BOROUGH OF MANHATTAN.

BUREAU OF BUILDINGS.

Amendments to the Plumbing and Drainage rules and regulations of the Bureau of Buildings for the Borough of Manhattan, published as required by paragraph 1 of section 141 of the Building Code.

Paragraph 11 is hereby amended so as to read as follows:

"Once in each year every employee or Master Plumber carrying on his trade, business or calling in The City of New York, shall register his name and address in the office of the Bureau of Buildings in the borough in which his place of business is located."

Paragraph 111 is hereby amended by adding at the end thereof these words:

"A plumber proposing to do work in a borough other than that in which he is registered shall present his certificate at the office of the Bureau of Buildings in that borough before commencing work, so that the fact of his having been properly registered may be recorded."

Section 79. Substitute the following:

"Section 79. A fresh-air inlet must be connected with the house drain just inside of the house-trap; where under ground, it will be of extra heavy cast iron. It must extend to the outer air and finish with a return bend at least one foot above the grade and ten feet away from any window or cold air box. When this arrangement is not possible, the fresh-air inlet must open into the side of a box not less than eighteen inches square, placed below the sidewalk at the curb. The bottom of the box must be eighteen inches below the under side of the fresh-air inlet pipe. The box may be of cast iron, or it may be constructed with eight inch walls of brick or flagstone laid in hydraulic cement. The box must be covered by a flagstone fitted with removable metal grating, leaded into the stone, having openings equal in area to the area of the fresh-air inlet, and not less than one-half inch in their least dimension. The fresh-air inlet must be of the same size as the drain up to four inches; for five inch and six inch drains it must not be less than four inches in diameter; for seven inch and eight inch drains not less than six inches in diameter; and for larger drains not less than eight inches in diameter, the removable portion of grate to be at least eight by twelve inches in area. An automatic device approved by the Superintendent of Buildings may be used, when set in a manner satisfactory to the said Superintendent."

Section 97. Substitute the following:

"Section 97. No form of trap will be permitted to be used unless it has been approved by the Bureau of Buildings, and no masons' cesspool, bell, pot, bottle or D-trap will be permitted, nor any form of trap that is not self-cleaning nor has interior chamber or mechanism, nor any trap, except earthenware ones, that depend upon interior partitions for a seal."

Section 119. Substitute the following:

"Section 119. In lodging houses the water closet and urinal apartments must have a window opening to the outer air; if three stories or less in height, they may have such window opening on a ventilating shaft not less than ten square feet in area."

Section 131. Substitute the following:

"Section 131. In lodging houses there must be one water closet on each floor, and where there are more than fifteen persons on any floor there must be an additional water closet on that floor for every fifteen additional persons or fraction thereof."

Change the number of section 134 to section 133 and substitute the following:

"Section 133.
