HEALTH DEPARTMENT, CITY OF NEW YORK, }
June 10, 1875. }

To his Honor MAYOR WICKHAM:

MY DEAR SIR—At the conference held to-day, between the Commissioner of Public Works and the Health Commissioners, it was decided that the only plan by which the Harlem Flats can be relieved is by the action of the Board of Aldermen.

Legal difficulties stand in the way of immediate action under ordinary methods, and unless the Board of Aldermen authorize the Commissioner of Public Works to put a force of men into the district at once, to fill up the stagnant waters, and raise the grade of the low and saturated areas, no relief can be secured till the mischief of this season has been already done.

I would urge, therefore, the importance of the immediate passage of the resolutions which have been prepared at this conference for presentation to the Board of Aldermen.

Very respectfully, yours,

C. F. CHANDLER,
President Health Department.

(G. O. 334.)

Resolved, That the sunken lands, from Third avenue to Harlem river, between One Hundred and Sixth and One Hundred and Eighth streets, be filled in by contract or in such manner as the Commissioner of Public Works shall deem best for the interests of the city, under the direction of the Commissioner of Public Works; and that the accompanying ordinance therefor be adopted.

(G. O. 335.)

Resolved, That the sunken lands, between Fourth and Fifth avenues, from Ninety-sixth to One Hundred and Fifth street, be filled in by contract or in such manner as the Commissioner of Public Works shall deem necessary for the interests of the city, under the direction of the Commissioner of Public Works; and that the accompanying ordinance therefor be adopted.

(G. O. 336.)

Resolved, That the sunken lands, between Third and Fifth avenues, from One Hundred and Fifth to One Hundred and Ninth street, be filled in by contract or in such manner as the Commissioner of Public Works shall deem best for the interests of the city, under the direction of the Commissioner of Public Works; and that the accompanying ordinance therefor be adopted.

(G. O. 337.)

Resolved, That the sunken lands, from Third to Fourth avenue, between One Hundred and Third and One Hundred and Fourth streets, be filled in by contract or such manner as the Commissioner of Public Works shall deem necessary for the interests of the city, under the direction of the Commissioner of Public Works; and that the accompanying ordinance therefor be adopted.

By Alderman Gross—

Whereas, The State Assessors have forwarded to the Comptroller their statement of the valuation of real and personal property in all the counties, based upon the reports returned by the local assessors, and on which the tax for the year 1875 is to be levied ; and

Whereas, This statement of the assessors is a more just and fairer exhibit of the taxable value than we have had for a number of years, increasing it in the different counties by \$198,427,229, or 9.15 per cent. if compared with that of 1873, while New York City is burdened only by additional \$14,800,024, which may be accounted for through the annexed parts of Westchester County, for the first time included in the city valuation ; and

Whereas, The State Board of Equalization, which meets in September next, has the power to diminish or increase estimates at its option, a proceeding heretofore invariably reverting to the pecuniary injury of New York City, whose interest at the present time it is to have adopted the estimates as coming from the assessors ; therefore be it

Resolved, That his Honor the Mayor be and is hereby requested to appoint a Committee or Commission of three members, of which Tax Commissioner Andrews shall be one, whose duty it shall be to attend the meeting of the State Board of Equalization, with a view of protecting the interests of this city and of securing a more equitable distribution of the public burden, as has been accorded heretofore.

By Alderman Gilon—

Resolved, That permission be and the same is hereby given to James W. Hart to lay a six-inch iron drain pipe from No. 280 Monroe street to the East river, for the purpose of drawing water to supply a condensing engine, the work to be done at his own expense, under the direction of the Commissioner of Public Works ; such permission to continue only during the pleasure of the Common Council ; the work to be done in such a manner as not to interfere with the public uses of the street, and the said James W. Hart to be responsible for any loss or damage occasioned either in laying such drain pipe, or in the use thereof.

MESSAGES FROM HIS HONOR THE MAYOR.

The President laid before the Board the following message from his Honor the Mayor :

EXECUTIVE DEPARTMENT—CITY HALL, }
NEW YORK, July 1, 1875. }

To the Honorable the Common Council :

GENTLEMEN—I herewith transmit for your information a communication from the Commissioner of Public Works, which refers to a matter of pressing importance, to which I ask your immediate attention.

WM. H. WICKHAM, Mayor.

DEPARTMENT OF PUBLIC WORKS,
COMMISSIONER'S OFFICE, ROOM 19 CITY HALL, }
NEW YORK, June 28, 1875. }

Hon. WILLIAM H. WICKHAM, Mayor of the City of New York :

SIR—By an act passed May 28, 1875, it is directed that—

"The powers conferred upon the Commissioner of Public Works of the City of New York by an act entitled 'An act to provide a further supply of pure and wholesome water for the city of New York,' passed February 27, 1871, and an act to re-enact and amend the same, passed April 6, 1871, shall hereafter be possessed and exercised only with the concurrence of the Common Council, approved by the Mayor of said city ; but when such concurrence shall be given, the said Commissioner of Public Works shall perform and execute all the duties and functions imposed upon him by the provisions of said acts."

Before asking the concurrence above enjoined, it is proper to present, as succinctly as possible, some statistics from the reports of E. H. Tracy, Esq., Chief Engineer, and from other records of the Department, to show the work done, its present condition, and the importance of maintaining and extending it.

Under the act creating the Croton Aqueduct Board in this city, passed April 11, 1849, "The Croton Aqueduct Board, in addition to the matters charged upon them by the amended Charter, are hereby charged with the preservation of the banks of the Croton river from injury or nuisance, with the execution of such measures as may be necessary to preserve and increase the quantity of water and keep it pure. * * * They shall be responsible for the supply of water and the good order and security of all the works * * * and for the fidelity, care, and attention of all persons employed by the Department."

By the Charters of 1870 and 1873, "The Croton Aqueduct Department, with all its powers, duties, and responsibilities," was merged into the Department of Public Works.

By the act of 1875, the exercise of these powers in maintaining the present works, in improving and extending them, both at the sources of supply and in this city, are made dependent on the concurrence of the Common Council, approved by the Mayor of this city.

Water Supply.

The area of land which drains into the Croton river, above the Croton dam, which supplies the water to this city, is about 340 square miles, which, according to the record of rain-fall, will give an average daily supply of water from rain alone throughout the year of about 300,000,000 gallons.

A gauge for many years of the daily quantity of water flowing over the Croton dam in addition to that which is conveyed into the city by the Aqueduct, shows for the past ten years (and presumably for every year previous), an average daily waste of water of 340,000,000 gallons.

It is thus manifest that many of the large springs within the Croton basin receive their supply from sources outside of the water shed, and that a much larger supply can be relied upon, if properly stored, than is shown by calculations from the average rainfall :

Table listing storage capacity of various reservoirs: The Croton Lake (the sedimentary basin of the water supply), at the head of the Aqueduct leading to this city, covers about 400 acres, and has a storage capacity (above a level that will allow the delivery daily of 35,000,000 gallons) of about 500,000,000 gallons. The new Reservoir in Central Park 1,000,000,000 " The old Reservoir in Central Park 150,000,000 " Distributing Reservoir on Fifth avenue 20,000,000 "

Total 1,670,000,000 "

Yet, on the 2d of October, 1869, all of this available storage supply was practically exhausted, and the only supply was an amount not exceeding 27,000,000 gallons per day, then running in the Croton river. But for the early partial closing of the valves at the reservoirs and in this city, the higher parts of the city would have been entirely without water, and the lower parts scantily supplied.

In Putnam county, at or near the sources of many of the tributaries of the river, are natural lakes, generally of great depth, the waters of which, coming from springs within their basins, or near by, are remarkably pure and limpid. These afforded the only immediate means of obtaining a full and adequate supply of water for the city, and in 1870 the right to draw from a number of them was secured, and the outlets cut down. Thus a full and ample supply of pure and wholesome water was furnished to the city during the long drought of 1870, notwithstanding it was much more severe than in 1869.

It is manifest that, if the rains were frequent, and evenly distributed throughout the year, there would be a large and constant supply of water—but the long droughts of Summer and Autumn, and occasionally the severe cold of Winter, so reduce the quantity of water running in the river as to be inadequate to supply the daily needs of the city. Necessity has therefore compelled the resort to Storage Reservoirs, the system of which had been commenced at Boyd's Corner, as early as 1866, which reservoirs are filled during the wet season, and drawn from during the dry season.

Natural Reservoirs.

Table listing natural reservoirs: The lakes, the waters of which are available in case of necessity, are Lake Glenida, 182 acres, drawn down 3 feet, will supply 168,000,000 gallons. " Gilead, 122 " " 12 " " 396,000,000 " " Mahopac, 603 " " 3 " " 584,000,000 " " Kirk, 101 " " 20 " " 528,000,000 " " Barrett, 70 " " 10 " " 198,000,000 " " China, 50 " " 10 " " 132,000,000 "

Total supply from lakes 2,005,000,000 "

Artificial Reservoirs.

Reservoir—Boyd's Corner (finished)..... 2,700,000,000 gallons.
New reservoir on middle branch of Croton river (unfinished)..... 4,000,000,000 "

The Rights of the City.

The rights of the State to the basins of these lakes have been granted to the City, and are held by it.

Private Rights Acquired or Used by the City.

Lake Glenida—Lease of mill rights of Tillott Cole, for \$2,000 per year, which lease expires in September, 1875.
Lake Gilead—The property controlling the right to use the water of this lake was bought by William M. Tweed; and this city, in 1870 and since, has had the use of the water without paying any compensation.

Table with columns for years 1868-1875 and rows for months January-December, showing consumption data.

It is evident from the above data that—
In 1869, careful husbanding of the water in the city reservoirs alone saved a large part of the city from water famine.

The Chief Engineer very justly says, that "it is evident that, in spite of all the restrictions that can be brought to bear against the waste of water, it will be necessary to build an additional aqueduct from Croton river to Harlem river.

Resolved, That the Commissioner of Public Works be and he is hereby authorized and directed to complete the Storage Reservoirs and their appurtenances, now under construction, in Putnam County; and also to protect, maintain and perpetuate the right to draw water from the natural lakes in Putnam County, which have heretofore been used, to assist in maintaining a never failing supply of pure and wholesome water for the City of New York.

Alderman Seery moved that the message be published in the CITY RECORD, printed in full in the minutes, and made the Special Order for the next meeting.

The President put the question whether the Board would agree with said motion. Which was decided in the affirmative.

The President laid before the Board the following message from his Honor the Mayor: (G. O. 333.) EXECUTIVE DEPARTMENT—CITY HALL, NEW YORK, July 1, 1875.

To the Honorable the Common Council: GENTLEMEN—I herewith transmit for your consideration a communication from the Department of Public Parks, to which I invite your prompt attention. W. H. WICKHAM, Mayor. DEPARTMENT OF PUBLIC PARKS, NEW YORK, July 1, 1875.

To his Honor the Mayor: This Department have the care of the Central bridge over the Harlem river at Eighth avenue. Their power is under section 3, chapter 534, of 1871, "to maintain and keep in repair all bridges now existing across said Harlem river, so far as said Board shall consider advisable;" and under section 14 of chapter 335 of 1873, as amended by section 14, chapter 329 of 1874, "to construct and maintain all bridges, etc., so located and laid out."

The bridge is an old one, and at the time of its construction was designed for temporary purposes. It is not now the time to replace it by anything more enduring, yet it must be maintained in order and in safety. It is the only point of crossing the river for several miles. The travel is constant, and the navigation requires the daily use of the draw.

The bridge is very much out of repair, and is unsafe for travel. In undertaking to keep it in repair there are two divisions of the work: 1st. The two main spans, or stationary part of the bridge; and, 2d. The draw.

The repairs consist principally in replacing old and decayed planks and timbers with sound ones. These unfit pieces cannot be discovered, except one by one, as they are uncovered; and the work requires the constant attention of an engineer to direct, from step to step, what more will be done. In advance, it is difficult, therefore, to prepare specifications, and to do the work by contract.

In May, 1873, the necessary repairs were done by day's work by Mr. Anthony Imhoff. The expectation that the visible need of repairs would fall within \$1,000 was disappointed as it proceeded. After it was begun it could not be discontinued, and it had to go to the extent of over \$2,000; for all unsound timber, as it was disclosed, had to be replaced with sound ones.

Payment of the bill of Mr. Imhoff has been refused by the Comptroller, on the ground that as the work exceeded \$1,000, it should have been done by contract (Charter, 1873, sec. 91). It remains unpaid.

In the present year the repairs needed were mainly upon the draw. An attempt was made to prepare specifications and a contract was advertised for. The lowest bidder proved to be a man unused to this kind of work; the amount of work required exceeded the expectation of the contractor; the contractor failed to progress with his work within the time specified in the contract, and his default on that ground was insisted upon by the Department. His work is suspended; he cannot complete it without loss, and the matter remains unadjusted.

In the meantime the repair of the bridge is a point of imperative necessity for the public safety and convenience. The travel cannot now be interrupted to repair the draw; that must be delayed until the close of this season's navigation; but the bridge must be maintained as it now stands for this season.

The work to be done is of two sorts: 1st. The replanking of the main spans; 2d. The repair of the draw so that it can be held together, and worked during the present season.

As it now appears, each of the divisions of the work can be done within the limit of \$1,000; together they will exceed it.

If we attempt to do it by contract, great delay will be occasioned for the advertisement and preliminary proceedings. Accidents may occur from its unsafe condition. In doing it otherwise than by contract, it is our duty to take such steps as will free the workmen from obstacles to payment after the work is done.

We, therefore, respectfully present this subject to you, and suggest that the passage of an ordinance by the Common Council, under sections 90 and 91 of the Charter, authorizing us to do the work otherwise than by contract, will be the proper way of relieving the difficulty.

The following resolution is respectfully submitted for adoption by the Common Council:

Resolved, That it is hereby ordered that the Commissioners of the Department of Public Parks shall have all the necessary repairs to the Central or McComb's Dam bridge, over the Harlem river, executed and done in such manner, by day's work or otherwise, as to them shall seem best for the interest of the city, without entering into a contract therefor, as provided by section 91, chapter 335, Laws of 1873.

I remain, respectfully, yours, HENRY G. STEBBINS, President D. P. P.

Table titled 'Present Supply of Storage Water.' showing gallons for various reservoirs and natural lakes, totaling 5,970,000,000.

The new Reservoir on the middle branch of Croton river, when completed, will supply 4,000,000,000 gallons.

The daily consumption of water has been steadily increasing, year by year, as follows:

Table showing average daily consumption in gallons for the years 1870, 1871, 1872, 1873, 1874, and for five months of 1875.

The Aqueduct is now used very nearly to its full capacity, and with the growth of the city, and the increased facilities for distributing water at higher elevations, the rate of consumption and waste will, no doubt, be proportionally greater each year, and soon the demand for water will exceed the capacity of the present Aqueduct to deliver, and the city will be stinted in supply.

A year with the drought that occurred in 1870, with the consumption of the present time, would require a storage capacity of 4,023,200,000 gallons.

The following table, made up from the records of this Department, shows the number of days in each year, since 1868, during which the direct flow of the Croton river has not furnished a full supply of water for the city:

The President laid before the Board the following message from his Honor the Mayor :

EXECUTIVE DEPARTMENT—CITY HALL, }
NEW YORK, July 1, 1875.

To the Honorable the Common Council :

GENTLEMEN—I herewith transmit for your attention and information a communication from the Commissioner of Public Works. The subject is one of urgent importance, and the facts stated by the Commissioner show that the case presented demands immediate action.

WM. H. WICKHAM, Mayor.

DEPARTMENT OF PUBLIC WORKS,
COMMISSIONER'S OFFICE, ROOM 19, CITY HALL, }
June 25, 1875.

Hon WM. H. WICKHAM,
Mayor of the City of New York :

SIR—Permit me to ask you to call the attention of the Common Council to the recommendation transmitted by you on the 9th instant relating to the proposed extension of the water supply in this city.

When they concur in the proposed action of this Department some weeks will elapse before the necessary pipe and valves to commence work with can be brought into the city, and I fear a most valuable portion of the dry and warm season will be lost, when the streets are least encumbered with vehicles of pleasure and traffic.

The work asked to be concurred in by the Common Council comprises :

An increased supply of water, and its delivery at higher elevations in all parts of the city, and its distribution in the Twenty-third and Twenty-fourth Wards.

The importance of this work will be seen as follows :

This increased service will permit many of the private force pumps to be dispensed with, and especially in the lower part of the city—it will enable the use of fire hose directly attached to the hydrants, and carried to the upper stories of many buildings without the aid of steam power.

Before the consumption outgrew the capacity of the old Croton main system, Croton water reached a much greater height than at present ; its absence on the upper floors has long been felt, and owners of property and fire insurance companies in the lower part of the city have had reason to believe that, under the appropriation of last session, the water supply would be restored at least to its former height.

The annual premium on insurance risks below Fifty-ninth street is over \$7,000,000, the largest portion of which is on property below Canal street, where the means of extinguishing fires are most demanded ; and so insecure have the companies felt by the absence of a reasonable supply of water that I am informed of an intention to increase the rates in certain parts of the city if the means of extinguishing fires are not increased.

Certainly, increased facilities for the delivery of water will add to the security of property against fires, and should prevent an increase of the rate of insurance, if they do not cause a reduction.

Increased distribution of Croton water will add to the revenue of the city.

The demand for water above the first stories in the higher portions of the city has been very great and urgent, and, for sanitary purposes alone, should be gratified at the earliest day.

The 48-inch pipe to be laid in Eighty-sixth street to First avenue is designed to supply water both north and south through First, Second, Third, and Lexington avenues, thus relieving the 20-inch pipe now giving water to all the district east of Fourth avenue, and permitting it to carry water into the lower wards.

It is the intention of the Department thus to have each district into which the city is divided amply supplied for ordinary purposes, independent of adjacent districts, yet to have all pipes connected that, in case of fire, the whole supply can be thrown wherever desired.

Already the demand for water in the Twenty-third and Twenty-fourth Wards has become very urgent, and cisterns have to be filled from fire hydrants.

In the upper wards of the city the dependence upon cisterns and wells is becoming more and more precarious ; and as these parts become more settled, the demand for Croton water will become imperative. Indeed, I think the wells, often in cities a fruitful cause of disease, should be dispensed with by law as rapidly as possible.

The work proposed to be done this season also involves the replacing of many old valves, which, from long service, are becoming unreliable. Lately a large part of the city was, for some hours, deprived of water by the inability of an employee to turn a rusty valve.

The supply of the sizes of pipe, and the numbers of valves wanted, is exhausted, or nearly so. The appropriations for this year cannot be made available with concurrence in the recommendation of this Department by the Common Council, approved by the Mayor.

Up to the act of May 28, 1875, the responsibility for the water supply in this city—on which depend its health, its manufactures, and, largely, the supply of its commerce—has rested in the Department of Public Works, which has not failed, when in its power, to meet its responsibilities.

Now the responsibility devolves upon the Common Council, until restored to this Department by the approval, sanctioned by the Mayor, of the recommendations made on the 9th inst.

Unless the Common Council sanctions the recommendation, no part of the appropriation for this year can be made available, and all work of this kind must cease till means are provided.

Very respectfully, your obedient servant,

FITZ JOHN PORTER,
Commissioner of Public Works.

Alderman Seery moved that the message be published in the CITY RECORD, printed in the minutes, and made the second special order of business for the next meeting.

The President put the question whether the Board would agree with said motion. Which was decided in the affirmative.

EXECUTIVE DEPARTMENT, CITY HALL, }

To the Honorable the Common Council :

GENTLEMEN—I herewith transmit for your consideration a communication from the Commissioner of Public Works, as to which I recommend prompt action.

WM. H. WICKHAM, Mayor.

DEPARTMENT OF PUBLIC WORKS,
COMMISSIONER'S OFFICE, ROOM 19, CITY HALL, }
NEW YORK, June 30, 1875.

Hon. WILLIAM H. WICKHAM,
Mayor of the City of New York :

SIR—In establishing the grade of the Eastern Boulevard on Avenue B, from Eightieth to Eighty-sixth street, it was found advantageous to the public interest to raise the grade of Eightieth street, at Avenue B, seven feet and six inches, making the new grade coincide with the old grade at Avenue A. The street, which has previously been graded, curbed, guttered, and flagged, will have to be filled in to this new grade with material to be obtained elsewhere.

In the grading of Avenue A, as a part of the Eastern Boulevard improvement, a large quantity of surplus material is now being excavated, by day's work. This material could be used to great and to the best advantage in raising Eightieth street to the new grade, and the cost of both improvements diminished, by apportioning the expense between Avenue A and Eightieth street.

I would, therefore, respectfully recommend the adoption of an ordinance, a draft of which is herewith submitted, authorizing and directing this Department to regulate, grade, curb, gutter, and flag Eightieth street, from Avenue A to B, by day's work or otherwise, in accordance with the established grade.

Very respectfully,

FITZ JOHN PORTER,
Commissioner of Public Works.

Resolved, That Eightieth street, from the easterly line of Avenue A to the East river, be regulated and graded, curb and gutter stones set and reset, and the sidewalks flagged and reflagged a space of four feet wide, where not already done, and that the labor and work required for such regulating and grading, setting and resetting of curb and gutter stones, and laying and relaying of flagging be done by day's work or otherwise, and that the materials required therefor be procured by the Commissioner of Public Works in such manner as he may deem for the best interests of the city and the property owners, all to be done under the direction of the Commissioner of Public Works ; and that the accompanying ordinance therefor be adopted.

Alderman Seery moved that the paper be laid over and made the third special order of business for the next meeting.

The President put the question whether the Board would agree with said motion. Which was decided in the affirmative.

The President laid before the Board the following communication from Henry Bergh, President of the Society for the Prevention of Cruelty to Animals :

THE AMERICAN SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS, }
HEADQUARTERS FOURTH AVENUE, COR. TWENTY-SECOND STREET,
NEW YORK, 28th June, 1875. }

To the Honorable the Board of Aldermen of the City of New York :

GENTLEMEN—Last summer an ordinance was passed by the Common Council, requiring the indiscriminate capture and slaughter of all dogs running at large in this city, on the assumption that they might become attacked with hydrophobia. The painful scenes of disorder, cruelty, and demoralization, which resulted from that enactment, are fresh in the minds of all, and learning that it is your intention to restore it this season, I beg permission to offer my own earnest protest, and that of this society, against it, and for the following reasons, among numerous others :

First.—Of all the maladies which mankind are heirs to, that of hydrophobia is the most rare, so much so, indeed, as to incline some of the ablest physiologists to believe that such a disease does not exist.

Second.—Madness in the canine race, is no more hydrophobia than it is in the human family. It is pronounced by learned scientists to be a nervous disorder, and when we remember the all controlling influence of the imagination over disease, it is not surprising that the symptoms of hydrophobia should become apparent, after being bitten by an animal (particularly a dog), the consequence of the insane treatment they receive at this season of the year. A horse is just as liable to have hydrophobia, if the disease exists, as the dog ; but who ever knew any one to be similarly alarmed by its bite ? I have read of two remarkable instances of the influence of the imagination over the mind and body. One was of a man who conceived himself to be an umbrella, and was continually found leaning in a corner of the room, after the fashion of that useful article when in a state of repose. The other was that of a woman, who believed herself to be a teapot, and with one arm a kimbo, and the other with the elbow resting against her side, and the hand extended, perpetually waited to “be poured out !”

Third.—Dogs are more liable to all disorders in the winter than in the summer, and some of the strongest believers in hydrophobia concede this fact.

Finally.—Even though it be true, that at this, or any other season of the year, the dog becomes afflicted with any dangerous disorder, the plan adopted last summer, for the protection of the citizens, was the worst which could be devised. It may be called the substitution of a most pernicious moral disease for a rare physical disorder. By it the youth of our city were educated to theft and cruelty. By virtue of the premiums offered in the ordinance, the market was recruited by vagrant dogs, brought from outside the city limits, and while the money thus expended ran uselessly away, like water through a sieve, or still worse, to fill the pockets of some political tool perhaps, the community was held in a constant and exaggerated terror. Besides, all symptoms arising from so-called hydrophobia may occur from other causes.

During the mayoralty of Mr. A. Oakey Hall, and long thereafter, the dogs were unmolested, and were generally regarded as comparing most favorably with the official bipeds of that moral epoch, in all their relations to society. I would most respectfully recommend a return to those “good old times,” as certain persons now call them, in so far at least as those four footed citizens are concerned, and to suffer “a masterly inactivity” to prevail in regard to them.

I have the honor to be your most obedient servant,
HENRY BERGH,
President.

Sec. 2. The Mayor of the City of New York is hereby authorized and empowered to take such measures as he may deem most efficient to carry into effect the provisions of section 1 of this ordinance; and for that purpose is further authorized and empowered to appoint two or more persons, each of the age of twenty-one years or upwards, in each of the Assembly Districts in the city of New York, to seize and capture all such dogs found running loose or at large, and to pay such persons so appointed, for every such dog so captured and delivered at a place to be provided and designated by the Mayor, the sum of fifty cents. Sec. 3. The person authorized to pay for the capture of such dogs shall render under oath, semi-monthly, a statement of all dogs so captured and killed, and the amount paid therefor, to the Mayor of this city, who shall thereupon certify the same to the Comptroller, when a warrant for the amount shall be drawn in favor of the said Mayor for the sum thus expended, which shall be paid, and the other expenses of enforcing the provisions of this ordinance, until otherwise ordered, from the Appropriation for City Contingencies.

For this purpose he requests of you a permit to place a tank or box, three feet wide by four long, and five high, upon the curb of Canal street, on the north side, west of Broadway, near to that street, and close to the hydrant now there, from which the water is to be obtained, and carried in pipes around the inside of the box or tank, otherwise filled with ice.

This he proposes to make, sustain, and remove at his own expense, and under the direction of the Commissioner of Public Works, or such subordinate as he directs.

Your petitioner desires to place the cool fountain in said place because it will be under his own eye, and because one or two policemen are always stationed on or near said place, and can see that the water is not used wastefully nor injudiciously.

JURORS.

NOTICE IN RELATION TO JURORS FOR STATE COURTS.

OFFICE OF THE COMMISSIONER OF JURORS, NEW COUNTY COURT-HOUSE, NEW YORK, JUNE 1, 1875.

APPLICATIONS FOR EXEMPTIONS WILL BE heard here, from 9 to 4 daily, from all persons hitherto liable or recently serving who have become exempt, and all needed information will be given.

Those who have not answered as to their liability, or proved permanent exemption, will receive a "jury enrollment notice," requiring them to appear before me this year. Whether liable or not, such notices must be answered (in person, if possible, and at this office only) under severe penalties. If exempt, the party must bring proof of exemption; if liable, he must also answer in person, giving full and correct name, residence, etc., etc. No attention paid to letters.

When possible and legal, serving jurors will be allowed to select a convenient season—if application be made in time. Persons "enrolled" as liable must serve when called or pay their fines. No mere excuse will be allowed or interference permitted. The fines, received from those who, for business or other reasons, are unable to serve at the time selected, pay the expenses of this office, and if unpaid will be entered as judgments upon the property of the delinquents.

The Commissioner will receive applications for relief from those jurors who have served continuously and promptly for several years, or have done excessive jury service in the State Courts.

All good citizens will aid the course of justice, and secure reliable and respectable juries, and equalize their duty by serving promptly when summoned, allowing their clerks or subordinates to serve, reporting to me any attempt at bribery or evasion, and suggesting names for enrollment. Persons between sixty and seventy years of age, summer absentees, persons temporarily ill, and United States and District Court jurors are not exempt.

Every man must attend to his own notice. It is a misdemeanor to give any jury paper to another to answer. It is also punishable by fine or imprisonment to give or receive any present or bribe, directly or indirectly, in relation to a jury service, or to withhold any paper or make any false statement, and every case will be fully prosecuted. No fees of any kind exist or are allowed in regard to jury notices, and any one asking, receiving, or giving any such "fee" or "present" will be arrested, and, if possible, punished to the full extent of the law.

DOUGLAS TAYLOR, Commissioner, County Court-house (Chambers street entrance).
