That the Committee on Railroads be and it is hereby discharged from further consideration of the proposed ordinances relating to vestibules on surface railroad cars, and that the said proposed ordinance be placed on file.

No. 2054.

By Alderman Goodman—

Whereas, This city has, by official action, duly recognized the worth and merit of the philanthropic project of offering to the unemployed poor vacant land for cultivation, by the means of which much suffering is alleviated and many families are placed beyond the reach of want—enabled to build a future for themselves by their own effort, thrift and enterprise; and

Whereas, Because of this official recognition on the part of our city there has been in practical operation a vacant lot farm for the period of a year past at Pelham Bay park which has established a worthy precedent, deserving further and broader extension and expansion; and

Whereas, The Association for Improving the Condition of the Poor, under whose auspices the said farm has been conducted, advises that this good work shall be continued by the Salvation Army, which has recently given so much attention with most satisfactory results to this commendable method of extending charity; therefore

Resolved, That our Committee on Public Charities shall and it is hereby instructed to make a prompt, careful and thorough investigation of this matter; to examine the records of the Board of Aldermen pertaining hereto, as found on pages 190 and 191 of the Journal of Proceeding of April 30, 1895, pages 336, 337 and 338 of the Journal of May 21, 1895; page 332, to and including page 340 of the Journal of February 18, 1896, and pages 454 to and including page 462 of the Journal of February 25, 1896; also to examine the records of the Park Department which granted the use of three hundred and twenty-one acres of Pelham Bay park for the purpose set forth; and to study the several papers appended hereto, and the works recommended in the bibliography attached; and having thus become fully acquainted with the project in its broadest sense, to confer with his Honor the Mayor and solicit his aid and co-operation for the continuance of this good work, in the most comprehensive and practical manner possible.

Resolved, That the consolidation of the several counties now forming our Greater City, having added thousands of acres of land available for farm cultivation to the limited acreage under our jurisdiction heretofore, the opportunity presents itself to carry into practical effect the work herein contemplated, on a scale of such magnificent proportions as to elicit the most earnest and enthusiastic support of the city administration.

Resolved, That the Committee on Public Charities shall, after conferring with all interests involved, present to the Municipal Assembly such an ordinance or ordinances as will authorize and enable the proper authorities to begin at once to locate and operate vacant land farms under conditions mutually satisfactory to the city, the organizations under whose auspices the work is to be conducted, and the poor whom it is intended to benefit.

THE VACANT LOT COMMITTEE WORKING WITH THE ASSOCIATION FOR IMPROVING THE CONDITION OF THE POOR.

NEW YORK, January 21, 1899.

Alderman GOODMAN, City Hall, New York:

MY DEAR SIR—In reply to your question I would say that whilst there has been no formal action of our committee as yet, I have seen the various members and can assure you that the committee does not intend to avail itself of the Park land, which it used last year.

The Association for Improving the Condition of the Poor feels that it has so much on hand that it must concentrate its efforts to its usual work, and our committee does not feel inclined to continue as a separate organization and to manage this alone. At the same time it would be glad to give anyone the benefit of its experience and encouragement.

I have suggested to the Executive Committee of the Association for Improving the Condition of the Poor the desirability of the Salvation Army taking it up, owing to its facilities in this line. It would be a pity, after so much success, were the matter allowed to drop.

Yours very truly,

BOLTON HALL, Chairman of Executive Committee.

SEALED BIDS OR ESTIMATES FOR THE above-mentioned work, in conformity with plans and specifications, will be received at the office of the Department of Public Charities, foot of East Twenty-sixth street, in The City of New York, until 12 o'clock, M.,

MONDAY, FEBRUARY 6, 1899.

The person or persons making any bid or estimate shall furnish the same in a sealed envelope, indorsed "Bid or Estimate for the Materials and Work required for Insane Pavilion, Bellevue Hospital," with his or their name or names, and the date of presentation, to the head of said Department, at the said office, on or before the day and hour above named, at which time and place the bids or estimates received will be publicly opened by the President of said Department, or his duly authorized agent, and read.

THE BOARD OF PUBLIC CHARITIES RESERVES THE RIGHT TO REJECT ALL BIDS OR ESTIMATES IF DEEMED TO BE FOR THE PUBLIC INTEREST, AS PROVIDED IN SECTION 419, CHAPTER 378, LAWS OF 1897.

No bid or estimate will be accepted from or contract awarded to any person who is in arrears to the Corporation upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the Corporation.

The award of the contract will be made as soon as practicable after the opening of the bids.

Any bidder for this contract must be known to be engaged in and well prepared for the business, and must have satisfactory testimonials to that effect, and the person or persons to whom the contract may be awarded will be required to give security for the performance of the contract, by his or their bond, with two sufficient sureties, each in the penal amount of Eight Thousand (\$8,000) Dollars.

Each bid or estimate shall contain and state the name and place of residence of each of the persons making the same, the names of all persons interested with him or them therein, and if no other person be so interested it shall distinctly state that fact; also that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Municipal Assembly, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of the Corporation, is directly or indirectly interested therein, or in the supplies or work to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated therein are in all respects true. When more than one person is interested it is requisite that the verification be made and subscribed by all the parties interested.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, with their respective places of business or residence, to the effect that if the contract be awarded to the person making the estimate, they will, on its being so awarded, become bound as his sureties for its faithful performance, and that if he shall omit or refuse to execute the same, they will pay to the Corporation any difference between the sum to which he would be entitled on its completion and that which the Corporation may be obliged to pay to the person or persons to whom the contract may be awarded as calculated upon the estimated amount of the work by which the bids are tested. The consent above-mentioned shall be accompanied by the oath or affirmation in writing, of each of the persons signing the same, that he is a householder or freeholder in The City of New York, and is worth the amount of the security required for the completion of this contract over and above all his debts of every nature, and over and above his liabilities as bail, surety or otherwise, and that he has offered himself as a surety in good faith and with the intention to execute the bond required by section 12 of chapter 7 of the Revised Ordinances of the City of New York, if the contract shall be awarded to the person or persons for whom he consents to become surety. The adequacy and sufficiency of the security offered to be approved by the Comptroller of the City of New York.

No bid or estimate will be considered unless accompanied by either a certified check upon one of the National or State Banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the security required for the faithful performance of the contract. Such check or money must not be inclosed in the sealed envelope containing the estimate, but must be handed to the officer or clerk of the Department who has charge of the estimate box, and no estimate can be deposited in said box until such check or money has been examined by said officer or clerk and found to be correct. All such deposits, except that of the successful bidder, will be returned to the persons making the same within three days after the contract is awarded. If the successful bidder shall refuse or neglect, within five days after notice that the contract has been awarded to him, to execute the same, the amount of the deposit made by him shall be forfeited to and retained by The City of New York as liquidated damages for such neglect or refusal; but if he shall execute the contract within the time aforesaid the amount of his deposit will be returned to him.

Should the person or persons to whom the contract may be awarded neglect or refuse to accept the contract within five days after written notice that the same has been awarded to his or their bid or proposal, or if he or they accept but do not execute the contract and give the proper security, he or they shall be considered as having abandoned it and as in default to the Corporation, and the contract will be readvertised and relet, as provided by law.

Bidders are cautioned to examine the plans and specifications for particulars of the work, etc., required before making their estimates, and are cautioned against referring to any specifications other than those furnished by the Department. Such references are cause for rejecting bids whereon they are written, and will in no case govern the action of the Department officers in passing upon tenders.

Bidders will write out the amount of their estimates in addition to inserting the same in figures.

Payment will be made by a requisition on the Comptroller in accordance with the terms of the contract.

The form of the contract, including specifications, and showing the manner of payment, can be obtained and plans seen at the office of Horgan & Slattery, architects, No. 1 Madison avenue, New York City, and bidders are cautioned to examine each and all of its provisions carefully, as the Board of Public Charities will insist upon its absolute enforcement in every particular.

The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated therein are in all respects true. Where more than one person is interested, it is requisite that the VERIFICATION be made and subscribed by all the parties interested.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, with their respective places of business or residence, to the effect that if the contract be awarded to the person making the estimate, they will, on its being so awarded, become bound as his sureties for its faithful performance, and that if he shall omit or refuse to execute the same, they will pay to the Corporation any difference between the sum to which he would be entitled on its completion and that which the Corporation may be obliged to pay to the person or persons to whom the contract may be awarded at any subsequent letting, the amount in each case to be calculated upon the estimated amount of the work by which the bids are tested. The consent above mentioned shall be accompanied by the oath or affirmation, in writing, of each of the persons signing the same, that he is a householder or freeholder in The City of New York, and is worth the amount of the security required for the completion of this contract over and above all his debts of every nature, and over and above his liabilities as bail, surety or otherwise, and that he has offered himself as a surety in good faith, and with the intention to execute the bond required by section 12 of chapter 7 of the Revised Ordinances of The City of New York, if the contract shall be awarded to the person or persons for whom he consents to become surety. The adequacy and sufficiency of the security offered to be approved by the Comptroller of The City of New York.

No bid or estimate will be considered unless accompanied by either a certified check upon one of the National or State banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the security required for the faithful performance of the contract. Such check or money must not be inclosed in the sealed envelope containing the estimate, but must be handed to the officer or clerk of the Department who has charge of the estimate box, and no estimate can be deposited in said box until such check or money has been examined by said officer or clerk and found to be correct. All such deposits, except that of the successful bidder, will be returned to the persons making the same within three days after the contract is awarded. If the successful bidder shall refuse or neglect, within five days after notice that the contract has been awarded to him, to execute the same, the amount of the deposit made by him shall be forfeited and be retained by The City of New York as liquidated damages for such neglect or refusal; but if he shall execute the contract within the time aforesaid the amount of his deposit will be returned to him.

Should the person or persons to whom the contract may be awarded neglect or refuse to accept the contract within five days after written notice that the same has been awarded to his or their bid or proposal, or if he or they accept but do not execute the contract and give the proper security, he or they shall be considered as having abandoned it and as in default to the Corporation, and the contract will be readvertised and relet as provided by law.

Bidders are cautioned to examine the plans and specifications for particulars of the work, etc., required before making their estimates, and are cautioned against referring to any specifications other than those furnished by the Department. Such references are cause for rejecting bids whereon they are written, and will in no case govern the action of the Department officers in passing upon tenders.

Bidders will write out the amount of their estimates in addition to inserting the same in figures.

Payment will be made by a requisition on the Comptroller, in accordance with the terms of the contract.

The form of the contract, including specifications, and showing the manner of payment, can be obtained and plans seen at the office of Horgan & Slattery, architects, No. 1 Madison avenue, New York City, and bidders are cautioned to examine each and all of its provisions carefully, as the Board of Public Charities will insist upon its absolute enforcement in every particular.

The consent above mentioned shall be accompanied by the oath or affirmation, in writing, of each of the persons signing the same that he is a householder or freeholder in the City of New York, and is worth the amount of the security required for the completion of this contract, over and above all his debts of every nature, and over and above his liabilities as bail, surety or otherwise, and that he has offered himself as a surety in good faith and with the intention to execute the bond required by law. The adequacy and sufficiency of the security offered is to be approved by the Comptroller of the City of New York before the award is made and prior to the signing of the contract.
