Sundries	7,045 00
Taxes	43,000 00
	<u>55,745 00</u>

Estimated balance, July 1, 1906..... \$168,007 11

On basis of six months' available funds, the expenditures are \$25,474.86 more than the allowance, but this is partly explained by the payments for taxes which had not been provided for by the Board of Estimate and Apportionment in the Budget for 1906. The contractual, requisition and salary payments will not exceed the amount allowed for the year, and other funds must be provided to meet the deficit caused by the payment of tax bills.

The Borough of The Bronx consumes all the supply from the Bronx and Byram rivers, and also about 18 to 20 million gallons daily of Croton water delivered through the old aqueduct.

June 21 the new aqueduct was closed for eighteen hours for the purpose of opening the bulkhead at shaft 21 into Jerome Park Reservoir.

Water wasted over the dam at Kensico for twenty-eight days, April 1 to 28, inclusive, during the quarter amounting to 860,000,000 gallons.

From April 1 to May 14 the gates in the Armonk tunnel were closed and the run off of the Byram and Wampus rivers allowed to waste off the watershed. May 14 five of the six gates were opened 12 inches, allowing the water of the Byram and Wampus to run into Kensico Reservoir.

The water throughout the Borough of The Bronx has been practically the same from a sanitary standpoint as it was during the corresponding quarter for last year, but the turbidity and microscopic growths have been considerably higher, due to an increase in turbidity and microscopic organisms in Kensico Reservoir and Rye Pond.

BOROUGH OF QUEENS.

Owing to the growth of this borough, the consumption has greatly increased, and the Department should, therefore, spare no efforts to increase the supply. For this purpose it is intended to build and put in commission Pumping Station No. 2, which was wrecked in November, 1902, and afterwards practically dismantled. The attention of the Citizens' Company has been repeatedly called to the lack of pressure, and they have been urged to secure additional supply and improve the distribution system. They are laying 24 and 36-inch mains from the end of the City main at Union turnpike to connect with their proposed pumping station at Alley Pond, Douglaston. They expect to be able to provide much better service for the First and Second Wards.

The supply from the Bowery Bay Building and Improvement Company has been curtailed as much as possible, owing to the large amount of chlorine present in the water.

Plans have been completed for the extension of the distribution system, at an expense of about \$70,000, the work being principally in Long Island City. Plans are also in preparation for extensions in the Third Ward. In the plans under preparation provision will be made for laying a 20-inch main from Bayside Pumping Station to connect with the present 20-inch main at Cemetery lane and Broadway. Also for laying a 12-inch main from the end of the present 12-inch main near Little Neck creek. It will probably be advisable, while this work is under progress, to relay the submerged 12-inch main in Little Neck creek, plans for which have been prepared.

The work now being done under contract by Contractors D'Ambra & Tuccillo is about one-third completed, while that of Messrs. Norton & Dalton is practically finished, and the water turned on in all lines thereof; final payment is being withheld until some minor requirements are complied with.

BOROUGH OF RICHMOND.

A large map covering the entire distribution system of the borough has been made, and copies given to the Fire Department. The map includes the distribution systems of the various private companies as well as the mains belonging to The City of New York. The Fire Department has asked for a number of additional hydrants, principally on the mains of the private companies, a request with which the Department has not been able to comply because of the lack of provision for additional hydrants in the hydrant rental appropriation. In the case of those on the mains of the Crystal Water Company, this difficulty may be overcome, when the City takes possession of the plant.

The field work in connection with a number of proposed contracts for a comprehensive distribution system, has been completed, and while the notes have not all been plotted, we are in a position to complete the drawings for the same at short notice. The surveys for the proposed extension of the Tottenville system to Kreischerville have been partly made, and the plans and specifications for the same will be ready shortly.

Numerous applications of the private water companies have been examined and reported on from time to time, as well as applications from the Fire Department for additional hydrants and applications of private individuals and corporations for permits that come under the jurisdiction of this Department.

MECHANICAL DIVISION.

BOROUGH OF MANHATTAN AND THE BRONX.

Ninety-eighth Street Pumping Station.

Pumping Engines—Minor repairs were made to the priming, drain piping and other auxiliary piping, to steam traps and to parts of the air pumps. A suspension bracket was placed on the water end of each pump. The pumps were repacked.

On the No. 1 engine a new cut of valve for crank end of the high pressure cylinder of the left-hand engine was made, fitted and placed.

Boilers—Minor repairs and renewals were made in feed-water connections, gauge gas connections in blow-off lines and other appurtenances for these boilers. Slight repairs were also made to the boiler shells and to the building.

One Hundred and Seventy-ninth Street Pumping Station.

Pumping Engines—Repairs and renewals were made on parts of the steam jacket, drain piping, oil cups, air chambers, gauge glasses, etc., on the engines. The engines, air pumps and valves were repacked. On the No. 2 engine a broken cam of the admission valve of the low pressure steam cylinder was replaced. A new crank was fitted to the low pressure exhaust valve. On the No. 4 engine a new bracket was placed on the frame of the high pressure engine to steady the rocker arm of the valve gear.

Boilers—The boilers were regularly cleaned out and clinkers removed from the side and bridge walls. Minor repairs were made to the boiler furnaces, setting grate bars and shakers, and in boilers No. 5 and No. 7 tubes were expanded and rerolled.

High Bridge Pumping Station.

The boilers in this station are in excellent condition, and when repaired may be started up at any time. Pumping Station No. 1 (Delamater), five million gallons daily capacity, has been shut down for several years, and has not been in condition to run on account of being damaged by frost.

Necessary general repairs, which are now approaching completion, are being made on this engine, so that in case of a breakdown in the One Hundred and Seventy-ninth street pumping station this engine may be put into service.

Pumping Engine No. 2 (Worthington)—This engine is in first-class condition, and put into the regular service when desired.

Jerome Avenue Pumping Station.

Outside of the regular routine of the station, such as cutting out and cleaning the boilers, etc., no work of importance on machinery has been done.

The tiled flooring of the engine room was repaired in several places, where it had been uplifted by frost.

BOROUGH OF QUEENS.

First Ward.

Pumping Station No. 1—Minor repairs were made to the pumping engines and the feed pumps at this station.

Pumping Station No. 2—This station was completely destroyed by an explosion several years ago, and since that time has been abandoned.

Owing to the increasing scarcity of water in Long Island City it has been decided to rebuild this station. Preparations have been made for constructing a temporary pumping plant, for purchasing pumping engines, condenser, smokestack, etc., and for making repairs to the wells now existing at the station.

Pumping Station No. 3—Minor repairs were made to the pumping engines, the feed pumps and other appurtenances at this station. A new cast-iron head was placed on one of the wells. The boilers have been regularly cleaned and are in excellent condition.

Third Ward.

Flushing Pumping Station.

The engines at this station are in excellent condition. Slight repairs were made to the receiver and automatic feed valves.

Boilers.

New furnace door liners have been received for the boilers. Minor repairs have been made to the steam lines. The work of installing toilet in fire room is progressing.

Bayside Pumping Station.

Minor repairs to the Holly pumping engine and to the Blake pumping engine have placed these engines in good order. The building closets and other parts of the pumping station have been painted and varnished by the department employees.

Whitestone Pumping Station.

Repairs were made to the large engine and the main steam line of same. The vacuum and water pipes were generally overhauled and other repairs were made to the suction receiver, the work being done by the department employees.

The boilers were regularly changed and cleaned, the furnace in same being relined by the department bricklayer. Minor repairs were made to the pipes and fitting on the boiler. The work of constructing the oil storage house is under way.

BOROUGH OF RICHMOND.

Tottenville Pumping Station.

The deep well pumps were regularly maintained, while general repairs were made on the boxes, piston rods of the auxiliary valves of the deep well pumps Nos. 3, 5 and 9. The renewals were also made of set screws and globe valves of these pumps.

Boilers—Part of the main steam line from the boilers to the well pumps were renewed and repairs were made to this line and the injector on the No. 1 boiler, and to the feed and cold water lines. A new 100-horse power Goubart feed water heater has been furnished and installed in this plant.

High Pressure Fire Service.

On the three contracts with the Continental Asphalt Pavement Company for furnishing and laying of high pressure fire service mains in the Northern district, Middle district, and in the Southern district, respectively, work was begun on the Northern district early in this quarter.

The delivery of pipes and special castings began on April 15, and ground was broken for laying of mains on May 6, last.

The work done, up to and including June 30 is, as follows:

Pipe 12 Inches in Diameter.

Eleventh avenue, between Twenty-first and Twenty-third streets.
Fifteenth street, between Tenth avenue and Union square.
Sixteenth street, between Tenth and Seventh avenues.
Seventeenth street, between Seventh avenue and Union square.
Eighteenth street, between Seventh and Fifth avenues.
Twentieth street, between Seventh and Fifth avenues.
Twenty-first street, between Tenth and Eleventh avenues.

Twenty-second street, between Tenth and Eleventh avenues.
Bethune street, between West and Hudson streets.
Gansevoort street, between West and Little West Twelfth streets.
Jane street, between West and Hudson streets.
Washington street, between Bethune and Little West Twelfth streets.
Total linear feet of 12-inch pipe laid, 18,288.

Pipe 16 Inches in Diameter.

Sixteenth street, between Sixth and Seventh avenues.
Twenty-first street, between Fifth and Seventh avenues.
Total linear feet of 16-inch pipe laid, 2,511.

Pipe 24 Inches in Diameter.

Little West Twelfth street, between Washington and Gansevoort streets.
Gansevoort street, between Little West Twelfth and West Fourth streets.
Thirteenth street, between West Fourth street and Fifth avenue.
Total linear feet of 24-inch pipe laid, 3,616.
Total linear feet of all sizes of pipe laid, 24,415.

Gate Valves and Hydrants Set.

20-inch gate valves set.....	2
16-inch gate valves set.....	1
12-inch gate valves set.....	44
8-inch gate valves set.....	15
Hydrants set	15

The laborers employed on the work up to June 30, is as follows:

Week ending May 21, per day.....	127
Week ending May 29, per day.....	175
Week ending June 4, per day.....	271
Week ending June 11, per day.....	371
Week ending June 18, per day.....	364
Week ending June 25, per day.....	392
Week ending June 30, per day.....	352

The average number of men employed per day from May 14 to June 30, inclusive, was 293.

The above work has been done entirely under the contract of laying mains in the Northern district for the high pressure fire system.

The estimated cost of which is.....	\$870,709 75
The work done to date and paid for under estimate No. 3.....	289,807 43

Balance of work to be done..... \$589,902 32

The above contracts for the Northern district is about 33 per cent. completed.

No work has been done to date on the distribution system for the middle and Southern districts.

It is evident that the rate at which the work is being done will be easily maintained.

The contract of the A. P. Smith Manufacturing Company for furnishing and delivering 1050 four nozzle post hydrants, and 40 two nozzle fire boat connection hydrants, for the high pressure fire service mains, is proceeding satisfactorily, 35 four nozzle post hydrants having been delivered to date.

The work under the contract with the Allis-Chalmers Company for furnishing and installing electric motor driven pumps with all appliances complete for the high pressure fire service at Oliver and South streets, and Gansevoort and West streets, is progressing, the work of construction in the shops having been begun.

The plans and specifications for the buildings for the pumping stations to be located at Oliver and South streets, and Gansevoort and West streets, and for the salt water suction and intakes to same are practically completed and ready for advertising.

Filtration.

On May 11, last, the Board of Aldermen, in answer to your request for an appropriation of \$50,000 for the employment of the requisite force and other incidental expenses needed for the study and preparation of plans, form of contracts and specifications for filtering the Croton supply, appropriated the sum of \$25,000 for that purpose.

On May 24, Mr. William B. Fuller was appointed as Engineer in charge of the Filtration Division and reported for work, and on the same day Mr. Fred C. Dunlap was appointed and reported as First Assistant Engineer. I assigned Mr. C. Manning and Edward Nuebling, draughtsmen in this Bureau, to the Filtration Division, and Mr. J. Vogelsson, Assistant Engineer, reported on June 21. The appointment of Messrs. Hering & Fuller as Expert Consulting Engineers has not yet been acted upon by the Civil Service Commission.

Although some delays have been experienced in obtaining the furniture and supplies, for which requisition was forwarded on May 24, the draughtsmen and assistant engineers have been diligently at work classifying and assorting the existing data relating to the project in hand, particularly as regards the Jerome Park Reservoir site.

Important questions in connection with the proposed plan of filtration, i. e.,

- Maximum rate to be adopted;
- Best method of removing the color;
- Best method of cleansing the filters;
- Need and sizes of settling basins, and
- Treatment of foundation,

—are and have been receiving consideration.

In connection with the work arrangements are being made to determine the capacities of the old and new aqueducts, so as to determine the loss of head. Careful inspection of the method of cleaning filter beds by washing, which has been successfully applied in the filter beds at Hempstead and Forest Stream in Brooklyn, is under way, to determine the adaptability of this method for the proposed filter beds under consideration. Should this plan be practicable, it would result in a very large economy.

Also, to determine the application of alum to remove color, experiments are under way to convert several of the filter tanks at Baiselevs (Borough of Brooklyn) into temporary testing tanks. Lastly, plans and specifications are under way for a temporary experimental filter station to be erected at the south end of the Jerome Park Reservoir, with a view to make direct tests of the Croton water. Plans are also under preparation showing the depth to rock foundation within the limits of the Jerome Park Reservoir.

Force and Office Room.

I again renew my recommendation to appoint two assistant engineers experienced in the work of distribution and prevention of waste, made in the last quarterly, in order to take charge of that branch of our work. This is all the more necessary in view of the law recently passed authorizing the Commissioner of this department to put meters in such districts as he may deem advisable, and tabulate results and report on the same, as prescribed in said law.

The rooms previously occupied by some of our Assistant Engineers in the sixth floor were given up and quarters secured in the ninth floor, both for the High Pressure Division, Mechanical Division and the new Division on Filtration. Considerable improvement in the space allowed and facilities for doing our work has thereby been secured. Our men on the fifteenth floor are, however, still crowded. After consulting with the managers of the building a plan has been laid out by which it may be practicable at the end of the year to secure quarters in the ninth floor for the whole engineering force. This will prevent the inconvenience of having the Engineers separated, with the consequent loss of time.

Yours respectfully,

I. M. DE VARONA, Chief Engineer.

Condition of the Supply.

The emergency stations established on both the old and new watershed increased the supply so that the yield from the watershed was ample to meet the demands of the Borough, but, on account of the threatened strike in the coal fields, it was impossible to obtain, during the greater part of June, a proper quality of coal for our Ridgewood Station and we therefore were unable to pump the full amount of water which otherwise would have been available. Furthermore, the warm weather caused a decided increase in the consumption, the average for the month of June being about 14,000,000 gallons more than for the corresponding month of last year. The contents of our Ridgewood basins were reduced at an alarming rate and it was necessary to buy coal without public letting in order to increase the pumping at the Ridgewood Station. To prevent waste, notice was sent to the Police Department to stop the illegal use of sprinklers and a house to house investigation was organized, all the Inspectors of the Water Registrar's Bureau who could possibly be spared being placed on this work. These measures should reduce the consumption, but in case of a very dry spell during the summer it will be impossible to furnish sufficient water to meet the demands of the consumers without curtailing the pressure to a point that would cause general complaint. Recommendation was therefore made to the Board of Aldermen to authorize

an expenditure of \$60,000, without public letting, for the establishment of additional temporary stations, and the location of these stations was fixed at the following points:

Along the conduit line at Woodhaven road.
Along the conduit line at Old South road.
Along the conduit line at about one and three-quarters miles west of Three Mile Mill road.
Along the conduit line at the intersection of the Merrick road, near Lynbrook.
South side of Millburn reservoir.

The location of these stations was determined by the supply to be obtained and also by the distribution of said supply. The lack of conduit capacity makes it necessary to obtain the supply at points where we would be able to carry the supply to the Ridgewood Station with our present conduit capacity. The first three stations are located on the western end of the conduit, where the conduit section is large and where we can carry an additional supply. The other two stations were located at points where the supply to be obtained would be a maximum and it would be expected to deliver the yield from these stations into the 48-inch pipe line laid in 1902 and increase the pressure on this line so as to increase the delivery at the Ridgewood Station.

If we should have a cool, wet summer, these emergency stations would be unnecessary, but the direct and indirect financial loss to the property owners in this Borough caused by any lack of water supply is so great that no effort should be spared to make certain that there would be no shortage in the supply necessary to meet the demands of the citizens. The experience of last year clearly indicated that the taxpayers would prefer to spend any reasonable amount on new stations rather than have any curtailment of the supply. It is expected that orders for the necessary boilers, engines and pumps will be given immediately, anticipating favorable action by the Board of Aldermen on the request for the emergency authorization.

The surface supply during the quarter has been comparatively large, as the rainfall has been above the normal and we have wasted water from the ponds both on the old and new sheds, the waste on the new shed being, however, comparatively unimportant. On the old shed the major portion of the waste has been from Baiseley's Pond and on account of the contaminated condition of the water flowing through Beaver brook, which is the west feeder for this pond, we have reduced as much as possible the use of water from the pond, only operating the filter plant when the other sources of supply were unable to furnish sufficient water to meet the demands of the consumers. The recent acquirement of title to property on East Meadow stream will permit the Department to place flashboards on the waste weirs of the East Meadow pond and thus store a larger amount of water than was previously possible and reduce the waste from this pond. The following is a summary of the waste from the ponds during the quarter:

H. S. WYNKOOP, Electrical Engineer.

Department of Water Supply, Gas and Electricity,
Borough of Brooklyn, Bureau of Water Rates,
July 5, 1906.

Hon. WILLIAM C. COZIER, Deputy Commissioner:

Dear Sir—I respectfully submit the following report of the business of this Bureau for the six months ending June 30, 1906:

Receipts	\$1,379,208 18
Receipts, same term, 1905	1,301,598 85
Increase, 1906	\$77,609 33

Notices to set meters have been sent, after due inspection and report, to owners of about 1,400 pieces of property during this term.

Permits were issued to plumbers to set meters	1,010
Permits were issued to plumbers (1905)	348
Increase, 1906	662

Orders given to City Plumber to set meters where owners have failed to comply with notices sent them through this office, 443. No such orders were issued in 1905.

The business of the Bureau is increasing very rapidly, and the need of the entire force of Inspectors is apparent. It is my desire to make a thorough inspection of the City by blocks, both to verify the books of the Bureau as to frontage rates, etc., and to determine what premises should be metered. I have been unable to do much in this line, however, as twenty-three of the Inspectors were sent from this office to Manhattan about March 1, and have not been returned to duty here, although their salaries are still charged to this Bureau, and I have to certify as to their time. All that could be done with the force available has been done.

Eight Temporary Inspectors have been on duty in this office since the middle of April, but their time expires within a few days, and it is very important that the Inspectors detailed to the New York office be returned as soon as possible.

Respectfully,
(Signed) WM. R. MCGUIRE, Water Registrar.Department of Water Supply, Gas and Electricity,

PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
