WHEREAS, THE DIVISION OF FACTORY INSPECTION has submitted to this Commission the following appeals from orders issued by said Division, which appeals have been made by the parties noted herein against the premises given below, the granting of which appeals would necessitate a variation of law, and

Whereas, the said Division of Factory Inspection has had a reinspection made in each case, and submits the following on the reports received, and recommends as follows:

(1) Premises affected, Athens, 3rd st.; appellant, H. F. Dornell Co. 7, additional exit; order issued Sept. 11, 1917. Three-story non-fireproof building; divided lofts; no sprinkler; no combustibles; no fire alarm; occupancy, 8; above the second floor, none regularly, said floor being used for live storage; occupancy of the second floor, 3; exits, one interior stairway from first to third floors; auxiliary stairway, second to third floors.

Recommendation—While conditions and occupancy remain unchanged, accept auxiliary stairway from second to third floors, if stairway be equipped with proper handrails and well hole guarded, with exit from second floor through window made into a door leading over roof of one-story boiler house, with iron ladder therefrom to ground.

(2) Premises affected, Athens, River st.; appellant, Athens Textile Co., Inc. 11, additional means of exit; 14, provide bars or other enclosure, 3-1/2 inches high and 12 inches from hoistway on all sides at third floor of elevator shaftway; orders issued September 18, 1917. Three-story non-fireproof building; divided lofts; sprinkler; combustibles; no fire alarm; occupancy, 11 in three-story part; above 1st floor, 9; 3rd floor used for live storage; exits, one interior stairway; no egress from roof; imperfect horizontal exit on 3rd floor. Item 14 matter explained and compliance promised.

Recommendation: Accept, while conditions and occupancy remain unchanged, the placing of an iron ladder on south end of building running from 3rd floor to ground, access to be had at 2nd and 3rd floors through present doors. No. 14 to be complied with.

(3) Premises affected, Auburn, Genesee st.; appellant, H. C. Metcalf. 1—Enclose stairway fire-resisting in six-story part; provide fire alarm system; organize and maintain fire drills; prohibit occupancy; additional exit. Orders issued March 13, 1917. Five- and six-story non-fireproof building; used for offices, mercantile and factory purposes; divided lofts; no sprinklers; no fire alarm; occupancy of building, 176; factory, 30; other occupancy, 146; above the 1st floor, 116; above the 2nd floor, 8; building divided above the 1st floor by a court; a hallway runs the entire depth of the building, with hallway (at right angles with present hallway) in each subdivision. Front portion six stories high; exits, 28-inch unenclosed stairway extending to grade; at rear of said building is a 48-inch unenclosed stairway from 4th floor to grade; at the 3rd floor there is provided a fire escape extending to roof of adjoining building from which there is a stairway leading to grade; two straight ladder fire escapes, one on the five-story part and one on the eight-story part, said fire escapes located in the court, and there is no egress from the foot thereof.

Recommendation: Accept the present exits if a doorway be provided in north wall of 6th floor leading to roof of five-story section and fire escape on east wall be extended to roof; exits, stairs and fire escape on each floor to be provided with signs reading "Exit," and also with red lights for use after dark. Exits to be accepted until such time as the Industrial Commission approve Code covering exit facilities from mercantile buildings, at which time the building is to be made to comply therewith. Class "C" fire alarm system to be installed, and when installed fire drills maintained.

(4) Premises affected, Buffalo, 93-117 Stone st.; appellant, Columbia Facing Mills Co. 4—Mechanical system to ventilate water closet, which has no window to outer air, same to exhaust not less than 35 cubic feet of air per minute. Order issued Oct. 30, 1917. Water closet installed in building erected since October 1, 1913; no window to outer air; 12 by 12 inch duct provided; this duct leads through roof to gutter air; water closet intended for use of male office force, consisting of one person.

Recommendation: Accept water closet as installed while present conditions and occupancy obtain.

(5) Premises affected, Buffalo, 86 Ellicott st.; appellant, George E. Farthing. 1—Provide unobstructed passageway to fire escape. (Order issued Oct. 24, 1917.) Six-story fireproof building; open lofts; no sprinkler; no combustibles; fire alarm system installed; occupancy 153, 150 of whom are factory employees; above the 1st floor, 147; above the 2nd floor, 134; exits, one interior stairway enclosed with fireproof partitions, doors to which open out and are self-closing; perfect front fire escape with fireproof openings 3 by 3 feet; exits remote, no egress from roof; appellant occupies half of 3rd floor with eight employees; passageway leading to fire escape is 22 inches wide; from this floor are three doors leading to fireproof stairs.

Recommendation: While conditions and occupancy remain unchanged, waive order for wider passageway and accept 22-inch passageway. Also accept fireproof openings 3 x 3 feet wide at fire escape balconies.

(6) Premises affected, Brooklyn, 68 Flushing ave., front and rear; appellant, W. Oscar Shadbolt. 1—Washing facilities for males employed on 1st floor. 2—Washing facilities for males employed on 2nd floor, equipped with hot water supply. (Orders issued August 28, 1917.) Two-story front and rear building used for manufacturing and repair of automobiles and wagons; most of the work done on the ground floor, which is used for blacksmith's shop and woodworking plant; 2nd floor for paint shop and storage; 2 men employed at time of visit; proprietors save not more than 2 ever employed; both floors equipped with running cold water; plant operated by electricity; electricity is the only method that could be used for heating water, and it would require ten minutes to heat enough for washing purposes. At present the employees of the ground floor drop a hot iron into a pail of water, there being 12 forges with hot irons always available; this method has been used for years and is quicker than any other method, except a continuous supply of running hot water. On 2nd floor a stove is provided for use in cold weather and during six months of the year can be utilized for heating water.

Recommendation: Acceptance of present faucets with running cold water and methods provided for heating water, while conditions and occupancy remain unchanged.

(7) Premises affected, Buffalo, 110 Washington st.; appellant, Richard Kast. 1—Additional exit. 2—Prohibit occupancy. Orders issued Oct. 8, 1917. Four-story non-fireproof factory building; open lofts; no sprinkler; no combustibles; no fire alarm; occupancy of building, 17; above 1st floor, 8; above 2nd floor, none. At time of inspection there were 25 employees, 13 above the 1st floor, none above the 2nd floor; exits, one unenclosed interior stairway; doors open out but are not self-closing; imperfect front fire escape; openings to balconies not fireproof; no egress from roof.

Recommendation: Acceptance of present exits while conditions and occupancy remain unchanged.

(8) Premises affected, Buffalo, 50 and 52 W. Eagle st.; appellant, J. Conway. 1—Additional exit. 2—Prohibit occupancy. (Orders issued Oct. 5, 1917.)

Four-story non-fireproof building; open lofts; no sprinklers; combustibles; no fire alarm; occupancy of building 18, 12 of whom are factory workers; above the 1st floor, 11; above the 2nd floor, 10; exits, one unenclosed stairway from 4th to 2nd floors, and one unenclosed stairway from 1st to 3rd floors; horizontal exit on 3rd floor; imperfect front fire escape; straight ladder escape on west wall; all employees are males, except on 2d floor, where one female is employed; exits remote; no egress from roof; 4th floor of building not used.

Recommendation: While conditions and occupancy remain unchanged, accept exits as present provided. Order No. 2 automatically waived.

(9) Premises affected, Endicott, Oak Hill ave.; appellant, Endicott, Johnson & Co. (Pig Skin Tannery). 10—Provide additional means of exit. Orders issued Nov. 13, 1914. Three-story non-fireproof building erected before Oct. 1, 1913; open lofts; sprinklers; no combustibles; fire alarm system installed; occupancy, 170; above the 1st floor, 72; above the 2nd floor, 31; exits, one interior unenclosed stairway, two perfect exterior screened stairways. When order was issued the exterior screened stairways were not on the building; same were erected as a result of said order; there is one at either end; that at east end is 6 feet wide of tower self-supporting type, constructed 8 feet from building wall, connected with the building by a balcony on each floor, balconies of which are provided with solid cement floors; the balcony at 3rd floor on west end is connected to roof of one-story extension by a 6-foot stairway, and from this roof a similar stairway extends to ground. These stairways are imperfect in that the doors and windows on the course of the stairs are not fireproofed and same are enclosed with pipe railing 3 feet high instead of screening.

Recommendation: Inasmuch as the building is equipped throughout with sprinkler system, no combustibles are carried and building is considerable distance from stairways as constructed, same to be accepted as compliance with order for additional exit.

(10) Premises affected, Mt. Vernon, South and Pearl sts.; appellant, Ward Leonard Electric Co. 5—Properly enclose dumbwaiter shaft in fireproof material, such enclosure to extend 3 feet above the roof and fitted with self-closing fire doors at all openings. (Issued Oct. 24, 1917.) Two-story non-fireproof factory building erected since Oct. 1, 1913; open lofts; sprinklered; no combustibles; no fire alarm; occupancy, 149; above the 1st floor, 90; exits, two interior fireproof enclosed stairways; one exterior screened stairway. Order issued per Section 79-a of the law. Dumbwaiter opening is approximately 3 feet square, located near center of building; exits provide for allowed occupancy of 202 on 2d floor; present occupancy, 90.

Recommendation: In view of the fact that sprinklers are provided, no combustible material carried, accept an automatic trapdoor entirely enclosing opening in floor when elevator is not at the 2d floor level.

(11) Premises affected, Parma Corners, Ridge rd.; appellant, Lewis W. Hilfiker. 2—Prohibit occupancy. 3—Enclose stairway. 4—Self-closing fire doors at horizontal exits. 5—Make stairway not less than 44 inches wide. (Orders issued Dec. 14, 1916.) Two-story semi-fireproof building erected since Oct. 1, 1913; divided lofts; no sprinklers; no combustibles; no fire alarm; 16 people at work in building; 4 on 2d floor; building used as evaporator, work being done therein for about three months of the year; building divided into four sections by three fire walls; openings equipped with double-swing doors, constructed of wood; 1st floor, front section, used for paring and slicing apples; 20 employees at times; rear section contains furnaces to heat kilns located on 2nd floor; 2nd floor used for drying apples and storage; no egress from roof; exits, one interior unenclosed stairway 32 inches wide, extending from 1st to 2nd floors; at south-west corner of building bridge to adjoining building located at easterly side near south wall.

Recommendation: In view of the fact that building is used but three months of the year and also that both exits are located at the one end of building, accept exterior wooden stairway to be provided at rear of building, same to extend from 2nd floor to grade, opening leading thereto to be provided with non-fireproof door measuring 2 by 6 feet.

(12) Premises affected, Rome, N. Y.; appellant, Rome Manufacturing Co.; F. K. Kirkland. Requests for variation of Sections 79-a-2-3 and 79-a-9 on two-story addition to plant of the Rome Manufacturing Co., which addition is already erected. Buildings measure 50 by 250 feet and 60 by 165 feet, the northerly portion of this addition to be used for office purposes entirely; exits, horizontal exits as per Section 79-a-9 leading to shipping warehouse, to packing department, and butting room building; bridge from southerly wall of office building to roof of one-story main building with fireproof stairway from roof to grade; at center of northerly wall of office building a fireproof enclosed stairway at easterly end of mill along northerly wall a fireproof enclosed stairway, both of which stairways have access direct to outer air. Request for acceptance of enclosure terminating 15 inches above the ceiling, said ceiling being of iron frame-work with heavy iron lath, plastered with three coats of mortar, instead of extending to 3 feet above roof as required; stairway in mill building has continuous run of 13 feet instead of 12 feet 6 inches between landings; stairway enclosure in mill building to extend to height of approximately 8 feet from floor and roofed over with concrete slab 3 inches in thickness; exterior walls of mill building to have parapet 18 inches thick instead of 3 feet as required; maximum occupancy on 2d floor, 150; building equipped throughout with sprinkler system; floor area 22,000; six exits are provided.

Recommendation: Accept stairway in office building with enclosure terminating at underside of building roof, approximately 15 inches below roof; extend enclosure of stairway in mill building 8 feet from 2d floor and roof over same with reinforced concrete slab 3 inches thick; provide parapet 18 inches instead of 3 feet on exterior building walls of building, and make straight run stairway between 1st and 2nd floors of 13 feet instead of 12 feet 6 inches. Stairway from roof of main building to grade to be so placed that passageway through area way at foot of stairs from mill will not be blocked.

(13) Premises affected, Syracuse, 200 South Salina st.; appellant, J. Henry Walters. Enclose stairways with fire-resisting partitions. (Orders issued March 22, 1917.) Two-, four- and seven-story building, used as a department store, and portions of 2d and 3d floors used for dressmaking and millinery shops, employing 16 and 24 people, and bakery on 4th floor, employing 3 people; exits, unenclosed interior stairway in seven-story part, extending to 1st floor; interior unenclosed stairway at southerly end of four-story part, extending to 1st floor; interior unenclosed stairway located along the southerly wall of four-story part, which stairway terminates at 2d floor and continued to 1st floor by means of moving stairway; on 1st, 2d, 3d and 4th floors there is an imperfect horizontal exit provided, with a self-closing sliding door on one side only; this exit is located between the two four-story portions; building has automatic sprinkler system with two sources of supply, i. e., city main and supply tank on roof; (No factory occupancy in seven-story building.)

Recommendation: Inasmuch as there is no factory occupancy in seven-story part, and building is equipped with sprinkler system, waive order on condition that no factory work be permitted in seven-story building, and that factory occupancy be not increased, and further, that building is to be placed in compliance with Code covering exit facilities from mercantile building when Commission adopts said Code.

(14) Premises affected, Webster, Railroad ave.; appellant, Monroe Manufacturing Co. 3—Make stairs of incombustible material and enclose fireproof. 4—Fireproof elevator shaft for both elevators. 6—Buffers in elevator pits. 7—Governors for both elevators and proper safety devices under platforms. 9—Construct toilet rooms as per Rules 112-113. 13—Paint interior of all toilet rooms. 14—Self-closing fireproof doors onto bridge between storage room and carpenter shop. 15—Self-closing fireproof doors between horizontal exit sloth room and storage room. 16—Horizontal bridge between storage room and carpenter shop to comply with Section 79-a-9. 17—Prohibit occupancy. (Orders issued Nov. 3, 1916.) Two-story non-fireproof building erected since Oct. 1, 1913; divided lofts; sprinkler installed; combustibles carried; no fire alarm; occupancy on 2d floor, 19; exits, three interior stairways not enclosed with fireproof partitions; two imperfect horizontal exits. Plans were filed in Albany for this building on Aug. 11, 1916; and disapproved Aug. 15, 1916; with letter of disapproval, suggestions and information as to construction of building were submitted to appellant by Engineering Division. No amended plan filed; building as erected not as shown on plan nor according to criticisms. Building of hollow tile construction; wood floors; roof of wood covered with three-ply asbestos. Elevator shafts have trapdoors at 2d floor; exits, 40-inch stairway, wood enclosed on 1st floor; wooden treads, wooden risers, terminated 1st floor workroom, does not extend to

roof; similar stairway 32 inches wide, and a 38 1/2-inch stairway, same as last two, but is not enclosed at all. These orders were appealed from and variation granted on April 4, 1917. Said variations were as follows: Enclose bridge from carpenter shop to storage building on both sides and top with substantial wood enclosure covered with metal sheeting; provide self-closing fireproof door at end of bridge opening into carpenter shop; additional fire door at each opening in fire wall, all doors in fire wall to remain open and unobstructed at all times; remove present sliding door in wooden partition which parallels fire wall, or arrange to keep same open during working hours. Remove present wood frames in all fire wall openings or cover same with tin; provide fireproof base at all openings in fire wall, 2d floor; paint interior of all water closet compartments with light-colored nonabsorbent paint; provide windows in each toilet room with an area of at least 6 square feet, and arrange to open readily to provide ventilation; waive order to enclose elevator shafts fireproof while 2d floor occupancy be not materially increased. Re exits: Provide 44-inch stairway in southwest corner with egress direct to outer air, said stairway to extend from 1st to 2d floor, and to be enclosed fire-resisting from ground to underside of roof; openings fitted with self-closing fire doors opening outwardly; remove present stairway and floor over opening. Enclose present stairway between carpenter shop and storage building with fire-resisting partitions to underside of roof, and equip same with self-closing fire doors opening outwardly. Relocate stairway in storage building and accept unenclosed while building used for storage only. The above to be accepted as compliance with orders 3, 9, 14, 15 and 16.

Recommendation: Horizontal exits be accepted with but one fire door if same be self-closing and fusible link so located as to fuse with action of flames on either side of wall; accept enclosure of stairs, wood studs, not less than 2 inches by 4 inches, lathed each side with at least No. 24 U. S. standard gauge metal lath and plastered each side with Portland cement mortar finishing at least three-quarters of an inch thick.

AND it appearing that there are practical difficulties and unnecessary hardships in complying with the strict provisions of the law and the rules and regulations of the Industrial Code on the premises noted above; and

It further appearing that each of the appellants herein has been notified that he would be given an opportunity to appear and be heard at this time and place if he so desired, and that in event of non-appearance the decisions above set forth would be confirmed; and

It further appearing that in granting the variations noted in each case the spirit of the law and of the rules and regulations will be observed and public safety secured; therefore,

Be it resolved, that the Industrial Commission grant the variations recommended in each case, with the understanding that said variations are effective only during the time that the conditions remain as of this date.

NOTICE TO BIDDERS AT SALES OF OLD BUILDINGS, ETC.

TERMS AND CONDITIONS UNDER WHICH BUILDINGS, ETC., WILL BE SOLD FOR REMOVAL FROM CITY PROPERTY.

THE BUILDINGS AND APPURTENANCES thereto will be sold to the highest bidder, who must pay cash or certified check, drawn to the order of the Comptroller of The City of New York, and must also give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of \$50, the sum of \$50 will be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but unfinished at the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the use of the buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal, nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or any of these conditions shall forthwith void the sale and cause immediate forfeiture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing therein or permitting the occupancy of any such building by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

The sale will be as of the condition of the property on date of delivery thereof to the purchaser. The City of New York will not be responsible for any change or loss which may occur in the condition of the buildings, or their appurtenances, between the time of the sale thereof and the time of delivering possession to the purchaser, after being properly vacated of all tenants. The sale and delivery to purchaser will be made as nearly together as the circumstances of vacating the structures of their tenants will permit.

All the material of buildings, sheds, walks, structures and cellars of whatsoever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the exterior walls of the buildings and their foundations, and the sidewalks and curb in front of said buildings, extending within the described area, shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point. The exterior walls and their foundations shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building. Where there is no curb the elevation of the surrounding ground shall be considered curb level. All wells, cesspools, sinks, etc., existing on the property must be filled to the level of the surrounding ground with clean earth.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street and the openings of the main sewer in street shall be properly closed in compliance with the directions of the Bureau of Sewers in the Borough in which the buildings are situated, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed.

The permit for all opening in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances, or any part thereof, within thirty days from the day of possession will work forfeiture

of ownership of such buildings, appurtenances or portions as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and The City of New York will, without notice to the purchaser, cause the same to be removed and the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and must be completed within thirty days from the date of possession, and the successful bidder will provide and furnish all materials or labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Where party walls are found to exist between buildings purchased by different bidders, the materials of said party walls shall be understood to be equally divided between the separate purchasers.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furrings, plaster, chimneys, projecting brick, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beam holes, etc., bricked up, and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs and adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the Contractor.

No buildings, parts of buildings, fixtures or machinery sold for removal under these terms and conditions shall in any case be relocated or re-erected within the lines of any proposed street or other public improvement, and if any such buildings, parts of buildings, fixtures or machinery, etc., shall be relocated or re-erected within the lines of any proposed street or other public improvement, title thereto shall thereupon become vested in The City of New York and a resale at public or private sale may be made in the same manner as if no prior sale thereof had been made.

The Comptroller of The City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids, and be it further

Resolved, That while the said sale is held under the supervision of the Commissioners of the Sinking Fund, the Comptroller is authorized to cause the sale to be advertised and to direct the sale thereof as financial officer of the City.
