NEW YORK CITY COMMUNITY ATLAS

EASY ACCESS TO THE COMPLEX 2GEN DATA
THAT INFORMS YOUR NEIGHBORHOOD EFFORTS

ABOUT

CENTER FOR INNOVATION THROUGH DATA INTELLIGENCE

CIDI is a research/policy center located in the Office of the Mayor of the City of New York under the auspice of the Deputy Mayor for Health and Human Services. As part of the Office of the Mayor, CIDI conducts citywide interagency research to identify areas of service need in the City. The vision of CIDI is to make data come alive to inspire change.

To learn more about CIDI and to access this report, please visit www.nyc.gov/cidi.

INTRODUCTION

GAIN EASY ACCESS TO THE COMPLEX 2GEN DATA THAT INFORMS YOUR NEIGHBORHOOD EFFORTS

People who want to make their neighborhood a better place to live and raise a family need to know where their effort matters most. This kind of data is available, but not easy to find, for either the professional or the responsible resident. There exists an overflow of data from a myriad of sources, but none gives a holistic set of neighborhood indicators as to what makes families thrive or fail to flourish.

To focus their effort and inform their strategic planning, the Administration for Children's Services (ACS) asked the city's Center for Innovation through Data Intelligence (CIDI) to provide data for 11 Community Districts (CD). Based on the positive reception, we realized these neighborhood profiles would be helpful to all the neighborhoods that make up the City of New York. The purpose of this NYC Community Data Atlas is to give access to the complex data that can direct efforts to strengthen family well-being throughout all of our neighborhoods.

WE TOOK A TWO-GENERATIONAL (2GEN) APPROACH TO DEEPEN UNDERSTANDING

The Center for Innovation through Data Intelligence (CIDI) under the Mayor's Office created profiles for all 59 CDs to reflect their varied characteristics. Each profile starts with a demographic overview and description of community boundaries, and then presents sections organized around the core components of the Two-Generational (2Gen; Children-Parents) and Three-Generational Approach (3Gen; Children-Parents-Grandparents). These emphasize the transfer of both vulnerabilities and assets from one generation to the next.

The specific profile sections are: Demographics, Cultural Connections, Health and Well-being, Economic Assets, and Education. Lastly, each profile presents a child welfare and juvenile justice section that shows the community's involvement in ACS programs.

RESEARCHERS COLLABORATED WITH ACS TO PINPOINT THE INDICATORS THAT MATTERS MOST

Each section's indicator list has been diligently curated to include 'Quality Indicators' through comprehensive discussions with government agencies. Quality indicators are those for which we can (1) calculate and highlight the statistical reliability of indicator values; (2) source the data from trusted New York City agencies and/or other government datasets; (3) make publicly available; (4) update regularly, ideally every year; and (5) make available at meaningful and familiar geographical levels for local communities.

KNOW THE **DATA THEMES** TO TRANSFORM YOUR NEIGHBORHOOD

The geographic levels at which the profiles provide data are the City level, CD level, and when possible at the more granular level of the Neighborhood Tabulation Area (NTA). NTAs are specific to New York City and consist of a number of Census Tracts residing exactly within the boundary of a Public Use Microdata Area (PUMA), which approximates to CD. Because NTAs are smaller than PUMAs and CDs, data at this level capture local dynamics of neighborhoods that would otherwise be obscured at the CD level. Providing indicators at the NTA level (1) provides an understanding of how different parts of community can vary from one another; (2) helps leaders focus strategies in a specific geographic area; and (3) allows for a more manageable assessment of outcomes. Thus, the profiles allow communities to understand variability within their geography as well as compare their geography with other CDs in order to understand their community within the larger NYC context.

On a final note, these community profiles have limitations. More and/or different indicators could have been included and we will build on these profiles where there is room for improvement. However, our focus on the statistical reliability of indicators and use of the 2Gen framework provided a reasonable and rigorous theoretical, research-based approach to the selection of these community indicators.

FAMILIES' WELL-BEING HINGES ON THE **CULTURAL CONNECTIONS**

This 2Gen core component focuses on the formal and informal networks through which people develop meaningful connections, find support, and access resources and knowledge. These networks and the skills to build them -termed social capital- are important contributors to families' well-being.

FAMILIES CAN THRIVE WITH **HEALTH AND WELL-BEING**

This 2Gen core component focuses on the impact that physical and mental health have on a family's ability to thrive. This core component also puts emphasis on building strong parent-child relationships to encourage healthy attachment. Health helps individuals and communities mobilize their resources, improve their economic productivity and educational attainment, and ultimately attain a better life.

CHILD WELFARE AND JUVENILE JUSTICE BUILDS TRUST AND STABLE RELATIONSHIPS

ACS has a variety of primary prevention services through CFWB aimed at reducing the need for ACS intervention, including the CPP and Family Enrichment Centers. When intervention is necessary, ACS provides a continuum of services and support to children and families aimed at strengthening stability and well-being for both families and the communities where they live.

In child welfare, the Division of Child Protection investigates all allegations of abuse and maltreatment. ACS also provides free prevention services to families involved in investigations to prevent foster care placement through the Division of Preventive Services. The Family Permanency Services Division works with ACS-contracted foster care provider agencies and other key stakeholders to achieve positive safety, permanency, and well-being outcomes for children and families in the foster care system.

In juvenile justice, the Division of Youth and Family Justice provides a wide range of services and programs to improve the lives of children and families involved in the juvenile justice system. The division provides preventive programs, therapeutic treatments, and other services to youth in custodial care, and helps youth develop the tools necessary to leave the justice system for good.

BUILDING ECONOMIC ASSETS HELPS FAMILIES THROUGH TIMES OF NEED

This 2Gen core component focuses on the role that building financial assets plays in a family's economic mobility, and how family income and financial security impact a child's future prospects. Helping families increase their economic security and mobility through housing and connections to concrete supports in times of need can make a huge difference.

EDUCATION LIFTS FAMILIES FROM POVERTY TO OPPORTUNITY

The 2Gen core component is emphasized because of its role in alleviating a cycle of intergenerational poverty and replacing it with a cycle of intergenerational opportunity. It is important from an early age to invest in childhood development with programs like child care, Head Start, and Pre-K. For older youth, providing academic enhancement activities and K-12 educational support is critical for success later in life. For adults, learning continues through postsecondary education, and participating in the labor market. Parents who complete a college degree increase their incomes, and a parent's level of educational attainment is a strong predictor of a child's success.

We believe and hope that this first NYC Community Atlas will serve as an important resource that facilitates holistic and action-oriented planning for its audiences and that it ultimately improves access to quality opportunities for NYC families and children.

GRATITUDE TO OUR LEADERS AND PARTNERS WITH WHOM WE WORK TOGETHER TO PROVIDE EQUAL ACCESS AND OPPORTUNITY FOR ALL

CIDI thanks Mayor Bill de Blasio, Deputy Mayor Dr. Raul Perea-Henze, Commissioner David A. Hansell and the entire team at ACS' Division of Child Well-Being for their leadership in making this New York City Community Atlas available.

We would also like to acknowledge CIDI staff and interns including: Nebahat Noyan, project manager, report and information designer; Anustha Shrestha, CIDI Intern, data analyst; Jacob Berman, data analyst; and Eileen Johns, Erin Eastwood and Andy Martens.

Special thanks to service providers, community members and change makers of the initial 11 community districts: Mott Haven (BX01), Hunts Point/Longwood (BX02), Highbridge (BX04), Bedford-Stuyvesant (BK03), Bushwick (BK04), East New York (BK05), East Flatbush (BK17), East Harlem (MN11), Elmhurst/Corona (QN04), Jamaica (QN12), and St. George/Stapleton (SI01).

Maryanne K. Schretzman
CIDI Executive Director

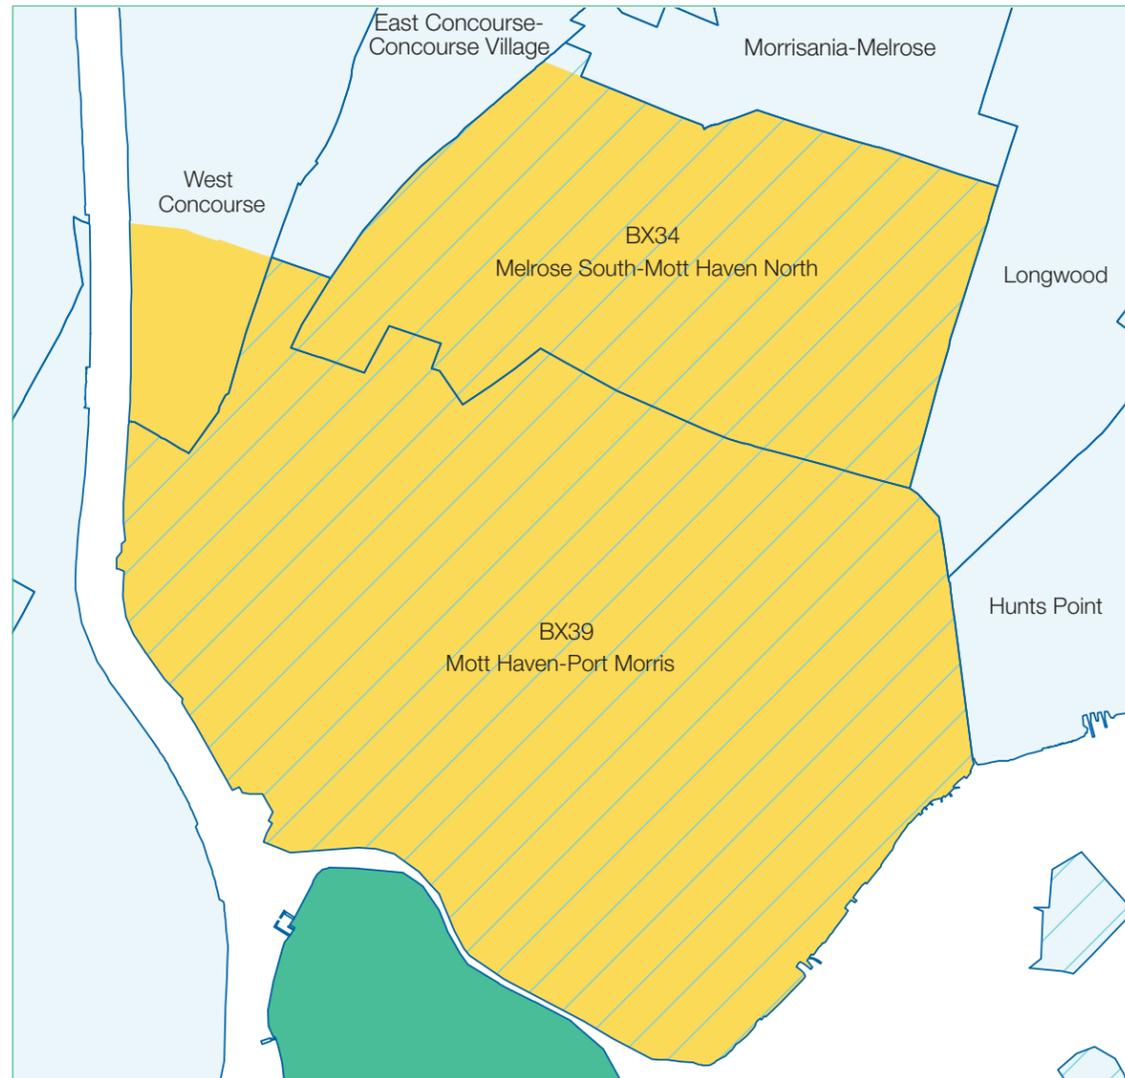

February 2020

SAMPLE MAP AND TABLE

Click the Triangle for "Back to Table of Contents"

Text in green describes the content of the maps and tables in this report.

BX01	COMMUNITY DISTRICT 1-MOTT HAVEN AND MELROSE	NAME OF CD ¹
BX34	MELROSE SOUTH-MOTT HAVEN NORTH	NAME OF NTAs ²
BX39	MOTT HAVEN-PORT MORRIS	

- 1 COMMUNITY DISTRICT**
CDs are political geographical units unique to NYC. CDs demonstrate indicators at a larger geography. Since they are not census-based geographies, the boundaries of CDs and NTAs do not always align.
- 2 NEIGHBORHOOD TABULATION AREAS**
NTAs demonstrate indicators at a smaller geography within CDs. Reviewing NTA-level indicators allow the user to note variations in a larger geography within the CD.
- SURROUNDING NTAs**
Surrounding NTAs are included by name to provide more navigation to the user.

METHODOLOGY

MAPS

INDICATOR CALCULATIONS

The indicators are primarily expressed as either percentages or rates.

RATES

The number of individuals/events with a given characteristic per 1,000 individuals/events (both with and without the characteristic). Rates are typically used for rare events.

CALCULATION EXAMPLE: TEEN BIRTHS

of births in which the mother was under 20 years old in the geographic area
————— × 1000
total # of women 15 to 19 years old in the geographic area.

PERCENTAGES

The number of individuals/events with a given characteristic divided by the total individuals/events (both with and without that characteristic).

CALCULATION EXAMPLE: INDIVIDUALS BELOW POVERTY: AGES 0-17

of individuals aged 17 years and under living below the poverty threshold in the geographic area
————— × 100
total # of individuals aged 17 years and under in the geographic area

HEALTH AND WELL-BEING265

CHILD WELFARE AND JUVENILE JUSTICE268

ECONOMIC ASSETS270

EDUCATION273

TOTAL POPULATION

The total population in the geographic area.

TOTAL POPULATION BY RACE (%)

These indicators measure the population of the following racial groups as a percentage of the total population in the geographic area.

*LatinX: Hispanic/LatinX is being used as a gender-neutral and nonbinary alternative to the U.S. Census indicator of Hispanic/Latino

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

TOTAL POPULATION BY GENDER (%)

These indicators measure the male and female population as a percentage of the total population in the geographic area. Male and female, in this measure, refer to the biological sex of an individual.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

TOTAL POPULATION BY AGE GROUP (%)

These indicators measure the population of age groups as a percentage of the total population in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA
Geography: City, CD, NTA

FOREIGN-BORN (%)

This indicator measures the population born outside of the U.S. and U.S. territories as a percentage of the total population in the geographic area. This indicator does not include as foreign-born people who were born abroad to American parent(s).

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

MOST COMMON LANGUAGE OTHER THAN ENGLISH

This indicator measures the most common language spoken by the population in the geographic area who report that they speak English less than “very well.”

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

SECOND MOST COMMON LANGUAGE OTHER THAN ENGLISH

This indicator measures the second most common language spoken by the population in the geographic area who report that they speak English less than “very well.”

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

THIRD MOST COMMON LANGUAGE OTHER THAN ENGLISH

This indicator measures the third most common language spoken by the population in the geographic area who report that they speak English less than “very well.”

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

MOST COMMON COUNTRY OF BIRTH OTHER THAN THE U.S.

This indicator measures the most common country of birth among the population in the geographic area who were born outside of the U.S. and U.S. territories.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

SECOND MOST COMMON COUNTRY OF BIRTH OTHER THAN THE U.S.

This indicator measures the second most common country of birth among the population in the geographic area who were born outside of the U.S. and U.S. territories.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

THIRD MOST COMMON COUNTRY OF BIRTH OTHER THAN THE U.S.

This indicator measures the third most common country of birth among the population in the geographic area who were born outside of the U.S. and U.S. territories.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

LATE OR NO PRENATAL CARE (%)

This indicator measures live births receiving late prenatal care as a percentage of all live births in the geographic area. Late prenatal care is defined here as births that received prenatal care after the first and second trimesters or births that received no prenatal care at all.

Sources: NYC Department of Health and Mental Hygiene, Bureau of Vital Statistics (2010-2014), NYC Department of Health and Mental Hygiene, Bureau of Vital Statistics (2016)
Geography: City, CD, NTA

PRETERM BIRTHS (%)

This indicator measures preterm births as a percentage of all live births in the geographic area. Preterm birth is defined as a birth that occurs before 37 weeks gestation.

Sources: NYC Department of Health and Mental Hygiene, Bureau of Vital Statistics (2010-2014), NYC Department of Health and Mental Hygiene, Bureau of Vital Statistics (2016)
Geography: City, CD, NTA

ANNUAL BIRTHS (AVG)

This indicator measures the average number of births per year in the geographic area.

Sources: NYC Department of Health and Mental Hygiene, Bureau of Vital Statistics (2010-2014)
Geography: City, CD, NTA

TEEN BIRTHS (PER 1,000 WOMEN AGES 15 TO 19 YEARS)

This indicator measures the number of births in which the mother was under 20 years old per 1,000 women aged 15 to 19 years in the geographic area.

Sources: NYC Department of Health and Mental Hygiene, Bureau of Vital Statistics (2010-2014), NYC Department of Health and Mental Hygiene, Bureau of Vital Statistics (2016)
Geography: City, CD, NTA

INFANT MORTALITY (PER 1,000 LIVE BIRTHS)

This indicator measures the number of infant deaths per 1,000 live births (3-year average) in the Community District, and the number of infant deaths per 1,000 live births (1-year).

Sources: NYC Department of Health and Mental Hygiene, Bureau of Vital Statistics (2014-2016; 2016)
Geography: City, CD

HEALTH INSURANCE (%)

This indicator measures the civilian noninstitutionalized population with health insurance coverage as a percentage of the total civilian noninstitutionalized population in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

MEDICAID ENROLLMENT (%)

This indicator measures the population that was continuously enrolled (for 11 months or more) in Medicaid as a percentage of the total population in the geographic area.

Sources: NYC Department of Health and Mental Hygiene, Salient NYC Medicaid Enterprise System (2015)
Geography: City, CD, NTA

CHILDREN COVERED BY MEDICAID (%)

This indicator measures the population aged 17 years and under that was continuously enrolled (for 11 months or more) in Medicaid as a percentage of the total population aged 17 years and under in the geographic area.

Sources: NYC Department of Health and Mental Hygiene, Salient NYC Medicaid Enterprise System (2015)
Geography: City, CD, NTA

NO HEALTH INSURANCE: AGES 0-17 (%)

This indicator measures the civilian noninstitutionalized population aged 17 years and under with no health insurance coverage as a percentage of the total civilian noninstitutionalized population aged 17 years and under in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

DISABILITY (ANY): AGES 0-17 (%)

This indicator measures the civilian noninstitutionalized population aged 17 years and under with a disability as a percentage of the total civilian noninstitutionalized population aged 17 years and under in the geographic area. Disability includes hearing, vision, cognitive, ambulatory, self-care, or an independent living difficulty.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

DISABILITY (ANY): ADULTS 18+ (%)

This indicator measures the civilian noninstitutionalized population aged 18 years and over with a disability as a percentage of the total civilian noninstitutionalized population aged 18 years and over in the geographic area. Disability includes hearing, vision, cognitive, ambulatory, self-care, or an independent living difficulty.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

HOSPITALIZATIONS: PREVENTABLE (PER 100,000 POPULATION)

This indicator measures the age-adjusted number of all preventable hospitalizations per 100,000 individuals aged 18 and older in the geographic area.

Sources: NYC Department of Health and Mental Hygiene, Statewide Planning and Research Cooperative System (SPARCS) Inpatient Hospitalizations (2012-2014)
Geography: City, CD, NTA

JUVENILE JUSTICE

ADMISSIONS TO JUVENILE DETENTION (PER 1,000 CHILDREN AGED 12 TO 17 YEARS)

This indicator measures the number of children who are admitted to juvenile detention per 1,000 children between ages 12 to 17 years in the geographic area. Rates are calculated using admissions, which include children between 11 and 17 years as the numerator and the population estimates of children between 12 and 17 years from available American Community Survey data, as the denominator.

Sources: Administration for Children's Services, CJIS (2017), American Community Survey 5-Year Estimate (2012 -2016)

Geography: City, CD, NTA

CHILD WELFARE

CHILDREN IN INVESTIGATIONS (%)

This indicator measures the population of children below 18 years in abuse/neglect consolidated investigations as the percentage of the total population of individuals below 18 years old in the geographic area. Geographic area is defined by the residence of the children in the investigation. If children in the same investigation live at different addresses, the address of only one child was used to designate the geographic area. Children in more than one investigation are counted more than once.

Sources: Administration for Children's Services, Connections (2017), American Community Survey 5-Year Estimate (2012-2016)

Geography: City, CD, NTA

CHILDREN IN INDICATED INVESTIGATIONS (%)

This indicator measures the population of children below 18 years in indicated investigations as the percentage of total individuals below 19 years old in the geographic area. Geographic area is defined by the residence of the children in the indicated investigation. If children in the same investigation live at different addresses, the address of only one child was used to designate the geographic area. Children in more than one indicated investigation are counted more than once.

Sources: Administration for Children's Services, Connections (2017), American Community Survey 5-Year Estimate (2012-2016)

Geography: City, CD, NTA

CHILDREN IN CHILD WELFARE PREVENTION CASES (%)

This indicator measures the population of children below 18 years who were served by Child Welfare Preventive Services as the percentage of the total population below 18 years old in the geographic area. This indicator measures the unique counts of children served during the year. If a child had more than one home address during the year, the most recent was used.

Sources: Administration for Children's Services, PROMIS (2017)

Geography: City, CD, NTA

FOSTER CARE PLACEMENTS (PER 1,000 CHILDREN BELOW 18 YEARS)

This indicator measures the number of children below 18 years in foster care per 1,000 children below 18 years old in the geographic area. This excludes Close to Home placements.

Sources: Administration for Children's Services, CCRS (2017), American Community Survey 5-Year Estimate (2012-2016)

Geography: City, CD, NTA

FOSTER CARE POPULATION (PER 1,000 CHILDREN BELOW 21 YEARS)

This indicator measures the number of children below 21 years old in foster care on January 31, 2019 per 1,000 children below 21 years in the geographic area. This includes children in 24 hour care only and excludes children in Close to Home placements.

Sources: Administration for Children's Services, CCRS (2019), American Community Survey 5-Year Estimate (2012-2016)

Geography: City, CD, NTA

VOUCHERS FOR CHILD CARE (%)

This indicator measures children who used vouchers for child care as a percentage of the total number of children ages 10 and below in the geographic area. This indicator measures unique counts of children during the calendar year. If a child had more than one address during the year, the most recent address is used to define the geographic area. Children using vouchers are primarily below 12 years of age.

Sources: Administration for Children's Services, ACCIS (2017)

Geography: City, CD, NTA

HOUSING

OVERCROWDED HOUSING (%)

This indicator measures housing units with more than 1 occupant per room as a percentage of the total occupied housing units in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

HOMEOWNERSHIP (%)

This indicator measures owner-occupied units as a percentage of total occupied units in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

MEDIAN RENT (\$)

This indicator measures median rent in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

RENT BURDEN: GREATER THAN 35 PERCENT (%)

This indicator measures occupied housing units whose gross rent as a percentage of household income (GRAPI) is 35 percent or more. This indicator is expressed as a percentage of the total number of housing units paying rent in the geographic area. This measure excludes units where GRAPI cannot be calculated.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

RESIDENTS LIVING IN PUBLIC HOUSING: AGES 0-12

This indicator measures the total number of residents living in New York City Housing Authority public housing in the geographic area who are ages 12 years and under.

Sources: New York City Housing Authority (2018)
Geography: City, CD, NTA

RESIDENTS LIVING IN PUBLIC HOUSING: AGES 13-17

This indicator measures the total number of residents living in New York City Housing Authority public housing in the geographic area who are ages 13 through 17 years.

Sources: New York City Housing Authority (2018)
Geography: City, CD, NTA

CHILDREN LIVING IN SHELTERS: AGES 0-12

This indicator measures the total number of children living in homeless shelters in the geographic area on January 1, 2019 who were 12 years old and under.

Sources Department of Homeless Services (2018)
Geography: City, CD, NTA

CHILDREN LIVING IN SHELTERS: AGES 13-17

This indicator measures the total number of children living in homeless shelters in the geographic area on January 1, 2019 who were 13 through 17 years old.

Sources Department of Homeless Services (2018)
Geography: City, CD, NTA

INCOME

MEDIAN HOUSEHOLD INCOME (\$)

This indicator measures the median household income of all households in the geographic area. It includes those with no income. The American Community Survey defines household income as income of the householder and all other people aged 15 years and older in the household, regardless of their relation to the householder.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

FAMILIES BELOW POVERTY (%)

This indicator measures families whose income in the past 12 months was below the poverty threshold¹ as the percentage of all families in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

¹American Community Survey creates poverty thresholds - the dollar amounts used to determine poverty status - based on size of the family and age of the members. These thresholds do not vary geographically.

INDIVIDUALS BELOW POVERTY (%)

This indicator measures the individuals whose income in the past 12 months was below the poverty threshold¹ as a percentage of all individuals in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

INDIVIDUALS BELOW POVERTY: AGES 0-17 (%)

This indicator measures individuals ages 17 and under who were living below the poverty threshold¹ as a percentage of all individuals ages 17 and under in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

FOOD STAMP/SNAP BENEFITS (%)

This indicator measures households that received Food stamp/SNAP benefits in the past 12 months as a percentage of total households in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

EARLY EDUCATION**EARLY EDUCATION ENROLLMENT (NURSERY SCHOOL, PRE-SCHOOL) (%)**

This indicator measures the population aged 3 years and over enrolled in nursery school or pre-school as a percentage of children aged 3-4 years old in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)
Geography: City, Census Tract, PUMA, NTA

NUMBER OF CHILDREN SERVED BY EARLY LEARN PROGRAMS

This indicator measures children aged 4 years and under who are enrolled in contracted early care, head start, or child care programs. The number of children served could exceed capacity because not all children receive services for the entire duration of the year.

Sources: Administration for Children's Services (2018)
Geography: City, CD, NTA

K-12 EDUCATION**3RD-8TH GRADE MATH PROFICIENCY (%)**

This indicator measures third through eighth grade students enrolled in Department of Education schools who scored a 3 or 4 on the New York State Common Core Mathematics Tests as a percentage of all students in grades three through eight in the geographic area.

Sources: New York City Department of Education (2018)
Geography: City, Census Tract, PUMA, NTA

3RD TO 8TH GRADE ELA PROFICIENCY (%)

This indicator measures third through eighth grade students enrolled in Department of Education schools who scored a 3 or 4 on the New York State Common Core English Language Arts (ELA) as a percentage of all students in grades three through eight in the geographic area.

Sources: New York City Department of Education (2018)
Geography: City, Census Tract, PUMA, NTA

EDUCATION

EDUCATION LESS THAN HIGH SCHOOL (%)

This indicator measures the population aged 25 years and older whose highest level of educational attainment is less than a high school diploma as a percentage of the total population aged 25 years and older in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)

Geography: City, Census Tract, PUMA, NTA

HIGH SCHOOL GRADUATE (INCLUDES EQUIVALENCY) (%)

This indicator measures the population aged 25 years and older whose highest level of educational attainment is a high school diploma or equivalency as a percentage of the total population aged 25 years and older in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)

Geography: City, Census Tract, PUMA, NTA

CHRONIC ABSENTEEISM (%)

This indicator measures students with less than 90% attendance as a percentage of the total population of students enrolled in Department of Education schools in the geographic area.

Sources: New York City Department of Education (2018)

Geography: City, Census Tract, PUMA, NTA

GRADUATION RATE (%)

This indicator measures students who graduated with a diploma within four years as a percentage of the total cohort of all students in the geographic area who entered ninth grade in Department of Education high schools. August graduates are also included in this indicator.

Geography: City, Census Tract, PUMA, NTA

POSTSECONDARY EDUCATION

BACHELOR'S DEGREE OR HIGHER (%)

This indicator measures the population aged 25 years and older whose highest level of educational attainment is a Bachelor's degree or higher as a percentage of the total population aged 25 years and older in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)

Geography: City, Census Tract, PUMA, NTA

EMPLOYMENT

UNEMPLOYMENT (%)

This indicator measures the population aged 16 years and older who are unemployed as a percentage of the total population aged 16 years and older in the geographic area.

Sources: American Community Survey 5-Year Estimate (2012-2016)

Geography: City, Census Tract, PUMA, NTA

DISCONNECTED YOUTH (%)

This indicator measures youth ages 16 to 24 years who are not employed or in school as a percentage of the total population of youth ages 16 to 24 in the geographic area.

METHODOLOGY

RELIABILITY

A few American Community Survey indicators within the community profiles are shown as grayed values. The grayed values indicate that data is not statistically reliable. In order to determine reliability, the Coefficient of Variation (CV) is computed for each indicator. Indicators with a CV greater than 20% are considered unreliable and hence grayed out. Similarly, the indicators with values of zero are considered unreliable and grayed out.

PUMA AND CD GEOGRPAHIES

American Community Survey indicators are not provided at the Community District (CD) level because CDs are political geographical units unique to New York City. The American Community Survey, however, does provide indicators for Public Use Microdata Areas (PUMA) and these are frequently equivalent to CDs. Thus, where CDs had clear PUMA equivalents, the PUMA values were used for the CDs. For the CDs that did not have clear PUMA equivalencies, census tracts were aggregated to calculate CD level information.

“Neighborhood Tabulation Areas (NTAs) were created to project populations at a small area level, from 2000 to 2030 for PlaNYC, the long-term sustainability plan for New York City. Since population size affects the error associated with population projections, these geographic units needed to have a minimum population, which was determined to be 15,000. This criterion resulted in combinations of neighborhoods that probably would not occur if one were solely designating boundaries of historical neighborhoods. Moreover, the neighborhood names associated with the neighborhood tabulation areas are not intended to be definitive. Another feature of the sustainability plan was the creation of projections for PUMAs, which are approximations of New York City’s CDs developed for use with the Census Bureau’s Public Use Microdata Samples (PUMS). In order to make the boundaries consistent with PUMAs, NTAs were created using whole census tracts, from the 2010 census, within PUMAs. Since NTAs were not permitted to cross PUMA boundaries, this further restricted our ability to identify what may be thought of as historical neighborhood boundaries. Thus, users need to be cognizant of the reason why NTAs were created and the demographic/geographic constraints inherent in how they were configured. Despite these limitations, NTAs are a valuable summary level for use with both the 2010 Census and the American Community Survey (ACS). Regarding the decennial census, these geographic areas offer a good compromise between the very detailed data for census tracts (2,168) and the broad strokes provided by community districts (59). For the ACS, NTAs offer a more statistically reliable alternative to the high sampling error that renders data for most individual census tracts unusable.”¹
