ation.

In the matter of the application of Peter Cassidy and George T. Reeves, an order having been received directing the Board to reinstate and to assign the patitioners to duty as Doormen, dated June 13, 1898, the opinion of the Corporation Counsel is respectfully asked as to the dety of the Board in assigning said patitioners to duty whether such assignment carries the salary that said persons received while in the employ of the late Park Department at the rate paid to them by the said Park Department, that of Laborers' pay, \$2 per day, or whether the board is obliged to assign them to duty with full pay and compensation as Doormen, and the date upon which such compensation will commence.

Application having been made by Lemis L. Grant for back salary due Charles W. Sturces. Application having been made by Louis J. Grant for back salary due Charles W. Sturges-reinstated as Patralman, the said application is decied for the reason that the Board does not recognize the right to demand such back salary except the same is made by the officer.

Sin—The width of East One Hundred and Forey data street, from Gerard avenue to the bulkherd line of the Harlem river, as now shown on the final maps of the Twenty-bird and Twenty-fourth Wards, is endirely inadequate for the construction of the bridge over the Harlem river connecting that street with One Handred and Forey finith street on the west side, and I subside, for the approval of the Board and the Mayor, a map are plan which will enable the Commissioner of Bridges to construct the approach in Board on Handred and Forey-nixth street and make the easterly beginning of the approach to the bridge at Exterior street, instead of at Gerard avenue.

The medification suggested is to whom East One Hundred and Ferry-ninth street fifty (50) bet in the north side between River avenue and the buildhood line of the Harless civer, to diver Randor arout from East One Hundred and Fiftieth street to the intersection of East One Hundred and Forty-ninth street and River avenue, and to which River avenue, from East One Hundred and Forty-ninth arest to East One Hundred and Forty-hundr attent, to too feet, thereby making River avenue the Esterior street and placing the southern terminal of River avenue at East One Hundred and Forty-hinth street.

The approach to the bridge will commence at Exterior street tracked of at Genord avenue at 1stone 1 it will have a predicated of 2 per cent, and will ovelate the construction of two (2) bridges new East on arout and over River avenue, as shown on the old plan, and will make the eastwhy to milious at the approach at a street too feet in width instead of at Genard avenue, which may on feet, that avoiding, in the lature, the congested traffic which will meetly follow the completion of the bridge should the old plan be carried out. That part of East-ord treet, as existing on the final maps, a to be discontinued.

there and Porty-mith area to East One Hundred and Forty-fourth street, as existing on the final maps, a to be discontinued.

This recommendation is made under authority of section 436 of chapter 378 of the Laws of 48-17, which say that the Board of Public Improvements is anthorized and empowered, without the consurrence of the Manicipal Assembly, but with the approval of the Mayor, to change the grades of bubbes, tunnel, and approaches to budge, and tunnels, and the location of approaches to bridges and numers.

The construction of the bridge was authorized under authority of chapter 986 of the Laws of 1803. Ample provisions are made in the act for the sequisition of lands required for changing grades and for connecting the approaches at each points on streets and avenues as may be determined.

I recommend that the matter be referred to the Commissioner of Bridges.

Respectfully, LOUIS A. RISSE, Chief Topographical Engineer and Engineer of Concourse,

Charl Topographical Engineer and Engineer of Concearse,

The inflowing resolution was thereupon manimously adopted:

Resolved, That the Board of Public Insprovements of The City of New York, in pursuance of the province of section 4 to of chapter 378, Laws of 1807, deeming it for the public interest so in the province to alter the map or plan of the City of New York by changing the approaches to the bridge over the Harless river at East One Hundred and Forty-ninth street, in the Borough of The Homes, City of New York, more particularly described as follows:

By widering East One Hundred and Forty-ninth street fully int on the north side between River avenue and the bulkbread line of the Harless river, directing Exterior street from East One Hundred and Fiftiers street to the intersection of East One Hundred and Forty-ninth street to East One Hundred and Forty-north street to a most of one Hundred fort, thereby making River avenue the exterior street, and placing the southern termines of River avenue at East One Hundred and Forty-ninth street, to that the approach to the bridge will commence at Exterior street instead of at Gersyl street. That pair of Exterior street from East One Hundred and Forty-ninth street to East One Hundred and Forty-ninth street

Resolved, That this board consider the proposed change of the approaches to the abovenamed bridge at a meeting of this Board, to be held in the office of this Board at No. 346 Broadway on the 6th day of July, 1895, at 2 o'clock v.m.

WINT END BOARD OF TRADE OF THE BOSOUGH OF BROOKLYN, No. 334 FIFTY SIXTH STREET, BROOKLYN, June 22, 1898.

The Board of Public Improvements of The City of New York;

The Hand of Public Improvements of The City of New York;

Gentlemen, "The West End Board of Trude, after seeing the report of the City's Engineer, respectfully suggest that the expenditure of the ladance of the money be made with regard to the wishes of the people of the locality embraced in the improvement and the needs of the locality. That territory suggested by the Engineer is not within that contemplated by the amended act, and there are no residents there at present. This money should be expended, in our view of it, in accordance with the act as amended, because it is jost and equitable to the entire locality, and it is the best for the entire locality to improve the streets between Third avenue and the water as indicated in the amended bill. This committee suggests (1) that the streets between Second and Third avenues be completed, which the Engineer estimates will leave \$18,000. We suggest then (2) that the paving of Second avenue be completed, beginning at Fifty-seventh street and paving north. This avenue is all paved with the exception of a strip of about to feet on each side of the tracks. If, as your committee believes, the accumulations of the original fund are credited to it, and as we read the set by its terms they should be added to it, there ought to be a fund sufficient to atmosphete all the streets west of Third avenue to the water.

What we are trying to convey to your Homorable Board is that it is the upinion of this Board of Trade that this money should be expended in accordance with the amended act, and that that view is shared by the majority of the residents of this district. It is evident to us that the greatest future in store for this locality must come from its water-from, and that this opportunity should be availed of to put the streets down to the water in as good condition as our means will permit.

Respectfully submitted.

Respectfully submitted,

tion, MAURICE F. HOLAHAN, Chairman, Found of City Improvements, New York City 2

DEAR SIR-The undersigned owners and occupants of premises in Broad street, south of Exchange place, in the Borough of Manhattan, City of New York, respectively request that the asphalt pavement which now extends in Broad street, from Wall to Exchange place, be extended south either toward or to Berster street.

This part of Broad street is almost the only densely populated part of the financial district of the city not payed with asphalt. Broad street to Exchange place is a powel; so is for honge place; so is New street. It is, during business hours, one of the most densely accepted parts of the city. The noise of the present block payerment makes offices in the toportion basing a limiting now erected on the street very objectionable, particularly during the momen months, when occupants are obliged to keep their windows and doors open, and the same remote which have applied to a change of payement in the adjacent streets apply with equal and even greater force to a change in the part of Broad street named.

Therappent of Highways - Communition's Office, No. 130 Nassau States, New York, June 17, 1808

How, Martine E. Holands, President, Board of Public Improvements

Dr. ar. Six.—Mr. Thomas Callanni has completed the work under his matrix to regulating and grating Porty-andi street, from Eleventh to Twelith average, Bonough at Machatian.

The contract time for performing the work was 30 days. The time coupled by completing the work was 36 days. Allowances of time were made at follows:

For inflement and stormy wenther,

For extra carb set
For extra earth exercised 12
For extra rock exercised 12

For extra rock exervated.

— making a total of 35 days, which, added to the 30 days' contract time apprepare 65 days, leaving 34 days' overtime chargeable under the contract, the possibly on the hay' arreviant being 55,50, or a total of 508,50.

The contractor claims that the overtime ought to be remitted because by such was delayed by the lowering of a water-main and a gas-pape, and also by the lowering of a machade hearts, of well as by the necessity of excessing to a depth of more than 4 fear, for the major of emotion large pieces of rock, while a depth of only 2 feet had been included in the most common The Chief Engineer of the Department of Highways reports that the contractor frequently excessed to a depth of from 2 to 5 feet had been meaning large pieces of rock, excepting over a distance of from 2 to 5 feet least of Twelith avenue, and that in the final inform a depth of out it is feet we included.

over a distance of from 210 to 220 feet each of Twelish revenue, and that in the limit is turn to depth of only 2 feet was included.

The Inspectors on the work input that it was delayed by the necessary lowering of water and gas pipes, in order that the contractor negles proved with the work. The gradue of the creek could not be accomplished without lowering the pipes, as the crude of the free had been changed. It is further reported by the Inspectors that delay not could by the lowering of sever manhabes, also by the bursting of a redespite.

It is therefore apparent that the contractor's claim that he work we delayed for a period count to the overtime charged is just, and the Chief Engineer of the Department of the the penalty for overtime is remained. It control is he is common and the penalty for overtime is remained. It control is he is common than the penalty for overtime one control in the control of the first control of the first order of the Department of the overtime control is control to the control of the first control of the first order of the Department of the order of the Department of the the penalty for overtime order to be contracted.
