Statement of Basis and Purpose

New York City has been on the forefront of action to protect New Yorkers from lead paint hazards since 1960. In response to NYC Administrative Code lead poisoning prevention provisions recently enacted, as well as to formally adopt the Department's high standards of public health practice, the Board has amended Article 173 of the Health Code twice in the past three years. In 2019, the Board adopted significant new safeguards for children that, among other things, lowered the childhood blood lead level requiring mandatory Department investigations and the lead dust action level.¹ And in 2021, the Board amended Article 173 to make explicit that the Department's investigations in response to reports of children with elevated blood lead levels ("EBLLs") include inspection of any location where the child regularly spends significant time, to clarify that the Department has the authority to order abatement or remediation of lead-based paint and dust in locations occupied by children under age 18, and to extend the unsafe lead paint hazard standard to childcare programs attended by a child with an EBLL.²

Among the recent Administrative Code amendments for lead poisoning prevention was the enactment of § 17-912 regarding anticipated changes by the federal Centers for Disease Control and Prevention (CDC) to its childhood blood lead reference value ("reference value") and the action level for Department investigations.³ The reference value is based on the 97.5th percentile of the blood lead distribution in U.S. children aged 1–5 years from National Health and Nutrition Examination Survey (NHANES) data, and identifies children with higher levels of lead in their blood compared to most children.

Until October 2021, the most recent reference value was 5 micrograms per deciliter (mcg/dL) and the amendments to the Administrative and Health Codes set 5 mcg/dL as the action level for Department investigations. Anticipating that the reference value would continue to decline as fewer children are exposed to lead hazards, the Administrative Code requires the Department to either adopt any new reference value as its action level or submit a report to the Mayor and Speaker of the City Council detailing the reasons the new reference value should not be adopted as the threshold for investigations.

In October 2021, the CDC lowered the reference value in children to 3.5 mcg/dL^4 The Department believes this lower level should be the new threshold for its investigations in order to continue to advance protections for children from lead exposure. Accordingly, the Department proposes to amend Article 173 to lower the action level for investigations for children with EBLLs to 3.5 mcg/dL and amend Article 11 to adopt the 3.5 mcg/dL standard for mandated reporting and inclusion in the Children's Blood Lead Registry. These proposed amendments also respond to a petition to the Board submitted pursuant to Health Code Article 9 asking for such a change.

In addition, the NYC Department of Housing Preservation and Development (HPD) has adopted regulations described by Administrative Code § 27-2056.2(7)(b) to redefine "lead-based paint" as that containing a lead content of 0.5 milligrams per square centimeter (mg/cm²) or greater.⁵ With this adoption, the Health Code definition of "unsafe lead paint" at 0.5 mg/cm², which had been adopted to enable the Department to order abatement of non-intact paint at this lower level until HPD was able to adopt the more protective standard, is no longer needed. The Department therefore proposes to repeal the definitions of "unsafe lead paint" and "unsafe lead paint hazard" from Health Code § 173.14(b) and amend the definition of "lead-based paint" to provide for this new lower standard. The now-outdated portions of the definition of "lead-based paint" that refer to Administrative Code § 27-2056.2(7)(b) are also proposed for deletion.

Statutory Authority

These amendments to the Health Code are promulgated pursuant to Sections 558 and 1043 of the New York City Charter. Section 558 empowers the Board to amend the Health Code and to include in the Health Code all matters to which the authority of the Department extends. Section 1043 grants the Department rulemaking authority.

Statement of Basis and Purpose of Proposed Rule

Background

The health risks of tanning are well known. Tans are caused by the skin's reaction to ultraviolet (UV) radiation, and any exposure to UV rays can lead to skin cancer and other diseases. The World Health Organization's International Agency for Research on Cancer found that indoor tanning devices cause carcinogenicity in humans and that the risk of melanoma increases by 75% when the use of tanning devices starts before 30 years of age. In addition, a study of adolescent indoor tanning practices between 1998 and 2004 found that over 60%of indoor tanners between the ages of 16 and 18 years old reported experiencing erythema, or burns, after indoor tanning sessions.

The earlier a person begins indoor tanning and the more frequently they tan, the greater their risk of developing skin cancer. Research has demonstrated a strong "dose response" relationship between melanoma risk and the total hours of indoor tanning over a person's lifetime.

Proposed Increase of Minimum Age to Use Indoor Tanning Facility Currently, Article 177 of the New York City Health Code ("Health Code") prohibits indoor tanning facilities from serving minors under 17 years of age, but not minors who are 17 years of age or older. That is because until recently, New York State law precluded localities from prohibiting indoor tanning for 17-year-olds. (New York State law and regulations instead required parental consent for tanning by 17-yearolds.) With the complete support of the New York City Department of Health and Mental Hygiene (the "Department"), however, New York State law and regulations have been amended to prohibit indoor tanning of 17-year-olds, regardless of parental consent. The Department now proposes to amend Article 177 of the Health Code to reflect these changes.

Other Proposed Amendments

The Department also proposes to amend Article 177's provisions relating to cleaning, sanitizing and disinfecting equipment and supplies used at tanning facilities, as well as to clarify operators' obligation to produce records of annual timer tests to the Department upon request and to allow records to be maintained in an electronic format. Moreover, the Department proposes to require operators of tanning facilities in New York City that maintain a website to post on such website a disclaimer describing the health risks of tanning.

Finally, the Department proposes to amend Article 177 to increase the inspection fee for each UV radiation device from \$50 to \$200, as provided in Section 72-1.5(b) of Title 10 of the New York Codes, Rules, and Regulations ("NYCRR"), and to repeal the biennial registration license fee currently set forth in Article 5 of the Health Code. The required fee range is provided by the State in 10 NYCRR § 72-1.4(a).

Statutory Authority

These proposed amendments are made pursuant to Sections 556, 558 and 1043 of the New York City Charter. Section 556 of the Charter grants the Department jurisdiction to regulate all matters affecting

health in the City of New York. Sections 558(b) and (c) of the Charter empower the Board of Health to amend the Health Code and to include in the Health Code all matters to which the Department's authority extends. Section 1043 of the Charter grants rulemaking powers to the Department. Additionally, section 3554(3) of the Public Health Law and regulations of the New York State Department of Health ("NYSDOH") (located in 10 NYCRR §§ 72-1.1(e) and 72-1.2(b) and (c)), authorize NYSDOH to enable local jurisdictions to enact and enforce local regulations concerning tanning facilities.
