DEPARTMENT OF PARKS.

REPORT FOR THE QUARTER ENDING SEPTEMBER 30, 1906.

Department of Parks, Boroughs of Brooklyn and Queens.
Litchfield Mansion, Prospect Park,
Brooklyn, October 1, 1906.

Hon. GEORGE B. McCLELLAN, Mayor of The City of New York:

Sir—I have the honor to submit to you herewith, in accordance with the provisions of section 1544 of the Charter, a quarterly report of the proceedings and finances of the Department of Parks, Boroughs of Brooklyn and Queens, from July 1, 1906, to September 30, 1906, inclusive.

Very truly yours,

M. J. KENNEDY, Commissioner.

STATEMENT OF WORK PERFORMED BY THE DEPARTMENT OF PARKS OF THE BOROUGH OF BROOKLYN AND QUEENS DURING THE THREE MONTHS FROM JULY 1 TO SEPTEMBER 30, 1906.

The quarter beginning July 1 and ending September 30 covers a period of the year during which the parks are used by the greatest number of people, and consequently the work of maintaining the same has been unusually extensive.

Prospect Park.

In Prospect Park the work of resoling was continued during the quarter and is practically completed. Portions of the lawns and plantations have been covered with a new layer of fine rich soil and parts of the same seeded and the borders sodded. The southeasterly section of Prospect Park adjoining the Willink entrance, which has long been a dumping ground, and which had practically never been fully developed, was cleaned up, grass and weeds cut, dead and decaying trees removed and much grading done. It is proposed to utilize this heretofore waste place, which is well covered with shade trees, as a picnic ground for Prospect Park, and remove the picnic shelter house and carrousel from the present site near the Third street entrance to the new location.

The resurfacing of the drives along the easterly section of the park was continued and is very near completion. Numerous repairs were made to the other drives, and no effort was spared to keep the same in good condition, although the surface is badly cut up by the many heavy automobiles frequenting the park.

The new brick gutter which is to replace the antiquated cobble throughout the park has been extended along the East drive and the Centre drive, opposite the music stand.

The grounds around the menagerie were thoroughly cleaned, some of the old cages removed and the foundations for new and modern quarters for the animals have been laid.

Repairs to buildings, park settees, tables and other fixtures have been numerous and constant. During the continued drought of the latter part of August and September portions of the lawns, as well as the trees and shrubbery, have been watered daily, the grass has been cut at least twice a week, the borders straightened and, where needed, resodded, and the park otherwise kept in attractive condition.

The chestnut trees forming a large portion of the old forest growth in this park have been attacked by a disease which at first could not be definitely identified, but has since proven to be a growth of fungi which will quickly destroy these trees. During the summer over five hundred stately trees were attacked by this pest, and while every effort was made to clean, spray and otherwise treat them, it has been impossible to save the same. The decay has been so rapid that the Departments forces have been unable to cope with it, and the taking down and replacing of the trees has been left for the fall and winter seasons.

The display in the flower garden, old-fashioned flower garden and the rose garden were unusually fine throughout the summer season, a great number of new and attractive species have been added and new beds were laid out and planted wherever it was deemed advisable.

The greater part of the bridle paths were recoated with fine gravel, the gutters cleaned and the paths harrowed almost daily.

A fine sidewalk was constructed on the park side of Prospect Park West, between Fifth and Fifteenth streets, at a cost of four thousand four hundred and eighty-eight dollars (\$4,488). A contract was also awarded for grading and soiling the grass plots between the same points for two thousand two hundred and twenty-six dollars (\$2,226). Both contracts were started and completed during the last quarter.

The new boathouse is rapidly nearing completion. A contract has been awarded for a suitable approach to the same for thirty thousand six hundred and thirty-seven dollars (\$30,637). The work is now well under way and it is expected that it will be completed by December 1.

The new building on the parade ground will be ready for occupancy in a short time. A contract has been awarded for the installation of the lockers for seven thousand two hundred and forty-eight dollars (\$7,248), and will be completed without delay.

Forest Park.

Forest Park has received the usual attention during the quarter just ended, the golf links have been kept in good condition, the trees and greens watered, the grass cut and the lawns rolled. The roadways were resurfaced with screenings where necessary and rolled, and were kept throughout the season in excellent condition. The weeds were cut, paths in the park and the surrounding sidewalks cleaned, and in some cases resurfaced with limestone screenings. The fences along the entire westerly portion of the park were scraped, cleaned and painted.

The new greenhouses and nursery were extended. One large house one hundred and twenty feet long and twenty-eight feet wide was added to the plant, and large number of plants and shrubs were propagated and set out. The grounds surrounding the new golf house were graded, covered with topsoil and sodded, walks and drives were laid out and two flights of granite steps were constructed.

Highland Park.

At Highland Park the newly established flower garden was extended, a number of new and attractive plants were set out, and the general display was admired by thousands of visitors. The roads and walks were resurfaced and rolled, trees and shrubbery were carefully looked after and watered, and the park in general was kept in excellent condition.

Fort Greene, Bushwick, City, Red Hook, Winthrop, and indeed all the smaller parks received considerable quantities of fresh topsoil. The same was spread wherever necessary, borders were cut and sodded and the grounds seeded. The fences were scraped, cleaned and painted, the walks raked, cleaned, resurfaced and rolled, and the parks in other respects greatly improved.

Floral displays of unusual brilliancy were had in most of the smaller parks, the principal ones being Seaside, City Hall, Cuyler, Tompkins, Saratoga and Linton parks.

Parkways.

Ocean Parkway—The main roadway from Coney Island to Kings Highway was recoated with trap screenings and rolled, repairs were made to the side traffic roads wherever necessary, the cycle paths were partly recoated with limestone screenings, and the work of resurfacing a portion of the main road between Twenty-second avenue and Prospect Park was started and is well under way. A number of new catch basins were built, drain pipe laid and sidewalks and stone crosswalks raised and otherwise repaired. The grass borders were cut, cleaned, carefully attended to, and the trees were watered throughout the dry spell.

A contract has been awarded for a pipe sewer from Avenue U to Kings Highway for five thousand one hundred and eighty-three dollars (\$5,183). Up to date fifteen hundred (1,500) linear feet of pipe has been laid and a number of basins constructed.

The bridle path was recoated with gravel and repairs made wherever necessary. The Speedway was kept in excellent condition. Frequent repairs were made to the same, and the entire course was harrowed and watered daily.

The work of constructing a cement sidewalk on the north side of the Concourse at Coney Island, being the south boundary of Seaside Park, was started, and will be completed in sixty days. The contract price is four thousand and fifty dollars (\$4,050).

Eastern Parkway—The work of resurfacing the main roadway was continued and completed. The entire road is now in excellent condition. The promenade and cycle paths on either side of the main roadway were resurfaced with limestone screenings where necessary, the grass borders were cut and trimmed, and the trees throughout the entire length of the parkway were watered during the dry season.

The contract has been awarded for rebuilding the traffic roads of the Eastern parkway at a cost of one hundred and sixty-five thousand dollars (\$165,000). The work of setting the curb has progressed and the grading and setting of concrete has been started. No time will be lost in completing this work.

The Eastern parkway extension was kept clean, numerous repairs were made, and the roadway was sprinkled daily.

Pitkin, Glenmore, Stone, Miller and Pennsylvania avenues were cleaned, sprinkled and otherwise cared for during the season. A contract has also been awarded for rebuilding the road at Glenmore avenue, from Stone avenue to Doscher street, at a cost of forty thousand dollars (\$40,000), and for the rebuilding of the roadway of Pennsylvania avenue, between Jamaica and Sutter avenues, at a cost of twenty-four thousand six hundred and eighty-eight dollars and sixty cents (\$24,688.60). Work has been started on the two last mentioned avenues, and it is expected that it will be completed before the cold weather sets in.

Bay Ridge Parkway and Shore road received careful attention. The roadways and gutters were repaired, the lawns were cut and the trees and shrubbery were watered.

On Fort Hamilton and Bay parkways numerous repairs were made. The gutters were cleaned, sidewalks freed from weeds, the roadways sprinkled, sidewalks raised in many places, new crosswalks provided where found necessary, and the trees properly looked after.

Care of City Streets.

Thirty-five men and two arboriculturists continued the work of pruning, cleaning and spraying the street trees, and over six hundred complaints were attended to during the quarter just ended.

Several sections of the Boroughs of Brooklyn and Queens were systematically taken in hand, the trees pruned, scraped and cleaned, and all insects removed and destroyed. This work has given general satisfaction.

Plans have been approved by the Art Commission of The City of New York for the following:

Entrance at Fifteenth street, consisting of two granite shafts surmounted by bronze tripod and urn, to cost twenty thousand dollars (\$20,000).

Shelter house and comfort station at Fulton Park, to cost ten thousand dollars (\$10,000).

A shelter house and comfort station at Sunset Park, to cost thirty-five thousand dollars (\$35,000).

Comfort station at New Lots playground to cost six thousand dollars (\$6,000).

Shelter house and comfort station at Winthrop Park to cost twenty-five thousand dollars (\$25,000).

A tennis house and shelter in Prospect Park to cost fifty thousand dollars (\$50,000).

A number of important improvements are contemplated in the different parks. Contracts have been awarded for the construction and completion of McLaughlin Park and for grading and paving the roadways of the same for thirty-two thousand three hundred and seventy-eight dollars and eighty cents (\$32,378.80).

Bids have been received for the erection of granite steps on the Fifteenth street or Coney Island avenue side of Prospect Park, to cost thirteen thousand six hundred and thirty-six dollars (\$13,636). A contract will also be awarded within ten days for the erection of a comfort station near the main entrance to Prospect Park, to cost twelve thousand dollars (\$12,000).

The work of grading and inclosing the addition to Willink entrance will begin early in October, bids for the same having already been received.

Concerts in the Parks.

The concerts in Prospect and the smaller parks closed on September 30, after the most successful season in the history of the Department. Music was furnished every Saturday and Sunday during the months of June, July, August and September in Prospect Park, and every Sunday during July, August and part of September in Highland and Fort Greene parks. Altogether there were thirty-three concerts given in Prospect Park, and forty-six in the small parks as follows:

Highland, fourteen; Fort Greene, eleven; Sunset, three; Red Hook, three; Irving Square, one; Flushing, three; College Point, two; Winthrop, three; Bushwick, three; Kings, two, and Corona, one.

It is estimated that over eight hundred thousand (800,000) people attended the various concerts.

On Sunday, September 23, the United German Singers of Brooklyn, numbering three hundred (300) voices, gave an exceptionally good concert. I desire to extend my thanks to the various organizations comprising the United German Singers for their services.

Revenue from Parks and Parkways.

During the three months from July 1 to September 30, 1906, inclusive, the sum of six thousand four hundred and sixty-six dollars and thirty-seven cents (\$6,466.37) was received from rents of houses and revenue from park privileges, bay window and sale of park property, which amount was turned over to the Hon. Patrick Keenan, City Chamberlain, for deposit to the credit of the Revenue Fund.

Advised that the Department has no inherent objection to the terminal, but it was suggested that plans be submitted so that it might be determined to what extent the carrying out of the plans would interfere with the wharfage facilities in the vicinity.

From the Department of Street Cleaning—

S. Butts.

From the Board of Armory Commissioners (68754)—Requesting the construction of a pier for its use between Ninety-fourth and Ninety-fifth streets, North river, together with the proper docking and mooring facilities. No. 1230.

Excelsior Hose Company No. 2
Fourth Ward, Borough of Queens,
Jamaica, N. Y., October 17, 1906.

Board of Aldermen of The City of New York; to the Fire Commissioners of Manhattan, Brooklyn and Queens Boroughs; to the Chief of Jamaica Fire Department:

Gentlemen—At a meeting of Excelsior Hose Company held on the evening of the 16th inst., at Excelsior Hose Company House, Union avenue, Jamaica, the following resolution was passed by the company:

Resolved, That we, the members of Excelsior Hose Company No. 2, Jamaica Fire Department, condemn the manner in which some persons connected with the Fire Alarm System, or others, have brought the name of our honored company before the public in such a notorious manner as to bring discredit upon its fair name; be it further

Resolved, That we cause a full and impartial investigation to be made, leading to a possible discovery of the person or persons responsible for having tampered with the alarm instruments in Excelsior Hose Company, the cause of which led to this controversy; be it further

Resolved, That a copy of this resolution be sent to the Board of Aldermen of The City of New York, Fire Commissioners of New York, Brooklyn and Queens, and to the Chief of Jamaica Fire Department.

Which was ordered on file.

COMMUNICATIONS FROM CITY, COUNTY AND BOROUGH OFFICERS.

The President laid before the Board the following communication from the President, Borough of Brooklyn:

No. 1231.

The City of New York,
Office of the President of the Borough of Brooklyn,
Brooklyn, October 23, 1906.

To the Honorable the Board of Aldermen:

Gentlemen—There has been appropriated for use in this borough for the installation of street signs \$8,000, and there is a balance available in a former fund for the same purpose of \$3,000. It has been found impracticable because of the conditions which govern the market for street signs to purchase these signs according to the usual method by contracts at public letting. I believe it therefore to be in the interest of the City that the signs should be otherwise purchased, and I therefore request your Honorable Board to adopt a resolution a form of which is attached hereto.

Yours very truly,

BIRD S. COLER,
President of the Borough of Brooklyn,

Resolved, That the President of the Borough of Brooklyn be and he is hereby authorized to let a contract for the purchase and installation of street signs in the Borough of Brooklyn without public letting, the total expense to the City for such street signs not to exceed eleven thousand dollars (\$11,000).

Which was referred to the Committee on Public Letting.

The President laid before the Board the following communication from the Trustees of Bellevue and Allied Hospitals:

No. 1232.

Bellevue and Allied Hospitals,
Office of the Board of Trustees, Bellevue Hospital,
New York, October 26, 1906.

Board of Aldermen, City Hall, New York City:

Gentlemen—The Board of Trustees of Bellevue and Allied Hospitals at its meeting held on October 23 adopted a resolution requesting the Board of Aldermen to permit the purchase in the open market of fresh fruits and vegetables for the coming year. This course has been pursued in the past by the Trustees in regard to this class of supplies with the result not only of obtaining a very satisfactory quality of supplies, but also at slight cost to the institution. Some months ago we were advised by the Comptroller that it would be necessary to purchase these supplies under contract, and since that time we have been so purchasing them. A comparison of the two methods shows a difference in cost of about \$138 a month in advantage of the old system of purchasing in the open market.

In consideration of the great saving involved in this and in further consideration of the fact that the quality of the supplies was better under the old system, we ask you to permit our return to this method of purchase.

I have the honor to remain

Yours respectfully,

J. K. PAULDING,
Secretary, Board of Trustees.

Which was referred to the Committee on Public Letting.

The President laid before the Board the following communication from the Board of Estimate and Apportionment, transmitting ordinance:

Hon. PATRICK F. MCGOWAN, President, Board of Aldermen:

Dear Sir—I send you herewith certified copy of a resolution adopted by the Board of Estimate and Apportionment October 26, 1906, approving of the issue of Corporate

Stock to the amount of \$13,110 to provide means to carry on the work of making maps, etc., and for making drainage and sewerage district plans of the Borough of The Bronx, together with copy of a report of the Chief Engineer, Department of Finance, approved by the Comptroller, relative thereto.

I also enclose form of ordinance for adoption by the Board of Aldermen to indicate its concurrence therein.

Hon. HERMAN A. METZ, Comptroller:

Sir—Hon. Louis F. Haffen, President of the Borough of The Bronx, in communication under date of October 11, 1906, requests the Board of Estimate and Apportionment to provide for the issue of Corporate Stock in the amount of \$13,110, for "Drainage and Sewerage District Plans, Borough of The Bronx."

I would report as follows:

In the departmental estimate of the said Borough for 1905, the sum of \$12,000 was included as being necessary for the purpose of meeting the expense of making the necessary examinations, surveys, etc., in connection with the said Drainage and Sewerage District Plans. The request was not allowed in the Budget of 1906, but was provided for by an issue of Corporate Stock, authorized by the Board of Estimate and Apportionment on December 22, 1905. (See page 3242, Minutes of the Board of Estimate and Apportionment, 1905.)

In communication herewith returned, addressed to Mr. Josiah A. Briggs, Chief Engineer of the Borough of The Bronx, and signed by Mr. Charles H. Graham, Engineer in Charge of Sewers, it is stated that the sum of \$13,110 is required for the year 1907, the increase of \$1,110 over last year being necessary in consequence of certain increases in salaries, either already made or proposed, of those engaged in the work.

The work for which the said appropriation is required consists in making certain investigations, studies, preliminary surveys, computations, maps, etc., in preparing the plans of drainage for the Chester district and also certain modifications for drainage plans for the Morrisania district.

It is my opinion that the amount asked for is necessary for the purpose stated, to provide for carrying on the work during the year 1907.

Respectfully,

CHANDLER WITHINGTON, Chief Engineer.

Approved:

H. A. Metz, Comptroller.

AN ORDINANCE providing for an issue of Corporate Stock in the sum of Thirteen thousand one hundred and ten dollars (\$13,110) to provide means to carry on the work of making maps, etc., and for making drainage and sewerage district plans of the Borough of The Bronx.

Be it Ordained by the Board of Aldermen of The City of New York as follows:

Section 1—The Board of Aldermen hereby approves of and concurs in the following resolution adopted by the Board of Estimate and Apportionment, October 26, 1906, and authorizes the Comptroller to issue Corporate Stock of The City of New York to the amount and for the purposes therein specified:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of Corporate Stock of The City of New York to an amount not exceeding thirteen thousand one hundred and ten dollars (\$13,110), to provide means to carry on the work of making maps, etc., and for making drainage and sewerage district plans of the Borough of The Bronx, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding thirteen thousand one hundred and ten dollars (\$13,110), the proceeds whereof to be applied to the purposes aforesaid.

Hon. PATRICK F. MCGOWAN, President, Board of Aldermen:

Dear Sir—I send you herewith certified copy of a resolution adopted by the Board of Estimate and Apportionment October 26, 1906, recommending the establishment of the grade of the position of Bookkeeper in the Bureau of Street Openings, Law Department, with salary at the rate of \$1,750 per annum for one incumbent, together with copy of communication from the Corporation Counsel relative thereto.

New York, October 16, 1906. }

Board of Estimate and Apportionment:

Dear Sirs—I request that your Board establish the position of Bookkeeper in this Department at an annual salary of \$1,750. At present the only Bookkeeper employed in the Department is Julius Hahn, in the Bureau of Street Openings. He was appointed at a salary of \$1,500 on November 9, 1893, and has never had a promotion or increase in salary, although his services have been satisfactory in every respect. There is money enough in the salary appropriation of this Department to increase his salary to \$1,750, but before that can be done it is necessary that your Board and the Board of Aldermen fix the salary of the grade.

I would appreciate it very much if you will give this matter your early attention, and will appear before your Board when the matter is considered to make any further explanation that is necessary.

Respectfully yours,

WILLIAM B. ELLISON, Corporation Counsel.

Whereas, The Board of Estimate and Apportionment, at a meeting held October 26, 1906, adopted the following resolution:

"Resolved, That the Board of Estimate and Apportionment, in accordance with the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen that the salary of the position of Bookkeeper in the Bureau of Street Openings, Law Department, be fixed at the rate of one thousand seven hundred and fifty dollars (\$1,750) per annum for one (1) incumbent."

Resolved, That the Board of Aldermen hereby concurs in said resolution and fixes the salary of the position of Bookkeeper in the Bureau of Street Openings, Law Department, at the rate of one thousand seven hundred and fifty dollars (\$1,750) per annum for one (1) incumbent.

Hon. PATRICK F. MCGOWAN, President, Board of Aldermen:

Dear Sir—I send you herewith certified copy of a resolution adopted by the Board of Estimate and Apportionment October 30, 1906, relative to the Budget for 1908 containing, whenever possible, a specific item for each class of expenditure to be made

thereunder in order that through said Budget adequate control may be had over the administrative and other cost of the various City and other departments, etc., etc., and requesting the Comptroller (in order to carry out this plan) to direct the preparation by the Bureau of Municipal Investigation and Statistics of the Finance Department, and submit to the Board of Estimate and Apportionment not later than May 1, 1907, an outline plan for the departmental estimate for each one of the departments, etc., etc.

Very truly yours,

JOSEPH HAAG, Secretary.

Whereas, The Board of Estimate and Apportionment have received certain preamble and resolutions adopted by the Board of Aldermen October 9, 1906, requesting "that the Budget do allow specific appropriations, indicating which estimates are granted and which are denied, in the case of every item in every account as they appear in the departmental estimate, and that the expenditure of each allowance be confined to the purposes as so indicated," etc., and

Whereas, Time has not permitted the adoption of this plan in more than a small part of the Budget for 1907, be it therefore

Resolved, That it is the opinion of the Board of Estimate and Apportionment that the Budget of the City of New York for the year 1908 should contain, whenever possible, a specific item for each class of expenditure to be made thereunder in order that through said Budget adequate control may be had over the administrative and other cost of the various City and other departments, especially to prevent increases in salary expenditures by department heads within the Budget allowances of said Departments for the year but in excess of the annual rates of salary allowances upon which the Budget was granted, and for the purpose of carrying out this plan the Comptroller is hereby requested to direct the preparation, by the Bureau of Municipal Investigation and Statistics, of the Finance Department, and submit to the Board of Estimate and Apportionment, not later than May 1, 1907, an outline plan for the departmental estimate for each one of the departments and county and other offices of the City to which allowances will be made in the Budget for 1908, said plan to provide for compliance with the purpose of this resolution in the said Budget of 1908.

Hon. PATRICK F. MCGOWAN, President, Board of Aldermen:

Dear Sir—I send you herewith certified copy of a resolution adopted by the Board of Estimate and Apportionment October 26, 1906, recommending the establishment of the positions of Curator and Auditor (1 incumbent) at \$4,750 per annum, Assistant Curator (1 incumbent) at \$2,500 per annum, and various other positions under the jurisdiction of the Board of Trustees, College of The City of New York, together with copy of report of the Investigations Division, Department of Finance, approved by the Select Committee, consisting of the Comptroller and the President, Board of Aldermen, and a copy of a communication from the said Board of Trustees, relative thereto.

I also inclose form of resolution for adoption by the Board of Aldermen to indicate its concurrence therein.

Very truly yours,

JOSEPH HAAG, Secretary.

Department of Finance, October 25, 1906.

Hon. HERMAN A. METZ, Comptroller:

Sir—In the matter of the communication from the Board of Trustees of the College of The City of New York requesting the fixing of the salaries of certain new positions which it is proposed to establish in said institution, which communication was referred to a select committee, consisting of the Comptroller and the President of the Board of Aldermen, and by you referred to the Bureau of Municipal Investigation and Statistics. I beg to report as follows:

In order to operate the new City College plant, with its five large modern buildings and extensive grounds, extending from One Hundred and Thirty-sixth street to One Hundred and Fortieth street, between Amsterdam avenue and St. Nicholas terrace, it will be necessary to employ a considerable number of officers, clerks, engineers, janitor's helpers and other employees, in addition to the present staff.

At a meeting of the Board of Estimate and Apportionment held October 12, 1906, a communication was presented from the Board of Trustees of the College of The City of New York, requesting the fixing of salaries for the following positions:

Curator, one incumbent.....	\$4,750 00
Assistant Curator, one incumbent.....	2,500 00
Elevator Boy, two incumbents.....	480 00
Mechanician, two incumbents.....	1,200 00
Photographer, one incumbent.....	1,000 00
Assistant Librarian, one incumbent.....	1,200 00
Cataloguer, one incumbent.....	1,200 00
Helper (in stock room), one incumbent.....	480 00
Assistant Engineer (dynamo), one incumbent.....	1,800 00
Assistant Engineer, two incumbents.....	1,400 00
Oiler, six incumbents.....	720 00
Fireman, five incumbents.....	720 00
Coal Passer, four incumbents.....	720 00
Electrician, one incumbent.....	1,800 00

Switchboard tender, one incumbent.....	720 00
Plumber (compensation estimated at prevailing rate, \$4.75 per day), one incumbent.....	1,482 00
Carpenter (compensation estimated at prevailing rate, \$4.50 per day), one incumbent.....	1,404 00
Janitor, one incumbent.....	18,330 00

As to Civil Service requirements concerning the above list of employees, the Board of Trustees states that it is not prepared at this time to say what positions it desires to have placed in the exempt class.

I am informed by the Secretary of the Board of Trustees that the position of Fireman has already been created, and that said item should therefore be eliminated from the above list.

Investigation shows that the Board of Trustees has given the matter of operating the new City College plant, with all its complicated appliances, including the most modern heating, ventilating and electrical apparatus, together with telephone and elevator service, long and careful consideration, and that the communication submitted to the Board of Estimate and Apportionment on October 12, 1906, concerning additional employees, was the final outcome of the best expert opinion which said Board could secure. Early in January of the present year a special committee was appointed, consisting of Parker D. Hartly and James W. Hyde, of the Board of Trustees, and Dr. John H. Finley, President of the College, which committee was requested to prepare a plan for the general organization of the supervision and care of the new buildings and grounds. Said committee secured the co-operation of the Supervisor of Janitors of the Board of Education of The City of New York, the Director of Buildings of Columbia University and the Curator of Buildings of Princeton University, and together they worked out the plan now under consideration.

It would appear that all of the above mentioned corps of additional employees will be necessary for the efficient operation and proper care of the City College plant as soon as it is completed, and that the necessity for the appointment of a Curator is especially urgent, because a part of the new plant is already in use by the College authorities for school purposes.

It was first proposed that the duties of the Curator of the College should be confined to the superintending of buildings and grounds, his position being similar to that of the Director of Buildings at Columbia University and the Curator of Buildings at Princeton University. He was to have general supervision of all employees, exclusive of the teaching force, including Engineers, Janitors, Clerks and all other persons necessary for the proper care and maintenance of the buildings and grounds. In addition to these duties, it has since been deemed advisable by the Board of Trustees to have the curator check all disbursements for the maintenance of the buildings, including the purchase of supplies, and also to perform various other important duties of an administrative character. Said Board has, therefore, requested, in a supplemental letter, that the title of the first position in the above list be changed to that of "Curator and Auditor." Your examiner would recommend that the title be that requested by the Trustees.

As to the salaries set opposite the several positions mentioned in the above list, as the result of a consultation by your examiner with the Secretary of the Commission on Salaries and Grades, appointed by the Board of Estimate and Apportionment, and an investigation of the salaries paid in corresponding positions in the various departments of the City and in other collegiate institutions, it is recommended that with the exception of the item for janitorial service, hereinafter considered, the salaries proposed by the Board of Trustees of the City College be approved.

As will appear from the above, it is proposed to employ a Janitor-in-Chief for the new City College plant at a salary of \$18,330, out of which sum said Janitor is to pay for the services of the staff of workmen which he employs to keep the buildings and grounds in proper condition. After thorough examination of both the direct and indirect systems of employment which now obtain in the Department of Education of The City of New York, the Board of Trustees of the College of The City of New York concluded to adopt the so-called indirect system, wherein the Chief Janitor hires his help, in providing janitor service for its new plant, the conclusion having been reached that said system is the cheapest as well as the most satisfactory.

The compensation which it is proposed to pay the Janitor-in-Chief of the City College, namely, \$18,330, was computed according to the indirect system employed by the Board of Education, which system, in so far as it relates to sweeping and cleaning, is as follows:

"Janitors' salaries shall be computed from building measurement, sidewalk areas and use of heating apparatus, as follows:

"First, the area in square feet covered by the building or buildings under the charge of each janitor shall be multiplied by the number of stories, excluding cellars, and from the product shall be deducted the area of Janitors' rooms.

"This measurement shall be multiplied by the following rates: On each thousand and quarter thousand square feet the rate shall be \$50. When the measurement is 10,000 square feet or over the rate shall be obtained by deducting from \$47 ten cents for each quarter thousand square feet in excess of 10,000, but it shall in no case be less than \$37.

"Second, all paved, flagged or planked sidewalks and yards connected with the buildings shall also be measured in square feet and on the same shall be calculated an amount at one-half the above mentioned rates."

It is to be noted in considering the above system that the rate per thousand feet decreases as the area of the building to be cared for increases until an amount of \$37 per thousand square feet is reached. It now appears that the Board of Education has no single plant which approximates the City College plant in extent of area, the latter being 471,776 square feet in buildings and 104,010 square feet of sidewalk, and that for this reason even the minimum rate of the Board of Education is too large to be used as the basis for computing the salary which should be paid to the Janitor-in-Chief of the City College.

I would, therefore, recommend that the question of the salary for the Janitor-in-Chief of the College of The City of New York be referred back to the Board of Trustees of said college for further consideration, and that the salaries of the remainder of the list as submitted, excluding the position of Fireman, which has already been created, be fixed, as requested, according to the resolution attached hereto.

Yours respectfully,
(Signed) CHARLES S. HERVEY,
Supervising Statistician and Examiner.

The College of The City of New York,
Office of the Board of Estimate,
New York, October 11, 1906.

To the Honorable GEORGE B. McCLELLAN, Chairman, Board of Estimate and Apportionment:

Dear Sir—The attention of the Board of Estimate and Apportionment is respectfully called to the following communication transmitted to the Commission on Salaries and Grades on August 27, 1906:

FRANK A. SPENCER, Esq., Secretary, Commission on Salaries and Grades, Appointed by the Board of Estimate and Apportionment:

Dear Sir—In reply to the communication from your Commission, dated June 15, 1906, requesting—

"1. What additional titles of positions should be created for your Department, giving reasons therefor?

"2. What grades of salaries should be established for such additional positions?

"3. What titles of positions now in existence can be abolished for the reason that the duties required are inconsistent with existing titles."

—the undersigned, Chairman and Secretary of the Board of Trustees of the College of The City of New York, beg to state that in order to properly care for the extensive grounds and buildings of the College at Amsterdam avenue, St. Nicholas Terrace, One Hundred and Thirty-eighth to One Hundred and Fortieth streets, with

their extensive and complicated apparatus, furniture and other appurtenances, it will be necessary to employ a sufficient and efficient staff of persons, and after careful consideration of the whole matter and upon its present information and subject to the possible inclusion of the present expense of janitorial service in the gross estimate of \$18,330, the Board has decided to recommend the establishment of the following positions in addition to the persons now on the College payroll, viz.:

1 Curator.....	\$4,750 00
1 Assistant Curator.....	2,500 00
*6 Clerks, \$600.....	3,600 00
*3 Office Boys, \$300.....	900 00
2 Elevator Boys, \$480.....	960 00
2 Mechanics, \$1,200.....	2,400 00
1 Photographer.....	1,000 00
1 Assistant Librarian.....	1,200 00
1 Cataloguer.....	1,200 00
1 Helper (in stock room).....	480 00
1 Assistant Engineer (Dynamo).....	1,800 00
2 Assistant Engineers, \$1,400.....	2,800 00
6 Oilers, \$720.....	4,320 00
5 Firemen, \$720.....	3,600 00
4 Coal Passers, \$720.....	2,880 00
1 Electrician, \$1,800.....	1,800 00
1 Switchboard Tender, \$720.....	720 00
1 Plumber (compensation estimated at prevailing rate of \$4.75 per day).....	1,482 00
1 Carpenter (compensation estimated at prevailing rate of \$4.50 per day).....	1,404 00
1 Janitor.....	18,330 00

*Positions already created.

The Board of Trustees finds that the method employed in the Department of Education for the cleaning of school buildings is to pay the Janitor a salary sufficient to enable him to pay all Cleaners, etc., and the Board is informed that this is a cheaper and more satisfactory method than employing such cleaning staff direct.

The Board is not prepared at this time to state what positions it desires to have placed in the exempt class.

On September 25, 1906, the following supplemental letter was sent to the Commission, viz.:

FRANK A. SPENCER, Esq., Secretary, Commission on Salaries and Grades, Board of Estimate and Apportionment:

Dear Sir—Supplementing the letter of the Board of Trustees of the College of The City of New York, dated August 27, 1906, addressed to you, we desire to state that at the present time the College is without a suitable person in its employ who can devote his entire time and attention to the responsible and often difficult details of the business, care and maintenance of the large and costly buildings erected for the use of the College at Amsterdam avenue and One Hundred and Thirty-eighth to One Hundred and Fortieth street. It has been deemed advisable by the Board of Trustees, in order to insure an intelligent and economical administration of the buildings, to appoint a responsible person to this proposed important position, who from experience would be able to superintend in an economical and efficient manner the execution of the policy for such administration prescribed by the Board of Trustees.

The duties of this new position would be various and important. The incumbent would check disbursements of the funds for maintenance of the buildings and it would be his duty to see that they were properly expended for the different purposes for which appropriated in the care and maintenance of the buildings, the purchase of supplies, etc., and he would also be called upon to perform other important duties of administrative character.

The Board has decided that the title "Curator and Auditor would be adequately descriptive of the duties to be performed, and would be a suitable and proper one to employ to designate this new position. It is most important for the reasons already given that this position should be created as soon as possible, and it is therefore requested that the Commission include it in the schedule of new positions recommended to be created in the preliminary report submitted to the Board of Estimate and Apportionment for its consideration and adoption."

In view of the urgent necessity for the appointment of a Curator and Auditor, the Chairman and Secretary of the Board of Trustees deem it advisable to bring this request to the attention of the Board of Estimate and Apportionment without further delay.

Yours respectfully,

(Signed) EDWARD M. SHEPARD,
Chairman, Board of Trustees, College of The City of New York.
(Signed) JAS. W. HYDE,
Secretary, Board of Trustees, College of The City of New York.

Whereas, The Board of Estimate and Apportionment, at a meeting held October 26, 1906, adopted the following resolution:

"Resolved, That the Board of Estimate and Apportionment, in accordance with the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment of the following grades of positions, in addition to those already existing under the jurisdiction of the Board of Trustees, College of The City of New York, as follows:

The Committee on Finance, to whom was referred, on September 19, 1906 (Minutes, page 755), the annexed ordinance in favor of an issue of Corporate Stock, \$400,000, for a site for a central supply depository for the Department of Education, respectfully

REPORTS:

The Committee has given very careful consideration to this matter, as it is one of great importance. It has held a public hearing, at which President Winthrop, of the Board of Education; Chairman Barrett, of the Committee on Supplies, and Patrick Jones, Supervisor of the Supplies Department, appeared and urged its adoption. In addition, the Committee has personally examined the present quarters and facilities of the Supply Department, and has examined very considerable data with reference to same. It has had personal inspection made of the proposed site—300 by 200 feet, on First avenue, between Sixty-seventh and Sixty-eighth streets—and investigated as to its value.

After this careful investigation and consideration, the majority of the Committee believe that a cheaper site (either less land or in a cheaper locality) would adequately answer the necessities of the Department for this purpose, and for this reason your Committee feels compelled to recommend that this application be rejected.

AN ORDINANCE providing for an issue of Corporate Stock in the sum of four hundred thousand dollars (\$400,000) to provide means for the acquisition of a site for a central supply depository for the Department of Education.

Be it Ordained by the Board of Aldermen of The City of New York as follows:

Section 1. The Board of Aldermen hereby approves of and concurs in the following resolution, adopted by the Board of Estimate and Apportionment September 14, 1906, and authorizes the Comptroller to issue Corporate Stock of The City of New York to the amount and for the purposes therein specified:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of Corporate Stock of The City of New York to an amount not exceeding four hundred thousand dollars (\$400,000), to provide means for the acquisition of a site for a central supply depository for the Department of Education, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding four hundred thousand dollars (\$400,000), the proceeds whereof to be applied to the purposes aforesaid."

JOHN R. DAVIES, B. W. B. BROWN, JAMES W. REDMOND, JOHN DIEMER, A. L. KLINE, THOS. J. MULLIGAN, Committee on Finance.

Under Rule 21, consideration of this report was deferred. Subsequently Alderman Davies moved the adoption of this report.

The President put the question whether the Board would agree to accept said report and reject said ordinance.

Which was decided in the affirmative by the following vote:

Affirmative—Aldermen Ahner, Bartscherer, Brown, Callahan, Carter, Cronin, Davies, Diemer, Dinwoodie, Dotzler, Downing, Ellery, Freeman, Griffenhagen, Gunther, C. Hahn, J. J. Hon. PATRICK F. MCGOWAN, President of the Board of Aldermen:

In connection with the operation of this ferry by the City, it may at any time become necessary to expend moneys in making repairs, etc., to an amount exceeding \$1,000, as now authorized, and in order to meet this condition I respectfully request that a resolution be adopted by the Board of Aldermen authorizing me as Commissioner of Docks to expend an amount not to exceed \$5,000 in any one case for the purpose of making expenditures for repairs and for the purchase of new parts, etc., in connection with such repairs, on the ferryboats and at each terminal.

A resolution of the character above requested was adopted by the Board of Aldermen in connection with the operation of the Staten Island Municipal Ferry.

Very respectfully, your obedient servant,

J. A. BENDEL, Commissioner.

Resolved, That, in pursuance of the provisions of section 419 of the Greater New York Charter, the Commissioner of Docks and Ferries be and he is hereby authorized and empowered to make expenditures for repairs and for the purchase of new parts, etc., in connection with such repairs, on the ferryboats and terminals of the South Brooklyn Ferry, from time to time as may be necessary, at a cost not to exceed five thousand dollars (\$5,000) in each case.

To the Honorable the Board of Aldermen of The City of New York:

Gentlemen—In accordance with the direction contained in the following resolution adopted at a meeting of the Board of Estimate and Apportionment, held this day, I have the honor to transmit herewith the Budget of The City of New York for the year 1907 for your consideration and action thereon:

"Resolved, That the Secretary be and he hereby is directed to forthwith transmit to the Board of Aldermen the Budget of The City of New York for the year 1907 for consideration and action thereon, in accordance with the provisions of section 226 of the Greater New York Charter."

Which was ordered received and printed.

(For summary hereof see CITY RECORD hereafter.)

SPECIAL ORDERS.

Alderman Griffenhagen called up Special Order 70, being a report and resolution, as follows:

No. 768.

The Committee on Public Letting, to which was referred on May 15, 1906 (Minutes, page 470), the annexed resolution authorizing the Commissioner of Public Charities to contract for additional plumbing in the male dormitory, Metropolitan Hospital, Blackwell's Island, without public letting, respectfully

REPORTS:

That at a hearing on the above matter Commissioner Heberd appeared before the Committee and explained that this additional work was required by the State Board of Charities. He stated that it was advisable for the contractor for the original work to do this extra work, as to bring another plumber on the building would lead to serious controversy, and mean considerable trouble and loss of time. The Committee therefore recommends the adoption of said resolution.

Whereas, The Commissioner of Public Charities in a communication to this Board, dated May 10, 1906, has reported that in order to comply with the requirements of the State Board of Charities, it is necessary to do additional plumbing in the male dormitory, now in course of construction at the Metropolitan Hospital, Blackwell's Island, and requests permission to award a contract for this extra work, amounting to about \$1,565, without public bidding; therefore be it

Resolved, That the Commissioner of Public Charities be and hereby is authorized to contract for additional plumbing without public bidding, for the male dormitory, Metropolitan Hospital, Blackwell's Island, amount of said contract for the extra plumbing not to exceed the sum of \$1,565, without further authorization by this Board.

A. L. KLINE, F. J. O'NEILL, MAX S. LEVINE, DAVID S. RENDT, JACOB BARTSCHERER, Committee on Public Letting.

The President put the question whether the Board would agree to accept said report and adopt said resolution.

Which was decided in the affirmative by the following vote:

Affirmative—Aldermen Ahner, Bartscherer, Brown, Callahan, Carter, Cole, Collins, Cronin, Davies, Diemer, Dinwoodie, Dotzler, Doull, Dowling, Doyle, Ellery, Everson, Freeman, Fried, Griffenhagen, Gunther, Haggerty, C. Alderman Peters called up Special Order No. 69, being a report and resolution, as follows:

Alderman Freeman called up Special Order No. 72, being a Code of Ordinances, as follows:

No. 29.

The Committee on Codification of Ordinances, to whom was referred, on January 9, 1906, a communication from the City Clerk, transmitting a code of City Ordinances, respectfully

REPORTS:

The Committee on Codification of Ordinances hereby reports that they have examined the entire subject of the ordinances of The City of New York, as well as the material in the proposed code of ordinances referred to this committee on the 9th day of January, 1906.

Your committee herewith present a compilation of all ordinances of The City of New York, including all such ordinances as are mentioned in sections 41 and 57 of the Greater New York Charter, together with all new ordinances and amendments of same, which have been adopted, and have become existing ordinances up to January 1, 1906.

Your committee have not reported anything as an existing ordinance, which has in it any new matter or has been revised in any manner whatsoever. Nor have this committee eliminated from their report any formerly existing ordinance, or part of an ordinance, which has not clearly been repealed by subsequent legislation or ordinance, or which has not been decided by the highest courts of this State to be of no force and effect.

In order to preserve certain well known ordinances, which have been repealed by the changes made necessary by the provisions of the Greater New York Charter, your committee have reported the same, not as existing ordinances, but as ordinances whose immediate re-enactment by this Board, with the substitution of such words as are suggested in the committee's report, is recommended. Instances of such ordinances are to be found where the ordinance relates solely to some locality, such as the Borough of Manhattan, or the Borough of Brooklyn, and where the words formerly contained in such ordinance were "The City of New York," or "the City of Brooklyn," and where

the duties of a designated office have devolved upon an official with a different title. In other words, the changes recommended are in cases where the name of some locality, or of some office, or the sense of the words, has been changed by the language of the Greater New York Charter, or of some State law.

Your committee, in its treatment and report of the existing ordinances, have considered only such acts as constitute the local laws of the City enacted by the Board of Aldermen, or similar body, and duly approved by the Mayor, or returned without his approval in such a manner that they have become ordinances by force of statute, and which are continuing in their nature, force and effect, and are either rules under which the Government of The City of New York is administered, or rules for the guidance or regulation of the conduct of the citizens of said City. This report contains only such acts of the Legislative body of this City as fall within the foregoing definition of an ordinance.

Your committee are not satisfied with the form or language of many of these ordinances, but a careful study of this subject has led the committee to believe that it is absolutely essential to adopt some code of ordinances that shall contain all the ordinances of this City, without reference to previously existing codes, in order that the code now adopted may be properly revised and corrected in the future, and your committee therefore ask this Board to refer this whole matter back to this committee for revision when the recommendations of this committee shall have been adopted.

For the purpose of clearing up a very confused state of affairs, your committee recommended that with the adoption of this report, this Board shall also adopt a general repealing clause, wiping out all ordinances that were in effect January 1, 1906, and adopting anew the ordinances as presented in this report as the existing ordinances of The City of New York, up to the date of January 1, 1906, together with such ordinances in their corrected form as are herein recommended for re-enactment.

For the purpose of carrying into effect the last preceding recommendation with greater clearness, this committee have stricken out the repealing clause of each ordinance, and also the clause designating when each ordinance shall take effect, for the reason that these clauses are now unnecessary. This is apparent from the fact that when this committee's report shall have been adopted, the ordinances herewith reported will supersede everything that has gone before, and will go into effect at the same instant of time that the repeal of all former ordinances as herein suggested, will take place.

Your committee find that the ordinances herewith reported divide themselves into five general classes.

First—The general ordinances applying throughout the entire confines of The City of New York, together with such ordinances of a general character as are recommended for re-enactment as general ordinances, including the Sanitary Code, the Building Code, and the Park Regulations.

Second—Local ordinances as amended to January 1, 1906, comprising such chapters and articles of the former revised ordinances as apply to the individual boroughs of said City, together with the local ordinances of the various towns, villages and localities now included within the Greater City of New York, and such as may be grouped together because their subject matter is related.

Third—Miscellaneous ordinances which refer to certain subjects that cannot be classified under a general heading, and which are grouped with those ordinances to which they are more specifically related.

Fourth—Obsolete ordinances, which relate to subjects that have no practical existence at the present time, and the immediate repeal of which is recommended.

Fifth—Ordinances that have been repealed by implication because of the fact that they referred to localities or officials, or to a condition of affairs not now existent, and the immediate re-enactment of which ordinances, with the suitable changes herein suggested, is hereby recommended. These ordinances have been reported in their proper places and connection.

As the policy of the framers of the Greater New York Charter and the interests of the City demand that the ordinances, so far as possible, shall be general, your committee, in several instances, have recommended the adoption of a local ordinance as a general ordinance or as a part of the existing general ordinances. In each such instance your committee have carefully indicated that such local ordinance, although inserted in the place it should occupy among the General Ordinances, is not a part of the General Ordinances, but is a local ordinance, and that its adoption as a General Ordinance is merely recommended.

Your committee believe that in all cases the suggestions made by the committee will strongly appeal to the common sense of the Board.

The system of corrections adopted by your committee is as follows:

The corrections of all ordinances of the former City of New York and of the former City of Brooklyn, together with those in the General Ordinances, are indicated by placing a parenthesis around such words as, in the opinion of your committee, should be stricken out, and by indicating the change which your committee suggests, in the margin opposite such parenthesis, the words suggested being underscored. The corrections of the ordinances of the former City of Long Island and the other smaller municipal corporations that are now comprised within the Greater City of New York have been indicated by placing the new matter suggested for adoption in parenthesis within the ordinance itself; the former language of the ordinance, which this committee recommends should be stricken out, is placed in the margin and underscored.

Your committee in presenting this report desire to express their thanks for the kind and valuable assistance rendered to it by the Hon. P. J. Scully, City Clerk, and his Deputies, Mr. Frank J. Martin and Mr. Charles R. Shopland, and also to the Assistant Corporation Counsel assigned to the Board, Mr. William H. Doherty, who is largely responsible for editing the ordinances of the smaller towns, villages and localities now incorporated in the Greater City of New York. As to these latter, your committee have included in their report all such local ordinances as they have been enabled to obtain.

Your committee therefore recommends the adoption of the following ordinance:

AN ORDINANCE adopting the Code of Ordinances of The City of New York.

Be it Ordained by the Board of Aldermen of The City of New York, as follows:

That all ordinances of The City of New York which were in force on January 1, 1906, be and they hereby are repealed;

Be it further Ordained that the ordinances of The City of New York, excluding those ordinances designed as obsolete, which are herewith presented in the report of the Committee on Codification of Ordinances of the Board of Aldermen of The City of New York as the existing ordinances of said City up to the date of January 1, 1906, and all ordinances recommended in said committee's report for re-enactment with the corrections as therein designated, be and they hereby are adopted and enacted as ordinances of The City of New York.

Note—Matter in italics is new matter; matter in parentheses, thus (), is old law to be omitted.

He shall direct and superintend the collection of all rents or other moneys due to the Corporation.

Sec. 25. He shall report to the Board of Aldermen (Common Council) within thirty days after their organization in each year a statement of all contracts made by the Corporation or directed or authorized by the Board of Aldermen (Common Council) and not performed or completed or upon which any moneys remain unpaid, with the amount of money so remaining unpaid on each.

Sec. 26. He shall direct legal proceedings to be taken when necessary to enforce payment of rents or other debts due to the Corporation, or to obtain possession of premises to which the Corporation is entitled.

Sec. 27. He shall, as often as the state of the Sinking Fund shall render it necessary, advertise and sell at auction or private sale, as in his judgment may be most expedient, the water lot quit-rents belonging to the Corporation in such parcels and on such terms as the Board of Aldermen or the Board of (Common Council or the) Commissioners of the Sinking Fund may prescribe, and cause proper conveyances to be executed to the purchasers, the avails of which shall be deposited in the treasury to the credit of the Sinking Fund.

Sec. 28. He may consent, in the name and on behalf of the Corporation, that the lessee or assignee of a lease made by the Corporation may assign the same or underlet the demised premises, whether or not provision is made by the lease that it shall not be assigned or the premises underlet without the consent of the Corporation; but he shall not so consent unless all arrears of rents and all taxes and assessments upon the premises be paid in full.

Sec. 29. When several lots or parcels of land belonging to different persons are assessed for taxes in one parcel, the Comptroller may make the proper apportionment of the tax among the different owners.

Sec. 30. The Comptroller shall preserve, in a book to be kept in his office for that purpose, to be called the record of quit-rents, maps of all grants of land now or hereafter made by the Corporation, on which quit-rents are payable, showing the original grants and the subdivisions of the same as near as they can be ascertained.

Sec. 31. He shall enter in the record of quit-rents immediately following each map the names of the owners of the different lots described thereon, with the portion of the quit-rent to which each is subject; and he may receive the sums proportionably due from each owner in payment of his portion of the moneys payable under the original grant, as the same shall from time to time become payable.

Sec. 32. He shall cause to be inserted, in all grants of land subject to a quit-rent, a covenant requiring the grantee or his legal representatives, when he or they shall sell the whole or a portion of the land granted, to give to the Comptroller a written notice of the sale within thirty days after it is made, specifying therein the name of the purchaser, the quantity and location of the land sold, the amount of quit-rent to be paid thereon, and the day of the sale.

Sec. 33. He shall, on receiving written notice from the grantee of the Corporation, or his assignee, of the sale of any portion of land subject to quit-rent, enter in the record of quit-rents the name of the purchaser, with the date of the sale and the portion of the land sold; and he may thereafter receive the sum proportionably due from such purchaser, in payment of his portion of the moneys payable under the original grant, as the same shall, from time to time, become payable.

Sec. 34. Upon receiving the notice mentioned in the last section the Comptroller shall enter the same in the record of quit-rents, and from that time he may receive from the owner of the lot or parcel mentioned in the notice, or his legal representatives, the sum proportionably due from him in payment of his proportion of the moneys payable under the original grant.

Sec. 35. When land heretofore granted by the Corporation, subject to a quit-rent, portions of which have been assigned by the grantee, shall be re-entered by the Corporation for non-payment of the quit-rent, the Comptroller may grant releases in severalty to such of the assignees of portions of the land granted as shall, within six months from the re-entry, pay their respective apportionments of commutation money, and the expenses of re-entry and conveyance, with such portions of the rent as may be justly due from the respective assignees for the land held by them, and which shall be apportioned by the Comptroller.

Sec. 36. The releases and apportionments mentioned in the last section shall not, however, be granted or made, unless the assignee requiring the same, or his legal representatives, shall comply with the terms and conditions prescribed in that section within thirty days after notice from the Comptroller requiring such compliance.

Sec. 37. The Comptroller may, from time to time, borrow on the credit of the Corporation, in anticipation of its revenues, such sum or sums, not exceeding in the whole the amount of such revenues as may be necessary to meet expenditures under appropriations for the current year.

Sec. 38. Every loan to be effected, as authorized by the last section, shall be secured by the bonds of the Corporation, payable in not exceeding one year, in such sums as the Comptroller may deem proper, which shall be signed by the Comptroller, countersigned by the Mayor and sealed with the common seal.

Sec. 39. No payment shall be made by the Comptroller for work done or supplies furnished except upon proper vouchers rendered by the head of the appropriate Department, or other proper officer, Board or Commission, for whom such work was done or supplies furnished. Such vouchers shall be made out in duplicate, and shall contain the certificates of such subordinate officers as the head of the Department may require, and of such form and purport as he shall prescribe, and also a certificate of the head of the Department. One of the duplicate vouchers shall be retained in the Department or office by which the vouchers are rendered, and the other shall be transmitted to the Department of Finance for payment. A receipt for the amount paid shall be taken by the Comptroller.

Article 2—The Disposition of Real Estate.

Sec. 40. It shall be the duty of the (said) Comptroller to take charge of all the real estate belonging to the Corporation, and to prevent all encroachments thereon.

Sec. 41. It shall be the duty of said Comptroller to superintend the collection of all rents, interest and demands due the (said) Sinking Fund, and to direct all necessary measures to compel the payment of them and report the condition of the same to the Board of Aldermen (Common Council) quarterly.

Sec. 42. It shall be the duty of said Comptroller, under the sanction of the Board of Commissioners of the Sinking Fund, to appoint appraisers on behalf of the Corporation to settle the rent on renewal of any leases, or the value of the building, to be paid for on the expiration of any lease, in which the Corporation is or shall be interested, whenever, by the provisions of such lease, the appointment of such appraisers is required.

Sec. 43. The said Comptroller is hereby authorized, with the sanction of the said Board of Commissioners, to assign any bond or mortgage held by the (Commissioners of the Sinking Fund) said Board to any person or persons who may elect to take such assignment, upon the payment in full of the principal and interest due on said bond and mortgage; and the Mayor and City Clerk (of the Common Council) are hereby authorized and directed to execute, under their hands and seal of the City, any such assignment, upon evidence being exhibited to them, showing that the principal and interest of such bond and mortgage have been paid into the Treasury of said City to the credit of the Board of Commissioners of the Sinking Fund.

Sec. 44. Upon the payment of any bond and mortgage in full, it shall be the duty of the said Comptroller to prepare and cause to be executed a proper satisfaction of such bond and mortgage; and the said Mayor and Clerk of the Board of Aldermen (Common Council) are hereby authorized to execute the same, upon the production of evidence that the same has been paid, as provided in the preceding section of this article. Sec. 45. Whenever any person or persons may desire to commute any quit-rent due the Corporation, it shall be the duty of the said Comptroller to calculate such commutation at the rate of six per cent.; and upon the production of evidence that the same and all arrears of rent have been paid into the Treasury of said City to the credit of the Commissioners of the Sinking Fund, it shall be the duty of the Mayor and Clerk to execute a release of such quit-rent.

Sec. 46. Whenever any property belonging to the Corporation is unproductive, or the term for which it may have been leased or let shall have expired or be about expiring, it shall be the duty of the said Comptroller to report the same to the Board of Commissioners of the Sinking Fund, and if, in his judgment, it will be beneficial to the public interest to lease property belonging to the Corporation, it shall be his duty to communicate the same, with his reasons therefor, to the Board of Commissioners of the Sinking Fund, and if they concur with him, they are hereby authorized and empowered to lease the same in such manner as they may deem most fit for the interest of the City, conforming in the leasing to the provisions of the Greater New York Charter (section 170 of the New York City Consolidation Act), and upon the production of a certificate, signed by a majority of said Commissioners, of whom the Comptroller shall be one, it shall be the duty of the said Mayor and City Clerk (or the Common Council) to execute such leases under their hands and seal of the City.

Sec. 47. In all cases of grants hereafter to be made of land under water on the shores of the island of New York, or on the shores of Long Island and within the limits of the various charters of The City of New York, or within the limits of the former municipalities now constituting The City of New York, and in all cases of extensions of grants previously made, it shall be the duty of the Comptroller and the (Commissioner of Public Works of the said City of New York) President of the Borough in which such grant or extension is to be made, to report to the Board of Commissioners of the Sinking Fund what sum of money shall, in their judgment, be charged as consideration for such grant; and if the said (Commissioners) Board, or a majority of (them) their number, shall agree to the terms reported by the said Comptroller and (Commissioner of Public Works) Borough President, then the said Comptroller shall be and is hereby authorized to cause such grants to be issued to the parties who may be legally entitled to the same.

Sec. 48. The preceding section shall not apply to grants to be made on the North or Hudson river, between West Eleventh and Thirtieth streets, Borough of Man-

Sec. 49. No grant shall be made by virtue of these ordinances except for a specific consideration to be paid in cash, or in five annual installments secured by bond and mortgage on the premises granted, with annual interest at the rate of six per cent. per annum; the first installment to be paid on the issuing of the grants.

distinctly marked thereon, shall be deposited and kept in the office of the (Commissioner) *Borough President* regulating the same.

Sec. 127. When any carriageway shall have been paved, and a majority of owners of lots on the same block shall have regulated and paved their sidewalks, the (Commissioner of Public Works, and in the Twenty-third and Twenty-fourth Wards the Commissioner of Street Improvements of those wards) *President of the Borough in which the same is located*, shall give notice to the owner or owners, or occupant or occupants, on any lots in front of which the sidewalks shall not be paved, to regulate and pave the same within a certain time to be designated in such notice.

Sec. 131. In default of such owner or owners, lessee or lessees, occupant or occupants, repairing or relaying, as the case may require, such sidewalks and curb and gutter, or either, within the time required by said notice and complying with the said notice, the said (Commissioner) *Borough President* is hereby authorized and required to lay and relay the flagging, and set and reset the curb and gutter or either, and otherwise repair such sidewalks, and to certify the expense of conforming to the provision of this ordinance, to the Board of Assessors, who are directed to make a just and equitable assessment of such expense among the owners or occupants, of all the houses or lots intended to be benefited thereby, in proportion as near as may be to the advantages which they may be deemed to acquire, and it shall be lawful for the (Commissioner of Public Works) *said Borough President* to report to the Corporation (Attorney) *Counsel* the neglect or refusal to comply with the above said notice, who shall recover \$10 as penalty from the owner or owners, lessee or lessees, occupant or occupants, of such house or other building in front of which the expense was incurred, in any Court having jurisdiction thereof, in the name of the (Mayor, Aldermen and Commonalty of the) City of New York.

Sec. 134. Any citizen or number of citizens shall be allowed to pave the street opposite to his or their property where the same shall extend from the intersection of one cross street to the intersection of another; provided the same be done in conformity to the regulations of the (Department of Public Works) *President of the Borough in which such street is located*.

Sec. 135. All pavements hereafter to be laid in any of the streets or lanes of this City by the (Water Purveyor) *Commissioner of Water Supply, Gas and Electricity*, or contractors for the construction of sewers, or for the laying of any water, gas or other pipes, shall, after the pavement is laid or driven down, have covered over them 1 inch in thickness of pure sand.

Sec. 137. Any person or persons, excepting the (Water Purveyor) *Commissioner of Water Supply, Gas and Electricity*, neglecting or refusing to remove the dirt, sand or rubbish mentioned herein within the time specified therein, shall forfeit and pay the sum of \$25 for each offense; and, in addition thereto, the (Water Purveyor) *President of the Borough in which such work has been done* shall cause the same to be removed at the expense of the party so neglecting or refusing, who shall be liable to repay and refund the same, and which sum shall be collected and paid into the City Treasury.

Sec. 138. It shall not be lawful for any of the gas companies of this City to break up any of the pavements of this City (other than those in the Twenty-third and Twenty-fourth Wards), without the permission of the (Commissioner of Public Works) *President of the Borough in which such work is to be done*; (and where such pavements are located in said wards without the permission of the Commissioner of Street Improvements for those wards); and such consent shall not be given until the party applying therefor shall enter into a stipulation satisfactory to the said (Commissioner) *Borough President* to repair and replace the said pavement to the satisfaction of the said (Commissioner) *Borough President*, at his and their own expense, by a day to be named in such permit; and if any person or persons shall neglect or refuse to repair and replace the same in accordance with such stipulation and permit, they shall forfeit and pay for each offense the sum of \$50, and, in addition thereto, shall be liable to pay the expense of repairing and replacing such pavement, which shall be done by and under the direction of the (Water Purveyor) *said Borough President*.

Sec. 139. It shall be lawful for the persons employed to pave or repave any street in The City of New York, to place proper obstructions across such street or cartway for the purpose of preserving the pavement then newly made or to be made, until the same shall be fit for use, leaving at all times a sufficient passage for foot passengers.

Sec. 140. No person or persons shall, without the consent of the (Commissioner) *Borough President* having jurisdiction of the street in which such obstruction is placed, in writing, or without the consent of the person superintending said paving, throw down, displace or remove any such obstruction mentioned in the last preceding section, under the penalty of \$15 for every such offense.

Sec. 141. Nothing contained in this article shall be construed to authorize any person or persons to stop up or obstruct more than the space of one block and one intersection, at the same time, in any one street, or to keep the same so stopped up for more than two days after the cartway is finished.

Sec. 142. Whenever any person or persons shall have authority under any contract with the Corporation or any officer thereof, or under any permit authorizing the same, to remove the pavement from, or to excavate, or to occupy or use any part of the public streets and avenues, in the City, so as to obstruct the travel in any streets or avenues, and to prevent the same from being used for the time being for the purposes of travel, such person or persons shall erect, or cause to be erected, in conspicuous positions, at the several points of intersection of such street or avenue so obstructed, with the cross streets nearest to such obstruction, a suitable notice

of such obstructions, which notice shall be in such manner and form as the (Commissioner) *Borough President* having jurisdiction of such street may at any time direct.

Sec. 143. Every person who shall violate the preceding section shall be subject to a penalty of \$10, to be sued for and recovered in any court of competent jurisdiction.

Sec. 144. Sec. 145. Whenever any pavement in any such street, or any part or portion thereof, has been or shall be taken up, or the paving stones in any such street or part of a street have been or shall be removed therefrom, or from the place or position in which they have been put in such pavement, in violation of the preceding sections, it shall be the duty of the (Commissioner of Public Works, or, if in the Twenty-third or Twenty-fourth Wards, the Commissioner of Street Improvements for those wards) *President of the Borough in which such work has been done*, forthwith to restore such pavement to its former condition and replace the same, and restore the paving stones so removed as aforesaid to their place in the said pavement, so as to restore said pavement, as nearly as may be practicable, to the condition in which it was before such taking or removal as aforesaid.

Sec. 146. Whenever any wood, timber, stone, iron or any other metal has been or shall be put or placed in or upon any such pavement so as to hinder or obstruct or be in the way of the restoration of said pavement, as mentioned in the preceding section, it shall be the duty of the (Commissioner) *Borough President* having charge of the street or pavement forthwith to cause such wood, timber, stone, iron or other metal to be taken up and removed from said street or pavement, so that they shall not incumber or obstruct said street and the free use of the pavement therein and all parts thereof.

Sec. 147. Whenever, hereafter, any person or association or body of persons, or any incorporated company, shall attempt to take up any such pavement mentioned in this article, or remove the paving stones, or any of them, therefrom, it shall be the duty of the (Commissioner) *Borough President* having charge thereof forthwith to prevent the same, and generally to prevent the pavement in the street aforesaid, and every part thereof, from being taken up, removed, incumbered or obstructed.

Sec. 148. It is hereby made the duty of the (Commissioner of Public Works and the Commissioners of the Department of Public Parks, and the Commissioner of Street Improvements in the Twenty-third and Twenty-fourth Wards) *Borough Presidents*, each in their respective jurisdiction, whenever granting a permit for any excavation, opening or disturbance of the pavement of the carriageway of any street, avenue or public place in The City of New York, or sidewalk thereof, except in cases where such opening, excavation or disturbance shall be directly authorized by law, to require of the person or persons by whom or for whose benefit any excavation or opening is to be made, for any purpose whatever, a deposit of such sum as shall be deemed sufficient to cover and pay all the expenses on the part of the Department granting the permit, as the case may be, of furnishing such material, doing such work, and taking such means as shall be required to properly restore and secure against sinkage the street and sidewalk, pavement, curb and flagging necessary to be replaced in consequence of making such excavation, opening or disturbance; which deposit shall be a full discharge of all liability and claim against the person or persons making such deposit and payment for the work herein provided for and required of the Departments aforesaid.

Sec. 149. The said (Commissioners) *Borough Presidents* shall deposit weekly with the City Chamberlain all moneys received under the last preceding section, an account of which moneys shall be kept separate and distinct from all other funds and accounts whatsoever by the said (Commissioners) *Borough Presidents*, and the City Chamberlain, who shall receive the same as a "Special Fund" in respect to each Department separately, which is hereby created and established subject to such payments as hereinafter provided for.

Sec. 150. Whenever any pavement, sidewalk, curb or gutter in any street, avenue or public place shall be taken up, it shall be the duty of the (Commissioner aforesaid) *Borough President*, within whose jurisdiction said street or avenue is, to restore such pavement, sidewalk, curb or gutter to its proper condition as soon thereafter as is practicable, requiring the person or persons by whom or for whose benefit the same is removed to deposit the material composing the superstructure without breaking or injuring the same, and in a manner which will occasion the least inconvenience to the public, and to fill in any excavation made, and to leave the same properly packed, rammed and repaired for the repaving required. And the said (Commissioners) *Borough Presidents* are hereby authorized to establish such rules and regulations as in their judgment shall be deemed necessary for the purpose of carrying out the provisions of this ordinance.

Sec. 151. Such sums as shall be certified by the said (Commissioners) *Borough Presidents* to have been necessarily expended by him or them for any repaving done pursuant to this ordinance, shall be paid from the Special Fund hereby created upon the requisition of the said (Commissioner or Commissioners) *Borough Presidents*, as the case may be, after examination, audit and allowance of accounts by the Finance Department, in the same manner that payments are or shall be required by law to be made from the City Treasury provided that the amount so certified and paid shall not exceed the aggregate amount of such Special Fund.

Sec. 158. Ten dollars shall be paid to the (Commissioner) *Borough President* granting the permit for permission to connect each house, store or building with any sewer or drain. Each hotel, boarding house or public building covering more ground than 25 feet by 50 feet shall pay proportionally for such additional space of ground covered by each respectively. Manufactories, breweries, distilleries and the like, for permission to connect with sewers or drains, for the purpose of carrying off water or fluids that will not deposit sediment or obstruction, shall pay such sums as shall be fixed and determined by said (Commissioner) *Borough President*. And any manufacturer, brewer, distiller, or the like, permitting any substance to flow into any sewer, drain or receiving basin, which shall form a deposit that tends to fill said sewer, drain or basin, shall be subject to a penalty of \$50 for each offense.

Sec. 159. All connections with sewers or drains, used for the purpose of carrying off animal refuse from water closets, or otherwise, and slops of kitchens, shall have fixtures for a sufficiency of Croton water, to be so applied as to properly carry off such matters, under the penalty of \$5 for each day the same are permitted to remain without such fixtures for supplying said water.

Sec. 161. It shall be the duty of the Policemen to be vigilant in the enforcement of the provisions of this chapter, and report any violations thereof to the Corporation (Attorney) *Counsel*. The Captains of the several police (districts) *precincts* shall, on observing or being informed of the opening of or excavating in any street or avenue, require the person making such opening or excavation to exhibit to him the authority or permission for such opening; and if none have been given by the proper officer, or if the exhibition thereof be refused, said Captain of Police shall, without delay, make complaint to the (Attorney of the) *Corporation Counsel* and report the same to the (Commissioner of Public Works or Commissioner of Street Improvement in the Twenty-third and Twenty-fourth Wards, as the location of the street or avenue may require) *President of the Borough in which such violation occurs*.

It shall be the duty of every person having charge of the sweeping and cleaning of the streets in the several wards to see that the gutters are properly scraped out before the water is suffered to flow from any hydrant for the purpose of washing the same, in order that no substance or obstruction be carried into any of the receiving basins; every person violating this section to be subject to a penalty of \$5 for each offense.

Sec. 163. Whenever any sewer, culvert, water mains or pipes are to be constructed, altered or repaired in any street in The City of New York in which the gas pipes of gaslight companies are laid, or whenever any such street shall be regulated or graded, it shall be the duty of the contractor or contractors thereof to give notice, in writing, of the same to the said companies, or to the one whose pipes are laid in the street about being disturbed by the construction, alteration or repairing of such sewer, culvert, water mains or pipes, or by the regulating or grading thereof, at least twenty-four hours before breaking ground therefor.

No person shall incumber or obstruct any street, roadway or sidewalk which has been opened, regulated or graded, according to law, in The City of New York, with any article or thing whatsoever, except as provided in section (197) 262 of these ordinances, without first having obtained written permission from the (Commissioner of Public Works) President of the Borough in which such street, roadway or sidewalk is situated, under the penalty of \$5 for each offense, and a further penalty of \$5 for each day or part of a day such obstruction or incumbrance shall continue.

Sec. 220. No post(s) shall be erected or put up in any of the streets, roads, lanes or highways in The City of New York, unless under the direction of the (Commissioner of Public Works) President of the Borough in which such post is to be erected, under the penalty of \$5 for every such post.

2. Bay and Show Windows.

Sec. 224. The Borough Presidents and the Park Commissioners having jurisdiction, shall issue permits for the erection of bay windows projecting beyond the building line, provided in the opinion of the officer having jurisdiction no injury will come to the public thereby. Permits for the erection of bay windows lying within any park, square or public place, or within a distance of 350 feet from the outer boundaries thereof, shall be issued by the Park Commissioner having jurisdiction, as provided in section 612 of the Charter, as amended by section 1, chapter 723 of the Laws of 1901. Permits for the erection of all other bay windows shall be issued by the Borough President having jurisdiction.

For the purposes of this ordinance a "bay window" shall be taken to mean and include all projections on the face of a building in the nature of windows, such as are commonly called bay windows, show windows, oriel windows and bow windows, without regard to the material of which they are constructed or to the purposes for which they are to be used.

Sec. 225. Before the erection of any bay window projecting beyond the building line shall have been commenced, the owner or his duly authorized agent shall make application in writing to the officer having jurisdiction, on suitable blanks furnished by him, and shall state the length and width of the proposed bay window, the number of stories through which it is intended to be carried, and the number of square feet of area covered by that portion of the bay window projecting beyond the building line. Drawings showing the size of and area covered by the bay window, the number of stories through which it is proposed to be carried and its location in reference to the lot and building lines shall be submitted with each application, and for the purpose of computing the area covered by a bay window projecting beyond the building line the outside face of the bay, exclusive of cornices, pilasters, trims, etc., shall be the line taken as a basis of computation.

Each application for the erection of a bay window projecting more than one foot beyond the building line shall have indorsed thereon the consent of all the adjoining property owners within a distance of 50 feet from the centre of the bay window, on

the same side of the street; meaning, thereby, so much of the side of a street as is unintersected by any other street on which it is proposed to be erected.

Each application shall be accompanied by the amount of the compensation due the City for the privilege of erecting said bay window, as hereinafter provided.

Sec. 226. Each application for the erection of a bay window projecting more than one foot beyond the building line shall be accompanied by a certified copy of the last assessed valuation of the property on which said bay window is to be erected, which appears upon the books of the Department of Taxes and Assessments. Except as hereinafter provided the amount that shall be paid as a compensation to the City for the privilege of erecting each bay window shall be at the rate of 10 per cent. of the assessed value per square foot of the property on which the said bay window is to be erected, for each and every square foot, or fraction thereof, of area covered by said bay window beyond the building line for each and every story through which it is carried.

If the projection of a bay window does not exceed one foot beyond the building line, and it is not carried higher than the sill of the second-story windows, the rate throughout The City of New York shall be 10 cents for each square foot or fraction thereof of horizontal area covered by said bay windows beyond the building line.

Sec. 227. Bay windows may be hereafter erected with a projection of not more than 3 feet beyond the building line, provided that when the projection exceeds 1 foot beyond the building line the total number of feet in width occupied by all the bay windows on the same frontage of the same building shall not exceed 75 per cent. of the width of the frontage of the building on which they are located. When the total number of feet to width occupied by all the bay windows on the same frontage of the same building exceeds 75 per cent. of the width of the frontage of the building on which they are located, the projection shall not exceed 1 foot beyond the building line, nor shall the bay window be carried higher than the sill course of the second-story windows.

Sec. 228. Permits for the erection of bay windows shall be issued in duplicate, one of which shall be retained by the applicant and kept at the building during the erection of the window, and the other shall be filed by him, with the plans for the construction of the window, in the Department of Buildings. If it shall appear, upon completion, that the bay window occupies a greater number of square feet, or has been carried through a greater number of stories than shall have been paid for, the applicant shall pay twice the sum previously paid for each square foot of area occupied by said bay window over and above the number of square feet paid for originally.

Sec. 229. Permits granted pursuant to the provisions of this ordinance are revocable permits, and shall have the following clause printed thereon, viz.: "This permit is issued subject to revocation thereof at any time hereafter by the Board of Aldermen of The City of New York, upon the recommendation of the officer having jurisdiction, when the space occupied by said bay, or any portion thereof, may be required for any public improvement, or, upon any violation of any of the terms or conditions upon which this permit is issued." A permit for the erection of a bay window shall be deemed to have expired when the bay window is taken down, and the space formerly occupied thereby shall no longer be used for the purpose for which the permit was issued, unless a permit for its reconstruction shall have been granted, as provided in section 7 of this ordinance. In case it is thereafter desired to erect a bay window on the said property, the applicant shall comply with all the provisions of this ordinance.

Sec. 230. Permits for the reconstruction of now existing bay windows as defined by this ordinance, and for the reconstruction of all bay windows which shall be hereafter erected under the provisions of this ordinance, shall be issued by the officer having jurisdiction, without the applicant's obtaining the consent of adjoining property owners, as provided in section 2 of this ordinance; provided that the bay window, when reconstructed, shall have no greater projection or width, nor be carried through a greater number of stories, nor cover a greater area, than the window as originally constructed. And, further, provided that no fee shall be charged for the reconstruction of bay windows which have been erected under the provisions of this ordinance, or for which a fee has been paid for the privilege of erecting the same under the provisions of the laws in force at the time of the erection of the said bay window. The restrictions specified under section 4 of this ordinance shall not apply to the reconstruction of now existing bay windows; but permits issued for the reconstruction of now existing bay windows, for which no fee has heretofore been paid, shall be paid for as provided in section 3 of this ordinance.

Sec. 231. Nothing herein contained shall be deemed to conflict with the provisions of the Building Code, and all bay windows for which permits are issued, under the provisions of this ordinance, shall be erected in accordance with all the provisions of said Code in regard to the kind and quality of materials used. No plans for the construction of a bay window as defined in this ordinance shall be approved by the Superintendent of Buildings until the permit is filed, as provided by section 5 of this ordinance.

Sec. 232. A permit for the continuance of any now existing bay window which projects beyond the building line may be issued by the officer who, according to section 1 of this ordinance, has jurisdiction over the erection of bay windows at the same place. Application for such permit must be in writing, and must be accompanied by a certified copy of the last assessed valuation of the property on which such bay window stands, which appears upon the books of the Department of Taxes and Assessments, and must also be accompanied by a survey showing the dimensions of such bay window and the number of stories through which it is carried. The application shall be accompanied by the amount of the compensation due the City for the privilege of continuing the bay window, calculated in the same manner and at the same rate as are provided in sections 2 and 3 of this ordinance. Permits shall be issued under this section without consent of adjoining property owners. Permits issued under this section shall be subject to all of the provisions of section 6 of this ordinance, in like manner as are permits for the erection of bay windows. Permits issued under this section shall be issued in duplicate, and one of such duplicates shall be filed in the Department of Buildings. All fees received under this section shall be accounted for and paid over as provided in section 9 of this ordinance. Nothing herein contained shall be construed to revoke any permit or authority heretofore lawfully issued or given.

Sec. 233. All fees received by the Borough Presidents or the Park Commissioners for the issuing of permits for the erection of bay windows shall be accounted for in proper books kept for that purpose, and shall be turned over by them to the City Chamberlain and credited to the General Fund.

Sec. 234. Any person, firm or corporation violating any of the provisions of this ordinance shall be liable to a fine of ten dollars (\$10) for each offense, and one dollar (\$1) for each and every day that such offense shall continue, which shall be duly sued for and collected.

3. Ornamental Projections.

Sec. 235. The Borough Presidents and the Park Commissioners having jurisdiction shall, subject to the restrictions of this ordinance, issue permits for the construction of ornamental projections which project beyond the building line, provided, in the opinion of the officer having jurisdiction, no injury will come to the public thereby. Permits for the construction of such projections, lying within any park, square or public place, or within a distance of 350 feet from the outer boundaries thereof, shall be issued by the Park Commissioner having jurisdiction, as provided in section 612 of the Charter as amended by section 1, chapter 723, of the Laws of 1901. Permits for the erection of all other ornamental projections shall be issued by the Borough President having jurisdiction.

For the purposes of this ordinance, "an ornamental projection" shall be taken to mean and include all decorative projections on the face of a building beyond the building line, in the nature of porches, arches, porticos, pedestals, free-standing statuary, columns and pillars, which are erected purely for the enhancement of the beauty of the building from an artistic standpoint.

Sec. 236. Before the erection of any such ornamental projections shall be commenced the owner of the building or his duly authorized agent shall make application in writing to the said Borough President or Park Commissioner having jurisdiction, on suitable blanks furnished by him, for the permit herein provided for, and shall file a plan and drawings showing the nature of the proposed ornament, with the dimensions thereof, the number of stories through which it is intended to be carried, and the number of square feet of area covered by that portion of the ornamentation projecting beyond the building line.

Each application shall be accompanied by the amount of compensation due the City for the privilege of erecting said ornamentation, as hereinafter provided.

Sec. 237. Each application for the erection of an ornamental projection which projects more than 1 foot beyond the building line, shall be accompanied by a certified copy of the last assessed valuation of the property on which said ornamental projection is to be erected, which appears upon the books of the Department of Taxes and Assessments. Except as hereinafter provided, the amount that shall be paid as a compensation to the City for the privilege of erecting each ornamental projection, shall be, for each and every square foot or fraction thereof of area extending more than 1 foot beyond the building line, at the rate of 10 per cent. per square foot of the assessed value of the property on which the said ornamental projection is to be erected.

Sec. 238. Ornamental projections which shall extend not more than 2 feet beyond the building line may hereafter be erected on buildings in the Borough of Manhattan, situated on Broadway to the south of Fifty-ninth street; on Fourteenth street, between Broadway and Sixth avenue; on Twenty-third street, between Third and Sixth avenues; on Thirty-fourth street, between Third and Ninth avenues; on Fifty-ninth street, between Third and Ninth avenues, and on Fifth avenue, between Fourteenth street and Fifty-ninth street, and on all other streets in The City of New York ornamental projections may be erected, provided they shall extend not more than one-fifteenth part of the width of the street they are upon, nor in any case more than 5 feet beyond the building line.

Sec. 239. The permits mentioned herein shall be issued in duplicate, one of which will be retained by the applicant and kept at the building during the erection of the projection, and the other shall be filed by him with the plans for the building in the Bureau of Buildings. If it shall appear upon completion that the ornamental projection occupies a greater number of square feet than shall have been paid for, the applicant shall pay twice the sum previously paid for each square foot of area occupied by said projection over and above the number of square feet paid for originally, but in no case shall said ornamental projection exceed the limit allowed by law.

Sec. 240. Permits granted pursuant to the provisions of this ordinance are revocable permits, and shall have the following clause printed thereon, viz.: "This permit is issued subject to revocation thereof, at any time hereafter by the Board of Aldermen of The City of New York, upon the recommendation of the officer having jurisdiction, when the space occupied by said ornamental projection or any portion thereof may be required for any public improvement, or upon any violation of any of the terms or conditions upon which this permit is issued." A permit for the erection of an ornamental projection shall be deemed to have expired when such projection is taken down, and the space formerly occupied thereby shall no longer be used for the purpose for which the permit was issued, unless a permit for its re-construction shall have been granted, as provided in section 8 of this ordinance. In case it is thereafter desired to erect an ornamental projection on the said property, the applicant shall comply with all of the provisions of this ordinance.

Sec. 241. Permits as hereinbefore described, and subject to the conditions therein attached, may be issued to the owners of all buildings having ornamental projections, which buildings have been erected or are being erected, and have ornamental projections thereon beyond the building line, without any authorization therefor.

Sec. 242. No fees shall be charged for granting a permit to reconstruct an ornamental projection within the limitations imposed by an original permit therefor.

Sec. 243. Nothing herein contained shall be deemed to conflict with the provisions of the Building Code. No plans for the construction of a building having ornamental projections thereon, beyond the building line, as defined in this ordinance, shall be approved by the Superintendent of Buildings until the permit therefor is filed, as provided by section 5 of this ordinance.

Sec. 244. All fees received by the Borough Presidents or Park Commissioners for the issuing of permits provided by this ordinance shall be accounted for in proper books kept for that purpose and shall be turned over by them to the City Chamberlain and credited to the General Fund.

Sec. 245. Any person, firm or corporation violating any of the provisions of this ordinance shall be guilty of a misdemeanor and shall in addition thereto be liable to a penalty of \$10 for each offence and \$10 for each and every day that such offence shall continue.

4. Porches, Platforms and Stoops.

Sec. 246. No person or persons shall hereafter construct any porch over a cellar door, under the penalty of \$100.

Sec. 247. All licenses for bootblacks and stands within stoop lines or under the stairs of the elevated railroad stations in The City of New York shall be granted by authority of the Mayor, and issued by the Bureau of Licenses, for a term of one year from the date thereof, unless sooner suspended or revoked by the Mayor or the Chief of said Bureau, with the approval of the Mayor; and no person shall be licensed except a citizen of the United States or one who has regularly declared intention to become such citizen, and the time to obtain such full citizenship has not yet elapsed.

Sec. 363. Stands within stoop lines may be permitted and licensed, with the consent of the owner of the premises and the consent of the Alderman of the district in which said stand is to be located, for the sale of newspapers, periodicals, fruits and soda water and the blacking of boots, and no bootblack stand shall be provided with more than three chairs. All such stands shall be classified, and the annual license fees therefor shall be fixed and collected as specified in the schedule following: Stands for the sale of newspapers, periodicals or both, \$5; stands for the sale of fruits or soda water or both, \$10; stands for the sale of newspapers, periodicals or both, and in addition also fruits or soda water or both, \$15; bootblack stands, each chair, \$5.

Sec. 364. Every such stand must be strictly within the stoop line and shall not be an obstruction to the free use of the sidewalk by the public, and shall not exceed the space of 6 feet long by 4 feet wide, except that in the case of bootblack stands a space not more than 3 feet wide and 4 feet long may be occupied by each chair of such stand. The construction and erection of all stands permitted by this ordinance shall be at the expense of the applicant and under the direction of the President of the Borough in which said stand is located. No person shall be permitted to sleep in any portion of the structure or hold more than one license. The Mayor, or Chief of the Bureau of Licenses, shall have power to transfer a permit or license to another location for the period of its unexpired term; provided, however, that the application for such transfer shall be accompanied by the written revocation of the owner's consent previously given therefor, by the consent of the owner of the premises to which the proposed transfer is to be made and by the consent of the Alderman of the district in which said premises are located.

Sec. 365. Any person desiring to erect a stand or booth underneath the stairs of any of the elevated railroad stations in The City of New York for the sale of newspapers and periodicals shall file in the Bureau of Licenses an application, having indorsed thereon the consent of the Alderman or of the Local Board of Improvements of the district in which said stand or booth is located, in which the applicant shall specify the location desired for such stand, and no such stand or booth or any projection therefrom shall be erected which is wider than the width of the stairs under which it is placed or which extends along the sidewalk a greater distance than to a point where the under surface of the stairs is not over 7 feet from the level of the sidewalk; and said stand shall be constructed, erected and maintained at the expense of the applicant and under the direction of the President of the Borough in which such stand is located, upon plans to be approved by the Chief Engineer of the elevated railroad company affected, so as to permit a ready removal of so much thereof as may be necessary to enable the said company, its agents or employees, to get convenient access to any part of the said stairways for the inspection, painting or repair-

ing thereof, and shall be painted the same color as the stairs of the elevated railroad, and no advertisement shall be painted or displayed thereon.

Sec. 366. Every license granted pursuant to the foregoing section (5 of this ordinance) shall contain the following reservation: "It is expressly agreed and understood that this permit is given subject to the right of the elevated railway company affected, its agents, employees, successors or assigns, or the owner of said stairway, at any time properly to inspect, paint, repair, renew, reconstruct or remove said stairway or any portion thereof, and without claim on the part of said licensee as against said company, its agents, employees, successors or assigns, or the owner of said stairway, for damages to or interference with said booth or stand, or the business therein conducted, occasioned by such inspection, painting, repair, renewal, reconstruction or removal."

Sec. 367. The licensee shall pay for such a stand or booth underneath the stairs of the elevated railroad stations the annual license fee of \$10.

Sec. 368. The official license for any stand or booth must be displayed thereon, so as to be easily visible at all times.

Sec. 369. In the event of a refusal by any Alderman of the consent required by the foregoing sections (3, 4 and 5 of this ordinance) 363, 364 and 365, the applicant for license or transfer may present his application to the Board of Local Improvements of the district in which the proposed stand is to be located, and by vote of a majority of the members elected, the consent of the said Board may be substituted for that of the Alderman. In case an Alderman fails to give his consent as aforesaid within ten days after he has received the application for license or transfer, such failure shall be deemed to be a refusal within the meaning of this section.

Sec. 370. The Chief of the Bureau of Licenses shall have the power to hear and determine complaints against any of the licensees hereunder, and impose a fine of \$2 for any violation of the regulations herein provided, and, subject to the approval of the Mayor, shall have power to suspend the license pending payment of such fine. All such fines when collected shall be paid into the Sinking Fund for the Redemption of the City Debt.

Sec. 371. The Chief of the Bureau of Licenses of The City of New York shall furnish to the Police Board of said City a list of unexpired licenses and permits, such list to contain the names of the persons to whom licenses were issued, the place and business for which issued, and the date of expiration of such license or permit, and thereafter, during the first week of each month, the said Police Board shall send to the Captains of Police of the various precincts of The City of New York a list of licenses and permits granted affecting their respective precincts, with the names of persons to whom granted, location of stand or business, and date of expiration of such permit or license, and also a list of all licenses or permits expiring the month for which the report is sent.

Sec. 372. Upon a written revocation by the owner (or) owners in front of or adjoining whose property any such booth (or) stand shall have been erected, of any consent which shall have been given therefor, signed by such owner or owners and filed in the office of the Mayor, it shall be the duty of the Mayor to revoke the license or permit for such booth or stand and the same shall thereupon cease, determine and become null and void.

Sec. 374. The Mayor shall have power to appoint Inspectors in the Bureau of Licenses to see that the provisions of this ordinance are fully and properly complied with; and all licensed vehicles and places of business shall be regularly inspected, and the result of such inspection shall be indorsed on the official license therefor, together with the date of inspection and the signature of the Inspector, and all inspections shall be regularly reported to the Bureau of Licenses.

Sec. 383. All persons using weights and measures, scale beams, patent balances, steelyards or any other instrument in weighing or measuring any article intended to be purchased or sold in The City of New York, shall cause the same to be sealed and marked by a Deputy Inspector of Weights and Measures of said City.

Sec. 384. Any person who shall, in weighing or measuring any article for purchase or sale within The City of New York, use any weight, measure, scale beam, patent

balance, steelyard or other instrument not sealed and marked as herein required, shall forfeit and pay the sum of \$50 for each and every offense.

Sec. 387. Sec. 389. Any weights or scales found by the Deputy Inspector in use in any market or in the public streets, which upon being tested are found to be short in weight by one-quarter of a pound or upwards, may be summarily confiscated and destroyed.

Sec. 390. No person shall sell or supply any coal or coke within the limits of The City of New York, unless there shall be delivered to the person in charge of the wagon or conveyance used in such delivery a certificate duly signed by the person selling such fuel, showing the weight of the fuel proposed to be delivered, the weight of the wagon or conveyance used in such delivery, the total weight of fuel and conveyance and the name of the purchaser.

Sec. 391. No person in charge of a wagon or conveyance used in delivering coal, coke or other fuel, to whom the certificate mentioned in the previous section has been given shall neglect or refuse to supply such certificate to the Inspector or Deputy Inspector of Weights and Measures, or to any person designated by either of them, or to the purchaser or intending purchaser of the fuel being delivered; and when the said officer or person so designated, or the intending purchaser, shall demand that the weight shown by such certificate be verified, it shall be the duty of the person delivering such fuel to convey the same forthwith to some public scale in the district, or to any private scale the owner whereof shall consent to such use and permit the verifying of the weight shown, and shall after the delivery of such fuel return forthwith with the wagon or conveyance used to the same scale and verify the weight of said wagon or conveyance.

Sec. 392. It shall be the duty of the Deputy Inspectors of Weights and Measures, and each of them is hereby authorized, to inspect, examine, test and seal, at least once in each year, and as much oftener as the Inspector of Weights and Measures may deem proper, the weights, measures, scale beams, patent balances, steelyards and other instruments used in The City of New York in weighing and measuring as aforesaid.

Sec. 393. No person shall refuse to exhibit any weights, measures, scale beams, patent balances, steelyards or other instruments to any of said Inspectors for the purpose of being so inspected and examined, under the penalty of \$25 for every such offense.

Sec. 394. No person shall in any way or manner obstruct, hinder or molest any Inspector of Weights and Measures in the performance of his duties as hereby imposed upon him, under a penalty upon every such person of \$25 for every such offense.

Sec. 395. All weights, scale beams, patent balances, steelyards and other instruments used for weighing shall be inspected and sealed at the stores and places where the same may be used; but in case they or any of them shall be found not to conform to the standard of this State, the owner thereof shall within five days, at his expense, have the same so altered and repaired as to conform it to the said standard of the State, under the penalty of \$10 for such neglect.

Sec. 396. It shall be the duty of each of the said Inspectors to make a record and certificate as hereinafter provided of all the weights, measures, scale beams, patent balances, steelyards and other instruments used for weighing and measuring inspected by him, in which he shall state the names of the owners of the same, and whether they are conforming to the standard of the State.

Sec. 397. It shall be the duty of the Deputy Inspector of Weights and Measures to report promptly to the Inspector of Weights and Measures the names of all persons whose weights, measures and other instruments for weighing and measuring shall be found to be incorrect.

Sec. 398. It shall also be the duty of said Deputy Inspectors to file monthly reports with the Inspector of Weights and Measures, and to make such other and further reports and keep such further records as may be required from time to time by said Inspector.

Sec. 399. It shall be the duty of the Inspector of Weights and Measures to report forthwith to the Corporation Counsel the names and places of business of all persons violating any of the provisions of this chapter, and of all persons making use of any fraudulent or unsealed weights, measures, scales or other instruments for weighing or measuring.

Sec. 400. It shall not be lawful for the said Inspector or Deputy Inspector to vend any weights, measures, scale beams, patent balances, steelyards or other instruments to be used for weighing or measuring, or to offer or expose the same for sale in The City of New York, under the penalty of \$50 for every such offense.

Sec. 401. Each Deputy Inspector shall give a certificate to the owner of the weights or measures inspected, and shall keep a record of such certificate given on a corresponding stub. The certificates and corresponding stubs shall be numbered consecutively. The books containing the stubs, after the corresponding certificates have been given out, shall become a public record. The Inspector shall be authorized, when required, to certify extracts from these records.

Sec. 402. All complaints against Deputy Inspectors of Weights and Measures shall be lodged with the Inspector of Weights and Measures, and by him reported, with his recommendation thereon, to the Mayor for his final action.

Sec. 403. The Deputy Inspectors shall be assigned for service by the Inspector to such district as he may deem proper. Whenever any Deputy Inspector shall resign or be removed from office, it shall be his duty to deliver at the office of the Inspector of Weights and Measures all the standard weights and measures and other official property in his possession.

Chapter 9—Cleaning Streets and Sidewalks.

Sec. 404. No person or persons shall throw, cast or lay, or direct, suffer or permit any servant, agent or employee to throw, cast or lay any ashes, offal, vegetables, garbage, dross, cinders, shells, straw, shavings, paper, dirt, filth or rubbish of any kind whatsoever in any street in The City of New York, either upon the roadway or sidewalk thereof, except that in the morning before 8 o'clock or before the first sweeping of the roadway by the Department of Street Cleaning, in the boroughs of Manhattan, Brooklyn and The Bronx, dust from the sidewalk may be swept into the gutter, if there piled, but not otherwise, and at no other time.

The wilful violation of any of the foregoing provisions of this section shall be and is hereby declared to be a misdemeanor, and shall be punished by a fine of not less than \$1 nor more than \$10, or by imprisonment for a term of not less than one nor more than five days.

Sec. 405. No persons other than an authorized employee or agent of the Department of Street Cleaning, or the Bureau of Street Cleaning in the Boroughs of Queens or Richmond, shall disturb or remove any ashes, garbage or light refuse or rubbish placed by householders, or their tenants, or by occupants or their servants, within the stoop or area line, or in front of houses or lots, for removal, unless requested by residents of house.

Sec. 406. All persons and corporations engaged in sprinkling the streets, lanes or highways of The City of New York shall be required to contract with the Commissioner of Water Supply, Gas and Electricity for the purchase and sale of the water necessary therefor, and obtain the approval of the President of the Borough to such contract, but in no case shall there be contracted for or used more water than shall be sufficient to thoroughly lay the dust on such streets, lanes and highways.

Every street railroad corporation in the boroughs of Richmond and Queens shall sprinkle the pavement between its tracks and rails when and as often as directed so to do by the Superintendent of Highways. Water shall be furnished for this purpose free of charge by The City of New York.

Sec. 407. No one being the owner, driver, manager or conductor of any cart or other vehicle, or of any receptacle, shall scatter, drop or spill, or permit to be scattered, dropped or spilled, any dirt, sand, gravel, clay, loam, stone or building rubbish, or hay, straw, oats, sawdust, shavings or other light materials of any sort, or manufacturing, trade or household waste, refuse, rubbish of any sort, or ashes or manure, garbage or other organic refuse or other offensive matter therefrom, or permit the same to be blown off therefrom by the wind, in or upon any street, avenue or public place.

Sec. 408. No person shall throw, cast or distribute in or upon any of the streets, avenues or public places, or in front yards or stoops, any hand bills, circulars, cards or other advertising matter whatsoever.

Sec. 409. Every owner, lessee, tenant, occupant, or other person having charge of any building or lot of ground in the City, abutting upon any street, avenue or public place where the sidewalk is paved, shall, within four hours after the snow ceases to fall, or after the deposit of any dirt or other material upon said sidewalk, remove the snow and ice, dirt or other material from the sidewalk and gutter, the time between 9 p. m. and 7 a. m. not being included in the above period of four hours; provided, however, that such removal shall in all such cases be made before the removal of snow and ice from the roadway by the Commissioner of Street Cleaning, or by the Borough President of Queens or Richmond, or subject to the regulations of said Commissioner of Street Cleaning or of said Borough President of Queens or Richmond, for the removal of snow and ice, dirt and other material, except that in the boroughs of Queens and Richmond any owner, lessee, tenant or occupant or other person who has charge of any ground abutting upon any paved street, avenue or public place for a linear distance of 500 feet or more, shall be considered to have complied with this ordinance if such person shall have begun to remove the snow and ice from the sidewalk and gutter before the expiration of the said four hours, and shall continue such removal and shall complete it within a reasonable time.

Sec. 410. In case the snow and ice on the sidewalk shall be frozen so hard that it cannot be removed without injury to the pavement, the owner, lessee, tenant, occupant or other person having charge of any building or lot of ground as aforesaid, shall, within the time specified in the last preceding section, cause the sidewalk abutting on the said premises to be strewn with ashes, sand, sawdust, or some similar suitable material, and shall, as soon thereafter as the weather shall permit, thoroughly clean said sidewalk.

Sec. 411. Any and all contractors, or any other person or persons, no matter how termed, are hereby forbidden, restrained and are never to be permitted to dump, throw, empty, convey or cause to be conveyed for the purpose of dumping, any snow, ice or water in a vacant lot or tract of land, if such lot or tract of land be within a radius of 300 feet of a dwelling, factory, school, any public building or any place of business.

Sec. 412. No person shall throw, place or pile, or assist others in throwing, placing or piling any snow, ice or other impediment or obstruction to the running of the cars of any City railroad company, upon the tracks of such company, or in the space between the rails thereof, or in the space between the tracks, and a line distant 3 feet outside of such rails, under a penalty of \$10 for each offense.

(Note—The foregoing paragraph, being section 10 of article 6 of chapter 3 of the Brooklyn Ordinances, is inserted here, as recommended in the Committee's report. The suggested penalty is that mentioned in the article from which this paragraph is taken.)

Sec. 413. Every person who shall throw, expose or place, or who shall cause or procure to be thrown, exposed or placed in or upon any street, highway or public place, except upon the curves, crossings or switches of railroad tracks, any salt, salt-petre or other substance for the purpose of dissolving any snow or ice which may have fallen or been deposited thereon, shall be guilty of a misdemeanor. It shall not be lawful for any person to throw or place upon the curves, crossings or switches of railroad tracks any salt, salt-petre or other substance for the purpose of dissolving snow or ice unless permission therefor be first obtained from the respective Borough Presidents (Mayor).

(Note—The foregoing paragraph, being section 693 of the New York Revised Ordinances of 1897, is inserted here, as recommended in the Committee's report.)

Sec. 414. Whenever any owner, lessee, tenant, occupant or other person having charge of any building or lot of ground abutting upon any street or public place where the sidewalk is paved shall fail to comply with the provision of any ordinance of the City for the removal of snow and ice, dirt, or other material from the sidewalk and gutter in the street, on the side of the street on which such building or lot abuts, the Commissioner of Street Cleaning or the Borough President of Queens or Richmond may cause such removal to be made, meeting such expense from any suitable street cleaning or highway fund and thereafter the expense of such removal as to each particular lot of ground shall be ascertained and certified by the said Commissioner of Street Cleaning or by the President of Queens or Richmond to the Comptroller of the City, and the Board of Estimate and Apportionment may authorize such additional expenditures as may be required for the said removal of such ice and snow, dirt, or other material, to be repaid to the fund from which the payments were made, or instead, in the Boroughs of Queens or Richmond to the special fund Restoring and Repaving in said boroughs, if the Presidents of these boroughs so elect, with proceeds from the issue and sale of Revenue Bonds which shall be sold by the Comptroller, as provided by law.

The Commissioner of Street Cleaning or Borough Presidents of Queens or Richmond shall, as soon as possible, after the work is done, certify to the Corporation Counsel the amount of the expense chargeable against each piece of property.

The Corporation Counsel is hereby directed and authorized to sue for and recover the amount of this expense, together with three (3) dollars penalty for each offense, and when so recovered the amount shall be turned over to the City Chamberlain to be deposited to the credit of the General Fund of The City of New York for the redemption of taxation.

Sec. 415. It shall be the duty of the Commissioner of Street Cleaning and the Borough Presidents of Queens and Richmond, immediately after every snowfall or the formation of ice on the crosswalks or in the culverts or paved streets, avenues or public places, forthwith to cause the removal of said snow and ice from the said crosswalks and culverts, and to keep the crosswalks and culverts aforesaid clean and free from obstruction.

Sec. 416. Every street railroad corporation shall remove all the snow and ice from its tracks and the spaces between, and shall not throw the same on either side thereof, and shall immediately carry away and dispose of the same under the direction of the Commissioner of Street Cleaning, or the Borough President of Queens or Richmond under a fine of \$100 for every City block in length in which the said corporation shall fail to so remove and dispose of the same, as aforesaid; provided, however, that for the more speedy and effective removal of snow and ice from the paved streets, avenues and public places of the City, the Commissioner of Street Cleaning and the Borough Presidents of Queens and Richmond shall have power and authority in their respective boroughs to enter into agreements for the entire winter season, or part thereof, with any street surface railroad or other railroad having tracks in the City for the removal of snow and ice for the entire width of the street, avenue or public place, from house-line to house-line, at any part of the route of the said railroad, provided that nothing in said agreements shall be inconsistent with any law of the State of New York or with any right of The City of New York.

Sec. 417. It shall not be lawful for any surface railroad company or other company, or any corporation or person whatever, or the officers, agents or servants thereof, to cause or allow any snow plow, sweeping machine or other similar instrument to pass over the tracks or lines used by them within the limits of the City unless by the written permit of the Commissioner of Street Cleaning or the Borough President of Queens or Richmond; any violation of this section shall be punished by a fine not exceeding \$100 for each such offense.

No such permit or renewal thereof shall be granted except upon the condition and agreement upon the part of the company applying for such permit or renewal that the party to whom the said permit has been granted shall and will, at his own expense, promptly remove and carry away the snow thrown up by such plow or machine, and that such snow plow, sweeping machine or other instrument shall be so constructed as not to throw any slush or snow upon the sidewalks or buildings, under a penalty of \$10 for every house or sidewalk in front thereof upon which slush or snow shall be thrown.

No such permit or renewal shall be granted unless the party to whom granted shall expressly covenant, stipulate and agree that in case of its failure, neglect or omission to promptly remove and carry away the snow and ice thrown up by such snow plow or other instrument, then the same may be removed under the direction of the Commissioner of Street Cleaning or the Borough President of Queens or Richmond, and the expense of removing the same shall be paid by the said party to the said Commissioner or the Borough President of Queens or Richmond, on demand, and the Board of Estimate and Apportionment may authorize that the amount or amounts of money so paid shall be credited to the appropriation for Street Cleaning, in the respective Boroughs, for the removal of snow and ice; but nothing herein contained shall be deemed to prohibit said Commissioner or Borough Presidents from demanding, before issuing said permit, and as a condition thereof, the deposit of such sum of money or other security as in their judgment may be necessary to pay the cost of properly performing the work above mentioned, together with the expense of the inspection thereof.

In case of neglect or refusal or omission of the party to whom such permit may be granted promptly to remove and to carry away the snow and ice thrown up by such plow or other instrument, then the Commissioner of Street Cleaning or the Borough President of Queens or Richmond may forthwith cause the same to be removed at the public expense, and all expenditures made or incurred therefor shall be chargeable upon the party so neglecting, refusing or omitting to perform its agreement, and shall be recoverable by an action at law on behalf of The City of New York, and when so recovered shall be placed to the credit of the Department of Street Cleaning or the Bureau of Street Cleaning in the Boroughs of Queens or Richmond, as the case may be, to supply the deficiency occasioned by such additional expenditure.

Sec. 418. Any person violating any provision or regulation hereof shall be deemed guilty of a misdemeanor, and upon conviction thereof by any magistrate, either upon confession of the party or competent testimony, may be fined for such offense any sum not less than \$1 and not exceeding \$3, except as herein otherwise provided; and in default of payment of such fine may be committed to prison by such magistrate until the same be paid, but such imprisonment shall not exceed one day.

Chapter 10—Sale, Use and Transportation of Explosives.

Sec. 419. Within thirty (30) days after the passage of this ordinance there shall be a Municipal Explosives Commission, which shall be constituted as follows: The said Commission shall consist of five (5) members; the Fire Commissioner of The City of New York shall be ex-officio Chairman and a member of the said commission. The remaining four (4) members shall be appointed by the Mayor, and one of the said four (4) must be appointed from a list of ten to be submitted by the New York Section of the American Chemical Society. The said Commission shall hold office during the pleasure of the Mayor.

Sec. 420. It shall be the duty of the said Commission to formulate and adopt such regulations as in its judgment may be necessary to carry out the purpose of this ordinance, and from time to time to add to or in any way change or amend such regulations. The said regulations and the amendments thereto and any changes which shall be made therein shall be subject to approval by the Mayor, and, when so approved, shall be published by the Fire Commissioner in the CITY RECORD, and in such other manner as he shall deem necessary.

Sec. 421. Said Commission, hereby established, shall meet at the call of the Fire Commissioner for the consideration of all matters pertaining to this ordinance, and each member thereof shall receive a fee of ten dollars (\$10) for attendance at each meeting. A majority of such Commission shall constitute a quorum for the purpose of doing business.

Sec. 422. No person, firm or corporation shall have, keep, sell, use, give away or transport any gunpowder, blasting powder, gun cotton, dynamite, nitro-glycerine or any substance or compound or mixture or article having properties of such a character that alone or in combination or contiguity with other substances or compounds it may decompose suddenly and generate sufficient heat or gas or pressure, or all of them, to produce rapid flaming combustion, or administer a destructive blow to surrounding persons or things, within the corporate limits of The City of New York, excepting in the manner and upon the conditions herein provided, and under license issued by the Fire Commissioner under such regulations as the Municipal Explosives Commission shall prescribe. The said Fire Commissioner shall have power to revoke the license or licenses in case, in his judgment, there is an infraction of the provisions of this ordinance or of the regulations of the Municipal Explosives Commission.

Sec. 423. No licensee shall employ any one in the use or care of explosives such as are used in blasting operations unless such person shall hold a certificate of fitness issued to him by the Fire Commissioner under the regulations established by the Municipal Explosives Commission.

No owner or lessee of any building, or any part thereof, shall lease or let or hire out or allow the same or any portion thereof to be occupied by any person, or allow any one to dwell or lodge therein, except when said building or such parts thereof are sufficiently lighted, ventilated, provided and accommodated, and are in all respects in that condition of cleanliness and wholesomeness for which this Code or any law of this State provides, or in which they or either of them require any such premises to be kept. Nor shall any such person rent, let, hire out, or allow, having power to prevent the same, to be used as or for a place of sleeping or residence, any portion or apartment of any building, which apartment or portion has not at least two feet of its height and space above the level of every part of the sidewalk and curbstone of any adjacent street, nor of which the floor is damp by reason of water from the ground, or which is impregnated or penetrated by any offensive gas, smell, or exhalation prejudicial to health. Sec. 20. Every person who shall be the owner, lessee, or keeper or manager of any tenement-house, boarding-house, lodging-house, or manufactory, shall provide, or cause to be provided, for the accommodation thereof and for the use of the tenants, lodgers, boarders, and workers thereat, adequate privies, or water-closets, and the same shall be adequately ventilated, and shall at all times be kept in such cleanly and wholesome condition, as not to be offensive, or be dangerous or detrimental to life or health. And no offensive smell or gases, from or through any outlet or sewer, or through any such privy or water-closet, shall be allowed by any person aforesaid to pass into such house or any part thereof, or into any other house or building.

Four hundred cubic feet of air space shall be provided and allowed for each bed or lodger.

Sec. 22. Every owner, lessee, tenant and manager of any boarding house or manufactory, shall cause every part thereof and its appurtenances to be put, and shall thereafter cause the same to be kept, in a cleanly and wholesome condition, and shall cause every room thereof in which any person may sleep, dwell or work, to be adequately lighted and ventilated; and, if the same be a manufactory, shall cause every part thereof in which any person may work, to be maintained at such temperature, and be provided with such accommodations and safeguards as not, by reason of the want thereof, or of anything about the condition of such manufactory or its appurtenances, to cause any unnecessary danger or detriment to the life or health of any person being properly therein or thereat.

Sec. 23. All filthy and dirty walls and ceilings of any building, including the walls and ceiling of the cellar thereof, shall be thoroughly cleaned and whitewashed whenever required by the Board of Health.

Sec. 25. No master or teacher, or manager of or in any school, public or private, or of or in any Sunday school or gymnasium, or the officers or managers thereof, or officers or managers or persons having charge of any place of public worship, shall so far omit or neglect any duty or reasonable care or precaution respecting the safety or health of any scholar, pupil or attendant, or respecting the temperature, ventilation or cleanliness or strength of any church, hall of worship, school house, school room or place of practice or exercise, or relative to anything appurtenant thereto, as that

by reason of such neglect or omission, the life or health of any person shall suffer or incur any avoidable peril or detriment, and no day nursery shall be conducted in The City of New York without a permit from the Board of Health.

Sec. 26. Every keeper or proprietor of a hotel or boarding house, and every other person having for use a bathing house upon any beach or shore of the ocean, for the accommodation of his guests or other persons for pay, shall provide for the safety of such bathers two lines of sound, serviceable and strong manila or hemp rope, not less than one inch in diameter, anchored at some point above high water, at the same distance apart as the line of bathing houses, or space fronting on such beach occupied by him is in width; and from the two points at which such life lines are so anchored, such line shall be made to extend as far into the surf as bathing is ordinarily safe and free from danger of drowning to persons not expert in swimming, and at such points of safety such lines shall be anchored and buoyed. From the two points of such lines so extended, anchored and buoyed, a third line shall be extended, connecting the two extremities, and buoyed at such points as to be principally above the surface of the water, thereby inclosing a space within such lines and the beach within which bathing is believed to be safe. Every such keeper or proprietor or other such person shall cause to be painted and put up in some prominent place upon the beach, near such bathing houses, the following words: "Bathing beyond the lines dangerous." Such lines so placed, anchored and buoyed and such notice so put up, shall continue and be so maintained by every such keeper, proprietor or other person during the entire season of surf bathing. The owner of a bathing house shall not be subject to the provisions of this section where it is used, occupied or maintained by a lessee for hire, but such lessee shall be deemed the keeper or proprietor thereof. No bathing establishment shall be maintained in The City of New York or along the water front of said City without a permit from the Board of Health.

Sewerage and Drainage.

Sec. 27. Every person using, making or having any drain, soil pipe, passage or connection between any sewer (or with any river or other body of water) and any ground, building, erection or place of business, and in like manner every owner or tenant of any grounds, buildings or erections, and every person interested in such place of business or the business thereat, and in like manner every Board, Department, officer and person (to the extent of the right and authority of each), shall cause and require such drain, soil pipe, passage and connection to be at all times adequate for its purpose, and to convey and allow, freely and entirely, to pass whatever enters or should enter the same; and no change shall be made of the drainage, sewerage or the sewer connection of any house or premises, involving changes in the drainage, sewerage or sewer connection of any other house or premises, unless at least thirty days' notice thereof in writing shall have been previously given to this Department, and to the owner or occupant of the premises affected by such change.

Sec. 28. It shall be the duty of all Boards, Departments, officers and persons having power and authority so to do or require (and to the extent thereof) to cause sufficient water to be used, and other adequate means to be taken, so that whatever substances may enter any sewer shall pass speedily along and from the same, and sufficiently far into some water or proper reservoir, that no accumulations shall take place, and no exhalations proceed therefrom, dangerous or prejudicial to life or health.

Sec. 29. No brick, sheet metal, or earthenware material or chimney flue shall be used as a sewer ventilator, or to ventilate any trap, drain, soil or waste pipe.

Sec. 30. The soil, waste and vent pipes in an extension to any building must be extended above the roof of the main building if within 30 feet of the front or rear windows of the main building or of an adjoining building, or if so located as to cause a nuisance.

Sec. 31. All joints in iron drain pipes, soil and waste pipes, must be filled with oakum and lead and hand caulked so as to make them gas tight. All connections of lead with iron pipes must be made with a brass sleeve or ferrule of the same size as the lead pipe, put in the hub of the branch of the iron pipe, and caulked with lead. The lead pipe must be attached to the ferrule by a wiped or overcast joint. All connections of lead waste and vent pipes shall be made by means of wiped joints.

Traps must be placed as near the fixtures as practicable, and in no case shall a trap be more than two feet from the fixture. In no case shall the waste from a bath tub or other fixture be connected with a water closet trap. No trap vent pipe shall be used as a waste or soil pipe.

When within the house, the leader must be of cast iron, with leaded joints; when outside of the house and connected with the house drain it must be trapped beneath the ground or just inside of the wall, the trap being arranged in either case so as to prevent freezing. In every case where a leader opens near a window or a light shaft, it must be properly trapped at its base. Sec. 48. No meat, fish, fruit, vegetable or milk, or unwholesome liquid shall knowingly be bought, sold, held, offered for sale, labeled, or any representation made in respect thereof, under a false name or quality, or as being what the same is not, as respects wholesomeness, soundness or safety for food or drink.

Sec. 49. Every person, being the owner, lessee, or occupant of any room, stall or place where any meat, fish, fruit or vegetables, designed or held for human food, shall be stored or kept, or shall be held or offered for sale, shall put and keep such room, stall and place, and its appurtenances, in a cleanly and wholesome condition; and every person having charge, or interested or engaged, whether as principal or agent, in the care or in respect to the custody or sale of any meat, fish, fruit, birds, fowl or vegetables, designed for human food, shall put and preserve the same in a cleanly and wholesome condition, and shall not allow the same, or any part thereof, to be poisoned, infected, or rendered unsafe or unwholesome for human food.

Sec. 50. No butcher or dealer shall keep in any market any refrigerator or ice-box, unless the same shall be lined with some proper metallic substance, so as to be water tight.

Sec. 51. In the sale, or keeping for sale, of any beverage or drink, no person shall keep or use any tap, faucet, tank, fountain or vessel, or any pipe or conduit in connection therewith, which shall be composed or made, either wholly or in part, of brass, lead, copper, or other metal or metallic substances that are or will be affected by liquids so that dangerous, unwholesome or deleterious compounds are formed therein or thereby, or such that beer, soda water, syrups or other liquids, or any beverage, drink or flavoring material drawn therefrom shall be unwholesome, dangerous or detrimental to health.

It shall be the duty of every owner, tenant, lessee, occupant or person in charge of any and every building, or place of business in the generally built-up portions of The City of New York, forthwith to provide or cause to be provided, and at all times thereafter to keep and cause to be kept and provided, within such building or place of business, and for the exclusive use of such building or place of business, separate receptacles for receiving and holding, without leakage, all the ashes, garbage and liquid substances that may accumulate during thirty-six hours, from said building or place of business, or the portion thereof of which such person may be the owner, tenant, lessee, occupant or in charge, and every such receptacle designed and used to hold ashes shall be made of or lined with some suitable metal.

And it shall be the duty of every owner, lessee or agent of any such building or place of business to cause to be separated and put into their respective receptacles all such materials and substances and such receptacles shall not be filled to within four inches of the top thereof.

And such receptacles, as well as any light refuse or rubbish to be removed, shall be kept within the premises until the proper time for removal, and shall then be placed in the area, or within the stoop line only, and shall there remain until such materials or substances are removed by the Department of Street Cleaning, but in no case shall such receptacles be placed where they shall be or become a nuisance.

All light refuse or rubbish likely to be scattered or blown about, shall, before being placed outside of any building or premises for removal, be properly bundled, packed or otherwise secured.

Sec. 109. No person, not for that purpose authorized, shall interfere with the receptacles for ashes, garbage or liquid substances, as provided in accordance with section 108 of the Sanitary Code, or with the contents thereof; nor shall any person in any way handle or disturb such contents.

Sec. 110. All occupants so preferring may deliver their ashes, garbage and rubbish directly to the proper carts, to be taken away at any hour of the day when said carts may be present; and said carts may take such articles from receptacles delivered at any such hour; provided that such garbage or rubbish be not highly filthy or offensive; and in the latter case the same shall not be so delivered or received during the period from 7 o'clock a. m. of any day till 10 o'clock of the evening of the same day.

Sec. 111. No pile or deposit of manure, offal, dirt or garbage, or any accumulation of any offensive or noxious substance, shall be made within the built-up portions of The City of New York, or upon the piers, docks or bulkheads adjacent thereto, or upon any vessel or scow lying at such pier, wharf or bulkhead; nor shall such deposit or accumulations be made anywhere in this City within 300 feet of any church or place of worship, or inhabited dwelling without a permit from the Board of Health; and no person shall contribute to the making of any such accumulations; nor shall cars or floats loaded with or having in or upon them any such substance or substances be allowed to remain or stand on or along any railroad, street or highway within 300 feet of any inhabited dwelling, nor elsewhere in said City without a permit from the Board of Health; and no manure, garbage or other material that is liable to emit an offensive exhalation shall, in or adjacent to the built-up portions of The City of New York, be turned or stirred, except about its removal, in such a way as to increase such exhalations by reason thereof, nor shall any straw, hay or other substance which has been used as bedding for animals be placed or dried upon any street or sidewalk, or roof of any building; nor shall any straw, hay or other substance, or the contents of any mattress or bed, be deposited or burnt without a permit from the Board of Health.

Sec. 112. Every proprietor, lessee, tenant and occupant of any oyster house, oyster saloon or other premises where any oysters, clams, lobsters or shell or other fish are consumed, used or sold, or where any of the refuse matter, offal or shells thereof accumulate, shall daily cause all such shells, offal and refuse matter to be removed therefrom to some proper place, and shall keep his house, saloon and premises at all times free from any offensive smells or accumulations.

Sec. 113. No person shall obstruct, delay or interfere with the proper and free use, for the purposes for which they may be and should be set apart and devoted, of any dock, pier or bulkhead set apart for the use of any contractor or person engaged in removing any offal, garbage, rubbish, dirt, dead animal, night soil or other like substances, or with the proper performance of such contracts.

Sec. 114. It shall be the duty of every person (his agents and employees) who has contracted or undertaken to remove any diseased or dead animal, offal, rubbish, garbage, dirt, street sweepings, night soil or other filthy, offensive, or noxious substance, or is engaged about any such removal, or in loading or unloading any such substance, to do the same with dispatch, and in every particular in a manner as cleanly and little offensive and with as little danger and prejudice to life and health as possible, and no matter or material shall lie piled up, or partially raked together, in any street or place, before the removal thereof, more than a reasonable time, nor for more than four hours in the daytime, under any circumstances.

Sec. 115. No ship, boat or other vessel shall be taken or allowed by any person to come into or lay to, or at, or within any dock, pier, bulkhead or slip, or be placed therein for the purpose of the shipment or removal of any offal, garbage, rubbish, blood or offensive animal or vegetable matter, dirt or dead animals, or for the use of any contractor for the removal of any of the foregoing substances, without a permit from the Board of Health.

Sec. 116. It shall be the duty of every owner, lessee and tenant of any vacant, sunken or excavated lot in The City of New York to keep the same at all times clean and inoffensive and free from the accumulation of water thereon, and to maintain around the same a proper fence, so as to effectually prevent the throwing or depositing therein or thereupon any garbage or offensive thing whatsoever, and so as to prevent persons passing from falling into such excavation.

Sec. 117. No person shall deposit upon any street or public place within the generally built-up portion of The City of New York, or upon any paved street, any dirt or brick or other material, or dirt taken from any ground therein, in such manner as to occupy more than 100 square feet of surface of any street or place (and the same shall be compact and at one side); nor shall any person allow the same to remain in said street or public place more than twelve hours, without a permit from the Board of Health, or unless such occupancy shall be otherwise duly authorized by paramount authority. Nor shall any such substance be so deposited or allowed to remain by any person as to obstruct the free flowage along any gutter.

Sec. 118. No lime, ashes, coal, dry sand, hair, feathers or other substance that is in a similar manner liable to be blown by the wind, shall be sieved, agitated or exposed, nor shall any mat, carpet or cloth be shaken or beaten, nor shall any cloth, yarn, garment, material or substance be scoured, cleaned or hung, nor shall any rags, damaged merchandise, barrels, boxes or broken bales of merchandise or goods, be placed, kept or exposed in any place where they or particles therefrom will

pass into any street or public place, or into any occupied premises. Neither shall any usual nor any reasonable precautions be omitted by any person to prevent fragments or other substances from falling, to the peril of life, or dust or light material flying into any street, place or building, from any building or erection, while the same is being altered, repaired or demolished, or otherwise.

Removal of Filth.

Sec. 119. No person shall engage in the business of transporting manure, swill, garbage, offal or any offensive or noxious substance, or drive any cart for such purpose, in The City of New York, without a permit from the Board of Health.

Sec. 120. No cart or other vehicle for carrying any manure, swill, garbage, offal, or rubbish, or other nauseous or offensive substance, or the contents of any privy, vault, cesspool or sink, shall, without necessity therefor, be allowed to stand or remain before or near any building, place of business or other premises where any person may be; nor shall any such cart or vehicle be allowed to occupy an unreasonable length of time in loading or unloading, or in passing along any street or through any inhabited place or grounds. Such carts, vehicles and all implements used in connection therewith must be kept in an inoffensive and sanitary condition, and, when not in use, shall be stored and kept in some place where no needless offense shall be given to any of the people of said City.

Sec. 121. All carts and vehicles for carrying any nauseous or offensive substances, boxes, tubs and receptacles in which any nauseous or offensive substance may be, or may be carried, shall be strong and tight, and the sides shall be so high above the load or contents that no part of such contents or load shall fall, leak or spill therefrom, and either the vehicle or vessel carried by it shall be so covered as to be inoffensive; and all such material shall be loaded and removed in a sanitary manner, and according to the regulations of the Department of Health, and it shall be the duty of every person removing any offensive material to at once replace in said vehicle or vessel any material that may have fallen therefrom upon or in any place, street or premises.

Sec. 122. All putrid or offensive matter, and all night soil, and the contents of sinks, privies, vaults and cesspools, and all noxious substances, shall, before their removal or exposure, be disinfected and rendered inoffensive by the owner, lessee, or occupant of the premises where the same may be, or by the person or contractor who removes or is about to remove the same; and no part of the contents of any vault, privy, sink or cesspool shall be removed without a permit from the Board of Health.

Sec. 123. No boat, scow or other receptacle used in transporting garbage to Barren Island or the place of disposal shall be permitted to remain moored or be at any dock, wharf or place within the limits of The City of New York for a longer period than twenty-four hours from the time garbage is first delivered or placed thereon. Garbage shall be received on such boat, scow or other receptacle and transported in a manner approved by the Board of Health.

Diseased, Injured and Dead Animals.

Sec. 124. No diseased cattle, swine, sheep, horses, dogs or cats, which are suffering from or have been exposed to any disease which is contagious among such animals, shall be brought into or kept in The City of New York. All persons, corporations or companies bringing milch cows into The City of New York shall furnish a certificate signed by a veterinarian who is a graduate of a recognized veterinary college, with the date of graduation and the name of the college from which the degree was received, to the effect that said cows are free from tuberculosis as far as may be determined by physical examination and the tuberculin test. Said certificate shall give a number which has been permanently attached to each cow, and a description sufficiently accurate for identification, stating the date (which must not be more than sixty days prior to the time when they are brought into the City), the place of examination, the temperature of the cow or cows at intervals of three hours for twelve hours before the subcutaneous injection of the tuberculin, the preparation of tuberculin used, the location of the injection, the quantity injected, the temperature at the tenth hour after the injection of the tuberculin and every three hours after the aforesaid tenth hour for twelve hours, or until the reaction is completed. No cow with a certificate which states that said cow gave a reaction of two degrees F. after the injection with 0.5 c. c. of the tuberculin prepared by the Department of Health of The City of New York (or its equivalent), diluted with ten times its volume of a 0.5 per cent. watery solution of carbolic acid, shall be brought into The City of New York.

Sec. 125. No person shall keep or retain, or allow or cause to be kept or retained, at any place within The City of New York, any animal having the disease known as glanders, or farcy or any other contagious disease, but shall forthwith report the fact to the Department of Health of said City, and, under the direction of the Sanitary Superintendent or Assistant Sanitary Superintendent, shall destroy or cause to be destroyed, remove or cause to be removed, and dispose of such animal or animals in a manner designated by the Sanitary Superintendent or Assistant Sanitary Superintendent, and every person who destroys any such animal shall forthwith notify the Department of Health of such destruction, the place of destruction, and the disposition of the body of such animal.

Sec. 126. All dead horses, before they are placed in the street, must have a tag attached giving the name and address of the owner and the stable from which the horse was removed.

Sec. 127. Every veterinary surgeon who is called to examine or professionally attend any animal within The City of New York having the glanders or farcy or any contagious disease shall report forthwith in writing to the Board of Health of said City the following facts, viz.: First, a statement of the location of such diseased animal; second, the name and address of the owner thereof; third, the type and character of the disease.

Sec. 128. No person shall leave in or throw into any place or street, or public water, or offensively expose or bury, the body (or any part thereof) of any dead or fatally sick or injured animal; nor shall any person keep any dead animal or any offensive meat, bird, fowl or fish in a place where the same may be dangerous to the life or detrimental to the health of any person.

Sec. 129. Any animal, being in any street or public place, within or adjacent to the built-up portion of New York City, and appearing in the estimation of any officer or Inspector of this Department (and of two discreet citizens, called by such officer or Inspector to view the same in his presence) injured or diseased past recovery, for any useful purpose, and not being attended and properly cared for by the owner or some proper person having charge thereof for such owner, or not having been removed to some private premises, or to some place designated by such officer or Inspector, within one hour after being found or left in such condition, may be deprived of life by such officer or Inspector, or as he may direct; and shall thereafter, unless at once removed by the owner or person, be treated as any other animal found on a street or place.

Sec. 130. Any person having a dead animal or an animal past recovery, and not killed for and proper for use as food, or in any offensive condition, or sick with an infectious or contagious disease, on his premises in said City, and every person whose animal or any animal in his charge or under his control in any street or place, may die or become or be in a condition past recovery, shall at once notify the Department of Health, and under the direction of the Sanitary Superintendent or an Assistant Sanitary Superintendent or an officer of the Police Department, remove or cause the removal of such animal, dead or alive, to such place as may be designated by such official.

Sec. 131. No person other than the Inspectors or officers of this Department or the Police Department, or persons thereto authorized, shall in any way interfere with such dead, sick or injured animal in any street or place, and no person shall skin or wound such animal in such street or public place, unless to terminate its life as herein authorized, except that the owner or person having control of such animal may terminate the life thereof in the presence and by the consent of a Policeman or an Inspector or officer of this Department.

Sec. 132. Every animal which shows symptoms of rabies and every animal that has been exposed to such disease shall, by the person owning the same or having possession thereof, be at once confined in some secure place for such length of time as to determine whether such disease exists or to show that such exposure has not given such animal said disease, and so as to avoid all danger to life or health. And such person shall also forthwith notify the Department of Health thereof and of the place where such animal is confined. Every animal which is mad or has rabies shall at once be killed by the owner or person having possession thereof, or by the Depart-

ment of Health, and the body of any animal that has died of such disease, or being suspected of such disease has been killed, shall be at once surrendered to the Department of Health to be by it disposed of.

Should a dog bite any person it shall be the duty of the owner, or person having the same in his possession or under his control, to at once notify said Department thereof, and surrender said dog to said Department for inspection and observation; and such dog shall be returned to the person from whom the same shall have been received if found not rabid, and if found to be rabid, it shall be destroyed by said Department.

When the Police or other person or authorities destroy a dog for any of the causes herein mentioned, it shall be his or their duty to immediately notify the said Department thereof and of the location of its body, so that the same may be obtained by the said Department; and it shall be unlawful to remove any such dog or the body of any such animal heretofore mentioned except as herein provided.

Infectious Diseases.

Sec. 133. It shall be the duty of every physician to report to the Department of Health, in writing, the full name, age and address of every person suffering from any one of the infectious diseases included in the list appended, with the name of the disease, within twenty-four hours of the time when the case is first seen:

A.—Contagious (very readily communicable): Measles, rubella (rotheln), scarlet fever, small-pox, varicella (chicken-pox), typhus fever, relapsing fever.

B.—Communicable: Diphtheria (croup), typhoid fever, Asiatic cholera, tuberculosis (of any organ), plague, tetanus, anthrax, glanders, epidemic cerebro-spinal meningitis, leprosy, infectious diseases of the eye (trachoma, suppurative conjunctivitis), puerperal septicaemia, erysipelas, whooping cough.

C.—Indirectly communicable (through intermediary host): Yellow fever, malarial fever.

Note.—In this provisional classification of the infectious diseases, arranged for practical purposes, the most readily communicable of these diseases, embracing the exanthemata and typhus fever, have been placed in a group by themselves and called contagious. This has been done with a view to emphasizing a distinction, which is not only of scientific significance, but of practical importance, in dealing with the sanitary features of administration. This distinction is furthermore of importance because it avoids the misunderstanding and alarm frequently caused by including in the same class the very readily communicable diseases (such as small-pox), and the much less communicable diseases (such as tuberculosis), which require very different sanitary measures for their control.

Sec. 134. It shall be the duty of the Commissioners or managers or the principal, superintendent or physician of each and every public institution or dispensary, in this City, to report to the Department of Health, in writing, the full name, age and address of any person suffering from any one of the infectious diseases included in the list appended, with the name of the disease, within twenty-four hours of the time when the case is first seen:

A.—Communicable: Influenza, lobar pneumonia, broncho-pneumonia, infectious diseases of the gastro-intestinal canal (dysentery, cholera morbus, cholera infantum, summer diarrhoeas of infants).

B.—Parasitic diseases of the skin: Scabies, tinea tonsurans, impetigo (contagious), favus.

Note.—In this list of diseases reporting is required by the Department of Health in order that data may be obtained for general and special investigation of the modes and sources of infection and as to the prevalence and distribution of these diseases. The Department of Health does not purpose to exercise a sanitary surveillance in these cases, but desires information with a view to the ultimate removal or improvement in the conditions which now foster them. Notification is required in certain of these diseases because of the liability to their extension among the children in schools.

Sec. 135. It shall be the duty of every physician to report forthwith, in writing, to the Department of Health, the death of every person who dies from, or while suffering with, any infectious disease, and to state in such report the specific name and type of such disease.

Sec. 136. It shall be the duty of every keeper of any boarding house or lodging house, and the proprietor of every lodging house or hotel, to report forthwith to the Department of Health all the known facts in regard to any person ill, in any house or hotel under his or her charge, and suffering from any one of the following infectious diseases: Measles, diphtheria (croup), scarlet fever, smallpox, chickenpox, epidemic cholera, typhus fever, rubella (rotheln), plague, tuberculosis and whooping cough.

Sec. 137. It shall be the duty of every person having knowledge of the existence of any person afflicted with any one of the following infectious diseases: Measles, diphtheria (croup), scarlet fever, smallpox, chickenpox, epidemic cholera, typhus fever, rubella (rotheln), plague, tuberculosis and whooping cough, who he has reason to think requires the attention of the Department of Health, to at once report to the Department all facts in regard to the disease; and no person shall interfere with or obstruct the entrance, inspection or examination of any building or house, or the occupants thereof, by the inspectors and officers of this Department, when any case of one of the infectious diseases above specified has been reported as existing in such house or dwelling; nor shall any person interfere with or obstruct, mutilate or tear down any notices of this Department posted in or on any premises in The City of New York.

Sec. 138. It shall be the duty of the commissioner or managers or the principal, superintendent or physician of each and every public or private institution or dispensary in this City to report to the Department of Health, in writing, or to cause such report to be made by some proper and competent person, the name, age, sex, occupation and latest address of every person afflicted with tuberculosis, who is in their care or who has come under their observation, within one week of such time. It shall be the duty of every person sick with this disease and of every person in attendance upon any one sick with this disease, and of the authorities of public and private institutions or dispensaries, to observe and enforce all the sanitary rules and regulations of the Board of Health for preventing the spread of pulmonary tuberculosis.

Sec. 139. Whenever an Inspector of this Department shall report in writing that any person is sick of any infectious disease, under such circumstances that the continuance of such sick person in the place where he or she may be is dangerous to the lives of other persons residing in the neighborhood, the Sanitary Superintendent, an Assistant Sanitary Superintendent or the Chief Inspector of the Division of Contagious Diseases, upon the report of the Medical Inspector of the Department, may cause the removal of such sick person to one of the hospitals under the charge of this Department or to a hospital delegated by the Board of Health.

Sec. 140. In every public hospital and dispensary in The City of New York there shall be provided and maintained a suitable room or rooms for the temporary isolation of persons suffering from any of the following infectious diseases: Measles, diphtheria (croup), scarlet fever, smallpox, chickenpox, epidemic cholera, typhus fever, rubella (rotheln), plague and whooping cough; and such persons shall immediately be separated from other persons at such dispensary or hospital. It shall be the duty of the physician or physicians, and of the officers and managers of every hospital or dispensary, to cause a report to be immediately made to the Department of Health of The City of New York of every person afflicted with any one of the infectious diseases herein specified who comes to their knowledge, and to have such persons properly isolated from other persons.

Sec. 141. It shall be the duty of every undertaker having notice of the death of any person within The City of New York of smallpox, diphtheria (croup), scarlet fever, yellow fever, typhus fever, plague, Asiatic cholera, measles or any other infectious disease dangerous to the general health of the community, or of the bringing of the dead body of any person who has died of any such disease into such City, to give immediate notice thereof to this Department. No person shall retain or expose or assist in the retention or exposure of the dead body of any such person except in a coffin or casket properly sealed; nor shall he allow any such body to be placed in any coffin or casket unless the body has been wrapped in a sheet saturated with a proper disinfecting solution and the coffin or casket shall then be immediately and permanently sealed. No undertaker shall assist in the public or church funeral of any such person. No undertaker shall use, or cause or allow to be used, at any funeral, or in any room where the dead body of any person shall be, any draperies, decorations, rugs or carpets, belonging to or furnished by him or under his direction.

Sec. 142. A public or church funeral shall not be held of any person who has died of smallpox, diphtheria (croup), scarlet fever, yellow fever, typhus fever, Asiatic cholera, measles or plague; but the funeral of such person shall be private,

and it shall not be lawful to invite or permit at the funeral of any person who has died of any one of the above diseases or of any infectious disease or at any services connected therewith, any person whose attendance is not necessary, or to whom there is danger of contagion thereby.

Sec. 143. No person shall within this City, without a permit from the Board of Health, carry, remove or cause or permit to be carried or removed, any person sick with any infectious disease, or remove or cause to be removed any such person from any building or vessel to any other building or vessel or to the shore or to or from any vehicle in any part of the City. Nor shall any person, by any exposure of any individual sick of any infectious disease, or of the body of such person, or by any negligent act connected therewith, or in respect of the care or custody thereof, or by a needless exposure of himself, cause or contribute to or promote the spread of disease from any such person or from any dead body.

Sec. 144. Every owner, lessee, tenant and occupant of any dwelling or apartment in The City of New York shall forthwith report to the Department of Health in writing the removal of any person from such dwelling or apartment who shall be suffering from any of the following infectious diseases: Measles, diphtheria (croup), scarlet fever, smallpox, chickenpox, epidemic cholera, typhus fever, rubella (rotheln), plague, whooping cough or tuberculosis (of any organ).

Sec. 145. No principal or superintendent of any school, and no parent, master or custodian of any child or minor (having the power and authority to prevent) shall permit any child or minor having scarlet fever, diphtheria (croup), smallpox or any dangerous, infectious or contagious disease, or any child in any family in which any such disease exists or has recently existed, to attend any public or private school until the Board of Health shall have given its permission therefor, nor in any manner to be unnecessarily exposed, or to needlessly expose any other person to the taking or to the infection of any contagious disease.

Disinfection.

Sec. 146. Adequate disinfection or cleansing and renovation of premises, furniture and belongings, deemed by the Department of Health to be infected by contagious or communicable diseases, shall immediately follow the recovery, death or removal of the person suffering from such disease, and such disinfection or cleansing and renovation shall be performed by the owner or occupant of said premises when ordered by the Board of Health.

Vaccination, Antitoxin.

Sec. 147. Every person, being the parent or guardian, or having the care, custody, or control of any minor, or other individual, shall (to the extent of any means, power and authority of said parent, guardian, or other person that could properly be used or exerted for such purpose) cause and procure such minor or individual to be so promptly, frequently, and effectively vaccinated, that such minor or individual shall not take, or be liable to take the smallpox.

Sec. 148. That no preparation of diphtheria antitoxin shall be offered or exposed for sale in this City unless the receptacle containing such preparation bear a label on which is placed the name and the address of the producer, and upon such label, or upon a circular accompanying such receptacle and inclosed with it in a sealed package, shall be printed or written the date of production and the value of the contents in antitoxin, as measured by some generally recognized standard.

Vessels and Seamen.

Sec. 149. The master, chief officer, and consignee of every vessel not being in quarantine, or within quarantine limits, but being within one-fourth of a mile of any dock, wharf, pier, or building of said City, shall daily report to the Department of Health, or cause to be reported, in writing, the particulars, and shall therein state the name, disease, and condition of any person being in or on such vessel, and sick of any infectious disease.

Sec. 150. The keepers, lessees, tenants, and owners of every boarding-house and lodging-house shall forthwith notify the Department of Health of the fact of any seafaring man or person lately from any vessel being taken sick at such house, and shall in such notice state where such sick person may be found, and from what vessel, and when he came, to the best of the knowledge of the person or persons giving such notice.

Sec. 151. Every master and chief officer of any vessel, and every physician of, or who practiced on, any vessel which shall arrive in the port of New York from any other port, shall at once report to this Department any facts connected with any person or thing on said vessel, or that came thereon, which he has reason to think may endanger the public health of this City; and he shall report the facts as to any person being or having been sick thereon, of an infectious disease, and as to there being or having been, during the voyage or since her arrival, any infected person or articles thereon.

Sec. 152. No master, charterer, owner, part owner or consignee of any vessel, or any other person, shall bring to any dock, pier, wharf, or building within 1,000 feet thereof, in said City, or unload at any dock, building, or pier therein, or have on storage in the built-up portions of said City, any skins, hides, rags, or similar articles or materials having been brought from any foreign country or any infected place, or from any points south of Norfolk, Virginia, without or otherwise than according to a permit from the Board of Health, and no person shall sell, exchange, remove or in any way expose any straw, bedding or other articles used by immigrants upon any vessel bringing immigrants to this port, until it has been adequately and properly cleansed or disinfected; and all straw, bedding or other articles that have been exposed on any vessel to contagion or infection of any contagious disease, or have been or are liable to communicate such disease, shall be destroyed by fire on said vessel.

Sec. 153. No owner, agent, or consignee of any vessel, or cargo, and no officer of any vessel (in respect of either of which vessel or cargo a permit, according to any law, ordinance, or regulation shall or should have been obtained to pass quarantine, or to come up to the water front of The City of New York) shall unload, or land, or cause to be unladen or landed, such cargo, or any part thereof, in said City, without having first received a permit from the Board of Health so to do.

Sec. 154. No captain, officer, consignee, owner or other person in charge of any vessel (or having right and authority to prevent the same) shall remove or aid in removing from any vessel to the shore (save as legally authorized by the Health Officer of the Port of New York, and into quarantine grounds and buildings only) any person sick of, or person that has been exposed to, and is liable very soon to develop any infectious disease, or so remove or aid in removing any articles that may have been exposed to the contagion of any such disease, except in accordance with a permit from the Board of Health.

Sec. 155. No master, charterer, consignee, or other person shall order, bring or allow (having power and authority to prevent the same) any vessel or person, or article therefrom, from any infected port, or any vessel, or person or article therefrom, liable to quarantine, according to the ninth section of the three hundred and fifty-eighth chapter of the Laws of 1863 (or under any other laws, and whether such quarantine has been made or suffered or not), to come or be brought to any point nearer than 300 yards from any dock or pier, or to any building in said City without or otherwise than according to a permit from the Board of Health. Nor shall any vessel, or person or thing therein or therefrom, having been in quarantine, come or be brought within the last-named distance of any last-named place, without the permit or assent of this Board.

Sec. 156. No person shall bring into this City from any infected place, or land or take therein from any vessel lately from an infected port, or from any vessel or building in which had lately been any person sick of an infectious disease, any article or person whatsoever, nor shall any such person land or come into said City without a permit from the Board of Health; and it shall be no excuse that such person or article so offending, or the occasion of offense, has passed through quarantine, or has a permit from any other source than this Board.

If such excavation shall not be intended to be, or shall not be, carried to a depth of more than 10 feet below the curb, the owner or owners of such adjoining or contiguous wall or walls, structure or structures shall preserve the same from injury, and so support the same by proper foundations that it or they shall be and remain practically as safe as before such excavation was commenced, and shall be permitted to enter upon the premises where such excavation is being made for that purpose, when necessary.

In case an adjoining party wall is intended to be used by the person or persons causing the excavation to be made, and such party wall is in good condition and sufficient for the uses of the adjoining building, then and in such case the person or persons causing the excavations to be made shall, at his or their own expense, preserve such party wall from injury and support the same by proper foundations, so that said party wall shall be and remain practically as safe as before the excavation was commenced.

If the person or persons whose duty it shall be to preserve or protect any wall or walls, structure or structures from injury shall neglect or fail so to do after having had a notice of twenty-four hours from the Department of Buildings, then the Commissioner of Buildings may enter upon the premises and employ such labor, and furnish such materials, and take such steps as, in his judgment, may be necessary to make the same safe and secure, or to prevent the same from becoming unsafe or dangerous, at the expense of the person or persons whose duty it is to keep the same safe and secure. Any party doing the said work, or any part thereof, under and by direction of the said Department of Buildings, may bring and maintain an action against the person or persons last herein referred to, to recover the value of the work done and materials furnished, in and about the said premises, in the same manner as if he had been employed to do the said work by the said person or persons. When an excavation is made on any lot, the person or persons causing such excavation to be made shall build, at his or their own cost and expense, a retaining wall to support the adjoining earth; and such retaining wall shall be carried to the height of the adjoining earth, and be properly protected by coping. The thickness of a retaining wall at its base shall be in no case less than one-fourth of its height.

Sec. 23. Bearing Capacity of Soil.—Where no test of the sustaining power of the soil is made, different soils, excluding mud, at the bottom of the footings, shall be deemed to safely sustain the following loads to the superficial foot—namely: Soft clay, one ton per square foot; ordinary clay and sand together, in layers, wet and springy, two tons per square foot; loam, clay or fine sand, firm and dry, three tons per square foot; very firm, coarse sand, stiff gravel or hard clay, four tons per square foot, or as otherwise determined by the Commissioner of Buildings having jurisdiction. Where a test is made of the sustaining power of the soil the Commissioner of Buildings shall be notified, so that he may be present in person or by representative. The record of the test shall be filed in the Department of Buildings. When a doubt arises as to the safe sustaining power of the earth upon which a building is to be erected the Department of Buildings may order borings to be made, or direct the sustaining power of the soil to be tested by and at the expense of the owner of the proposed building.

Sec. 24. Pressure Under Footings of Foundations.—The loads exerting pressure under the footings of foundations in buildings more than three (3) stories in height are to be computed as follows: For warehouses and factories they are to be the full dead load and the full live load established by section 130 of this Code. In stores and buildings for light manufacturing purposes they are to be the full dead load and 75 per cent. of the live load established by section 130 of this Code.

In churches, school houses and places of public amusement or assembly, they are to be the full dead load and 75 per cent. of the live load established by section 130 of this Code.

In office buildings, hotels, dwellings, apartment houses, tenement houses, lodging houses and stables they are to be the full dead load and 60 per cent. of the live load established by section 130 of this Code.

Footings will be so designed that the loads will be as nearly uniform as possible and not in excess of the safe bearing capacity of the soil, as established by section 23 of this Code.

Sec. 25. Foundations.—Every building, except buildings erected upon solid rock or buildings erected upon wharves and piers on the water front, shall have foundations of brick, stone, iron, steel or concrete laid not less than 4 feet below the surface of the earth, on the solid ground or level surface of rock, or upon piles or ranging timbers when solid earth or rock is not found. Piles intended to sustain a wall, pier or post shall be spaced not more than 36 or less than 20 inches on centres, and they shall be driven to a solid bearing, if practicable to do so, and the number of such piles shall be sufficient to support the superstructure proposed. No pile shall be used of less dimensions than 5 inches at the small end and 10 inches at the butt for short piles, or piles 20 feet or less in length, and 12 inches at the butt for long piles, or piles more than 20 feet in length. No pile shall be weighted with a load exceeding 40,000 pounds. When a pile is not driven to refusal, its safe sustaining power shall be determined by the following formula: Twice the weight of the hammer in tons multiplied by the height of the fall in feet divided by least penetration of pile under the last blow in inches plus one. The Commissioner of Buildings shall be notified of the time when such test piles will be driven, that he may be present in person or by representative. The tops of all piles shall be cut off below the lowest water line. When required, concrete shall be rammed down in the interspaces between the heads of the piles to a depth and thickness of not less than 12 inches and for one foot in width outside of the piles. Where ranging and capping timbers are laid on piles for foundations, they shall be of hard wood not less than six inches thick and properly joined together, and their tops laid below the lowest water line. Where metal is incorporated in or forms part of a foundation, it shall be thoroughly protected from rust by paint, asphaltum, concrete, or by such materials and in such manner as may be approved by the Commissioner of Buildings. When footings of iron or steel for columns are placed below the water level, they shall be similarly coated, or inclosed in concrete, for preservation against rust. When foundations are carried down through earth by piers of stone, brick or concrete in caissons, the loads on same shall be not more than 15 tons to the square foot when carried down to rock; 10 tons to the square foot when carried down to firm gravel or hard clay; 8 tons to the square foot in open caissons or sheet pile trenches when carried down to rock. Wood piles may be used for the foundations under frame buildings built over the water or on salt meadow land, in which case the piles may project above the water a sufficient height to raise the building above high tide, and the building may be placed directly thereon without other foundation.

Sec. 26. Foundation Walls.—Foundation walls shall be construed to include all walls and piers built below the curb level, or nearest tier of beams to the curb, to serve as supports for walls, piers, columns, girders, posts or beams. Foundation walls shall be built of stone, brick, Portland cement concrete, iron or steel. If built of rubble stone, or Portland cement concrete, they shall be at least 8 inches thicker than the wall next above them to a depth of 12 feet below the curb level; and for every additional 10 feet, or part thereof, deeper, they shall be increased 4 inches in thickness. If built of brick, they shall be at least 4 inches thicker than the wall next above them to a depth of 12 feet below the curb level; and for every additional 10 feet, or part thereof, deeper, they shall be increased 4 inches in thickness.

The footing or base course shall be of stone or concrete, or both, or of concrete and stepped-up brickwork, of sufficient thickness and area to safely bear the weight to be imposed thereon. If the footing or base course be of concrete, the concrete shall not be less than 12 inches thick. If of stones, the stones shall not be less than 2 by 3 feet, and at least 8 inches in thickness for walls; and not less than 10 inches in thickness if under piers, columns or posts; the footing or base course, whether formed of concrete or stone, shall be at least 12 inches wider than the bottom width of walls, and at least 12 inches wider on all sides than the bottom width of said piers, columns or posts. If the superimposed load is such as to cause undue transverse strain on a footing projecting 12 inches, the thickness of such footing is to be increased so as to carry the load with safety. For small structures and for small piers sustaining light

loads, the Commissioner of Buildings having jurisdiction may, in his discretion, allow a reduction in the thickness and projection for footing or base courses herein specified. All base stones shall be well bedded and laid crosswise, edge to edge.

If stepped-up footing of brick are used in place of stone, above the concrete, the offsets, if laid in single courses, shall each not exceed one and one-half inches, or if laid in double courses, then each shall not exceed 3 inches, offsetting the first course of brickwork, back one-half the thickness of the concrete base, so as to properly distribute the load to be imposed thereon.

If, in place of a continuous foundation wall, isolated piers are to be built to support the superstructure, where the nature of the ground and the character of the building make it necessary, in the opinion of the Commissioner of Buildings having jurisdiction, inverted arches resting on a proper bed of concrete, both designed to transmit with safety the superimposed loads, shall be turned between the piers. The thrust of the outer piers shall be taken up by suitable wrought iron or steel rods and plates.

Grillage beams of wrought iron or steel resting on a proper concrete bed may be used. Such beams must be provided with separators and bolts inclosed and filled solid between with concrete, and of such sizes and so arranged as to transmit with safety the superimposed loads.

All stone walls 24 inches or less in thickness shall have at least one header extending through the wall in every 3 feet in height from the bottom of the wall, and in every 3 feet in length, and if over 24 inches in thickness, shall have one header for every 6 superficial feet on both sides of the wall, laid on top of each other to bond together, and running into the wall at least 2 feet.

All headers shall be at least 12 inches in width and 8 inches in thickness, and consist of good flat stones.

No stone shall be laid in such walls in any other position than on its natural bed.

No stone shall be used that does not bond or extend into the wall at least 6 inches. Stones shall be firmly bedded in cement mortar and all spaces and joints thoroughly filled.

Part 6—Walls, Piers and Partitions.

Sec. 27. Materials of Walls—The walls of all buildings, other than frame or wood buildings, shall be constructed of stone, brick, Portland cement concrete, iron, steel or other hard, incombustible material and the several component parts of such buildings shall be as herein provided. All buildings shall be inclosed on all sides with independent or party walls.

Sec. 28. Walls and Piers—In all walls of the thickness specified in this Code, the same amount of materials may be used in piers or buttresses. Bearing walls shall be taken to mean those walls on which the beams, girders or trusses rest. If any horizontal section through any part of any bearing wall in any building shows more than 30 per centum area of flues and openings, the said wall shall be increased four inches in thickness for every 15 per centum, or fraction thereof, of flue or opening area in excess of 30 per centum.

The walls and piers of all buildings shall be properly and solidly bonded together with close joints filled with mortar. They shall be built to a line and be carried up plumb and straight. The walls of each story shall be built up the full thickness to the top of the beams above. All brick laid in non-freezing weather shall be well wet before being laid. Walls or piers, or parts of walls and piers, shall not be built in freezing weather, and if frozen, shall not be built upon.

All piers shall be built of stone or good, hard, well-burnt brick laid in cement mortar. Every pier built of brick, containing less than 9 superficial feet at the base, supporting any beam, girder, arch or column on which a wall rests, or lintel spanning an opening over ten feet and supporting a wall, shall at intervals of not over 30 inches apart in height have built into it a bond stone not less than 4 inches thick, or a cast-iron plate of sufficient strength, and the full size of the piers. For piers fronting on a street the bond stones may conform with the kind of stone used for the trimmings of the front. Cap stones of cut granite or blue stone, proportioned to the weight to be carried, but not less than 5 inches in thickness, by the full size of the pier, or cast-iron plates of equal strength by the full size of the pier, shall be set under all columns or girders, except where a 4-inch bond stone is placed immediately below said cap stone, in which case the cap stone may be reduced in horizontal dimensions at the discretion of the Commissioner of Buildings having jurisdiction. Isolated brick piers shall not exceed in height ten times their least dimensions. Stone posts for the support of posts or columns above shall not be used in the interior of any building. Where walls or piers are built of coursed stones, with dressed level beds and vertical joints, the Department of Buildings shall have the right to allow such walls or piers to be built of a less thickness than specified for brickwork, but in no case shall said walls or piers be less than three-quarters of the thickness provided for brickwork.

In all brick walls every sixth course shall be a heading course, except where walls are faced with brick in running bond, in which latter case every sixth course shall be bonded into the backing by cutting the course of the face brick and putting in diagonal headers behind the same, or by splitting the face brick in half and backing the same with a continuous row of headers. Where face brick is used of a different thickness from the brick used for backing, the courses of the exterior and interior brickwork shall be brought to a level bed at intervals of not more than ten courses in height of the face brick, and the face brick shall be properly tied to the backing by a heading course of the face brick. All bearing walls faced with brick laid in running bond shall be 4 inches thicker than the walls are required to be under any section of this Code.

Sec. 29. Ashlar—Stone used for the facing of any building, and known as ashlar, shall be not less than 4 inches thick.

Stone ashlar shall be anchored to the backing and the backing shall be of such thickness as to make the walls, independent of the ashlar, conform as to the thickness with the requirements of sections 31 and 32 of this Code, unless the ashlar be at least 8 inches thick and bonded into the backing, and then it may be counted as part of the thickness of the wall.

Iron ashlar plates used in imitation of stone ashlar on the face of a wall shall be backed up with the same thickness of brickwork as stone ashlar.

Sec. 30. Mortar for Walls and Ashlar—All foundation walls, isolated piers, parapet walls and chimneys above roofs shall be laid in cement mortar, but this shall not prohibit the use, in cold weather, of a small proportion of lime to prevent the mortar from freezing. All other walls built of brick or stone shall be laid in lime, cement, or lime and cement mortar mixed.

The backing up of all stone ashlar shall be laid up with cement mortar, or cement and lime mortar mixed, but the back of the ashlar may be parged with lime mortar to prevent discoloration of the stone.

Sec. 31. Walls for Dwelling Houses—The expression "walls for dwelling houses" shall be taken to mean and include in this class walls for the following buildings:

Dwellings, asylums, apartment houses, convents, club houses, dormitories, hospitals, hotels, lodging houses, tenements, parish buildings, schools, laboratories, studios.

The walls above the basement of dwelling houses not over three stories and basement in height, nor more than 40 feet in height, and not over 20 feet in width, and not over 55 feet in depth, shall have side and party walls not less than 8 inches thick, and front and rear walls not less than 12 inches thick. All walls of dwellings exceeding 20 feet in width and not exceeding 40 feet in height, shall be not less than 12 inches thick. All walls of dwellings 26 feet or less in width between bearing walls which are hereafter erected or which may be altered to be used for dwellings and being over 40 feet in height and not over 50 feet in height, shall be not less than 12 inches thick above the foundation wall. No wall shall be built having a 12-inch thick portion measuring vertically more than 50 feet. If over 50 feet in height and not over 60 feet in height the wall shall be not less than 16 inches thick in the story next above the foundation walls and from thence not less than 12 inches to the top. If over 60 feet in height, and not over 75 feet in height, the walls shall be not less than 16 inches thick above the foundation walls to the height of 25 feet, or to the nearest tier of beams to that height, and from thence not less than 12 inches thick to the top. If over 75 feet in height, and not over 100 feet in height, the walls shall be not less than 20 inches thick above the foundation walls to the height of 40 feet, or to the nearest tier of beams to that height, thence not less than 16 inches thick to the height of 75 feet, or to the nearest tier of beams to that height, and thence not less than 12 inches thick to the top. If over 100 feet in height and not over 125 feet in height, the walls shall be not less than 24 inches thick above the foundation walls to the height of 40 feet or to the nearest tier of beams to that height, thence not less than 20 inches thick to the height of 75 feet, or to the nearest tier of beams to that height, thence not less than 16 inches thick to the height of 110 feet, or to the nearest tier of beams to that height, and thence not less than 12

inches thick to the top. If over 125 feet in height and not over 150 feet in height, the walls shall be not less than 28 inches thick above the foundation walls to the height of 30 feet, or to the nearest tier of beams to that height; thence not less than 24 inches thick to the height of 65 feet, or to the nearest tier of beams to that height; thence not less than 20 inches thick to the height of 100 feet, or to the nearest tier of beams to that height, thence not less than 16 inches thick to the height of 135 feet, or to the nearest tier of beams to that height, and thence not less than 12 inches thick to the top. If over 150 feet in height, each additional 30 feet in height or part thereof, next the foundation walls, shall be increased 4 inches in thickness, the upper 150 feet of wall remaining the same as specified for a wall of that height.

All non-fireproof dwelling houses erected under this section, exceeding 26 feet in width, shall have brick fore-and-aft partition walls. All non-bearing walls of buildings hereinbefore in this section specified may be 4 inches less in thickness, provided, however, that none are less than 12 inches thick, except as in this Code specified. Eight-inch brick partition walls may be built to support the beams in such buildings in which the distance between the main or bearing walls is not over 33 feet; if the distance between the main or bearing walls is over 33 feet the brick partition wall shall not be less than 12 inches thick; provided, that no clear span is over 26 feet. No wall shall be built having any one thickness measuring vertically more than 50 feet. This section shall not be construed to prevent the use of iron or steel girders, or iron or steel girders and columns, or piers of masonry, for the support of the walls and ceilings over any room which has a clear span of more than 26 feet between walls, in such dwellings as are not constructed fireproof, nor to prohibit the use of iron or steel girders, or iron or steel girders and columns in place of brick walls in buildings which are to be used for dwellings when constructed fireproof. If the clear span is to be over 26 feet, then the bearing walls shall be increased 4 inches in thickness for every 12½ feet or part thereof that said span is over 26 feet, or shall have, instead of the increased thickness, such piers or buttresses as, in the judgment of the Commissioner of Buildings having jurisdiction, may be necessary.

Whenever two or more dwelling houses shall be constructed not over 12 feet 6 inches in width, and not over 50 feet in height, the alternating centre wall between any two such houses shall be of brick, not less than 8 inches thick above the foundation wall; and the ends of the floor beams shall be so separated that 4 inches of brickwork will be between the beams where they rest on the said centre wall.

Sec. 32. Walls for Warehouses—The expression "walls for warehouses" shall be taken to mean and include in this class walls for the following buildings:

Warehouses, stores, factories, mills, printing-houses, pumping stations, refrigerating houses, slaughter-houses, wheelwright shops, cooperage shops, breweries, light and power houses, sugar refineries, office buildings, stables, markets, railroad buildings, jails, police stations, court houses, observatories, foundries, machine shops, public assembly buildings, armories, churches, theatres, libraries, museums. The walls of all warehouses, 25 feet or less in width between walls or bearings, shall be not less than 12 inches thick to the height of 40 feet above the foundation walls. If over 40 feet in height, and not over 60 feet in height, the walls shall be not less than 16 inches thick above the foundation walls to the height of 40 feet, or to the nearest tier of beams to that height, and thence not less than 12 inches thick to the top. If over 60 feet in height, and not over 75 feet in height, the walls shall be not less than 20 inches thick above the foundation walls to the height of 25 feet, or to the nearest tier of beams to that height, and thence not less than 16 inches thick to the top. If over 75 feet in height, and not over 100 feet in height, the walls shall be not less than 24 inches thick above the foundation walls to the height of 40 feet, or to the nearest tier of beams to that height; thence not less than 20 inches thick to the height of 75 feet, or to the nearest tier of beams to that height; thence not less than 16 inches thick to the top. If over 100 feet in height, and not over 125 feet in height, the walls shall be not less than 28 inches thick above the foundation walls to the height of 40 feet, or to the nearest tier of beams to that height; thence not less than 24 inches thick to the height of 75 feet, or to the nearest tier of beams to that height; thence not less than 20 inches thick to the height of 110 feet, or to the nearest tier of beams to that height, and thence not less than 16 inches thick to the top. If over 125 feet in height, and not over 150 feet, the walls shall be not less than 32 inches thick above the foundation walls to the height of 30 feet, or to the nearest tier of beams to that height; thence not less than 28 inches thick to the height of 65 feet, or to the nearest tier of beams to that height; thence not less than 24 inches thick to the height of 100 feet, or to the nearest tier of beams to that height; thence not less than 20 inches thick to the height of 135 feet, or to the nearest tier of beams to that height; and thence not less than 16 inches thick to the top. If over 150 feet in height, each additional 25 feet in height, or part thereof next above the foundation walls shall be increased 4 inches in thickness, the upper 150 feet of wall remaining the same as specified for a wall of that height.

If there is to be a clear span of over 25 feet between the bearing walls, such walls shall be 4 inches more in thickness than in this section specified, for every 12½ feet, or fraction thereof, that said walls are more than 25 feet apart, or shall have instead of the increased thickness such piers or buttresses as, in the judgment of the Commissioner of Buildings, may be necessary.

The walls of buildings of a public character shall be not less than in this Code specified for warehouses with such piers or such buttresses, or supplemental columns of iron or steel, as, in the judgment of the Commissioner of Buildings having jurisdiction, may be necessary to make a safe and substantial building.

In all stores, warehouses and factories over 25 feet in width between walls there shall be brick partition walls, or girders supported on iron, steel, or wood columns, or piers of masonry.

In all stores, warehouses or factories, in case iron, steel or wood girders, supported by iron, steel or wood columns, or piers of masonry, are used in place of brick partition walls, the building may be 75 feet wide and 210 feet deep; when extending from street to street, or when otherwise located may cover an area of not more than 8,000 superficial feet. When a building fronts on three streets it may be 105 feet wide and 210 feet deep, or if a corner building fronting on two streets it may cover an area of not more than 12,500 superficial feet; but in no case wider nor deeper, nor to cover a greater area, except in the case of fireproof buildings. An area greater than herein stated may, considering location and purpose, be allowed by the Board of Buildings when the proposed building does not exceed 3 stories in height.

Sec. 33. Increased Thickness of Walls for Buildings More Than 105 Feet in Depth—All buildings, not excepting dwellings, that are over 105 feet in depth, without a cross-wall or proper piers or buttresses, shall have the side or bearing walls increased in thickness 4 inches more than is specified in the respective sections of this Code for the thickness of walls for every 105 feet, or part thereof, that the said buildings are over 105 feet in depth.

Sec. 34. Reduced Thickness for Interior Walls—In case the walls of any building are less than 25 feet apart, and less than 40 feet in depth, or there are cross-walls which intersect the walls, not more than 40 feet distant, or piers or buttresses built into the walls, the interior walls may be reduced in thickness in just proportion to the number of cross-walls, piers or buttresses, and their nearness to each other; provided, however, that this clause shall not apply to walls below 60 feet in height, and that no such wall shall be less than 12 inches thick at the top, and gradually increased in thickness by set-offs to the bottom. The Commissioner of Buildings having jurisdiction is hereby authorized and empowered to decide (except where herein otherwise provided for) how much the walls herein mentioned may be permitted to be reduced in thickness, according to the peculiar circumstances of each case, without endangering the strength and safety of the building.

Sec. 35. One-story Brick Buildings—One-story structures not exceeding a height of 15 feet may be built with 8-inch walls when the bearing walls are not more than 19 feet apart, and the length of the 8-inch bearing walls does not exceed 55 feet. One-story and basement extensions may be built with 8-inch walls when not over 20 feet wide, 20 feet deep and 20 feet high to dwellings.

Sec. 36. Inclosure Walls for Skeleton Structures—Walls of brick built in between iron or steel columns, and supported wholly or in part on iron or steel girders, shall be not less than 12 inches thick for 75 feet of the uppermost height thereof, or to the nearest tier of beams to that measurement, in any building so constructed, and every lower section of 60 feet, or to the nearest tier of beams to such vertical measurement, or part thereof, shall have a thickness of 4 inches more than is required for the section next above it down to the tier of beams nearest to the curb level; and thence downward, the thickness of walls shall increase in the ratio prescribed in section 26, this Code.

Sec. 37. **Curtain Walls**—Curtain walls built in between piers or iron or steel columns and not supported on steel or iron girders, shall be not less than twelve inches thick for sixty feet of the uppermost height thereof, or nearest tier of beams to that height, and increased four inches for every additional section of sixty feet or nearest tier of beams to that height.

Sec. 38. **Existing Party Walls**—Walls heretofore built for or used as party walls, whose thickness at the time of their erection was in accordance with the requirements of the then existing laws, but which are not in accordance with the requirements of this Code, may be used, if in good condition, for the ordinary uses of party walls, provided the height of the same be not increased.

Sec. 39. **Lining Existing Walls**—In case it is desired to increase the height of existing party or independent walls, which are less in thickness than required under this Code, the same shall be done by a lining of brickwork to form a combined thickness with the old wall of not less than four inches more than the thickness required for a new wall corresponding with the total height of the wall when so increased in height. The said linings shall be supported on proper foundations and carried up to such height as the Commissioner of Buildings having jurisdiction may require. No lining shall be less than eight inches in thickness, and all lining shall be laid up in cement mortar and thoroughly anchored to the old brick walls with suitable wrought-iron anchors, placed two feet apart and properly fastened or driven into the old walls in rows alternating vertically and horizontally with each other, the old walls being first cleaned of plaster or other coatings where any lining is to be built against the same. No rubble wall shall be lined except after inspection and approval by the Department.

Sec. 40. **Walls of Unfinished Buildings**—Any building, the erection of which was commenced in accordance with specifications and plans submitted to and approved by the Department of Buildings prior to the passage of this Code, if properly constructed and in safe condition, may be completed or built upon in accordance with the requirements of law, as to thickness of walls, in force at the time when such specification and plans were approved.

Sec. 41. **Walls Tied, Anchored and Braced**—In no case shall any wall or walls of any building be carried up more than two stories in advance of any other wall, except by permission of the Commissioner of Buildings having jurisdiction, but this prohibition shall not include the inclosure walls for skeleton buildings. The front, rear, side and party walls shall be properly bonded together, or anchored to each other every six feet in their height by wrought-iron tie anchors, not less than one and a half inches by three-eighths of an inch in size, and not less than twenty-four inches in length. The side anchors shall be built into the side or party walls not less than sixteen inches, and into the front and rear walls, so as to secure the front and rear walls to the side or party walls when not built and bonded together. All exterior piers shall be anchored to the beams or girders on the level of each tier. The walls and beams of every building, during the erection or alteration thereof, shall be strongly braced from the beams of each story and, when required, shall also be braced from the outside until the building is inclosed. The roof tier of wood beams shall be safely anchored with plank or joist to the beams of the story below until the building is inclosed.

Sec. 42. **Arches and Lintels**—Openings for doors and windows in all buildings shall have good and sufficient arches of stone, brick or terra-cotta, well built and keyed with good and sufficient abutments or lintels of stone, iron or steel of sufficient strength, which shall have a bearing at each end of not less than five inches on the wall. On the inside of all openings in which lintels shall be less than the thickness of the wall to be supported, there shall be timber lintels which shall rest at each end not more than three inches on any wall, which shall be chamfered at each end, and shall have a suitable arch turned over the timber lintel. Or the inside lintel may be of cast iron or wrought iron or steel, and in such case stone blocks or cast-iron plates shall not be required at the ends where the lintel rests on the walls, provided the opening is not more than six feet in width.

All masonry arches shall be capable of sustaining the weight and pressure which they are designed to carry, and the stress at any point shall not exceed the working stress for the material used, as given in section 139 of this Code. Tie rods shall be used where necessary to secure stability.

Sec. 43. **Parapet Walls**—All exterior and division or party walls over fifteen feet high, excepting where such walls are to be finished with cornices, gutters or crown mouldings, shall have parapet walls not less than eight inches in thickness and carried two feet above the roof, but for warehouses, factories, stores and other buildings used for commercial or manufacturing purposes, the parapet walls shall be not less than twelve inches in thickness and carried three feet above the roof, and all such walls shall be coped with stone, terra-cotta or cast iron.

Sec. 44. **Hollow Walls**—In all walls that are built hollow the same quantity of stone, brick or concrete shall be used in their construction as if they were built solid, as in this Code provided, and no hollow wall shall be built unless the parts of same are connected by proper ties, either of brick, stone or iron, placed not over twenty-four inches apart.

Sec. 45. **Hollow Bricks on Inside of Walls**—The inside four inches of all walls may be built of hard-burnt hollow brick, properly tied and bonded into the walls and of the dimension of ordinary bricks. Where hollow tile or porous terra-cotta blocks are used as lining or furring for walls, they shall not be included in the measurement of the thickness of such walls.

Sec. 46. **Recesses and Chases in Walls**—Recesses for stairways or elevators may be left in the foundation or cellar walls of all buildings, but in no case shall the walls be of less thickness than the walls of the fourth story, unless reinforced by additional piers with iron or steel girders, or iron or steel columns and girders, securely anchored to walls on each side. Recesses for alcoves and similar purposes shall have not less than 8 inches of brickwork at the back of such recesses, and such recesses shall be not more than 8 feet in width, and shall be arched over or spanned with iron or steel lintels, and not carried up higher than 18 inches below the bottom of the beams of the floor next above. No chase for water or other pipes shall be made in any pier, and in no wall more than one-third of its thickness. The chases around said pipe or pipes shall be filled up with solid masonry for the space of 1 foot at the top and bottom of each story. No horizontal recess or chase in any wall shall be allowed exceeding 4 feet in length without permission of the Commissioner of Buildings having jurisdiction. The aggregate area of recesses and chases in any wall shall not exceed one-fourth of the whole area of the face of the wall on any story, nor shall any such recess be made within a distance of 6 feet from any other recess in the same wall.

Sec. 47. **Furred Walls**—In all walls furred with wood, the brickwork between the ends of wood beams shall project the thickness of the furring beyond the inner face of the wall for the full depth of the beams.

Sec. 48. **Light and Vent Shafts**—In every building hereafter erected or altered, all the walls or partitions forming interior light or vent shafts shall be built of brick or such other fireproof materials as may be approved by the Commissioner of Buildings having jurisdiction. The walls of all light or vent shafts, whether exterior or interior, hereafter erected, shall be carried up not less than 3 feet above the level of the roof, and the brick walls coped as other parapet walls. Vent shafts to light interior bathrooms in private dwellings may be built of wood filled in solidly with brick or hard-burnt clay blocks, when extending through not more than one story in height, and carried not less than 2 feet above the roof, covered with a ventilating skylight of metal and glass.

Sec. 49. **Brick and Hollow Tile Partitions**—Eight-inch brick and 6-inch and 4-inch hollow tile partitions of hard-burnt clay or porous terra-cotta may be built, not exceeding in their vertical portions a measurement of 50, 36 and 24 feet, respectively, and in their horizontal measurement a length not exceeding 75 feet, unless strengthened by proper crosswalls, piers or buttresses, or built in iron or steel framework. All such partitions shall be carried on proper foundations, or on iron or steel girders, or on iron or steel girders and columns or piers of masonry.

Sec. 50. **Cellar Partitions in Residence Buildings**—One line of fore-and-aft partitions in the cellar or lowest story, supporting stud partitions above, in all residence buildings over 20 feet between bearing walls in the cellar or lowest story, hereafter erected, shall be constructed of brick, not less than 8 inches thick, or piers of brick with openings arched over below the under side of the first tier of beams, or girders of iron or steel and iron columns, or piers of masonry, may be used; or if iron or steel floor beams spanning the distance between bearing walls are used, of adequate strength to support the stud partitions above in addition to the floor load to be sustained by the said iron or steel beams, then the fore-and-aft brick partition, or its equivalent, may be omitted.

Stud partitions, which may be placed in the cellar or lowest story of any building, shall have good, solid, stone or brick foundation walls under the same, which shall be built up to the top of the floor beams or sleepers, and the sills of said partitions shall be of locust or other suitable hard wood; but if the walls are built 5 inches higher of brick than the top of the floor beams or sleepers, any wooden sill may be used on which the studs shall be set.

Sec. 51. **Main Stud Partitions**—In residence buildings, where fore-and-aft stud partitions rest directly over each other, they shall run down between the wood floor beams and rest on the top plate of the partition below, and shall have the studding filled in solid between the uprights to the depth of the floor beams with suitable incombustible materials.

Sec. 52. **Timber in Walls Prohibited**—No timber shall be used in any wall of any building where stone, brick or iron is commonly used, except inside lintels, as herein provided, and brace blocks, not more than 8 inches in length.

Part 7—Apartment Houses, Tenement Houses and Dwellings of Certain Heights.

Sec. 53. **Apartment Houses, Tenement Houses and Dwellings of Certain Heights**—Every non-fireproof building hereafter erected or altered for an apartment house or tenement house, five stories in height, or having a basement and four stories in height above a cellar, to be occupied by one or more families on any floor above the first shall have the first floor above the cellar or lowest story constructed fireproof in such manner as required in section 106 of this Code. When any such non-fireproof building exceeding five stories in height or having a basement and five stories in height above a cellar has a store on the first story, the entire second story floor shall also be constructed fireproof. No non-fireproof apartment house, tenement house or dwelling house shall be hereafter erected more than six stories in height, nor exceed a height of 75 feet, unless such building has both the first and second story floors constructed fireproof, and then the height shall be not more than seven stories nor exceed 85 feet in height. Fireproof apartment houses or tenement houses, if constructed entirely in accordance with the requirements of section 105 of this Code, for fireproof construction may be erected to a height not to exceed 150 feet, but not more than twelve stories in height upon all streets and avenues exceeding 79 feet in width, and 125 feet, but not more than ten stories in height upon all streets and avenues not exceeding 79 feet in width, but any such building, when exceeding 100 feet in height, shall be not less than 40 feet in width. If any such building shall have a frontage exceeding 40 feet and exceeds 85 feet in height, it shall have at least two separate fireproof stairways accessible from each apartment, leading from the ground floor to the roof, one of which shall be remote from elevator shafts.

The stairs from the cellar or lowest story to the fireproof floor next above, when placed within any such building, shall be located, when practicable, to the rear of the staircase leading from the first story to the upper stories and be inclosed with brick or stone walls, and such stairway shall be provided with self-closing fireproof doors at the top and bottom of said flight of stairs. When such stairway is placed underneath the first story staircase, it shall be constructed fireproof and be roofed over with fireproof material, and be also inclosed with brick walls, with self-closing fireproof doors at the top and bottom of said flight of stairs.

When the stairs from the first story to the cellar or lowest story are located in an open side court the door leading thereto from the first story may be placed underneath the staircase in the first story, and the strings and railings of such outside stairs shall be of iron, and if the stairs be inclosed from the weather incombustible material only shall be used for that purpose. No closet shall be constructed underneath the first story staircase, but the space thereunder shall be left entirely open and kept free from incumbrance, but this shall not prohibit the inclosing without openings the under portions of the staircase from the foot of the same to a point where the height from the floor line to the soffit of the staircase shall not exceed 5 feet.

All non-fireproof apartment houses and tenement houses exceeding five stories in height, or having a basement and five stories in height above a cellar, shall be constructed as in this section before described, and shall also have the halls and stairs inclosed with twelve-inch brick walls. Eight-inch brick walls not exceeding 50 feet in their vertical measurement, may inclose said halls and stairs, and be used as bearing walls where the distance between the outside bearing walls does not exceed 33 feet, and the area between the said brick inclosure walls does not exceed 180 superficial feet. The floors, stairs and ceilings in said halls and stairways shall be made of iron, steel, brick, stone, tile, cement or other hard incombustible materials, excepting that the flooring and sleepers underneath the same may be of wood and the handrails of the stairs may be of hard wood, and the treads may be of oak not less than 1½ inches in thickness, provided that where such wooden treads are used the under side of the stairs shall be entirely lathed with iron or wire lath, and plastered thereon, or covered with metal. At least one flight of such stairs in each of said buildings shall extend to the roof, and be inclosed in a bulkhead built of fireproof materials. The said halls and stairways shall have a connecting fireproof hallway inclosed with suitable walls of brick or such other fireproof materials, including the ceiling in all cases, as may be approved by the Commissioner of Buildings having jurisdiction, in the first story and extend to the street.

Part 8—Vaults, Areas and Cellars.

Sec. 54. **Cellars to Be Connected with Sewers**—Before the walls of buildings are carried up above the foundation walls the cellar shall be connected with the street sewers. Should there be no sewer in the street, or if the cellars are below water level, or below the sewer level, then provision shall be made by the owner to prevent water accumulating in the cellars to the injury of the foundations.

Sec. 55. **Vaults Under Sidewalks**—In buildings where the space under the sidewalk is utilized, a sufficient stone or brick wall, or brick arches between iron or steel beams, shall be built to retain the roadway of the street, and the side, end or party walls of such building shall extend under the sidewalk, of sufficient thickness, to such wall. The roofs of all vaults shall be of incombustible material. Openings in the roofs of vaults for the admission of coal or light, or for manholes, or for any other purposes, if placed outside the area line, shall be covered with glass set in iron frames, each glass to measure not more than sixteen square inches, or with iron covers having a rough surface, and rabbeted flush with the sidewalk. When any such cover is placed in any sidewalk, it shall be placed as near as practicable to the outside line of the curb. All vaults shall be thoroughly ventilated.

Sec. 56. **Areas**—All areas shall be properly protected with suitable railings or covered over.

When areas are covered over, iron or iron and glass combined, stone or other incombustible materials shall be used and supported on brick or stone walls, or on iron or steel beams.

Sec. 57. **Cellar Floors**—The floor of the cellar or lowest story in every dwelling house, apartment house, tenement house, lodging house, hotel, workshop, factory, school, church, hospital and asylum hereafter erected, shall be concreted not less than four inches thick.

Where wood floors are to be laid in such cellars or lowest stories, the sleepers shall be placed on top of the concrete.

Sec. 58. **Cellar Ceilings**—The ceiling over every cellar or lowest floor in every residence building more than four stories in height, hereafter erected, when the beams are of wood, shall be lathed with iron or wire lath and plastered thereon with two coats of brown mortar of good materials, or such other fireproof covering as may be approved by the Commissioner of Buildings having jurisdiction.

Part 9—Wood Beams, Girders and Columns.

Sec. 59. **Wood Beams**—All wood beams and other timbers in the party wall of every building built of stone, brick or iron shall be separated from the beam or timber entering in the opposite side of the wall by at least 4 inches of solid mason work. No wood floor beams or wood roof beams used in any building hereafter erected shall be of a less thickness than 3 inches. All wood trimmer and header beams shall be proportioned to carry with safety the loads they are intended to sustain. Every wood header or trimmer more than 4 feet long, used in any building, shall be hung in stirrup irons of suitable thickness for the size of the timbers. Every wood beam, except header and tail beams, shall rest at one end 4 inches in the wall, or upon a girder, as authorized by this Code. The ends of all wood floor and roof beams, where they rest on brick walls, shall be cut to a bevel of 3 inches on their depth. In no case shall either end of a floor or roof beam be supported on stud partitions, except in frame buildings. All wood floor and wood roof beams shall be properly bridged with cross bridging, and the distance between bridging or between bridging and walls shall not exceed 8 feet. All wood beams shall be trimmed away from all flues and chimneys, whether the same be a smoke, air or any other flue or chimney. The trim-

mer beam shall not be less than 8 inches from the inside face of a flue, and 4 inches from the outside of a chimney breast, and the header beam not less than 2 inches from the outside face of the brick or stone work of the same; except that for the smoke flues of boilers and furnaces where the brickwork is required to be 8 inches in thickness, the trimmer beam shall be not less than 12 inches from the inside of the flue. The header beam, carrying the tail beams of a floor, and supporting the trimmer arch in front of a fireplace, shall be not less than 20 inches from the chimney breast. The safe carrying capacity of wood beams for uniformly distributed loads shall be determined by multiplying the area in square inches by its depth in inches and dividing this product by the span of the beam in feet. This result is to be multiplied by seventy for hemlock, ninety for spruce and white pine, one hundred and twenty for oak and by one hundred and forty for yellow pine. The safe carrying capacity of short span timber beams shall be determined by their resistance to shear in accordance with the unit stresses fixed by section 139 of this Code.

Sec. 60. Anchors and Straps for Wood Beams and Girders—Each tier of beams shall be anchored to the side, front, rear or party walls at intervals of not more than 6 feet apart, with good, strong, wrought iron anchors of not less than $1\frac{1}{2}$ inches by $\frac{3}{4}$ of an inch in size, well fastened to the side of the beams by two or more nails made of wrought iron at least $\frac{1}{4}$ of an inch in diameter. Where the beams are supported by girders, the girders shall be anchored to the walls and fastened to each other by suitable iron straps. The ends of wood beams resting upon girders shall be butted together end to end and strapped by wrought-iron straps of the same size and distance apart, and in the same beam as the wall anchors, and shall be fastened in the same manner as said wall anchors.

Or they may lap each other at least 12 inches and be well spiked or bolted together where lapped.

Each tier of beams front and rear, opposite each pier, shall have hardwood anchor strips dovetailed into the beams diagonally, which strips shall cover at least 4 beams and be 1 inch thick and 4 inches wide, but no such anchor strips shall be let in within 4 feet of the centre line of the beams; or wood strips may be nailed on the top of the beams and kept in place until the floors are being laid. Every pier and wall, front or rear, shall be well anchored to the beams of each story, with the same size anchors as are required for side walls, which anchors shall hook over the fourth beam.

Sec. 61. Wood Columns and Plates—All timber columns shall be squared at the ends perpendicular to their axes.

To prevent the unit stresses from exceeding those fixed in this Code, timber or iron cap and base plates shall be provided.

Additional iron cheek plates shall be placed between the cap and base plates and bolted to the girders when required to transmit the loads with safety.

Sec. 62. Timber for Trusses—When compression members of trusses are of timber they shall be strained in the direction of the fibre only. When timber is strained in tension it shall be strained in the direction of the fibre only. The working stress in timber struts of pin-connected trusses shall not exceed seventy-five per cent. of the working stresses established in section 139, this Code.

Sec. 63. Bolts and Washers for Timber Work—All bolts used in connection with timber and wood beam work shall be provided with washers of such proportions as will reduce the compression on the wood at the face of the washer to that allowed in section 139, this Code, supposing the bolt to be strained to its limit.

Part 10—Chimneys, Flues, Fireplaces and Heating Pipes.

Sec. 64. Trimmer Arches—All fireplaces and chimney breasts where mantels are placed, whether intended for ordinary fireplace uses or not, shall have trimmer arches to support hearths, and the said arches shall be at least 20 inches in width, measured from the face of the chimney breast, and they shall be constructed of brick, stone or burnt clay. The length of a trimmer arch shall be not less than the width of the chimney breast. Wood centres under trimmer arches shall be removed before plastering the ceiling underneath. If a heater is placed in a fireplace, then the hearth shall be the full width of the heater. All fireplaces in which heaters are placed shall have incombustible mantels. No wood mantel or other woodwork shall be exposed back of a summer piece; the ironwork of the summer piece shall be placed against the back or stone work of the fireplace. No fireplace shall be closed with a wood fireboard.

Sec. 65. Chimneys, Flues and Fireplaces—All fireplaces and chimneys in stone or brick walls in any building hereafter erected, except as herein otherwise provided, and any chimney or flue hereafter altered or repaired, without reference to the purpose for which they may be used, shall have the joints struck smooth on the inside, except when lined on the inside with pipe. No paring mortar shall be used on the inside of any fireplace, chimney or flue. The firebacks of all fireplaces hereafter erected shall be not less than 8 inches in thickness, of solid masonry. When a grate is set in a fireplace a lining of firebrick, at least 2 inches in thickness, shall be added to the fireback, unless soapstone, tile or castiron is used, and filled solidly behind with fireproof material. The stone or brickwork of the smoke flues of all boilers, furnaces, bakers' ovens, large cooking ranges, large laundry stoves, and all flues used for a similar purpose shall be at least 8 inches in thickness, and shall be capped with terra-cotta, stone or castiron.

The inside 4 inches of all boiler flues shall be firebrick, laid in fire mortar, for a distance of 25 feet in any direction from the source of heat. All smoke flues of smelting furnaces or of steam boilers, or other apparatus which heat the flues to a high temperature, shall be built with double walls of suitable thickness for the temperature, with an air space between the walls, the inside 4 inches of the flues to be of firebrick. All smoke flues shall extend at least 3 feet above a flat roof, and at least 2 feet above a peak roof.

On dwelling houses and stables, three stories or less in height, not less than six of the top courses of a chimney may be laid in pure cement mortar and the brickwork carefully bonded and anchored together in lieu of coping.

In all buildings hereafter erected every smoke flue, except the flues hereinbefore mentioned, shall be lined on the inside with cast iron or well-burnt clay, or terra-cotta pipe, made smooth on the inside, from the bottom of the flue, or from the throat of the fireplace, if the flue starts from the latter, and carried up continuously to the extreme height of the flue. The ends of all such lining pipes shall be made to fit close together, and the pipe shall be built in as the flue or flues are carried up. Each smoke pipe shall be inclosed on all sides with not less than 4 inches of brickwork properly bonded together.

All flues in every building shall be properly cleaned and all rubbish removed, and the flues left smooth on the inside upon the completion of the building.

Sec. 66. Chimney Supports—No chimney shall be started or built upon any floor or beam of wood.

In no case shall a chimney be corbeled out more than 8 inches from the wall, and in all such cases the corbeling shall consist of at least five courses of brick, but no corbeling more than 4 inches shall be allowed in 8-inch brick walls. Where chimneys are supported by piers, the piers shall start from the foundation on the same line with the chimney breast, and shall be not less than 12 inches on the face, properly bonded into the walls. When a chimney is to be cut off below, in whole or in part, it shall be wholly supported by stone, brick, iron or steel. All chimneys which shall be dangerous in any manner whatever, shall be repaired and made safe, or taken down.

Sec. 67. Chimneys of Cupolas—Iron cupola chimneys of foundries shall extend at least 10 feet above the highest point of any roof within a radius of 50 feet of such cupola, and be covered on top with a heavy wire netting. No woodwork shall be placed within 2 feet of the cupola.

Sec. 68. Hot Air Flues, Pipes and Vent Ducts—All stone or brick hot air flues and shafts shall be lined with tin, galvanized iron or burnt-clay pipes. No wood casing, furring or lath shall be placed against or cover any smoke flue or metal pipe used to convey hot air or steam. No smoke pipe shall pass through any wood floor. No stovepipe shall be placed nearer than 9 inches to any lath and plaster or board partition, ceiling or any woodwork. Smoke pipes of laundry stoves, large cooking ranges and of furnaces shall be not less than 15 inches from any wood work, unless they are properly guarded by metal shields; if so guarded, stovepipes shall be not less than 6 inches distant, smoke pipes of laundry stoves, large cooking ranges and of furnaces shall be not less than 9 inches distant from any wood work. Where smoke pipes pass through a lath and plaster partition they shall be guarded by galvanized iron ventilated thimbles at least 12 inches larger in diameter than the pipes, or by galvanized iron thimbles built in at least 8 inches of brickwork. No smoke pipe shall pass through the roof of any building unless a special permit be first obtained from the Building Department for the same. If a permit is so granted, then the roof through which the

smoke pipe passes shall be protected in the following manner: A galvanized iron ventilated thimble of the following dimensions shall be placed; in case of a stovepipe, the diameter of the outside guard shall be not less than 12 inches and the diameter of the inner one, 8 inches, and for all furnaces, or where similar large hot fires are used, the diameter of the outside guard shall be not less than 18 inches and the diameter of the inner one, 12 inches. The smoke pipe thimbles shall extend from the under side of the ceiling or roof beams to at least 9 inches above the roof, and they shall have openings for ventilation at the lower end where the smoke pipes enter, also at the top of the guards above the roof. Where a smoke pipe of a boiler passes through a roof, the same shall be guarded by a ventilated thimble, same as before specified, 36 inches larger than the diameter of the smoke pipe of the boiler. Tin or other metal pipes in brick or stone walls, used or intended to be used to convey heated air, shall be covered with brick or stone at least 4 inches in thickness. Woodwork near hot-air pipes shall be guarded in the following manner. A hot-air pipe shall be placed inside another pipe, 1 inch larger in diameter, or a metal shield shall be placed not less than one-half inch from the hot-air pipe; the outside pipe or the metal shield shall remain $1\frac{1}{2}$ inches away from the woodwork and the latter must be tin lined, or in lieu of the above protection, 4 inches of brickwork may be placed between the hot-air pipe and the woodwork. This shall not prevent the placing of metal lath and plaster directly on the face of hot-air pipes or the placing of woodwork on such metal lath or plaster, provided the distance is not less than seven-eighths of an inch. No vertical hot-air pipe shall be placed in a stud partition, or in a wood inclosure, unless it be at least 8 feet distant in a horizontal direction from the furnace. Hot-air pipes in closets shall be double, with a space of 1 inch between them. Horizontal hot-air pipes shall be placed 6 inches below the floor beams or ceiling; if the floor beams or ceiling are plastered and protected by a metal shield, then the distance shall be not less than 3 inches.

Vent flues or ducts for the removal of foul or vitiated air in which the temperature of the air cannot exceed that of the rooms, may be constructed of iron, or other incombustible material, and shall not be placed nearer than 1 inch to any woodwork, and no such pipe shall be used for any other purpose.

In the support or construction of such ducts, if placed in a public school room, no wood furring or other inflammable material shall be nearer than 2 inches to said flues or ducts, and shall be covered on all sides other than those resting against brick, terra cotta, or other incombustible material, with metal lath plastered with at least two heavy coats of mortar, and having at least one-half inch air space between the flues or ducts and the lath and plaster.

Sec. 69. Steam and Hot Water Heating Pipes—Steam or hot water heating pipes shall not be placed within 2 inches of any timber or woodwork, unless the timber or woodwork is protected by a metal shield; then the distance shall be not less than 1 inch. All steam or hot water heating pipes passing through floors and ceilings or lath and plastered partitions shall be protected by a metal tube 1 inch larger in diameter than the pipe having a metal cap at the floor, and where they are run in a horizontal direction between a floor and ceiling, a metal shield shall be placed on the under side of the floor over them, and on the sides of wood beams running parallel with said pipe.

All wood boxes or casings inclosing steam or hot water heating pipes and all wood covers to recesses in walls in which steam or hot water heating pipes are placed, shall be lined with metal.

All pipes or ducts used to convey air warmed by steam or hot water shall be of metal or other fireproof material. All steam and hot water pipe coverings shall consist of fireproof materials only.

Part 11—General Construction.

Sec. 70. Ducts for Pipes—All ducts for pipes, wires, and other similar purposes shall be inclosed on all sides with fireproof material, and the opening through each floor shall be properly fire-stopped.

Sec. 71. Studded-off Spaces—Where walls are studded-off, the space between the inside face of the wall and the studding shall be fire-stopped with fireproof material placed on the under side of the wood beams above, for a depth of not less than 4 inches, and be securely supported; or the beams directly over the studded-off space shall be deafened with not less than 4 inches of fireproof material, which may be laid on boards cut in between the beams.

Sec. 72. Wainscoting—When wainscoting is used in any building hereafter erected, the surface of the wall or partition behind such wainscoting shall be plastered flush with the grounds and down to the floor line.

Sec. 73. Bay, Oriel and Show Windows—Bay windows, oriel windows and show windows on the street front or side of any building may project not more than 1 foot beyond the building line and shall be constructed of such materials and in such manner as will meet with the approval of the Department of Buildings.

Any such window that does not extend more than 3 feet above the second-story floor of any dwelling-house may be built of wood covered with metal.

Part 12—Stairs and Entrance.

Sec. 74. Entrance to Basement—Every dwelling-house arranged for or occupied by two or more families above the first story, hereafter erected, shall be provided with an entrance to the basement thereof from the outside of such building.

Sec. 75. Stairs, Number Regulated by Area of Building—In any building hereafter erected to be used as a store, factory, hotel or lodging-house, covering a lot area exceeding 2,500 feet and not exceeding 5,000 feet, there shall be provided at least two continuous lines of stairs remote from each other; and every such building shall have at least one continuous line of stairs for each 5,000 feet of lot area covered, or part thereof, in excess of that required for 5,000 feet of area. When any such building covers an area of lot greater than 15,000 feet the number of stairs shall be increased proportionately, or as will meet with the approval of the Commissioner of Buildings having jurisdiction.

Sec. 76. Engineers' Stationary Ladders—Every building in which boilers or machinery are placed in the cellar or lowest story shall have stationary iron ladders or stairs from such story leading direct to a manhole above on the sidewalk, or other outside exit.

Sec. 77. Slate and Stone Treads of Stairs to Be Supported—In all buildings hereafter erected more than seven stories in height where the treads and landings of iron stairs are of slate, marble or other stone, they shall each be supported directly underneath, for their entire length and width, by an iron plate made solid or having openings not exceeding 4 inches square in same, of adequate strength and securely fastened to the strings. In case such supporting plates be made solid, the treads may be of oak, not less than $1\frac{3}{4}$ inches thick.

Part 13—Skylights and Floor Lights.

Sec. 78. Metal Skylights—All skylights having a superficial area of more than 9 square feet, placed in any building, shall have the sashes and frames thereof constructed of iron and glass. Every fireproof roof hereafter placed on any building shall have, besides the usual scuttle or bulkhead, a skylight or skylights of a superficial area equal to not less than one fiftieth the superficial area of such fireproof roof. Skylights hereafter placed in public buildings, over any passageway or room of public resort, shall have immediately underneath the glass thereof a wire netting, unless the glass contains a wire netting within itself.

Sec. 79. Floor Lights—Floor lights, used for transmission of light to floors below, shall be constructed of metal frames and bars or plates, and if any glass in same measures more than 16 square inches, the glass shall be provided with a mesh of wire either in the glass or under the same, and the floor lights shall be of the same proportional strength as the floors in which they are placed.

Part 14—Inclosure and Shed Coverings for the Protection of Pedestrians.

Sec. 80. Inclosure and Shed Coverings for the Protection of Pedestrians—Whenever buildings shall be erected or increased to over 65 feet in height, upon or along any street, the owner, builder or contractor constructing or repairing such buildings shall have erected and maintained during such construction or repair a shed over the sidewalk in front of said premises, extending from building line to curb, the same to be properly, strongly and tightly constructed, so as to protect pedestrians and others using such streets. Whenever outside scaffolds are required to carry on the construction of buildings over 85 feet in height, whether the same be constructed by poles or thrust-out scaffold, there shall be erected on its outer edge and ends an inclosure of wire netting of not over 2-inch mesh, or of boards not less than $\frac{3}{4}$ inch thick, placed not over $1\frac{1}{2}$ inches apart, well secured to uprights not less than 2 inches by 4 inches, fastened to planks or timbers, and resting on put logs or thrust outs.

The said inclosure shall be carried up at least 5 feet in advance above the level on which the workmen employed on said front are working. The said thrust outs shall be not less than 3 by 10, of spruce or yellow pine, and to be doubled or tripled, as may be required for the load to be carried, and to be thoroughly braced and secured; or said timbers can be in one stick, if proportioned to the load. The flooring on thrust outs and put logs shall be tightly constructed with plank. This said floor and inclosure shall not be removed until a like floor and inclosure is already prepared and in position on the story above. In all buildings over 85 feet in height, during construction or alteration, the windows on each floor above the second shall be properly inclosed as soon as the story is built. If the walls of such buildings are carried up two stories or more above the roofs of adjoining buildings, proper means shall be provided and used for the protection of skylights and roofs of such adjoining buildings. The protection over skylights shall be of stout wire netting not over 1/4-inch mesh, on stout timbers, and properly secured. All such sheds and inclosures are to be subject to the inspection of the Department of Buildings. Should said adjoining owner, tenant or lessee refuse to grant permission to have said roofs and skylights so protected, such refusal by said owner, tenant or lessee shall relieve the owner of the building in course of construction from any responsibility for damage done to persons or property on or within the premises affected. Should such inclosure or protection not be so erected, the Commissioner of Buildings having jurisdiction shall cause a notice to be served personally upon the owner, or his authorized agent, constructing or repairing such buildings, or the owner, tenant or lessee of adjoining premises, requiring such inclosure or protection, as provided in this section, specifying the manner in which same shall be erected; and if such inclosures or protections are not erected, strengthened or modified as provided in such notice within three days after the service thereof, the said Commissioner of Buildings having jurisdiction shall have full power and authority to cause such inclosure to be erected on the fronts and roofs and the skylights protected, and all expenses connected with same may become a lien on the property in interest so inclosed and protected, and which lien may be created and enforced in the same manner as now provided for in section 156 of this Code.

Part 15—Miscellaneous Buildings.

Sec. 81. Grain Elevators—Nothing in this Code shall be so construed as to apply to or prevent the erection of what are known as grain elevators, as usually constructed, provided they are erected on tidewater, or adjacent to the river front in said City, in isolated localities, under such conditions as the Department of Buildings may prescribe, including location.

Sec. 82. Exhibition Buildings—Buildings for fair and exhibition purposes, towers for observation purposes and structures for similar uses, whether temporary or permanent in character, shall be constructed in such manner and under such conditions as the Board of Buildings may prescribe.

Sec. 83. Smokehouses—All smokehouses shall be of fireproof construction, with brick walls, iron doors and brick or metal roofs. An iron guard shall be placed over and 3 feet above the fire, and the hanging rails shall be of iron. The walls of all smokehouses shall be built up at least 3 feet higher than the roof of the building in which they are located.

Part 16—Heating Apparatus, Drying Rooms, Gas and Water Pipes.

Sec. 84. Heating Furnaces and Boilers—A brick-set boiler shall not be placed on any wood or combustible floor or beams. Wood or combustible floors and beams under and not less than 3 feet in front and 1 foot on the sides of all portable boilers shall be protected by a suitable brick foundation of not less than two courses of brick well laid in mortar on sheet iron; the said sheet iron shall extend at least 24 inches outside of the foundation at the sides and front. Bearing lines of bricks, laid on the flat, with air spaces between them, shall be placed on the foundation to support a cast-iron ash pan of suitable thickness, on which the base of the boiler shall be placed, and shall have a flange, turned up in the front and on the sides, 4 inches high; said pan shall be in width not less than the base of the boiler and shall extend at least 2 feet in front of it. If a boiler is supported on a cast-iron base with a bottom of the required thickness for an ash pan, and is placed on bearing lines of brick in the same manner as specified for an ash pan, then an ash pan shall be placed in front of the said base and shall not be required to extend under it. All lath and plaster and wood ceilings and beams over and to a distance of not less than 4 feet in front of all boilers shall be shielded with metal. The distance from the top of the boiler to said shield shall be not less than 12 inches. No combustible partition shall be within 4 feet of the sides and back and 6 feet from the front of any boiler, unless said partition shall be covered with metal to the height of at least 3 feet above the floor, and shall extend from the end or back of the boiler to at least 5 feet in front of it; then the distance shall be not less than 2 feet from the sides and 5 feet from the front of the boiler. All brick hot-air furnaces shall have two covers, with an air space of at least 4 inches between them; the inner cover of the hot-air chamber shall be either a brick arch or two courses of brick laid on galvanized iron or tin, supported on iron bars; the outside cover, which is the top of the furnace, shall be made of brick or metal supported on iron bars, and so constructed as to be perfectly tight, and shall be not less than 4 inches below any combustible ceiling or floor beams. The walls of the furnace shall be built hollow in the following manner: One inner and one outer wall, each 4 inches in thickness, properly bonded together with an air space of not less than 3 inches between them. Furnaces must be built at least 4 inches from all woodwork. The cold-air boxes of all hot-air furnaces shall be made of metal, brick or other incombustible material, for a distance of at least 10 feet from the furnace. All portable hot-air furnaces shall be placed at least 2 feet from any wood or combustible partition or ceiling, unless the partitions and ceilings are properly protected by a metal shield, when the distance shall be not less than 1 foot. Wood floors under all portable furnaces shall be protected by two courses of brickwork well laid in mortar on sheet iron. Said brickwork shall extend at least 2 feet beyond the furnace in front of the ash pan.

Sec. 85. Registers—Registers located over a brick furnace shall be supported by a brick shaft built up from the cover of the hot air chamber; said shaft shall be lined with a metal pipe, and all wood beams shall be trimmed away not less than 4 inches from it. Where a register is placed on any woodwork in connection with a metal pipe or duct, the end of the said pipe or duct shall be flanged over on the woodwork under it. All registers for hot air furnaces placed in any woodwork or combustible floors shall have stone or iron borders firmly set in plaster of paris or gauged mortar. All register boxes shall be made of tin plate or galvanized iron with a flange on the top to fit the groove in the frame, the register to rest upon the same; there shall be an open space of 2 inches on all sides of the register box, extending from the under side of the border to and through the ceiling below. The said opening shall be fitted with a tight tin or galvanized iron casing, the upper end of which shall be turned under the frame. When a register box is placed in the floor over a portable furnace, the open space on all sides of the register box shall be not less than 3 inches. When only one register is connected with a furnace said register shall have no valve.

Sec. 86. Drying Rooms—All walls, ceilings and partitions inclosing drying rooms, when not made of fireproof material, shall be wire lathed and plastered, or covered with metal, tile or other hard incombustible material.

Sec. 87. Ranges and Stoves—Where a kitchen range is placed from 12 to 6 inches from a wood stud partition, the said partition shall be shielded with metal from the floor to the height of not less than 3 feet higher than the range; if the range is within 6 inches of the partition, then the studs shall be cut away and framed 3 feet higher and 1 foot wider than the range, and filled in to the face of the said stud partition with brick or fireproof blocks, and plastered thereon. All ranges on wood or combustible floors and beams that are not supported on legs and have ash pans 3 inches or more above their base, shall be set on suitable brick foundations, consisting of not less than two courses of brick well laid in mortar on sheet iron, except small ranges such as are used in apartment houses that have ash pans 3 inches or more above their base, which shall be placed on at least one course of brickwork on sheet iron or cement. No range shall be placed against a furred wall. All lath and plaster or wood ceilings over all large ranges and ranges in hotels and restaurants, shall be guarded by metal hoods placed at least 9 inches below the ceiling. A ventilating pipe connected with a hood over a range shall be at least 9 inches from all lath and plaster or woodwork, and shielded. If the pipe is less than 9 inches from lath and plaster and woodwork, then the pipe shall be covered with 1 inch of asbestos plaster on wire mesh. No ventilating pipe connected with a hood over a range shall pass through any floor. Laundry stoves on wood or combustible floors shall have a course of bricks, laid on metal, on the floor under and extended 24 inches on all sides of them. All stoves for heating purposes shall be properly supported on iron legs resting on the floor 3 feet from all

lath and plaster or woodwork; if the lath and plaster or woodwork is properly protected by a metal shield, then the distance shall be not less than 18 inches. A metal shield shall be placed under and 12 inches in front of the ash pan of all stoves that are placed on wood floors. All low gas stoves shall be placed on iron stands, or the burners shall be at least 6 inches above the base of the stoves, and metal guard plates placed 4 inches below the burners, and all woodwork under them shall be covered with metal.

Sec. 88. Notice as to Heating Apparatus—In cases where hot water, steam, hot air or other heating appliances or furnaces are hereafter placed in any building, or flues or fireplaces are changed or enlarged, due notice shall first be given to the Department of Buildings by the person or persons placing the said furnace or furnaces in said building, or by the contractor or superintendent of said work.

Sec. 89. Gas and Water Pipes—Every building, other than a dwelling house, hereafter erected, and all factories, hotels, churches, theatres, schoolhouses and other buildings of a public character now erected in which gas or steam is used for lighting or heating, shall have the supply pipes leading from the street mains provided each with a stopcock placed in the sidewalk at or near the curb, and so arranged as to allow of shutting off at that point. No gas, water or other pipes which may be introduced into any buildings shall be let into the beams unless the same be placed within 36 inches of than 2 inches in depth. All said pipes shall be installed in accordance with the rules and regulations prescribed by the Board of Buildings. All gas brackets shall be placed at least 3 feet below any ceiling or woodwork, unless the same is properly protected by a shield; in which case the distance shall be not less than 18 inches. No swinging or folding gas bracket shall be placed against any stud partition or woodwork. No gas bracket on any lath and plaster partition or woodwork shall be less than 5 inches in length, measured from the burner to the plaster surface or woodwork. Gaslights placed near window curtains or any other combustible material shall be protected by a proper shield.

Part 17—Roofs, Leaders, Cornices, Bulkheads, Scuttles and Tanks.

Sec. 90. Mansard Roofs—If a mansard or other roof of like character having a pitch of over 60 degrees be placed on any building, except a wood building, or a dwelling house not exceeding three stories nor more than 40 feet in height, it shall be constructed of iron rafters and lathed with iron or steel on the inside and plastered, or filled in with fireproof material not less than 3 inches thick, and covered with metal, slate or tile.

Sec. 91. Cornices and Gutters—On all buildings hereafter erected within the fire limits, the exterior cornices, inclusive of those on show windows, and gutters shall be of some fireproof material. All fireproof cornices shall be well secured to the walls with iron anchors, independent of any woodwork. In all cases the walls shall be carried up to the planking of the roof. Where the cornice projects above the roof the walls shall be carried up to the top of the cornice. The party walls shall in all cases extend up above the planking of the cornice and be coped. All exterior wooden cornices that may now be or that may hereafter become unsafe or rotten shall be taken down, and if replaced, shall be constructed of some fireproof material. All exterior cornices of wood or gutters that may hereafter be damaged by fire to the extent of one-half shall be taken down, and if replaced shall be constructed of some fireproof material; but if not damaged to the extent of one-half, the same may be repaired with the same kind of material of which they were originally constructed.

Sec. 92. Bulkheads on Roofs and Scuttles—Bulkheads used as inclosures for tanks and elevators, and coverings for the machinery of elevators and all other bulkheads, including the bulkheads of all dwelling houses more than four stories in height hereafter erected or altered, may be constructed of hollow fireproof blocks; or of wood, covered with not less than two inches of fireproof material, or filled in the thickness of the studding with such material, and covered on all outside surfaces with metal, including both surfaces and edges of doors. All such buildings shall have scuttles or bulkheads covered with some fireproof materials, with ladders or stairs leading thereto, and easily accessible to all occupants. No scuttle shall be less in size than two by three feet. No staging or stand shall be constructed or occupied upon the roof of any building without first obtaining the approval of the Commissioner of Buildings having jurisdiction.

Sec. 93. Tanks—Tanks containing more than 500 gallons of water or other fluid hereafter placed in any story, or on the roof or above the roof of any building now or hereafter erected, shall be supported on iron or steel beams of sufficient strength to safely carry the same; and the beams shall rest at both their ends on brick walls or on iron or steel girders or iron or steel columns or piers of masonry. Underneath any said water tank or on the side near the bottom of the same, there shall be a short pipe or outlet, not less than 4 inches in diameter, fitted with a suitable valve having a level or wheel handle to same, so that firemen or others can readily discharge the weight of the fluid contents from the tank, in case of necessity. Such tanks shall be placed where practicable at one corner of a building, and shall not be placed over nor near a line of stairs. Covers on top of water tanks placed on roofs, if of wood, shall be covered with tin.

Sec. 94. Roofing and Leaders within the Fire Limits—The planking and sheathing of the roofs of buildings shall not in any case be extended across the side or party wall thereof. Every building and the tops and sides of every dormer window thereon shall be covered and roofed with brick, tile, slate, tin, copper, iron; or plastic slate, asphalt, slag, or gravel may be used, provided such roofing shall be composed of not less than five layers of roofing felt, cemented together and finished with not less than 10 gallons of coal tar, pitch or asphalt to each 100 square feet of roof, or such other quality of fireproof roofing as the Board of Buildings, under its certificate, may authorize, and the outside of the frames of every dormer window hereafter placed upon any building shall be made of some fireproof material. No wood building within the fire limits more than 2 stories or above 20 feet in height above the curb level to the highest part thereof, which shall require roofing, shall be roofed with any other roofing or covered except as aforesaid. Nothing in this section shall be construed to prohibit the repairing of any shingle roof, provided the building is not altered in height. All buildings shall be kept provided with proper metallic leaders for conducting water from the roofs in such manner as shall protect the walls and foundations of said buildings from injury. In no case shall the water from the said leaders be allowed to flow upon the sidewalk, but the same shall be conducted by pipe or pipes to the sewer. If there be no sewer in the street upon which such buildings front, then the water from said leader shall be conducted by proper pipe or pipes, below the surface of the sidewalk to the street gutter.

Part 18—Elevators, Hoistways and Dumbwaiters.

Sec. 95. Elevators and Hoistways—In any building in which there shall be any hoistway or freight elevator or wellhole not inclosed in walls constructed of brick or other fireproof material and provided with fireproof doors, the openings thereof through and upon each floor of said building, shall be provided with and protected by a substantial guard or gate and with such good and sufficient trap doors as may be directed and approved by the Department of Buildings; and when in the opinion of the Commissioner of Buildings having jurisdiction, automatic trap doors are required to the floor openings of any uninclosed freight elevator, the same shall be constructed so as to form a substantial floor surface when closed, and so arranged as to open and close by the action of the elevator in its passage either ascending or descending. The said Commissioner of Buildings shall have exclusive power and authority to require the openings of hoistways or hoistway shafts, elevators and wellholes in buildings to be inclosed or secured by trap doors, guards or gates and railings. Such guards or gates shall be kept closed at all times, except when in actual use, and the trap doors shall be closed at the close of the business of each day by the occupant or occupants of the building having the use or control of the same.

Sec. 96. Elevator Inclosures—All elevators hereafter placed in any building, except such fireproof buildings as have been or may be hereafter erected, shall be inclosed in suitable walls of brick, or with a suitable framework of iron and burnt clay filling, or of such other fireproof material and form of construction as may be approved by the Department of Buildings, except that the inclosure walls in non-fireproof buildings used as warehouses, stores or factories shall be of brick. If the inclosure walls are of brick, laid in cement mortar, and not used as bearing walls, they may be 8 inches in thickness for not more than 50 feet of their uppermost height, and increasing in thickness 4 inches for each lower 50 feet portion or part thereof. Said walls or construction shall extend through and at least 3 feet above the roof. All openings in the said walls shall be provided with fireproof shutters or fireproof doors, made solid for 3 feet above the floor level, except that the doors used for openings in buildings intended for the occupancy of one family may be of wood covered on the inner surface and edges with metal, not including the openings in the cellar, nor above the roof in any such shaft walls. The roofs over all inclosed elevators shall be made of fireproof materials,

with a skylight at least three-fourths the area of the shaft, made of glass, set in iron frames. When the shaft does not extend to the ground, the lower end shall be inclosed in fireproof material.

Sec. 97. Dumb-waiter Shafts—All dumb-waiter shafts, except such as do not extend more than three stories above the cellar or basement in dwelling houses, shall be inclosed in suitable walls of brick or with burnt clay blocks, set in iron frames of proper strength, or fireproof blocks strengthened with metal dowels, or such other fireproof material and form of construction as may be approved by the Commissioner of Buildings having jurisdiction. Said walls or construction shall extend at least 3 feet above the roof and be covered with a skylight at least three-fourths the area of the shaft, made with metal frames and glazed. All openings in the inclosure walls or construction shall be provided with self-closing fireproof doors. When the shaft does not extend to the floor level of the lowest story, the bottom of the shaft shall be constructed of fireproof material.

Sec. 98. Elevators in Staircase Inclosures—Open grillwork inclosures for passenger elevators, not extending below the level of the first floor, may be erected in staircase inclosures in buildings where the entire space occupied by the stairs and elevators is inclosed in brick or stone walls, and the stairs are constructed as specified in section 53 of this Code.

Sec. 99. Elevators in Existing Hotels—In every non-fireproof building used or occupied as a hotel, in which there is an elevator not inclosed in fireproof shafts, such elevator shall be inclosed in suitable walls, constructed and arranged as in this Code required for elevator shafts.

Sec. 100. Screen Under Elevator Sheaves—Immediately under the sheaves at the top of every elevator shaft in any building there shall be provided and placed a substantial grating or screen of iron or steel, of such construction as shall be approved by the Department of Buildings.

Sec. 101. Inspection of Elevators—The Commissioners of Buildings shall cause an inspection of elevators carrying passengers or employees to be made at least once every three months, and shall make regulations for the inspection of such elevators with a view to safety; and shall also prescribe suitable qualifications for persons who are placed in charge of the running of such elevators. The regulations shall require any repairs found necessary to any such elevators to be made without delay by the owner or lessee. In case defects are found to exist which endanger life or limb by the continued use of such elevator, then, upon notice from the Department of Buildings, the use of such elevator shall cease, and it shall not again be used until a certificate shall be first obtained from said Department that such elevator has been made safe. No person shall employ or permit any person to be in charge of running any passenger elevator who does not possess the qualifications prescribed therefor.

Every freight elevator or lift shall have a notice posted conspicuously thereon as follows: "Persons riding on this elevator do so at their own risk."

Part 19—Fire Appliances, Fire-escapes and Fireproof Shutters and Doors.

Sec. 102. Auxiliary Fire Apparatus for Buildings—In every building now erected, unless already provided with a 3-inch or larger vertical pipe, which exceeds 100 feet in height and in every building hereafter to be erected exceeding 85 feet in height, and when any such building does not exceed 150 feet in height, it shall be provided with a 4-inch stand pipe, running from cellar to roof, with one two-way 3-inch Siamese connection to be placed on street above the curb level, and with one 2½-inch outlet, with hose attached thereto on each floor, placed as near the stairs as practicable, and all buildings now erected, unless already provided with a 3-inch or larger vertical pipe, or hereafter to be erected, exceeding 150 feet in height, shall be provided with an auxiliary fire apparatus and appliances, consisting of water tank on roof or in cellar, stand pipes, hose, nozzles, wrenches, fire extinguishers, hooks, axes and such other appliances as may be required by the Fire Department; all to be of the best material and of the sizes, patterns and regulation kinds used and required by the Fire Department. In every such building a steam pump and at least one passenger elevator shall be kept in readiness for immediate use by the Fire Department during all hours of the night and day, including holidays and Sundays. The said pumps, if located in the lowest story, shall be placed not less than 2 feet above the floor level. The boilers which supply power to the passenger elevators and pumps, if located in the lowest story, shall be so surrounded by a dwarf brick wall laid in cement mortar or other suitable permanent waterproof construction, as to exclude water to the depth of 2 feet above the floor level from flowing into the ash pits of said boilers. When the level of the floor of the lowest story is above the level of the sewer in the street, a large cesspool shall be placed in said floor and connected by a 4-inch cast iron drain pipe with the street sewer. Stand pipes shall be not less than 6 inches in diameter for all buildings exceeding 150 feet in height. All stand pipes shall extend to the street and there be provided at or near the sidewalk level with the Siamese connections. Said stand pipes shall also extend to the roof. Valve outlets shall be provided on each and every story, including the basement and cellar, and on the roof. All valves, hose, tools and other appliances provided for in this section, shall be kept in perfect working order, and once a month the person in charge of said building shall make a thorough inspection of the same to see that all valves, hose and other appliances are in perfect working order and ready for immediate use by the Fire Department. If any of the said buildings extend from street to street, or form an L shape, they shall be provided with stand pipes for each street frontage. In such buildings as are used or occupied for business or manufacturing purposes there shall be provided, in connection with said stand pipe or pipes, 2½-inch perforated iron pipes placed on and along the ceiling line of each floor below the first floor and extending to the full depth of the building. Such perforated pipe shall be provided with a valve placed at or near the stand pipe, so that the water can be let into same when deemed necessary by the Firemen, or in lieu of such perforated pipes automatic sprinklers may be put in. When the building is 25 feet or less in width, two lines of perforated pipes shall be provided, and one line additionally for each 12½ feet, or part thereof, that the building is wider than 25 feet. A suitable iron plate, with raised letters, shall be fastened to the wall near said stand pipe to read: "This stand pipe connects to perforated pipes in the cellar."

Sec. 103. Fire-escapes—Every dwelling-house occupied by or built to be occupied by three or more families, and every building already erected, or that may hereafter be erected, more than three stories in height, occupied and used as a hotel or lodging-house, and every boarding-house having more than 15 sleeping rooms above the basement story, and every factory, mill, manufactory or workshop, hospital, asylum or institution for the care or treatment of individuals, and every building three stories and over in height used or occupied as a store or workroom, and every building in whole or in part occupied or used as a school or place of instruction or assembly, and every office building five stories or more in height, shall be provided with such good and sufficient fire-escape, stairways or other means of egress in case of fire as shall be directed by the Department of Buildings; and said Department shall have full and exclusive power and authority within said city to direct fire-escapes and other means of egress to be provided upon and within said building or any of them. The owner or owners of any building upon which a fire-escape is erected shall keep the same in good repair and properly painted. No person shall at any time place any incumbrance of any kind whatsoever before or upon any fire-escape, balcony or ladder. It shall be the duty of every fireman and policeman who shall discover any fire-escape, balcony or ladder of any fire-escape incumbered in any way to forthwith report the same to the commanding officer of his company or precinct, and such commanding officer shall forthwith cause the occupant of the premises or apartment to which said fire-escape, balcony or ladder is attached, or for whose use the same is provided, to be notified, either verbally or in writing, to remove such incumbrance and keep the same clear. If said notice shall not be complied with by the removal forthwith of such incumbrance, and keeping said fire-escape, balcony or ladder free from incumbrance, then it shall be the duty of said commanding officers to apply to the nearest police magistrate for a warrant for the arrest of the occupant or occupants of the said premises or apartments of which the fire-escape forms a part, and the said parties shall be brought before the said magistrate, as for a misdemeanor; and, on conviction, the occupant or occupants of said premises or apartment shall be fined not more than ten dollars for each offense, or may be imprisoned not to exceed ten days, or both, in the discretion of the court. In constructing all balcony fire-escapes the manufacturer thereof shall securely fasten thereto, in a conspicuous place, a cast-iron plate having suitable raised letters on the same, to read as follows: "Notice: Any person placing any incumbrance on this balcony is liable to a penalty of ten dollars and imprisonment for ten days."

All buildings requiring fire-escapes shall have stationary iron ladders leading to the scuttle opening in the roof thereof, and all scuttles and ladders shall be kept so

as to be ready for use at all times. If a bulkhead is used in place of a scuttle it shall have stairs with sufficient guard or hand-rail leading to the roof. In case the building shall be a tenement-house the door in the bulkhead or any scuttle shall at no time be locked, but may be fastened on the inside by movable bolts or hooks.

Sec. 104. Fireproof Shutters and Doors—Every building which is more than two stories in height above the curb level, except dwelling houses, hotels, schoolhouses and churches, shall have doors, blinds or shutters made of iron, hung to iron hanging frames or to iron eyes built into the wall, on every exterior window and opening above the first story thereof, excepting on the front openings of buildings fronting on streets which are more than 30 feet in width, or where no other buildings are within 30 feet of such openings. The said doors, blinds or shutters may be constructed of pine or other soft wood of two thicknesses of matched boards at right angles with each other, and securely covered with tin on both sides and edges, with folded lapped joints, the nails for fastening the same being driven inside the lap; the hinges and bolts or latches shall be secured or fastened to the door or shutter after the same has been covered with the tin, and such doors or shutters shall be hung upon an iron frame independent of the woodwork of the windows and doors, or two iron hinges securely fastened in the masonry; or such frames, if of wood, shall be covered with tin in the same manner as the doors and shutters. All shutters opening on fire-escapes, and at least one row, vertically, in every three rows on the front window openings above the first story of any building, shall be so arranged that they can be readily opened from the outside by firemen. All rolling iron or steel shutters hereafter placed in the first story of any building shall be counterbalanced so that said rolling shutters may be readily opened by the firemen. No building hereafter erected other than a dwelling house or fireproof building shall have inside iron or steel shutters to windows above the first story. All windows and openings above the first story of any building may be provided with other suitable protection, or may be exempted from having shutters by the Board of Buildings or the Board of Examiners, as the case may be. All buildings specified in this section hereafter erected or altered having openings in interior walls shall be provided with suitable fireproof doors where deemed necessary by the Commissioner of Buildings having jurisdiction. All occupants of buildings shall close all exterior and interior fireproof shutters, doors and blinds at the close of the business of each day.

Part 20—Fireproof Buildings.

Sec. 105. Fireproof Buildings—Every building hereafter erected or altered, to be used as a hotel, lodging house, school, theatre, jail, police station, hospital, asylum, institution for the care or treatment of persons, the height of which exceeds 35 feet, excepting all buildings for which specifications and plans have been heretofore submitted to and approved by the Department of Buildings, and every other building the height of which exceeds 75 feet, except as herein otherwise provided, shall be built fireproof; that is to say, they shall be constructed with walls of brick, stone, Portland cement concrete, iron or steel, in which wood beams or lintels shall not be placed, and in which the floors and roofs shall be of materials provided for in Section 106 of this Code. The stairs and staircase landings shall be built entirely of brick, stone, Portland cement concrete, iron or steel. No woodwork or other inflammable material shall be used in any of the partitions, furnishings or ceilings in any such fireproof buildings, excepting, however, that when the height of the building does not exceed twelve stories nor more than 150 feet, the doors and windows and their frames, the trims, the casings, the interior finish when filled solid at the back with fireproof material, and the floor boards and sleepers directly thereunder, may be of wood, but the space between the sleepers shall be solidly filled with fireproof materials and extend up to the under side of the floor boards.

When the height of a fireproof building exceeds twelve stories, or more than 150 feet, the floor surfaces shall be of stone, cement, rock asphalt, tiling or similar incombustible material, or the sleepers and floors may be of wood treated by some process, approved by the Board of Buildings, to render the same fireproof. All outside window frames and sash shall be of metal, or wood covered with metal. The inside window frames and sash, doors, trim and other interior finish may be of wood covered with metal, or wood treated by some process approved by the Board of Buildings to render the same fireproof.

All hall partitions or permanent partitions between rooms in fireproof buildings shall be built of fireproof material and shall not be started on wood sills, nor on wood floor boards, but be built upon the fireproof construction of the floor and extend to the fireproof beam filling above. The tops of all door and window openings in such partitions shall be at least twelve inches below the ceiling line.

Sec. 106. Fireproof Floors—Fireproof floors shall be constructed with wrought iron or steel floor beams so arranged as to spacing and length of beams that the load to be supported by them, together with the weights of the materials used in the construction of the said floors, shall not cause a greater deflection of the said beams than one-thirtieth of an inch per foot of span under the total load; and they shall be tied together at intervals of not more than eight times the depth of the beam. Between the wrought iron or steel floor beams shall be placed brick arches springing from the lower flange of the steel beams. Said brick arches shall be designed with a rise to safely carry the imposed load, but never less than 1¼ inches for each foot of span between the beams, and they shall have a thickness of not less than 4 inches for spans of 5 feet or less and 8 inches for spans over 5 feet, or such thickness as may be required by the Board of Buildings. Said brick arches shall be composed of good, hard brick or hollow brick of ordinary dimensions laid to a line on the centres, properly and solidly bonded, each longitudinal line of brick breaking joints with the adjoining lines in the same ring and with the ring under it when more than a 4-inch arch is used. The brick shall be well wet and the joints filled in solid with cement mortar. The arches shall be well grouted and properly keyed. Or the space between the beams may be filled in with hollow tile arches of hard-burnt clay or porous terra-cotta of uniform density and hardness of burn. The skew backs shall be of such form and section as to properly receive the thrust of said arch; and the said arches shall be of a depth and sectional area to carry the load to be imposed thereon, without straining the material beyond its safe working load, but said depth shall not be less than one and three-quarter inches for each foot of span, not including any portion of the depth of the tile projecting below the under side of the beams, a variable distance being allowed of not over six inches in the span between the beams, if the soffits of the tile are straight; but if said arches are segmental, having a rise of not less than one and one-quarter inches for each foot of span, the depth of the tile shall not be less than six inches. The joints shall be solidly filled with cement mortar as required for common brick arches and the arch so constructed that the key block shall always fall in the central portion. The shells and webs of all end construction blocks shall abut, one against another. Or the space between the beams may be filled with arches of Portland cement concrete, segmental in form, and which shall have a rise of not less than one and one-quarter inches for each foot of span between the beams. The concrete shall not be less than four inches in thickness at the crown of the arch and shall be mixed in the proportions required by section 18 of this Code. These arches shall in all cases be reinforced and protected on the under side with corrugated or sheet steel, steel ribs, or metal in other forms weighing not less than one pound per square foot and having no openings larger than three inches square. Or between the said beams may be placed solid or hollow burnt-clay, stone, brick, or concrete slabs in flat or curved shapes, concrete or may be used in composition, and any of said materials may be used in combination with wire cloth, expanded metal, wire strands, or wrought iron or steel bars; but in any such construction and as a precedent condition to the same being used, tests shall be made as herein provided by the manufacturer thereof under the direction and to the satisfaction of the Board of Buildings, and evidence of the same shall be kept on file in the Department of Buildings, showing the nature of the test and the result of the test. Such tests shall be made by constructing within inclosure walls a platform consisting of four rolled steel beams, 10 inches deep, weighing each 25 pounds per linear foot, and placed four feet between the centres, and connected by transverse tie-rods, and with a clear span of 14 feet for the two interior beams and with the two outer beams supported on the side walls throughout their length, and with both a filling between the said beams, and a fireproof protection of the exposed parts of the beams of the system to be tested, constructed as in actual practice, with the quality of material ordinarily used in that system and the ceiling plastered below, as in a finished job; such filling between the two interior beams being loaded with a distributed load of 150 pounds per square foot of its area and all carried by such filling; and subjecting the platform so constructed to the continuous heat of a wood fire below, averaging not less than 1,700 degrees Fahrenheit for not less than four hours, during which time the platform shall have remained in such condition that no flame will have passed through the platform or

any part of the same, and that no part of the load shall have fallen through, and that the beams shall have been protected from the heat to the extent that after applying to the under side of the platform at the end of the heat test a stream of water directed against the bottom of the platform and discharged through a one and one-eighth-inch nozzle under 60 pounds pressure for five minutes, and after flooding the top of the platform with water under low pressure, and then again applying the stream of water through the nozzle under the 60 pounds pressure to the bottom of the platform for five minutes, and after a total load of 600 pounds per square foot uniformly distributed over the middle bay shall have been applied and removed, after the platform shall have cooled, the maximum deflection of the interior beams shall not exceed two and one-half inches. The Board of Buildings may from time to time prescribe additional or different tests than the foregoing for systems of filling between iron or steel floor beams, and the protection of the exposed parts of the beams. Any system failing to meet the requirements of the test of heat, water and weight, as herein prescribed, shall be prohibited from use in any building hereafter erected. Duly authenticated records of the tests heretofore made of any system of fireproof floor filling and protection of the exposed parts of the beams may be presented to the Board of Buildings, and if the same be satisfactory to said Board, it shall be accepted as conclusive. No filling of any kind which may be injured by frost shall be placed between said floor beams during freezing weather, and if the same is so placed during any winter months, it shall be temporarily covered with suitable material for protection from being frozen. On top of any arch, lintel or other device which does not extend to and form a horizontal line with the top of the said floor beams, cinder concrete or other suitable fireproof material shall be placed to solidly fill up the space to a level with the top of the said floor beams, and shall be carried to the under side of the wood floor boards in case such be used. Temporary centering when used in placing fireproof systems between floor beams, shall not be removed within twenty-four hours or until such time as the mortar or material has set. All fireproof floor systems shall be of sufficient strength to safely carry the load to be imposed thereon without straining the material in any case beyond its safe working load. The bottom flanges of all wrought iron or rolled steel floor and flat roof beams, and all exposed portions of such beams below the abutments of the floor arches shall be entirely incased with hard-burnt clay, porous terra-cotta, or other fireproof material allowed to be used for the filling between the beams under the provisions of this section, such incasing material to be properly secured to the beams.

The exposed sides and bottom plates or flanges of wrought iron or rolled steel girders supporting iron or steel floor beams, or supporting floor arches or floors, shall be entirely incased in the same manner. Openings through fireproof floors for pipes, conduits and similar purposes shall be shown on the plans. After the floors are constructed no opening greater than eight inches square shall be cut through said floors unless properly boxed or framed around with iron. And such openings shall be filled in with fireproof material after the pipes or conduits are in place.

Sec. 107. Incasing Interior Columns—All cast iron, wrought iron or rolled steel columns, including the lugs and brackets on same, used in the interior of any fireproof building, or used to support any fireproof floor, shall be protected with not less than 2 inches of fireproof material, securely applied. The extreme outer edge of lugs, brackets and similar supporting metal may project to within seven-eighths of an inch of the surface of the fireproofing.

Part 21—Public Buildings, Theatres and Places of Assemblage.

Sec. 108. Public Buildings—In all buildings of a public character, such as hotels, churches, theatres, restaurants, railroad depots, public halls, and other buildings used or intended to be used for purposes of public assembly, amusement or instruction, and including department stores and other business and manufacturing buildings where large numbers of people are congregated, the halls, doors, stairways, seats, passageways and aisles, and all lighting and heating appliances and apparatus shall be arranged as the Department of Buildings shall direct to facilitate egress in cases of fire or accident, and to afford the requisite and proper accommodation for the public protection in such cases. All aisles and passageways in said buildings shall be kept free from camp stools, chairs, sofas and other obstructions, and no person shall be allowed to stand in or occupy any of said aisles or passageways, during any performance, service, exhibition, lecture, concert, ball or any public assemblage. The Commissioner of Buildings having jurisdiction may at any time serve a written or printed notice upon the owner, lessee or manager of any of said buildings, directing any act or thing to be done or provided in or about the said buildings and the several appliances therewith connected, such as halls, doors, stairs, windows, seats, aisles, fire walls, fire apparatus and fire escapes, as he may deem necessary. Nothing herein contained shall be construed to authorize or require any other alterations to theatres existing prior to June 9, 1885, than are specified in this section.

Sec. 109. Theatres and Places of Public Amusement—Every theatre or opera house, or other building intended to be used for theatrical or operatic purposes, or for public entertainments of any kind hereafter erected, for the accommodation of more than three hundred persons, shall be built to comply with the requirements of this section. No building which, at the time of the passage of this Code, is not in actual use for theatrical or operatic purposes, and no building hereafter erected not in conformity with the requirements of this section, shall be used for theatrical or operatic purposes, or for public entertainments of any kind until the same shall have been made to conform to the requirements of this section. And no building hereinbefore described shall be opened to the public for theatrical or operatic purposes, or for public entertainments of any kind, until the Department of Buildings shall have approved the same in writing as conforming to the requirements of this section. Every such building shall have at least one front on the street, and in such front there shall be suitable means of entrance and exit for the audience. In addition to the aforesaid entrances and exits on the street, there shall be reserved for service in case of an emergency, an open court or space on the side not bordering on the street, where said building is located on a corner lot; and on both sides of said building where there is but one frontage on the street. The width of such open court or courts shall be not less than 7 feet where the seating capacity is not over one thousand people, above one thousand and not more than eighteen hundred people, eight feet in width, and above eighteen hundred people, 10 feet in width. Said open court or courts shall begin on a line with or near the proscenium wall and shall extend the length of the auditorium proper, to or near the wall separating the same from the entrance lobby or vestibule. A separate and distinct corridor shall continue to the street, from each open court through such superstructure as may be built on the street side of the auditorium, with continuous walls of brick or fireproof materials on each side the entire length of said corridor or corridors, and the ceiling and floors shall be fireproof. Said corridor or corridors shall not be reduced in width to more than 3 feet less than the width of the open court or courts, and there shall be no projection in the same; the outer openings to be provided with doors or gates opening toward the street. During the performance the doors or gates in the corridors shall be kept open by proper fastenings; at other times they may be closed and fastened by movable bolts or locks. The said open courts and corridors shall not be used for storage purposes, or for any purpose whatsoever except for exit and entrance from and to the auditorium and stage, and must be kept free and clear during performances. The level of said corridors at the front entrance to the building shall be not greater than one step above the level of the sidewalk where they begin at the street entrance. The entrance of the main front of the building shall be not on a higher level from the sidewalk than four steps, unless approved by the Department of Buildings. To overcome any difference of level in and between courts, corridors, lobbies, passages and aisles on the ground floor, gradients shall be employed of not over 1 foot in 12 feet with no perpendicular rises. From the auditorium opening into the said open courts or on the side street, there shall be not less than two exits on each side in each tier from and including the parquet and each and every gallery. Each exit shall be at least 5 feet in width in the clear and provided with doors of iron or wood; if of wood, the doors shall be constructed as hereinbefore in this Code described. All of said doors shall open outwardly, and shall be fastened with movable bolts, the bolts to be kept drawn during performances. There shall be balconies not less than 4 feet in width in the said open court or courts at each level or tier above the parquet, on each side of the auditorium, of sufficient length to embrace the two exits, and from said balconies there shall be staircases extending to the ground level, with a rise of not over 8½ inches to a step, and not less than 9 inches tread, exclusive of the nosing. The staircase from the upper balcony to the next below shall be not less than 36 inches in width in the clear, and from the first balcony to the ground 3 feet in width in the clear, where the seating capacity of the auditorium is for one thousand people or less, 3 feet 6 inches in the clear where above one thousand and

not more than eighteen hundred people, and 4 feet in clear where above eighteen hundred people and not more than twenty-five hundred people, and not over 4 feet 6 inches in the clear where above twenty-five hundred people. All the before-mentioned balconies and staircases shall be constructed of iron throughout, including the floors, and of ample strength to sustain the load to be carried by them, and they shall be covered with a metal hood or awning, to be constructed in such manner as shall be approved by the Department of Buildings. Where one side of the building borders on the street there shall be balconies and staircases of like capacity and kind, as before mentioned, carried to the ground. When located on a corner lot that portion of the premises bordering on the side street and not required for the uses of the theatre may, if such portion be not more than 25 feet in width, be used for offices, stores or apartments, provided the walls separating this portion from the theatre proper are carried up solidly to and through the roof, and that a fireproof exit is provided for the theatre, on each tier, equal to the combined width of exits opening on opposite sides in each tier, communicating with balconies and staircases leading to the street in manner provided elsewhere in this section said exit passages shall be entirely cut off by brick walls from said offices, stores or apartments, and the floors and ceilings in each tier shall be fireproof. Nothing herein contained shall prevent a roof garden, art gallery or rooms for similar purposes being placed above a theatre or public building, provided the floor of the same forming the roof over such theatre or building shall be constructed of iron or steel and fireproof materials, and that said floor shall have no covering boards or sleepers of wood, but be of tile or cement. Every roof over said garden or rooms shall have all supports and rafters of iron or steel, and be covered with glass or fireproof materials, or both, but no such roof garden, art gallery or room for any public purpose shall be placed over or above that portion of any theatre or other building which is used as a stage. No workshop, storage or general property room shall be allowed above the auditorium or stage, or under the same, or in any of the fly galleries. All of said rooms or shops may be located in the rear or at the side of the stage, but in such cases they shall be separated from the stage by a brick wall, and the openings leading into said portions shall have fireproof doors on each side of the openings, hung to iron eyes built into the wall. No portion of any building hereafter erected or altered, used or intended to be used for theatrical or other purposes as in this section specified, shall be occupied or used as a hotel, boarding or lodging house, factory, workshop or manufactory, or for storage purposes, except as may be hereafter specially provided for. Such restriction relates not only to that portion of the building which contains the auditorium and the stage, but applies also to the entire structure in conjunction therewith. No store or room contained in the building, or the offices, stores or apartments adjoining, as aforesaid, shall be let or used for carrying on any business dealing in articles designated as specially hazardous in the classification of the New York Board of Fire Underwriters, or for manufacturing purposes. No lodging accommodations shall be allowed in any part of the building communicating with the auditorium. Interior walls built of fireproof materials shall separate the auditorium from the entrance vestibule, and from any room or rooms over the same, also from any lobbies, corridors, refreshment or other rooms. All staircases for the use of the audience shall be inclosed with walls of brick, or of fireproof materials approved by the Department of Buildings, in the stories through which they pass, and the openings to said staircases from each tier shall be the full width of said staircase. No door shall open immediately upon a flight of stairs, but a landing at least the width of the door shall be provided between such stairs and such door. A fire-wall, built of brick, shall separate the auditorium from the stage, and the same shall extend at least 4 feet above the stage roof, or the auditorium roof, if the latter be the higher, and shall be coped. Above the proscenium opening there shall be an iron girder of sufficient strength to safely support the load above and the same shall be covered with fireproof materials to protect it from the heat. Should there be constructed an orchestra over the stage, above the proscenium opening, the said orchestra shall be placed on the auditorium side of the proscenium fire-wall, and shall be entered only from the auditorium side of said wall. The molded frame around the proscenium opening shall be formed entirely of fireproof materials; if metal be used the metal shall be filled in solid with non-combustible material and securely anchored to the wall with iron. The proscenium opening shall be provided with a fireproof metal curtain, or a curtain of asbestos, or other fireproof material approved by the Department of Buildings, sliding at each end within iron grooves, securely fastened to the brick wall, and extending into such grooves, to a depth of not less than 6 inches on each side of the opening. Said fireproof curtain shall be raised at the commencement of each performance and lowered at the close of said performance, and be operated by approved machinery for that purpose. The proscenium curtains shall be placed at least three feet distant from the footlights at the nearest point. No doorway or opening through the proscenium wall, from the auditorium, shall be allowed above the level of the first floor and such first floor openings shall have fireproof doors on each face of the wall, and the doors shall be hung so as to be opened from either side at all times. There shall be provided over the stage, metal skylights of an area or combined area of at least one-eighth the area of said stage, fitted up with sliding sash and glazed with double-thick sheet glass not exceeding one-twelfth of an inch thick, and each pane thereof measuring not less than 300 square inches, and the whole of which skylight shall be so constructed as to open instantly on the cutting or burning of a hempen cord, which shall be arranged to hold said skylights closed, or some other equally simple approved device for opening them may be provided. Immediately underneath the glass of said skylights there shall be wire netting, but wire glass shall not be used in lieu of this requirement. All that portion of the stage not comprised in the working of scenery, traps and other mechanical apparatus, for the presentation of a scene, usually equal to the width of the proscenium opening, shall be built of iron or steel beams filled in between with fireproof material, and all girders for the support of said beams shall be of wrought iron or rolled steel. The fly-galleries entire, including pin-rails, shall be constructed of iron or steel, and the floors of said galleries shall be composed of iron or steel beams, filled with fireproof materials, and no wood boards or sleepers shall be used as covering over beams, but the said floors shall be entirely fireproof. The rigging loft shall be fireproof. All stage scenery, curtains and decorations made of combustible material, and all woodwork on or about the stage, shall be painted or saturated with some non-combustible material, or otherwise rendered safe against fire, and the finishing coats of paint applied to all woodwork throughout the entire building, shall be of such kind as will resist fire to the satisfaction of the Department of Buildings. The roof over the auditorium and the entire main floor of the auditorium and vestibule, also the entire floor of the second story of the front superstructure over the entrance, lobby and corridors, and all galleries and supports for the same in the auditorium shall be constructed of iron or steel and fireproof materials, not excluding the use of wood floor boards and necessary sleepers to fasten the same to, but such sleepers shall not mean timbers of support, and the space between the sleepers, excepting the portion under the stepping in the galleries, which shall be properly fire-stopped, shall be solidly filled with incombustible material up to the under side of the floor boards. The fronts of each gallery shall be formed of fireproof materials, except the capping, which may be made of wood. The ceiling under each gallery shall be entirely formed of fireproof materials. The ceiling of the auditorium shall be formed of fireproof materials. All lathing, whenever used, shall be of wire or other metal. The partitions in that portion of the building which contains the auditorium, the entrance and vestibule and every room and passage devoted to the use of the audience, shall be constructed of fireproof materials, including the furring of outside or other walls. None of the walls or ceilings shall be covered with wood sheathing, canvas or any combustible material. But this shall not exclude the use of wood wainscoting to a height not to exceed six feet, which shall be filled in solid between the wainscoting and the wall with fireproof materials. The walls separating the actors' dressing-rooms from the stage and the partitions dividing the dressing-rooms, together with the partitions of every passageway from the same to the stage, and all other partitions on or about the stage, shall be constructed of fireproof material approved by the Department of Buildings. All doors in any of said partitions shall be fireproof. All shelving and cupboards in each and every dressing-room, property room or other storage rooms, shall be constructed of metal, slate or some fireproof material. Dressing rooms may be placed in the fly-galleries, provided that proper exits are secured therefrom to the fire-escapes in the open courts, and that the partitions and other matters pertaining to dressing-rooms shall conform to the requirements herein contained, but the stairs leading to the same shall be fireproof. All dressing-rooms shall have an independent exit leading directly into a court or street, and shall be ventilated by windows in the external wall; and no dressing-room shall be more than one story below street level. All windows shall

be arranged to open, and none of the windows in outside walls shall have fixed sashes, iron grills or bars. All seats in the auditorium excepting those contained in boxes, shall be not less than 32 inches from back to back, measured in a horizontal direction, and firmly secured to the floor. No seat in the auditorium shall have more than six seats intervening between it and an aisle, on either side. No stool or seat shall be placed in any aisle. All platforms in galleries formed to receive the seats shall be not more than 21 inches in height of riser, nor less than 32 inches in width of platform. All aisles on the respective floors in the auditorium, having seats on both sides of same, shall be not less than 3 feet wide where they begin, and shall be increased in width toward the exits in the ratio of $1\frac{1}{2}$ inches to 5 running feet. Aisles having seats on one side only, shall be not less than 2 feet wide at their beginning and increased in width the same as aisles having seats on both sides. The aggregate capacity of the foyers, lobbies, corridors, passages and rooms for the use of the audience, not including aisle space between seats shall, on each floor or gallery, be sufficient to contain the entire number to be accommodated on said floor or gallery, in the ratio of 150 superficial feet of floor room for every 100 persons. Gradients or inclined planes shall be employed instead of steps where possible to overcome slight difference of level in or between aisles, corridors and passages. Every theatre accommodating 300 persons shall have at least two exits; when accommodating 500 persons, at least three exits shall be provided; these exits not referring to or including the exits to the open court at the side of the theatre. Doorways of exit or entrance for the use of the public shall be not less than 5 feet in width, and for every additional 100 persons or portions thereof to be accommodated, in excess of 500, an aggregate of twenty inches additional exit width must be allowed. All doors of exit or entrance shall open outwardly and be hung to swing in such a manner as not to become an obstruction in a passage or corridor, and no such doors shall be closed and locked during any representation, or when the building is open to the public. Distinct and separate places of exit and entrance shall be provided for each gallery above the first. A common place of exit and entrance may serve for the main floor of the auditorium and the first gallery, provided its capacity be equal to the aggregate capacity of the outlets from the main floor and the said gallery. No passage leading to any stairway communicating with any entrance or exit shall be less than 4 feet in width in any part thereof. All stairs within the building shall be constructed of fireproof material throughout. Stairs from balconies and galleries shall not communicate with the basement or cellar. All stairs shall have treads of uniform width and risers of uniform height throughout in each flight. Stairways serving for the exit of 50 people shall be at least 4 feet wide, between railings, or between walls, and for every additional 50 people to be accommodated 6 inches must be added to their width. The width of all stairs shall be measured in the clear between handrails. In no case shall the risers of any stairs exceed $7\frac{1}{2}$ inches in height, nor shall the treads, exclusive of nosings, be less than $10\frac{1}{2}$ inches wide in straight stairs. No circular or winding stairs for the use of the public shall be permitted. Where the seating capacity is for more than 1,000 people, there shall be at least two independent staircases, with direct exterior outlets, provided for each gallery in the auditorium, where there are not more than two galleries, and the same shall be located on opposite sides of said galleries. Where there are more than two galleries one or more additional staircases shall be provided, the outlets from which shall communicate directly with the principal exit or other exterior outlets. All said staircases shall be of width proportionate to the seating capacity as elsewhere herein prescribed. Where the seating capacity is for 1,000 people, or less, two direct lines of staircases only shall be required, located on opposite sides of the galleries, and in both cases shall extend from the sidewalk level to the upper gallery, with outlets from each gallery to each of said staircases. At least two independent staircases, with direct exterior outlets, shall also be provided for the service of the stage and shall be located on the opposite sides of the same. All inside stairways leading to the upper galleries of the auditorium shall be inclosed on both sides with walls of fireproof materials. Stairs leading to the first or lower gallery may be left open on one side, in which case they shall be constructed as herein provided for similar stairs leading from the entrance hall to the main floor of the auditorium. But in no case shall stairs leading to any gallery be left open on both sides. When straight stairs return directly on themselves, a landing of the full width of both flights, without any steps shall be provided. The outer line of landings shall be curved to a radius of not less than 2 feet, to avoid square angles. Stairs turning at an angle shall have a proper landing without winders introduced at said turn. In stairs, when two side flights connect with one main flight, no winders shall be introduced, and the width of the main flight shall be at least equal to the aggregate width of the side flights. All stairs shall have proper landings introduced at convenient distances. All inclosed staircases shall have, on both sides, strong hand-rails firmly secured to the wall about 3 inches distant therefrom and about 3 feet above the stairs, but said hand-rails shall not run on level platforms and landings where the same is more in length than the width of the stairs. All staircases 8 feet and over in width shall be provided with a centre hand-rail of metal, not less than 2 inches in diameter, placed at a height of about 3 feet above the centre of the treads, and supported on wrought metal or brass standards of sufficient strength, placed not nearer than 4 feet nor more than 6 feet apart, and securely bolted to the treads or risers of stairs, or both, and at the head of each flight of stairs, on each landing, the post or standard shall be at least 6 feet in height, to which the rail shall be secured. Every steam boiler which may be required for heating or other purposes shall be located outside of the building, and the space allotted to the same shall be inclosed by walls of masonry on all sides, and the ceiling of such space shall be constructed of fireproof materials. All doorways in said walls shall have fireproof doors. No floor register for heating shall be permitted. No coil or radiator shall be placed in any aisle or passageway used as an exit; but all said coils and radiators shall be placed in recesses formed in the wall or partition to receive the same. All supply, return or exhaust pipes shall be properly incased and protected where passing through floors or near woodwork. Stand-pipes 4 inches in diameter shall be provided with hose attachments on every floor and gallery, as follows, namely: One on each side of the auditorium in each tier, also on each side of the stage in each tier, and at least one in the property room and one in the carpenter's shop, if the same be contiguous to the building. All such stand pipes shall be kept clear from obstruction. Said stand pipes shall be separate and distinct, receiving their supply of water direct from the power pump or pumps, and shall be fitted with the regulation couplings of the Fire Department, and shall be kept constantly filled with water by means of an automatic power pump or pumps, of sufficient capacity to supply all the lines of hose when operated simultaneously; and said pump or pumps shall be supplied from the street main and be ready for immediate use at all times during a performance in said building. In addition to the requirements contained in this section, the stand pipes shall also conform to the requirements contained in section 102 of this Code. A separate and distinct system of automatic sprinklers, with fusible plugs approved by the Department of Buildings supplied with water from a tank located on the roof over the stage and not connected in any manner with the stand pipes, shall be placed each side of the proscenium opening and on the ceiling or roof over the stage at such intervals as will protect every square foot of stage surface when said sprinklers are in operation. Automatic sprinklers shall also be placed, wherever practicable, in the dressing rooms, under the stage and in the carpenter shop, paint rooms, store rooms and property rooms. A proper and sufficient quantity of two and one-half inch hose not less than one hundred feet in length, fitted with the regulation couplings of the Fire Department and with nozzles attached thereto, and with hose spanners at each outlet, shall always be kept attached to each hose attachment as the Fire Commissioner may direct. There shall also be kept in readiness for immediate use on the stage, at least 4 casks full of water, and 2 buckets to each cask. Said casks and buckets shall be painted red. There shall also be provided hand pumps or other portable fire extinguishing apparatus and at least 4 axes, and 2 25-foot hooks, 2 15-foot hooks and 2 10-foot hooks on each tier or floor of the stage. Every portion of the building devoted to the uses or accommodation of the public, also all outlets leading to the streets, and including the open courts and corridors, shall be well and properly lighted during every performance, and the same shall remain lighted until the entire audience has left the premises. All gas or electric lights in the halls, corridors, lobby or any other part of said buildings used by the audience, except the auditorium, must be controlled by a separate shut-off, located in the lobby, and controlled only in that particular place. Gas mains supplying the building shall have independent connections for the auditorium and the stage, and provision shall be made for shutting off the gas from the outside of the building. When interior gas lights are not lighted by electricity, other suitable appliances, to be approved by the Department of Buildings, shall be provided. All suspended or bracket lights surrounded by glass in the auditorium or in any part of the

building devoted to the public shall be provided with proper wire netting underneath. No gas or electric light shall be inserted in the walls, woodwork, ceilings, or in any part of the building unless protected by fireproof materials. All lights in passages and corridors in said buildings, and wherever deemed necessary by the Department of Buildings, shall be protected with proper wire net work. The footlights, in addition to the wire net work, shall be protected with a strong wire guard and chain, placed not less than two feet distant from said footlights, and the trough containing said footlights shall be formed of and surrounded by fireproof materials. All border lights shall be constructed according to the best known methods, and subject to the approval of the Department of Buildings, and shall be suspended for 10 feet by wire rope. All ducts or shafts used for conducting heated air from the main chandelier, or from any other light or lights, shall be constructed of metal and made double, with an air space between. All stage lights shall have strong metal wire guards or screens, not less than 10 inches in diameter, so constructed that any material in contact therewith shall be out of reach of the flames of said stage lights, and must be soldered to the fixture in all cases. The stand pipes, gas pipes, electric wires, hose, foot lights and all apparatus for the extinguishing of fire or guarding against the same, as in this section specified, shall be in charge and under control of the Fire Department, and the Commissioner of said Department is hereby directed to see that the arrangements in respect thereto are carried out and enforced. A diagram or plan of each tier, gallery or floor, showing distinctly the exits therefrom, each occupying a space not less than 15 square inches, shall be printed in black lines in a legible manner on the programme of the performance. Every exit shall have over the same on the inside the word Exit painted in legible letters not less than 8 inches high.

Part 22—Iron and Steel Construction.

Sec. 110. Skeleton Construction—Where columns are used to support iron or steel girders carrying inclosure walls, the said columns shall be of cast iron, wrought iron, or rolled steel, and on their exposed outer and inner surfaces be constructed to resist fire by having a casing of brickwork not less than 8 inches in thickness on the outer surfaces, nor less than 4 inches in thickness on the inner surfaces, and all bonded into the brickwork of the inclosure walls. The exposed sides of the iron or steel girders shall be similarly covered in with brickwork not less than four inches in thickness on the outer surfaces and tied and bonded, but the extreme outer edge of the flanges of beams, or plates or angles connected to the beams, may project to within 2 inches of the outside surface of the brick casing. The inside surfaces of girders may be similarly covered with brickwork, or if projecting inside of the wall, they shall be protected by terra cotta, concrete or other fireproof material. Girders for the support of the inclosure walls shall be placed at the floor line of each story.

Sec. 111. Steel and Wrought Iron Columns—No part of a steel or wrought iron column shall be less than one-quarter of an inch thick. No wrought iron or rolled steel column shall have an unsupported length of more than forty times its least lateral dimension or diameter, except as modified by section 138 of this Code, and also except in such cases as the Commissioners of Buildings may specially allow a greater unsupported length. The ends of all columns shall be faced to a plane surface at right angles to the axis of the columns and the connection between them shall be made with splice plates. The joint may be effected by rivets of sufficient size and number to transmit the entire stress, and then the splice plates shall be equal in sectional area to the area of column spliced. When the section of the columns to be spliced is such that spliced plates cannot be used, a connection formed of plates and angles may be used, designed to properly distribute the stress. No material, whether in the body of the column or used as lattice bar or stay plate, shall be used in any wrought iron or steel column of less thickness than one-thirty-second of its unsupported width, measured between centres of rivets transversely, or one-sixteenth the distance between centres or rivets in the direction of the stress. Stay plates are to have not less than four rivets, and are to be spaced so that the ratio of length by the least radius of gyration of the parts connected does not exceed forty; the distance between nearest rivets of two stay plates shall in this case be considered as length. Steel and wrought iron columns shall be made in one, two or three-story lengths, and the materials shall be rolled in one length wherever practicable to avoid intermediate splices. Where any part of the section of a column projects beyond that of the column below, the difference shall be made up by filling plates secured to column by the proper number of rivets. Shoes of iron or steel, as described for cast iron columns, or built shoes of plates and shapes may be used, complying with same requirements.

Sec. 112. Cast Iron Columns—Cast iron columns shall not have less diameter than 5 inches, or less thickness than $\frac{3}{4}$ inch. Nor shall they have an unsupported length of more than twenty times their least lateral dimensions or diameter, except as modified by section 138 of this Code, and except the same may form part of an elevator inclosure or staircase, and also except in such cases as the Commissioner of Buildings having jurisdiction, may specially allow a greater unsupported length. All cast iron columns shall be of good workmanship and material. The top and bottom flanges, seats and lugs shall be of ample strength, reinforced by fillets and brackets; they shall be not less than 1 inch in thickness when finished. All columns must be faced at the ends to a true surface perpendicular to the axis of the column. Column joints shall be secured by not less than four bolts each, not less than $\frac{3}{4}$ inch in diameter. The holes for these bolts shall be drilled to a template. The core of a column below a joint shall be not larger than the core of the column above and the metal shall be tapered down for a distance of not less than 6 inches, or a joint plate may be inserted of sufficient strength to distribute the load. The thickness of metal shall be not less than one-twelfth the diameter or the greatest lateral dimension of cross section, but never less than $\frac{3}{4}$ inch. Wherever the core of a cast iron column has shifted more than one-fourth the thickness of the shell, the strength shall be computed assuming the thickness of metal all around equal to the thinnest part, and the column shall be condemned if this computation shows the strength to be less than required by this Code. Wherever blowholes or imperfections are found in a cast iron column which reduces the area of the cross section at that point more than 10 per cent., such column shall be condemned. Cast iron posts or columns not cast with one open side or back, before being set up in place, shall have a $\frac{3}{4}$ -inch hole drilled in the shaft of each post or column by the manufacturer or contractor furnishing the same, to exhibit the thickness of the castings, and any other similar sized hole or holes which the Commissioners of Buildings may require shall be drilled in the said posts or columns by the said manufacturer or contractor at his own expense.

Iron or steel shoes or plates shall be used under the bottom tier of columns to properly distribute the load on the foundation. Shoes shall be planed on top.

Sec. 113. Double Columns—In all buildings hereafter erected or altered, where any iron or steel column or columns are used to support a wall or part thereof, whether the same be an exterior or an interior wall, and columns located below the level of the sidewalk which are used to support exterior walls or arcades over vaults, the said column or columns shall be either constructed double—that is, an outer and an inner column, the inner column alone to be of sufficient strength to sustain safely the weight to be imposed thereon, and the outer columns shall be 1 inch shorter than the inner columns, or such other iron or steel column of sufficient strength and protected with not less than 2 inches of fireproof material securely applied, except that double or protected columns shall not be required for walls fronting on streets or courts.

Sec. 114. Party Wall Posts—If iron or steel posts are to be used as party posts in front of a party wall, and intended for two buildings, then the said posts shall be not less in width than the thickness of the party wall, nor less in depth than the thickness of the wall to be supported above. Iron or steel posts in front of side, division or party walls shall be filled up solid with masonry and made perfectly tight between the posts and walls. Intermediate posts may be used, which shall be sufficiently strong, and the lintels thereon shall have sufficient bearings to carry the weight above with safety.

Sec. 115. Plates Between Joints of Open Back Columns—Iron or steel posts or columns, with one or more open sides and backs, shall have solid iron plates on top of each, excepting where pierced for the passage of pipes.

Sec. 116. Steel and Iron Girders—Rivets in flanges shall be placed so that the last value of a rivet for either shear or bearing is equal or greater than the increment of strain due to the distance between adjoining rivets. All other rules given under riveting shall be followed. The length of rivets between heads shall be limited to four times the diameter. The compression flange of plate girders shall be secured against buckling, if its length exceeds thirty times its width. If splices are used, they

shall fully make good the members spliced in either tension or compression. Stiffeners shall be provided over supports and other concentrated loads; they shall be of sufficient length, as a column, to carry the loads, and shall be connected with a sufficient number of rivets to transmit the stresses into the web plate. Stiffeners shall fit so as to support the flanges of the girders. If the unsupported depth of the web plate exceeds sixty times its thickness, stiffeners shall be used at intervals not exceeding one hundred and twenty times the thickness of the web.

Sec. 117. Rolled Steel and Wrought Iron Beams Used as Girders—When rolled steel or wrought iron beams are used in pairs to form a girder, they shall be connected together by bolts and iron separators at intervals of not more than 5 feet. All beams 12 inches and over in depth shall have at least two bolts to each separator.

Sec. 118. Cast Iron Lintels—Cast iron lintels shall not be used for spans exceeding 16 feet. Cast iron lintels or beams shall be not less than three-quarters of an inch in thickness in any of their parts.

Sec. 119. Plates Under Ends of Lintels and Girders—When the lintels or girders are supported at the ends by brick walls or piers they shall rest upon cut granite or blue-stone blocks at least 10 inches thick, or upon cast iron plates of equal strength by the full size of the bearings. In case the opening is less than 12 feet, the stone blocks may be 5 inches in thickness, or cast iron plates of equal strength by the full size of the bearings, may be used, provided that in all cases the safe loads do not exceed those fixed by section 139 of this Code.

Sec. 120. Rolled Steel and Wrought Iron Floor and Roof Beams—All rolled steel and wrought iron floor and roof beams used in buildings shall be of full weight, straight and free from injurious defects. Holes for tie rods shall be placed as near the thrust of the arch as practicable. The distance between tie rods in floors shall not exceed 8 feet, and shall not exceed eight times the depth of floor beams 12 inches and under. Channels or other shapes, where used as skewbacks, shall have a sufficient resisting moment to take up the thrust of the arch. Bearing plates of stone or metal shall be used to reduce the pressure on the wall to the working stress. Beams resting on girders shall be securely riveted or bolted to the same; where joined on a girder, tie-straps of one-half inch net sectional area shall be used, with rivets or bolts to correspond. Anchors shall be provided at the ends of all such beams bearing on walls.

Sec. 121. Templates Under Ends of Steel or Iron Floor Beams—Under the ends of all iron or steel beams where they rest on the walls, a stone or cast iron template shall be built into the walls. Templates under ends of steel or iron beams shall be of such dimensions as to bring no greater pressure upon the brickwork than that allowed by section 139 of this Code. When rolled iron or steel floor beams, not exceeding 6 inches in depth, are placed not more than 30 inches on centres, no templates shall be required.

Sec. 122. Framing and Connecting Structural Work—All iron or steel trimmer beams, headers, and tail beams, shall be suitably framed and connected together, and the iron or steel girders, columns, beams, trusses and all other iron work of all floors and roofs shall be strapped, bolted, anchored and connected together, and to the walls.

All beams framed into and supported by other beams or girders shall be connected thereto by angles or knees of a proper size and thickness, and have sufficient bolts or rivets in both legs of each connecting angle to transmit the entire weight or load coming on the beam to the supporting beam or girder. In no case shall the shearing value of the bolts or rivets or the bearing value of the connection angles, provided for in section 139 of this Code, be exceeded.

Sec. 123. Riveting of Structural Steel and Wrought Iron Work—The distance from centre of a rivet hole to the edge of the material shall not be less than:

- $\frac{5}{8}$ of an inch for $\frac{1}{2}$ -inch rivets.
- $\frac{7}{8}$ of an inch for $\frac{3}{4}$ -inch rivets.
- $1\frac{1}{8}$ of an inch for $\frac{3}{4}$ -inch rivets.
- $1\frac{3}{8}$ of an inch for $\frac{7}{8}$ -inch rivets.
- $1\frac{1}{2}$ of an inch for 1-inch rivets.

Wherever possible, however, the distance shall be equal to two diameters. All rivets, wherever practicable, shall be machine driven. The rivets in connections shall be proportioned and placed to suit the stresses. The pitch of rivets shall never be less than three diameters of the rivet, nor more than 6 inches. In the direction of the stress it shall not exceed sixteen times the least thickness of the outside member. At right angles to the stress it shall not exceed thirty-two times the least thickness of the outside member. All holes shall be punched accurately, so that upon assembling a cold rivet will enter the hole without straining the material by drifting. Occasional slight errors shall be corrected by reaming. The rivets shall fill the holes completely; the heads shall be hemispherical and concentric with the axis of the rivet. Gussets shall be provided wherever required, of sufficient thickness and size to accommodate the number of rivets necessary to make a connection.

Sec. 124. Bolting of Structural Steel and Wrought Iron Work—Where riveting is not made mandatory connections may be effected by bolts. These bolts shall be of wrought iron or mild steel, and they shall have United States standard threads. The threads shall be full and clean, the nut shall be truly concentric with the bolt, and the thread shall be of sufficient length to allow the nut to be screwed up tightly. When bolts go through bevel flanges, bevel washers to match shall be used so that head and nut of bolt are parallel. When bolts are used for suspenders, the working stresses shall be reduced for wrought iron to 10,000 pounds and for steel to 14,000 pounds per square inch of net area, and the load shall be transmitted into the head or nut by strong washers distributing the pressure evenly over the entire surface of the same. Turned bolts in reamed holes shall be deemed a substitute for field rivets.

Sec. 125. Steel and Wrought Iron Trusses—Trusses shall be of such design that the stresses in each member can be calculated. All trusses shall be held rigidly in position by efficient systems of lateral and sway bracing, struts being spaced so that the maximum limit of length to least radius of gyration, established in section 111 of this Code, is not exceeded. Any member of a truss subjected to transverse stress, in addition to direct tension or compression, shall have the stresses causing such strain added to the direct stresses coming on the member, and the total stresses thus formed shall in no case exceed the working stresses stated in section 139 of this Code.

Sec. 126. Riveted Steel and Wrought Iron Trusses—For tension members, the actual net area only, after deducting rivet holes, one-eighth inch larger than the rivets, shall be considered as resisting the stress. If tension members are made of angle irons riveted through one flange only, only that flange shall be considered in proportioning areas. Rivets to be proportioned as prescribed in section 123 of this Code. If the axes of two adjoining web members do not intersect within the line of the chords, sufficient area shall be added to the chord to take up the bending strains. No bolts shall be used in the connections of riveted trusses, excepting when riveting is impracticable, and then the holes shall be drilled or reamed.

Sec. 127. Steel and Iron Pin-Connected Trusses—The bending stresses on pins shall be limited to 20,000 pounds for steel and 15,000 pounds for iron. All compression members in pin-connected trusses shall be proportioned, using 75 per cent. of the permissible working stress for columns. The heads of all eye-bars shall be made by upsetting or forging. No weld will be allowed in the body of the bar. Steel eye-bars shall be annealed. Bars shall be straight before boring. All pin-holes shall be bored true and at right angles to the axis of the members, and must fit the pin within 1-32 of an inch. The distances of pin-holes from centre to centre for corresponding members shall be alike, so that, when piled upon one another, pins will pass through both ends without forcing. Eyes and screw ends shall be so proportioned that upon test to destruction, fracture will take place in the body of the member. All pins shall be accurately turned. Pin-plates shall be provided wherever necessary to reduce the stresses on pins to the working stresses prescribed in section 139 of this Code. These pin-plates shall be connected to the members by rivets of sufficient size and number to transmit the stresses without exceeding working stresses. All rivets in members of pin-connected trusses shall be machine driven. All rivets in pin-plates which are necessary to transmit stress shall be also machine-driven. The main connections of members shall be made by pins. Other connections may be made by bolts. If there is a combination of riveted and pin-connected members in one truss, these members shall comply with the requirements for pin-connected trusses; but the riveting shall comply with the requirements of section 126 of this Code.

Sec. 128. Iron and Other Metal Fronts to Be Filled In—All cast iron or metal fronts shall be backed up or filled in with masonry of the thicknesses provided for in sections 31 and 32.

Sec. 129. Painting of Structural Metal Work—All structural metal work shall be cleaned of all scale, dirt and rust, and be thoroughly coated with one coat of paint.

Cast iron columns shall not be painted until after inspection by the Department of Buildings. Where surfaces in riveted work come in contact, they shall be painted before assembling. After erection all work shall be painted at least one additional coat. All iron or steel used under water shall be inclosed with concrete.

Part 23—Floor Loads, Temporary Supports.

Sec. 130. Floor Loads—The dead loads in all buildings shall consist of the actual weight of walls, floors, roofs, partitions and all permanent construction.

The live or variable loads shall consist of all loads other than dead loads.

Every floor shall be of sufficient strength to bear safely the weight to be imposed thereon in addition to the weight of the materials of which the floor is composed; if to be used as a dwelling house, apartment house, tenement house, hotel or lodging house, each floor shall be of sufficient strength in all its parts to bear safely upon every superficial foot of its surface not less than 60 pounds; if to be used for office purposes not less than 75 pounds upon every superficial foot above the first floor, and for the latter floor 150 pounds; if to be used as a school or place of instruction, not less than 75 pounds upon every superficial foot; if to be used for stable and carriage house purposes, not less than 75 pounds upon every superficial foot; if to be used as a place of public assembly, not less than 90 pounds upon every superficial foot; if to be used for ordinary stores, light manufacturing and light storage, not less than 120 pounds upon every superficial foot; if to be used as a store where heavy materials are kept or stored, warehouse, factory, or for any other manufacturing or commercial purpose, not less than 150 pounds upon every superficial foot.

The strength of factory floors intended to carry running machinery shall be increased above the minimum given in this section in proportion to the degree of vibratory impulse liable to be transmitted to the floor, as may be required by the Commissioner of Buildings having jurisdiction. The roofs of all buildings having a pitch of less than twenty degrees shall be proportioned to bear safely 50 pounds upon every superficial foot of their surface, in addition to the weight of materials composing the same. If the pitch be more than twenty degrees the live load shall be assumed at 30 pounds upon every superficial foot measured on a horizontal plane. For sidewalks between the curb and area lines the live load shall be taken at 300 pounds upon every superficial foot. Every column, post or other vertical support shall be of sufficient strength to bear safely the weight of the portion of each and every floor depending upon it for support, in addition to the weight required as before stated to be supported safely upon said portion of said floors. For the purpose of determining the carrying capacity of columns of dwellings, office buildings, stores, stables and public buildings when over five stories in height, a reduction of the live loads shall be permissible as follows: For the roof and top floor the full live loads shall be used; for each succeeding lower floor it shall be permissible to reduce the live load by 5 per cent. until 50 per cent. of the live loads fixed by this section is reached, when such reduced loads shall be used for all remaining floors.

Sec. 131. Load on Floors to Be Distributed—The weight placed on any of the floors of any building shall be safely distributed thereon. The Commissioner of Buildings having jurisdiction may require the owner or occupant of any building, or of any portion thereof, to redistribute the load on any floor, or to lighten such load where he deems it to be necessary.

Sec. 132. Strength of Existing Floors to Be Calculated—In all warehouses, storehouses, factories, workshops and stores where heavy materials are kept or stored, or machinery introduced, the weight that each floor will safely sustain upon each superficial foot thereof, or upon each varying part of such floor, shall be estimated by the owner or occupant, or by a competent person employed by the owner or occupant. Such estimate shall be reduced to writing, on printed forms furnished by the Department of Buildings, stating that material, size, distance apart and span of beams and girders, posts or columns to support floors, and its correctness shall be sworn to by the person making the same, and it shall thereupon be filed in the office of the Department of Buildings. But if the Commissioners of Buildings shall have cause to doubt the correctness of said estimate, they are empowered to revise and correct the same and for the purpose of such revision the officers and employees of the Department of Buildings may enter any building and remove so much of any floor or other portion thereof as may be required to make necessary measurements and examination. When the correct estimate of the weight that the floors in any such buildings will safely sustain has been ascertained, as herein provided, the Department of Buildings shall approve the same, and thereupon the owner or occupant of said building, or of any portion thereof, shall post a copy of such approved estimate in a conspicuous place on each story, or varying parts of each story, of the building to which it relates. Before any building hereafter erected is occupied and used, in whole or in part, for any of the purposes aforesaid, and before any building, erected prior to the passage of this Code, but not at such time occupied for any of the aforesaid purposes, is occupied or used, in whole or in part, for any of said purposes, the weight that each floor will safely sustain upon each superficial foot thereof, shall be ascertained and posted in a conspicuous place on each story or varying parts of each story of the building to which it relates. No person shall place, or cause or permit to be placed on any floor of any building any greater load than the safe load thereof, as correctly estimated and ascertained as herein provided. Any expense necessarily incurred in removing any floor or other portion of any building for the purpose of making any examination herein provided for shall be paid by the Comptroller of The City of New York, upon the requisition of the Board of Buildings, out of the fund paid over to said Board under the provisions of section 158 of this Code. Such expenses shall be a charge against the person or persons by whom or on whose behalf said estimate was made, provided such examination proves the floors of insufficient strength to carry with safety the loads found upon them when such examination was made; and shall be collected in an action to be brought by the Corporation Counsel against said person or persons, and the sum so collected shall be paid over to the said Comptroller to be deposited in said fund in reimbursement of the amount paid as aforesaid. When the architect of record for any building has filed with his application to build the data required to determine the strength of floors, on one of the blank forms provided for that purpose, such examination shall not be required provided that the purposes and uses of the building have not been changed.

Sec. 133. Strength of Temporary Supports—Every temporary support placed under any structure, wall, girder or beam, during the erection, finishing, alteration, or repairing of any building or structure or any part thereof, shall be of sufficient strength to safely carry the load to be placed thereon.

Part 24—Calculations. Strength of Materials.

Sec. 134. Safe Load for Masonry Work—The safe-bearing load to apply to brickwork shall be taken at eight tons per superficial foot, when lime mortar is used; eleven and one-half tons per superficial foot when lime and cement mortar mixed is used; fifteen tons per superficial foot when cement mortar is used. The safe bearing load to apply to rubble-stone work shall be taken at ten tons per superficial foot when Portland cement is used; when cement other than Portland is used, eight tons per superficial foot; when lime and cement mortar mixed is used, seven tons per superficial foot; and when lime mortar is used, five tons per superficial foot. The safe-bearing load to apply to concrete when Portland cement is used shall be taken at fifteen tons per superficial foot; and when cement other than Portland is used, eight tons per superficial foot.

Sec. 135. Weights of Certain Materials—In computing the weight of walls, a cubic foot of brickwork shall be deemed to weigh 115 pounds. Sandstone, white marble, granite and other kinds of building stone shall be deemed to weigh 170 pounds per cubic foot.

Sec. 136. Computations for Strength of Materials—The dimensions of each piece or combination of materials required shall be ascertained by computation, according to the rules prescribed by this Code.

Sec. 137. Factors of Safety—Where the unit stress for any material is not prescribed in this Code the relation of allowable unit stress to ultimate strength shall be as one to four for metals, subjected to tension or transverse stress; as one to six for timber, and as one to ten for natural or artificial stones and brick or stone masonry. But wherever working stresses are prescribed in this Code, varying the factors of safety hereinabove given, the said working stresses shall be used.

Sec. 138. Strength of Columns—In columns or compression members with flat ends of cast iron, steel, wrought iron or wood, the stress per square inch shall not exceed that given in the following tables:

When the Length Divided by Least Radius of Gyration Equals.	Working Stresses Per Square Inch of Section.		
	Cast Iron.	Steel.	Wrought Iron.

And in like proportion for intermediate ratios. Five-eighths the values given for white pine shall also apply to chestnut and hemlock posts. For locust posts use one and one-half the value given for white pine.

Columns and compression members shall not be used having an unsupported length of greater ratios than given in the tables. Any column eccentrically loaded shall have the stresses caused by such eccentricity computed, and the combined stresses resulting from such eccentricity at any part of the column, added to all other stresses at that part, shall in no case exceed the working stresses stated in this Code.

The eccentric load of a column shall be considered to be distributed equally over the entire area of that column at the next point below at which the column is securely braced laterally in the direction of the eccentricity.

Sec. 140. Wind Pressure—All structures exposed to wind shall be designed to resist a horizontal wind pressure of thirty pounds for every square foot of surface thus exposed, from the ground to the top of same, including roof, in any direction. In no case shall the overturning moment due to wind pressure exceed 75 per centum of the moment of stability of the structure. In all structures exposed to wind, if the resisting moments of the ordinary materials of construction, such as masonry, partitions, floors and connections are not sufficient to resist the moment of distortion due to wind pressure, taken in any direction on any part of the structure, additional bracing shall be introduced sufficient to make up the difference in the moments. In calculations for wind bracing, the working stresses set forth in this Code may be increased by 50 per centum. In buildings under 100 feet in height, provided the height does not exceed four times the average width of the base, the wind pressure may be disregarded.

Part 25—Plumbing and Drainage.

Sec. 141. Plumbing, Drainage and Repairs Thereto.

1. The drainage and plumbing of all buildings, both public and private, shall be executed in accordance with the rules and regulations of the Department of Buildings. Said rules and regulations and any change thereof shall be published in the CITY RECORD on eight successive Mondays before the same shall become operative.

Repairs or alterations of such plumbing or drainage may be made without the filing and approval of drawings and descriptions in the Department of Buildings, but such repairs or alterations shall not be construed to include cases where new vertical or horizontal lines of soil, waste, vent or leader pipes are proposed to be used.

Notice of such repairs or alterations shall be given to the said Department before the same are commenced in such cases as shall be prescribed by the rules and regulations of the said Department, and the work shall be done in accordance with the said rules and regulations.

2. Once in each year, every employing or master plumber carrying on his trade, business or calling in The City of New York, shall register his name and address at the office of the Department of Buildings in said City under such rules and regulations as said Department shall prescribe and as hereinafter provided.

And thereupon he shall be entitled to receive a certificate of such registration from said Department, provided, however, that such employing or master plumber shall, at the time of applying for such registration, hold a certificate of competency from the Examining Board of Plumbers of said City.

The time for making such registration shall be during the month of March in each year. Where, however, a person obtains a certificate of competency at a time other than in the month of March in any year, he may register within thirty days after obtaining such certificate of competency, but he must also register in the month of March in each year as herein provided.

Such registration may be canceled by the Department of Buildings for a violation of the rules and regulations for the plumbing and drainage of said Department of Buildings, duly adopted and in force pursuant to the provisions of this section or whenever the person so registered ceases to be a master or employing plumber, after a hearing had before said Department, and upon a prior notice of not less than ten days, stating the grounds of complaint and served upon the person charged with the violation of the aforesaid rules and regulations.

3. After this Code takes effect, no person, corporation or copartnership shall engage in, or carry on the trade, business or calling of employing or master plumber in The City of New York, unless the name and address of such person and the president, secretary or treasurer of such corporation and each and every member of such copartnership shall have been registered as above provided.

4. No person or persons shall expose the sign of "Plumber" or "Plumbing" or a sign containing words of similar import and meaning in The City of New York unless each person forming such a copartnership shall have obtained a certificate of competency from the Examining Board of Plumbers, and shall have registered as herein provided.

A master or employing plumber within the meaning of this Code is any person who hires or employs a person or persons to do plumbing work.

5. The Inspectors of Plumbing in the Department of Buildings in addition to their other duties shall ascertain whether the employing or master plumber having charge of the construction, repairing or alteration of any plumbing work performed in The City of New York is registered as herein provided, and if such person is not so registered, then such Inspectors shall forthwith report to said Department the name of said plumber.

6. The Commissioner of Buildings having jurisdiction may present a petition to a justice of the Supreme Court or to a special term thereof for an order restraining the person so reported from acting as an employing or master plumber until he registers pursuant to the provisions of this Code. Said petition shall state that the said person is engaged in plumbing work as an employing or master plumber without having so registered, and shall be verified by the inspector making the said report.

Upon the presentation of the petition, the Court shall grant an order requiring such plumber to appear before a special term of the Supreme Court on a date therein specified, not less than two nor more than six days after the granting thereof, to show cause why he should not be permanently enjoined until he has obtained a certificate of registration as herein required. A copy of such petition and order shall be served upon such person not less than twenty-four hours before the return thereof. On the day specified in such order the Court before whom the same is returnable shall hear the proofs of the parties, and may, if deemed necessary, take testimony in relation to the allegations of the petition.

If the Court is satisfied that such plumber is practicing without having registered, as provided by this Code, an order shall be granted enjoining him from acting as an employing or master plumber until he has so registered.

No undertaking shall be required as a condition to the granting or issuing of such injunction order or by reason thereof.

If, after the entry of such order in a County Clerk's office in The City of New York, such person shall, in violation of such order, practice as an employing or master plumber, he shall be deemed guilty of a criminal contempt of court, and be punishable as for a criminal contempt in the manner provided by the Code of Civil Procedure.

In no case shall the Department of Buildings be liable for costs in any such proceeding, but costs may be allowed against the defendant or defendants, in the discretion of the Court.

Part 26—Buildings Raised, Lowered, Altered or Moved.

Sec. 142. Buildings Raised, Lowered, Altered or Moved—Within the fire limits it shall not be lawful for the owner or owners of any brick dwelling house with 8-inch walls, or of any wood building already erected that has a peaked roof, to raise the same for the purpose of making a flat roof thereon, unless the same be raised with the same kind of material as the building, and unless such new roof be covered with fireproof material, and provided that such building, when so raised, shall not exceed 40 feet in height to the highest part thereof. All such buildings must exceed 25 feet in height to the peak of the main roof before the said alteration and raising. In increasing the height of any such building, the entire area which such building covers may be raised to a uniform height. If any such building has an extension of less width than the main building, the same may be increased in width to the full width of the main building, with the same kind of material and to the same height as the main building. Any such building may be extended either on the front or rear to a depth of not more than 15 feet and not more than the width of the building, and not more than two stories and basement in height, with the same kind of material as the building. Any frame building situated in a row of frame buildings may be increased in height to conform to the height of adjoining buildings. If any block situated within the fire limits has 90 per cent. of the buildings located thereon constructed of frame, any vacant lot situated therein may have a frame building placed thereon provided the same be not more than two stories and basement in height and is to be used for residence purposes only. If any building shall have been built before the street upon which it is located is graded, or if the grade is altered, such building may be raised or lowered to meet the requirements of such grade. The restrictions contained in this section shall not prohibit one-story and basement frame dwelling houses from being increased one additional story in height. Within the fire limits no frame building more than two stories in height, now used as a dwelling, shall hereafter be raised or altered to be used as a factory, warehouse or stable.

No wood building within or without the fire limits shall be moved from one lot to another until a statement setting forth the purposes of said removal and the uses to which said building is to be applied is filed in the Department of Buildings, and a permit be first obtained therefor. No wood building shall be moved from without to within the fire limits.

Within the fire limits no brick building shall be enlarged or built upon unless the exterior walls of said addition or enlargement be constructed of incombustible materials; provided, however, that such brick building may be raised, lowered or altered under the same circumstances and in the manner provided for in this section.

Part 28—Frame Buildings.

Sec. 144. Frame Structures Within the Fire Limits—The provisions, in this section contained, shall apply to buildings and structures, whether temporary or permanent, within the fire limits, as the said fire limits now are or may hereafter be established.

Temporary one-story frame buildings may be erected for the use of builders, within the limits of lots whereon buildings are in course of erection, or on adjoining vacant lots, upon permits issued by the Commissioner of Buildings having jurisdiction.

Temporary structures shall be taken to mean and include platforms, stands, election booths, temporary buildings and circus tents.

Sheds of wood not over fifteen feet high, open on at least one side, with the sides and roof thereof covered with fireproof material, may also be built, but a fence shall not be used as the back or side thereof. Such sheds shall not cover an area exceeding two thousand five hundred square feet, except by permission of the Board of Buildings.

Fences of wood shall not be erected over 10 feet high.

Signs of wood shall not be erected over 2 feet high on any building. Sky signs, or any device in the nature of an advertisement, announcement or direction, supported upon or above or attached to any building, constructed of sheet metal or wire fastened to wood frames, shall be deemed to be wood signs. Before any wood or metal sign shall be placed in position upon, above or attached to the outside of any building, a permit shall first be obtained from the Commissioner of Buildings having jurisdiction. Such signs shall be so constructed, placed and supported as not to be or become dangerous. All signs which shall be dangerous in any manner whatever, shall be repaired and made safe or taken down by the owner, lessee or occupant of the building. No signs or bill boards of wood or metal erected upon uprights or other supports extending into the ground shall be at any point more than 10 feet above the surface of the ground, and the same shall be properly supported and braced.

Piazas or balconies of wood on buildings other than frame buildings which do not exceed 8 feet in width, and which do not extend more than 3 feet above the second story floor beams, may be erected, provided a permit from the Commissioner of Buildings having jurisdiction, be granted therefor. In connected houses such piazas or balconies may be built, provided the same are open on the front and have brick ends not less than 8 inches thick, carried up above the roof of such piazza or balcony, and coped with stone. The roofs of all piazas shall be covered with some fireproof material. Frame buildings already erected may have placed on any story piazas, balconies or bay-windows of wood, the roofs of which may be covered with the same material as the roof of the main building.

Exterior privies, and wood or coal houses, not exceeding 150 square feet in superficial area and 8 feet high, may be built of wood, but the roofs thereof must be covered with metal, gravel or slate.

Sec. 145. Frame Buildings Damaged—Every wood or frame building with a brick or other front within the fire limits, which may hereafter be damaged to an amount not greater than one-half of the value thereof, exclusive of the valuation of the foundation thereof, at the time of such damage, may be repaired or rebuilt; but if such damage shall amount to more than one-half of such value thereof, exclusive of the value of the foundation, then such building shall not be repaired or rebuilt, but shall be taken down, except as provided in this Code. In case the owner of the damaged building shall be dissatisfied with the decision of the Commissioner of Buildings having jurisdiction that such building is damaged to a greater extent than one-half of its value, exclusive of the value of the foundation, then the amount and extent of such damage shall be determined upon an examination of the building by one Surveyor, who shall be appointed by the Commissioner of Buildings having jurisdiction, and one Surveyor who shall be appointed by the owner or owners of said premises. In case these two Surveyors do not agree, they shall appoint a third Surveyor to take part in such examination, and a decision of a majority of them reduced to writing and sworn to, shall be conclusive, and such building shall in no manner be repaired or rebuilt until after such decision shall have been rendered.

Sec. 146. Frame Buildings Outside of Fire Limits—The provisions of this section shall apply to frame or other buildings hereafter erected outside of the fire limits, as the same are now or may hereafter be established, in portions of The City of New York where streets are now and where they may hereafter be legally established. Three-story frame buildings may be erected to a height of 40 feet, said height being taken from the curb-line, where same exists, at the centre of front or side of building on which main entrance to upper floors is located. Where the walls of a building do not adjoin the street or building line then the average level of the ground on which the building stands may be taken in place of the curb-line. The measurement for height shall be to the highest point of roof beams in case of flat roof buildings, and to the average height of gable or roof in case of pitched roofs. Towers, turrets and minarets of wood may be erected to a height not to exceed 15 feet greater than the foregoing limited height, except that the spires of churches may be erected of wood to a height not exceeding 90 feet from the ground. All footings or bottom

stones shall be at least 6 inches wider on each side than bottom width of foundation walls above, except where the outside of the foundation wall sets on the property line, in which case 6 inches wider on the inside shall be sufficient. The thickness of footings shall be not less than 8 inches, if of stone, and not less than 12 inches if of concrete.

Foundations for frame structures shall be laid not less than 4 feet below the finished surface of the earth or upon the surface where there is rock bottom, or upon piles or ranging timbers where found necessary. The foundation walls of frame structures exceeding 15 feet in height, if of stone, shall be not less than 18 inches thick, and if of brick not less than 12 inches to the grade and 8 inches thick to the under side of the sill. If the foundation and first story walls are constructed of brick the foundation walls shall be not less than 12 inches thick to the first tier of beams and 8 inches thick from first tier to second tier of beams; or if these walls are constructed of stone they shall be not less than 20 inches for the foundation wall and 18 inches for the first story wall; and if the walls are faced with stone ashlar the total thickness shall be 4 inches greater than in this section specified. In the foundation walls there may be recesses not more than 8 feet long for stairs, with brick walls not less than 8 inches thick. All chimneys in frame buildings shall be built of brick or stone or other fireproof material. If of brick the flues shall have walls at least 8 inches thick, except where flues are lined with burnt-clay pipe, in which case the walls around flues may be 4 inches thick. All flue linings shall extend at least 1 foot above the roof boards. Where chimneys are built of stone the walls of the flues shall be not less than 8 inches on all sides, and shall be lined with burnt-clay pipe. All chimneys shall be topped out at least 4 feet above the highest point of contact with the roof, and be properly capped. Chimneys in party walls or serving two rooms on the same floor may be built in the walls or partitions; elsewhere, they shall be built inside of the frame, except in the case of ornamental or exposed chimneys. In no case shall a frame building be erected within 3 feet of the side or rear line of a lot, unless the space between the studs on any such side be filled in solidly with not less than 2½ inches of brickwork or other fireproof material. When two or more such buildings are built continuous, the party or division studding shall be not less than 4 inches thick and filled in solidly with brickwork or other fireproof material extending to the under side of roof boards. When the division walls are of brick they shall be not less than 8 inches thick above the foundation wall and extending to under side of roof boards, and the ends of the floor beams shall be so separated that 4 inches of brick will be between the beams where they rest on said walls. The sills of all frame dwellings, except where the first floor is used for store or business purposes, shall be not less than 2 feet above the ground to the under side of same. All frame or wood buildings exceeding a height of 15 feet shall be built with sills, posts, girts, plates and rafters, all of suitable size and properly framed and braced with suitable studs or planks set at proper distance apart; but this shall not prohibit the use of balloon framing. The floor beams and rafters shall be not less than 2 inches in thickness. The covering of roof may be of shingle. The walls of light, vent and dumb-waiter shafts, whether exterior or interior, in frame buildings, may be constructed of frame. Posts of locust or other hard wood and wood girders may be used instead of brick for end-aft partitions in cellars of frame buildings, and it shall not be necessary to use metal or wire lath for the ceilings of cellars or lowest floors of any frame building. The cellar stairs in frame buildings may be placed directly under main stairs, and no brick wall shall be necessary to inclose the same; nor shall areas be required to be built across the front of frame buildings except where the cellar or basement is used for living purposes. The regulations governing plumbing, drainage and heating, also steam and hot-air pipes and registers, where same extend through or along stud partitions, shall also apply to frame buildings. Frame buildings may be altered, extended, raised or repaired, provided the new portions comply with the provisions of this section. No frame building exceeding 3 stories in height shall hereafter be erected to be occupied by more than six families, nor shall any frame building already erected be altered to be occupied by more than six families, nor more than three stories in height. Outside of the fire limits, when any brick or stone building is to be erected of a class that could, under this Code, be constructed of wood, the Commissioner of Buildings having jurisdiction is hereby authorized and directed to allow reasonable modifications of this Code relating to brick buildings, in consideration of incombustible material being used for walls instead of wood.

Sec. 147. Frame Buildings; Where Streets Are Not Established.—Within portions of The City of New York where streets have not been or are not legally established and are outside of the prescribed fire limits, no building or structure other than small outhouses shall be erected without first filing plans and a detailed statement of the proposed construction and obtaining an approval therefor, as provided in section 4 of this Code. Within the said portions of The City of New York, hotels, tenement houses for occupancy by not more than six families, and places of public assembly may be built of wood, but shall in all other respects comply with the several provisions of this Code relating to such structures; but for all other buildings or structures only so much of the requirements, regulations and restrictions of this Code shall apply as in the opinion of the Commissioner of Buildings having jurisdiction may be necessary for safety and health. The purpose of this section is to permit greater freedom in construction and in plumbing and drainage of buildings in the outlying and undeveloped portions of The City of New York than in those portions where a street system has been adopted by the municipality or established by law.

Part 29—Appeals and Modifications of Law.

Sec. 148. The Board of Buildings.—Each Commissioner of Buildings shall have power, with the approval of the Board, to vary or modify any rule or regulation of the Board, or the provisions of chapter 12 of the Greater New York Charter, or of any existing law or ordinance relating to the construction, alteration or removal of any building or structure erected or to be erected within his jurisdiction, pursuant to the provisions of section 650 of the Greater New York Charter.

Sec. 149. Board of Examiners.—The Board of Examiners for the Boroughs of Manhattan and The Bronx shall be constituted as prescribed by section 649 of the Greater New York Charter. Each of said Examiners shall take the usual oath of office before entering upon his duties. No member of said Board shall pass upon any question in which he is pecuniarily interested. The said Board shall meet as often as once in each week upon notice from the Commissioner of Buildings.

The members of said Board of Examiners, and the Clerk of said Board, shall each be entitled to and shall receive \$10 for each attendance at a meeting of said Board, to be paid by the Comptroller from the annual appropriation to be made therefor upon the voucher of the Commissioner of Buildings for the Boroughs of Manhattan and The Bronx.

Part 30—Violations and Penalties. Courts Having Jurisdiction.

Sec. 150. Violations and Penalties.—The owner or owners of any building, structure or part thereof, or wall, or any platform, staging or flooring to be used for standing or seating purposes where any violation of this Code shall be placed, or shall exist, and any architect, builder, plumber, carpenter or mason who may be employed or assist in the commission of any such violation, and any and all persons who shall violate any of the provisions of this Code or fail to comply therewith, or any requirement thereof, or who shall violate or fail to comply with, any order or regulation made thereunder, or who shall build in violation of any detailed statement of specifications or plans, submitted and approved thereunder, or of any certificate or permit issued thereunder, shall severally, for each and every such violation and non-compliance, respectively, forfeit and pay a penalty in the sum of \$50. Except that any such person who shall violate any of the provisions of this Code, as to the construction of chimneys, fire-places, flues, hot-air pipes and furnaces, or who shall violate any of the provisions of this Code, with reference to the framing or trimming of timbers, girders, beams, or other woodwork in proximity to chimney flues or fire-places, shall forfeit and pay a penalty in the sum of \$100. But if any said violation shall be removed or be in process of removal within ten days after the service of a notice as hereinafter prescribed, the liability of such a penalty shall cease, and the Corporation Counsel, on request of the Commissioner of Buildings having jurisdiction, shall discontinue any action pending to recover the same, upon such removal or the completion thereof within a reasonable time. Any and all of the aforementioned persons who having been served with a notice as hereinafter prescribed, to remove any violation, or comply with any requirement of this Code, or with any order or regulation made thereunder, shall fail to comply with said notice within ten days after such service or shall continue to violate any requirement of this Code in the respect named in said notice shall pay a penalty of \$250. For the recovery of any said penalty or penalties an action may be brought in any municipal court, or court of record, in said City in the name of The City of New York; and whenever any judg-

ment shall be rendered therefor, the same shall be collected and enforced, as prescribed and directed by the Code of Civil Procedure of the State of New York. The Commissioner of Buildings having jurisdiction, through the Corporation Counsel, is hereby authorized, in his discretion, good and sufficient cause being shown therefor, to remit any fine or fines, penalty or penalties, which any person or persons may have incurred, or may hereafter incur, under any of the provisions of this Code; but no fine or penalty shall be remitted for any such violation until the violation shall have been removed. Said remission shall also operate as the remission of the costs obtained in such action.

Sec. 151. Courts Having Jurisdiction.—All courts of civil jurisdiction in The City of New York shall have cognizance of and jurisdiction over any and all suits and proceedings by this Code authorized to be brought for the recovery of any penalty and the enforcement of any of the several provisions of this Code, and shall give preference to such suits and proceedings over all others, and no court shall lose jurisdiction of any action by reason of a plea that the title to real estate is involved, provided the object of the action is to recover a penalty for the violation of any of the provisions of this Code. The Corporation Counsel is authorized to institute any and all actions and proceedings, either legal or equitable that may be appropriate or necessary for the enforcement of the provisions of this Code, and all civil courts in said City are hereby invested with full legal and equitable jurisdiction to hear, try and determine all such actions and proceedings, and to make appropriate orders and render judgment therein according to law, so as to give force and effect to the provisions of this Code. Whenever the Commissioner of Buildings having jurisdiction is satisfied that any building or structure, or any portion thereof, or any drainage or plumbing, the erection, construction or alteration, execution or repair of which is regulated, permitted or forbidden by this Code, is being erected, constructed, altered or repaired, or has been erected, constructed, altered or repaired, in violation of, or not in compliance with, any of the provisions or requirements of this Code, or in violation of any detailed statement of specifications or plans submitted and approved thereunder, or of any certificate or permit issued thereunder, or that any provision or requirement of this Code, or any order or direction made thereunder has not been complied with, or that plans and specifications for plumbing and drainage have not been submitted or filed as required by this Code, the Commissioner of Buildings having jurisdiction may in his discretion, through the Corporation Counsel, institute any appropriate action or proceeding at law or in equity to restrain, correct or remove such violation, or the execution of any work thereon, or to restrain or correct the erection or alteration of, or to require the removal of, or to prevent the occupation or use of, the building or structure erected, constructed or altered, in violation of, or not in compliance with, any of the provisions of this Code, or with respect to which the requirements of this Code, or of any order or direction made pursuant to any provisions contained in this Code, shall not have been complied with. In any such action or proceeding The City of New York may, in the discretion of the Commissioner of Buildings having jurisdiction and on his affidavit setting forth the facts, apply to any court of record in said City or to a judge or justice thereof, for an order enjoining and restraining all persons from doing, or causing or permitting to be done, any work in or upon such building or structure, or in or upon such part thereof as may be designated in said affidavit, or from occupying or using said building or structure, or such portion thereof as may be designated in said affidavit for any purpose whatever, until the hearing and determination of said action and the entry of final judgment therein. The court, or judge or justice thereof, to whom such application is made, is hereby authorized forthwith to make any or all of the orders above specified, as may be required in such application, with or without notice, and to make such other or further orders or directions as may be necessary to render the same effectual. No officer of said Department of Buildings, acting in good faith and without malice shall be liable for damages by reason of anything done in any such action or proceeding. No undertaking shall be required as a condition to the granting or issuing of such injunction order, or by reason thereof. All courts in which any suit or proceeding is instituted under this Code shall, upon the rendition of a verdict, report of a referee, or decision of a judge or justice, render judgment in accordance therewith; and the said judgment, so rendered, shall be and become a lien upon the premises named in the complaint in any such action, to date from the time of filing in a County Clerk's office in The City of New York, where the property affected by such action, suit, or proceeding, is located, of a notice of lis pendens therein; which lien may be enforced against said property, in every respect, notwithstanding the same may be transferred subsequent to the filing of the said notice. Said notice of lis pendens shall consist of a copy of the notice issued by the Commissioner of Buildings having jurisdiction requiring the removal of the violation and a notice of the suit or proceedings instituted, or to be instituted thereon, and said notice of lis pendens may be filed at any time after the service of the notice issued by the Commissioner of Buildings as aforesaid, provided he may deem the same to be necessary, or is satisfied that the owner of the property is about to transfer the same to avoid responsibility for having violated the provisions of this Code or some one of its provisions. Any notice of lis pendens filed pursuant to the provisions of this Code may be vacated and canceled of record; upon an order of a judge or justice of the court in which such suit or proceeding was instituted or is pending, or upon the consent in writing of the Corporation Counsel, and the clerk of the said county where such notice is filed, is hereby directed and required to mark any such notice of lis pendens and any record or docket thereof as vacated and canceled of record, upon the presentation and filing of a certified copy of an order as aforesaid, or of the consent, in writing, of said Corporation Counsel. In no case shall the said Department of Buildings, or any officer thereof, or the Corporation of The City of New York, or any defendant, be liable for costs in any action, suit or proceedings that may have been, or may hereafter be, instituted or commenced in pursuance of this Code, unless specially ordered and allowed against any defendant or defendants, by a court of justice, in the course of such action, suit or proceeding.

Such notice or order shall contain a description of the building, premises or property on which such violation shall have been put or may exist, or which may be deemed unsafe or dangerous, or to which such notice or order may refer. If the person or persons or any of them, to whom said notice or order is addressed, do not reside in the State of New York, and have no known place of business therein, the same may be served by delivering to and leaving with such person or persons, or either of them, a copy of said notice or order, or if said person or persons cannot be found within said State after diligent search, then by posting a copy of the same in manner as aforesaid and depositing a copy thereof in a post-office in The City of New York, inclosed in a sealed wrapper addressed to said person or persons at his or their last known place of residence, with the postage paid thereon; and said posting and mailing of a copy of said notice or order shall be equivalent to personal service of said notice or order.

The amount so collected shall be paid over to the Comptroller in reimbursement of the amounts paid by him as aforesaid.

In case said issue shall not be tried at the time specified in said notice, or to which the trial may be adjourned, the same may be brought to trial at any time thereafter by the said Commissioner of Buildings, without a new survey, upon not less than three days' notice of trial to the person or persons upon whom the original notice was served, or to his or their attorney, which notice of trial may be served in the same manner as said original notice. Section 1. Section one hundred and nine of the Building Code is hereby amended to read as follows:

Sec. 109. Theatres and Places of Public Amusement—Every theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, hereafter erected for the accommodation of more than three hundred persons, shall be built to comply with the requirements of this section. No building which, at the time of the passage of this Code is not in actual use for theatrical or operatic purposes, and no building hereafter erected not in conformity with the requirements of this section, shall be used for theatrical or operatic purposes, or for public entertainments of any kind, until the same shall have been made to conform to the requirements of this section. And no building herebefore described shall be opened to the public for theatrical or operatic purposes, or for public entertainments of any kind, until the Department of Buildings and the Fire Commissioner shall have approved the same in writing as conforming to the requirements of this section. Every such building shall have at least one front on the street, and in such front there shall be suitable means of entrance and exit for the audience, not less than 25 feet in width. In addition to the aforesaid entrances and exits on the street there shall be reserved for service in case of an emergency an open court or space in the rear and on the side not bordering on the street, where said building is located on a corner lot; and in the rear and on both sides of said building, where there is but one frontage on the street as hereinafter provided. The width of such open court or courts shall be not less than (7) 10 feet where the seating capacity is not over one thousand people, above one thousand and not more than eighteen hundred people (8) 12 feet in width, and above eighteen hundred people (10) 14 feet in width. Said open court or courts shall (begin on a line with or near the proscenium wall, and shall extend the length of the auditorium proper to or near the wall separating the same from the entrance lobby or vestibule) extend the full length and height of the building and across on each side and rear thereof where its sides or side does not abut on a street or alley, and shall be of the same width at all points, and exits hereafter specified shall lead into such open courts. [A separate and distinct corridor shall continue to the street side from each open court through such superstructure as may be built on the street side of the auditorium, with continuous walls of brick or fireproof materials on each side the entire length of said corridor or corridors, and the ceiling and floors shall be fireproof. Said corridor or corridors shall not be reduced in width to more than 3 feet less

than the width of the open court or courts, and there shall be no projection in the same; the outer openings to be provided with doors or gates opening toward the street.) During the performance the doors or gates in the corridors shall be kept open by proper fastenings; at other times they may be closed and fastened by movable bolts or blocks. The said open courts and corridors shall not be used for storage purposes, or for any purposes whatsoever except for exit and entrance from and to the auditorium and stage, and must be kept free and clear during performances. The level of said corridors at the front entrance to the building shall be not greater than one step above the level of the sidewalk where they begin at the street entrance. The entrance of the main front of the building shall be not on a higher level from the sidewalk than four steps, unless approved by the Department of Buildings. To overcome any difference of level in and between courts, corridors, lobbies, passages and aisles on the ground floor, gradients shall be employed of not over 1 foot in 12 feet, with no perpendicular rises. From the auditorium opening into the said open courts or on the side street, there shall be not less than two exits on each side in each tier from and including the parquet and each and every gallery. Each exit shall be at least 5 feet in width in the clear and provided with doors of iron or wood; if of wood, the doors shall be constructed as hereinbefore in this Code described. All of said doors shall open outwardly, and shall be fastened with movable bolts, the bolts to be kept drawn during performances. There shall be balconies not less than (4) 6 feet in width in the said open court or courts at each level or tier above the parquet, on each side of the auditorium, of sufficient length to embrace the two exits, and from said balconies there shall be staircases extending to the ground level, with a rise of not over 8½ inches to a step and not less than 9 inches tread, exclusive of the nosing. The staircase from the upper balcony to the next below shall be not less than (36) 48 inches in width clear, and from the first balcony to the ground (3) 4 feet in width in the clear where the seating capacity of the auditorium is for one thousand people or less (3 feet and 6 inches) 4 feet 6 inches in the clear where above one thousand and not more than eighteen hundred people, and 5 feet in the clear where above eighteen hundred people and not more than twenty-five hundred people, and not over 5 feet 6 inches in the clear where above twenty-five hundred people. All the before-mentioned balconies and staircases shall be constructed of iron throughout, including the floors, and of ample strength to sustain the load to be carried by them, and they shall be covered with a metal hood or awning, to be constructed in such manner as shall be approved by the Department of Buildings. Where one side of the building borders on the street, there shall be balconies and staircases of like capacity and kind, as before mentioned, carried to the ground. When located on a corner lot, that portion of the premises bordering on the side street and not required for the uses of the theatre may, if such portion be not more than 25 feet in width, be used for offices, stores or apartments, provided the walls separating this portion from the theatre proper are carried up solidly to and through the roof, and that a fireproof exit is provided for the theatre on each tier, equal to the combined width of exits opening on opposite sides in each tier, communicating with balconies and staircases leading to the street in manner provided elsewhere in this section; said exit passages shall be entirely cut off by brick walls from said offices, stores or apartments, and the floors and ceilings in each tier shall be fireproof. Nothing herein contained shall prevent a roof garden, art gallery or rooms for similar purposes being placed above a theatre or public building, provided the floor of the same forming the roof over such theatre or building shall be constructed of iron or steel and fireproof materials, and that said floor shall have no covering boards or sleepers of wood, but be of tile or cement. Every roof over said garden or rooms shall have all supports and rafters of iron or steel, and be covered with glass or fireproof materials, or both, but no such roof garden, art gallery or room for any public purpose shall be placed over or above that portion of any theatre or other building which is used as a stage. No workshop, storage or general property room shall be allowed above the auditorium or stage, or under the same or in any of the fly galleries. Sec. 83B. Every cart, wagon or other vehicle in which any garden produce or other thing shall be brought to market shall be unloaded immediately on its arrival at the said market and forthwith removed from said market or the limits thereof, under the penalty of ten dollars for every refusal or neglect to remove the same, to be recovered from the owner or owners, or person or persons having charge thereof, severally and respectively.

Sec. 83F. The last preceding section shall not be construed to apply to the carts used by licensed cartmen of this City, nor to wagons, carts or other vehicles owned by countrymen and bringing such countrymen's produce to market.

By adding at the end of Chapter 13, entitled "Miscellaneous Ordinances," the following sections:

12. Contracts for Supplies and Work for the City.

Sec. 502. All supplies to be furnished or work to be done for The City of New York, whether they are to be paid for out of the City Treasury or out of trust moneys under the control of or to be assessed or collected by The City of New York, shall be furnished or performed by contract, except where otherwise provided by law.

Sec. 503. The several departments and officers empowered by law to make contracts on the part of the City shall issue proposals for estimates therefor, and advertise the same, as provided by law. There shall be kept by each of said departments an appropriate box, to be designated "Estimate Box," with a proper opening in the top thereof to receive estimates for which proposals have been issued. Such box shall be kept locked, except at such times as it may be necessary to open the same to examine and decide upon said estimates, and the key thereof shall be retained by the head of the Department. It shall be the duty of the head of the Department to deposit in said box all estimates duly presented to him for work to be done under the direction of the Department, immediately on the receipt thereof by him.

Sec. 504. The proposals for estimates shall be in such form as may be prescribed by the Department making the same, and shall contain the following particulars:

1. They shall require that the person making the estimate shall furnish the same in a sealed envelope to the head of the appropriate department, at his office, on or before a day and hour therein named, not less than ten days from the first publication thereof.

2. They shall state the quantity and quality of supplies, or the nature and extent, as near as possible, of the work required.

3. They shall state that the estimates received will be publicly opened by the head of the department issuing the proposals, at his office, at a day and hour therein mentioned.

4. They shall state the amount in which security is required for the performance of the contract.

5. They shall state, briefly, the several matters required by the next four sections to be contained in or to accompany the estimates.

Sec. 505. Each estimate shall contain—

1. The name and place of residence of the person making the same.

2. The names of all persons interested with him therein; and if no other person be so interested, it shall distinctly state that fact.

3. That it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair, and without collusion or fraud.

4. That no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York, is directly or indirectly interested therein, or in the supplies or the work to which it relates, or in any portion of the profits thereof.

Sec. 506. The estimate shall be verified by the oath, in writing, of the party making the estimate, that the several matters stated therein are in all respects true.

Sec. 507. The estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, to the effect that if the contract be awarded to the person making the estimate, they or it will, upon its being so awarded, become bound as his sureties for its faithful performance, and that if he shall omit or refuse to execute the same, they or it will pay to The City of New York any difference between the sum to which he would be entitled upon its completion and that which The City of New York may be obliged to pay to the person to whom the contract shall be awarded at any subsequent letting; the amount in each case to be calculated upon the estimated amount of the work by which the bids are tested.

Sec. 508. The consent mentioned in the last section shall be accompanied by the oath or affirmation, in writing of each of the persons signing the same, that he is a householder or freeholder in The City of New York, and is worth the amount of the security required for the completion of the contract, and stated in the proposals, over and above all his debts of every nature, and over and above his liabilities, as bail, surety or otherwise, and that he has offered himself as a surety in good faith, and with an intention to execute the bond required by law; and like affidavit as to sufficiency shall be required of an officer of any company so consenting.

Sec. 509. The sealed envelope containing the estimate shall be indorsed with the name or names of the person or persons presenting the same, the date of its presentation, and a statement of the work to which it relates; and no estimate shall be taken from the "Estimate Box," or the sealed envelope thereof, opened by any one, except at the time and in the manner herein designated for deciding on such estimates. At the time and place appointed for that purpose in the proposals as prescribed in this article, the head of the Department, or other officers empowered to make the contract, in the presence of the Comptroller, and such of the parties making them as may desire to be present, shall then and there open the said estimate box; and the estimates to be examined at that time, as may appear from the indorsements thereon, shall be taken from said box. The said head of Department shall then and there publicly open and read all estimates which he may have received for the contract mentioned in such proposals, and shall reject all estimates not furnished in conformity with the law and the ordinances relating thereto and the requirements thereof. The award of the contract shall be made according to law.

Sec. 510. When proposals are issued for a contract to furnish any article of which a sample can conveniently be furnished, the head of the Department issuing the same may require that such sample be delivered at his office or at the office of the head of the appropriate bureau in his Department, within such time before the opening of the estimates as he may prescribe; and if it be not so furnished, or do not conform to the quality required by the proposals, the estimate delivered by the person furnishing or omitting to furnish the same, as the case may be, shall be rejected.

Sec. 511. In all contracts for work for The City of New York where provision is made for the payment of the contract price by installments, a provision shall be inserted that the contractor shall allow ten per cent. of the contract price of the work actually done to remain as security till the whole work shall be completed according to the contract.

Sec. 512. In all contracts for the work for The City of New York upon any public building, or in any public street or place, in the performance of which accidents or injuries may happen to the person or property of another, a provision shall be inserted that the contractor shall place proper guards for the prevention of accidents, and shall put up and keep at nights suitable and sufficient lights during the performance of the work; and that he will indemnify The City of New York for damages or costs to which the City may be put by reason of injury to person or property of another resulting from negligence or carelessness in the performance of the work.

Sec. 513. Every contract for supplies or work by The City of New York shall be executed by the contractor or contractors to whom the same may be awarded, and shall be accompanied by a bond in the penalties mentioned in the proposals therefor, executed by the persons or company consenting to become bound as sureties, or by such other persons or company as shall be substituted therefor, with the consent of the head of the department making such contract, conditioned for the faithful performance of the contract and every provision therein contained, and which bond shall be accompanied by the oath, in writing, of the person signing the same, that each is a householder or freeholder in The City of New York, and of the person or any officer of such company, that he or it is worth the amount of the security required for the completion of the contract and stated in the proposals, as hereinbefore prescribed. And it shall be the duty of the Comptroller to require such sureties to be further examined before himself or an officer authorized to administer oaths deputed by him, in respect to the items and details of their property, before approving the adequacy and sufficiency of such sureties. And the several departments of the City government and officers aforesaid, by which every and each contract for work to be done for The City of New York shall be made in pursuance of these ordinances, shall have power and it shall be their duty to require and enforce the faithful execution of each and every contract so made by them; and in case the contractor or contractors shall fail in any respect to perform the work which he or they have contracted to render or perform within the time limited for the performance of the same, then it shall be the duty of such departments or officers aforesaid having charge of such work to do and complete the same in the manner provided for the performance of the same, in the contract, and the cost of the same shall be a charge against such delinquent contractor or contractors; provided, however, that the head of any department or officers aforesaid, by whom any such contract shall be made, may, on good and sufficient cause, extend for a reasonable time the period fixed for the completion thereof.

Sec. 514. Whenever any contract shall be made hereafter by any of the departments or officers aforesaid of The City of New York, the amount whereof is to be afterward collected by assessment from the property benefited by the work to be done under said contract, it shall be the duty of the head of department or officers aforesaid making such contracts to cause to be inserted therein a clause that, as the work progresses, payments will be made to the contractors by monthly installments of 70 per cent. on the work performed, provided the amount of work done on each installment shall amount to \$1,500; and the head of department making such contracts shall forthwith file a copy thereof with the Comptroller.

Sec. 515. Whenever any payment shall become due upon any contract, according to the provisions thereof or in accordance with any of the provisions of these ordinances, it shall be the duty of the head of department or officer aforesaid having such work in charge to furnish to the person or persons entitled to such payments a certificate, in writing, specifying the contract upon which such payment is due and the amount due upon such contract.

Sec. 516. It shall be the duty of the Comptroller, on the presentation of such certificate being made to him, to pay the amount thereof and indorse such payment upon the contract upon which said payment is made; but no payment shall be made upon such contract beyond the amount thereof, and the final payment thereon shall not be made until the head of department or officer aforesaid having such work in charge shall furnish the Comptroller, who shall file the same in his office, a certificate signed by the head of such department or officer aforesaid, that the work mentioned in such contract has been completed according to the terms of said contract, and to the satisfaction of the head of department giving such certificate.

Sec. 517. The Comptroller shall keep an account of all bonds so issued, specifying the particular work on account of which the same may be issued; and all moneys collected on account of any work for the payment of which said bonds were issued shall be faithfully applied as aforesaid.

Sec. 518. Each and every contractor shall be required to have an affidavit from the surveyor, setting forth the amount of work done, of every description, that may be charged in each bill or assessment list of said contract; and said affidavit shall be attached to said assessment list. The inspector shall also furnish an affidavit attached to each contract that the work is done according to the plans and specifications, said affidavit to be attached to each assessment list before presented for confirmation.

Sec. 519. In all cases of delinquency in the payment of any assessment for work done under a contract made by any contractor with The City of New York in respect to any street or road, and in respect to the building of wharves, piers, slips and sewers in this City, and in all such like contracts on a final settlement with every such contractor, there shall be allowed and paid to such contractor all interest money which shall have been collected on his account or contract, first deducting the collector's commissions on so much of the said interest as shall have been collected and received by him.

Sec. 520. In all contracts for work done at the expense of and by The City of New York for the more speedy execution of any by-laws, ordinances, orders or directions of The City of New York, and which by any law The City of New York is authorized to collect by assessment or otherwise from the owners or occupants, lessees or parties interested in any property deemed benefited thereby, provisions shall be made for the payment of the amount of said contract, on the completion of the work, to the satisfaction of the department making such contract.

Sec. 521. It shall be lawful for the department making any contract of the character mentioned in the preceding section of this article to make provision for the payment to any contractor of installments on account of such work, as the same progresses, reserving thirty per cent. of the contract price of the work actually done, to remain as security till the whole work be completed according to the contract.

13. Transportation of Iron, Steel or Other Material over Streets.

Sec. 522. All rails, pillars and columns of iron, steel or other material, which are being transported over and along the streets of the City of New York upon carts, drays, cars, or in any other manner, shall be so loaded as to avoid causing loud noises or disturbing the peace and quiet of such streets, under penalty of twenty-five dollars for each offense.

14. Walks and Bridges Over Gutters.

Sec. 523. It shall be lawful for any person who so desires to place and keep a bridge over the gutter in front of any building other than those used as private residences, except on Broadway, Fifth avenue and Madison avenue, on the following conditions: First—Application must be made to the Bureau of Licenses, and the sum of one dollar per annum, dating from the granting of such permit, paid for the privilege. Second—Every such bridge shall be constructed under the supervision and subject to the direction of the President of the Borough in which the same shall be constructed. Third—Every such bridge shall be so constructed that it can be easily moved, and it shall be the duty of every person to whom such privilege may be granted, and to all persons now enjoying a like privilege, to clean thoroughly, or cause to be so cleaned, the gutter underneath every such bridge on Wednesday of each week, between the hours of sunrise and 9 o'clock a. m. The Mayor may, for any violation of this ordinance, or on the complaint of any citizen, or for any cause that he may deem sufficient, revoke any such permit so granted, or like privilege now enjoyed without a permit.

15. The Discharge of Combustible Substances.

Sec. 524. No person shall fire, discharge or set off in The City of New York any rocket, cracker, torpedo, squib, balloon or other fireworks, or thing containing any substance in a state of combustion under the penalty of five dollars for each offense.

GENERAL ORDERS.

Alderman Davies called up General Order 158, being a report and resolution, as follows:

No. 963.

The Committee on Finance, to whom was referred on June 26, 1906 (Minutes, page 1249), the annexed resolution in favor of an issue of \$25,000 Special Revenue Bonds for fitting up and equipping new offices for the Bureau for the Collection of Assessments and Arrears of the Department of Finance, respectfully

REPORTS:

That this has been in the Committee's hands for some time, as the advisability of the expenditure was questioned, but, after investigation, your Committee feel that on account of the very large amount of outstanding claims due the City for back taxes and assessments, which are represented in the records of this office, that it is good business to remove them to a more modern and fireproof building than that in which they are at present and to install new fireproof filing cases. The Comptroller has submitted a detailed estimate of the cost, and it seems that it will take the amount requested to do the work. Your Committee therefore recommend the adoption of the resolution.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment is hereby requested to authorize the Comptroller to issue Special Revenue Bonds in an amount not to exceed twenty-five thousand dollars (\$25,000), to be expended for the purpose of fitting up and equipping the new offices to be occupied by the Bureau for the Collection of Assessments and Arrears of the Department of Finance, in the Boroughs of Brooklyn and Manhattan.

JOHN B. DAVIES, B. W. B. BROWN, THOS. J. MULLIGAN, A. L. KLINE, JOHN DIEMER, JAMES W. REDMOND, Committee on Finance.

Alderman Davies moved that this report be recommitted to the Committee on Finance.

Which motion was adopted.

Which was decided in the affirmative.

PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc. on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
