DEPOSIT MADE ON CONTRACT No. 2 AS SECURITY—COMMUNICATION FROM COMPTROLLER AS TO DISPOSITION—OPINION OF COUNSEL

The Secretary presented a communication dated February 2, 1910, from Edmund D. Fisher, Deputy Comptroller, Department of Finance of the City of New York, stating that the Rapid Transit Subway Construction Company had made application for the return of the balance of \$150,000.00 remaining from the deposit of \$1,000,000.00 made by it with the Comptroller of the City of New York as security for the completion of Contract No. 2, and asking if it would be proper to return such balance to the company at the present time; also a communication dated February 7, 1910, from the Counsel to the Commission, giving his opinion in the matter, from which the Secretary was directed to transmit to the Department of Finance the following extract:

"I think, in view of the possible liability on the part of the contractor for the damages which have occurred in constructing the subway under Joralemon Street, that it would be inadvisable at this time to make any further reduction in the security furnished by the contractor and held by the city. Under the agreement, dated September 22, 1908, provision was made for returning \$850,000.00 of the \$1,000,000.00, leaving \$150,000.00, that being the amount certified by the Chief Engineer as sufficient to cover the physical damage. In addition, the city holds various liens which furnish additional security. I think it would be advisable to send a copy of this agreement to the Department of Finance and inform it that in view of the Joralemon Street litigation it would, in the opinion of the Commission, be inadvisable to make any further reduction in the security held by the city."

(hereinafter referred to as "the Contract"), for permission to lay upon the surface of Flatbush Avenue Extension and property acquired for bridge purposes, between Willoughby Street and the dock or pier indicated on the annexed plan, a temporary double track tramway for the purpose of facilitating the construction of the said Section Manhattan Bridge Extension One and to diminish the period of occupancy of Flatbush Avenue Extension and other streets and places for the transportation of material.

Now, pursuant to the provisions of the Rapid Transit Act, being Chapter 4 of the Laws of 1891, as amended, and pursuant also to the provisions of the Contract, the Commission hereby approves the application of the Contractor for permission to lay upon the Flatbush Avenue Extension and property acquired for bridge purposes in the Borough of Brooklyn, City of New York, a temporary double track tramway as indicated on the blue-print hereto annexed entitled "Proposed Temporary railroad track on Manhattan Bridge property for use of Fourth Avenue Subway contractors", to be used only for the removal of excavated material and for the transportation of materials for use in the construction of the said Manhattan Bridge Extension One, provided, however, that this approval is granted only upon the following terms and conditions:

(1) The Contractor, in advance of constructing such temporary tramway, shall make arrangements with the Bridge Department of The City for the use of property belonging to the Department of Bridges and shall at all times whether in construction, maintenance or operation of such tramway comply with the requirements of the Department of Bridges in so far as such construction, maintenance or operation shall affect property acquired for bridge purposes.

(3) The Contractor shall use special care in laying such tramway at all street crossings where the streets are or may be open to traffic and shall take up the stone blocks and pavement for the width of the tracks in order to permit the tracks to be laid flush with the pavement with planking between the tracks also laid flush with the tracks so that vehicular or other traffic can cross the tracks without noise or inconvenience, and upon the removal of the temporary tramway the Contractor shall restore the street pavement and sidewalks to a good condition and shall at all times during the operation of such tramway make all such repairs to the pavement or sidewalks as may be necessary to maintain the same in a good state of repair.

(4) The Contractor shall construct and maintain the crossing of any street railroad tracks in accordance with the reasonable requirements of the railroad company or companies operating such tracks.

(5) The Contractor shall install south of Sands Street derailing switches and bumpers or such other means of avoiding accident and affording protection to traffic at Sands Street as may be required by the Chief Engineer to the Commission.

(6) The Contractor shall keep a watchman at all times during the operation of the said tramway at or near the Sands Street crossing and such other crossings as may be required by the Chief Engineer to the Commission for the purpose of preventing accidents.

(7) If coal burning locomotives are used for operating the tramway such locomotives shall be fitted with proper spark arresters and only anthracite coal shall be used and every practicable precaution shall be taken to reduce to a minimum the smoke and noise incident to the use of steam motive power.

(8) The Contractor shall indemnify and save harmless The City of New York and the Commission from any and all loss, damages, claims, costs or expenses of whatsoever character directly or indirectly caused by or resulting from or in consequence of or in any way connected with the construction, maintenance or operation of the said tramway.

(10) In the event that the right of the Contractor to construct, maintain or operate the said tramway shall for any reason be attacked they shall at their own cost and expense maintain, in so far as they deem necessary, any right claimed by them hereunder.

(6) If coal burning locomotives are used in operating said tramway such locomotives shall be fitted with proper spark arresters and only anthracite coal shall be used and every practicable precaution shall be taken to reduce to a minimum the smoke and noise incident to the use of steam motive power.

(7) The Contractors shall indemnify and save harmless The City of New York and the Commission from any and all loss, damages, claims, costs or expenses of whatsoever character, directly or indirectly, caused by or resulting from or in consequence of or in any way connected with the construction, maintenance or operation of the said tramway.

(8) The Contractors shall operate cars and locomotives or other appliances over the said tracks at such times and in such manner as may be required by the Chief Engineer to the Commission and so as to cause the least possible annoyance or inconvenience to the public or adjacent property owners and shall construct, maintain and operate the said tramway in accordance with all valid and applicable ordinances and regulations of The City of New York or otherwise.

Mr. Latson replied to Mr. Dykman, making a statement as to the general intention of the applicant to use electricity as a motive power with gasoline as a possibility, but not to use the underground trolley in Brooklyn or the overhead trolley in Manhattan, and, after a discussion between counsel for the applicant and for the opposing companies and Commissioner Bassett as to the necessary proof in the proceeding, the hearing was adjourned to February 23, 1910, at 2:30 P. R. T. 5040

FOURTH AVENUE SUBWAY—ACQUISITION OF REAL ESTATE—REQUISITION ON BOARD OF ESTIMATE AND APPORTIONMENT FOR \$200,000.00

The adoption of the following resolution was moved and duly seconded: RESOLVED: That the Public Service Commission for the First District make application upon the Board of Estimate and Apportionment of the City of New York for the authorization of corporate stock of the City of New York, for the purpose of acquiring necessary real estate and rights, terms and easements therein for the construction of the various sections of the Fourth Avenue Subway now under construction, to the amount of \$200,000.00, and that the Chairman and Secretary be and they hereby are authorized to execute and transmit under the seal of the Commission a communication including such requisition herewith presented.

Ayes—Commissioners Willcox, McCarroll, Bassett, Maltbie, Eustis.  
Nays—None.  
Carried.

The form of the communication which the Chairman and Secretary were authorized by the above resolution to transmit to the Board of Estimate and Apportionment was as follows:

February , 1910

To the Board of Estimate and Apportionment of the City of New York.

SIRS:—The Commission has duly entered into contracts for the construction of the Fourth Avenue Subway and the work is now proceeding, but while appropriations were made for the construction of the subway and for the construction of the pipe galleries no appropriation has yet been made for the acquisition of the necessary private property. Surveys have been made and condemnation maps are in process of preparation, and the Corporation Counsel will shortly be requested under the provisions of the Rapid Transit Act to institute condemnation proceedings. A large amount of real estate, probably not less than \$2,500,000.00 in value, will need to be acquired in this locality. In many cases, however, it is more economical and advantageous to the city to purchase property at private sale, and while the greater part of the property needed will have to be condemned it is probable that from time to time it will be possible to acquire parcels of property at advantageous terms which will not only result in a probable saving to the city in the case of the special piece of property purchased but may also establish some standard of valuation in the condemnation proceeding. From another standpoint it is also important in the opinion of the Commission that there be some machinery for purchases at private sale. There have been so many delays incident to condemnation proceedings in the past that while under the Rapid Transit Act the award to be made carries interest at six per cent from

the title vests upon the filing of the oaths of the Commissioners, still the taking of the property and the payment for it several years after the property owner has lost possession of it has caused real suffering and hardship on the part of many property owners. For this reason in addition to the advantage to the city the Commission thinks that where a property owner wishes to sell at a fair price he should be afforded an opportunity of making the sale and getting prompt payment.

The Commission has lately made a contract, subject to the appropriation of the necessary moneys, with the City House Moving Company for the purchase of a triangular piece of property situated on the westerly side of Flatbush Avenue extension near the corner of Nassau Street, having a frontage of one hundred and three feet four and one-half inches on the extension, a depth of forty-one feet and five inches and a length of ninety-four feet ten inches, for the sum of \$20,000.00, free and clear of all incumbrances. It will cost to procure a policy of title insurance upon this property in the sum of \$20,000.00 the additional amount of \$71.82. The purchase price in this case was fixed after informal conferences between representatives of the office of Counsel to the Commission and the Law Department of the city, which will have to conduct the necessary condemnation proceedings, and is the price fixed by the real estate experts retained by the Commission and the Law Department.

The delay incident to making a separate requisition for each piece of property would in many cases greatly hinder if not defeat the attempts to purchase at private sale, and the Commission deems it advisable that a requisition be made for a blanket amount which can be applied for these purchases from time to time as the occasion arises. Under an amendment to the charter passed at the last session of the Legislature provision is made for the purchase of awards in condemnation proceedings after title vests, so that purchases at private sale need not cease with the institution of condemnation proceedings. These purchases will be made in the future, as in the past, in concert with the Law Department of the city, so that there may be no danger of prejudice to the city's rights in the condemnation proceedings.

The amount of \$200,000.00 which is now requested is sufficient for contracts of purchase now in hand or immediately contemplated. If it is possible to buy still more of the requisite land without condemnation it will be necessary to ask your Board for further similar appropriations.

Therefore, in accordance with the provisions of the Rapid Transit Act, being Chapter 4 of the Laws of 1891, as amended, the Public Service Commission for the First District hereby makes requisition upon the Board of Estimate and Apportionment of the City of New York for the authorization of corporate stock of the City of New York to be issued and sold by the Comptroller for the purpose of acquiring real estate and any rights, terms and interests therein, any and all rights, privileges, franchises and easements, whether of owners or abutters or others, to interfere with the construction or operation of the various sections of the Fourth Avenue Subway now under construction, or to cover damages therefor, which in the opinion of the Commission it shall be necessary to acquire or extinguish for the purpose of constructing and operating such road, free of interference or right of interference, to the amount of \$200,000.00.

IN WITNESS WHEREOF, the Public Service Commission has caused this requisition to be subscribed by its Chairman and Secretary and its official seal to be hereto affixed this day of February, 1910.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT,

Chairman.

Attest:

Secretary.

BROADWAY-LEXINGTON AVENUE SUBWAY—DIAMOND DRILL BORINGS—REQUISITION ON BOARD OF ESTIMATE AND APPORTIONMENT FOR \$20,000.00

The Secretary presented a communication dated February 18, 1910, from the Counsel to the Commission, transmitting the following form of resolution, the adoption of which was thereupon moved and duly seconded:

RESOLVED: That the Public Service Commission for the First District make requisition upon the Board of Estimate and Apportionment of the City of New York for the authorization of corporate stock of the City of New York to be issued and sold by the Comptroller for the purposes of providing means to pay the expenses of making diamond drill borings and verifying wash borings and doing certain other work along certain rapid transit routes to an amount not exceeding \$20,000, and that the Chairman and the Secretary be and they hereby are authorized to send the following communication including a requisition for these purposes to the Board of Estimate and Apportionment under the seal of the Commission.

Ayes—Commissioners Willcox, Bassett, Maltbie, Eustis.

Nays—None.

Carried.

The form of communication to the Board of Estimate and Apportionment referred to above, was as follows:

February , 1910

To the Board of Estimate and Apportionment of the City of New York:

The former Rapid Transit Board in connection with laying out routes for additional rapid transit lines caused to be made a number of wash borings to obtain information as to the underlying conditions. Borings of this character were made along the Lexington Avenue Route and the other routes for the construction of which the Commission is preparing to ask for bids. The Commission is advised, however, that in view of the magnitude of the projected work it is advisable that more exact information be obtained by means of diamond drill borings, and that in some instances the former tests be verified. This necessity is increased by the decision of the Commission that future contracts for construction at municipal expense should be unit price contracts which makes it imperative that the rock and earth lines be determined beforehand as definitely as possible. In addition there is a considerable amount of preliminary work such as surveying and the collection of additional data, which should be done now. The Commission is advised by its Chief Engineer that the sum of twenty thousand dollars (\$20,000.00) is necessary for this work.

Therefore, in accordance with the provisions of the Rapid Transit Act, being Chapter 4 of the Laws of 1891, as amended, the Public Service Commission for the First District hereby makes requisition upon the Board of Estimate and Apportionment of the City of New York for the authorization of corporate stock of the City of New York to be issued and sold by the Comptroller for the purpose of providing means to pay the expense of doing the work hereinbefore described to an amount not exceeding twenty thousand dollars (\$20,000.00).

IN WITNESS WHEREOF, the Public Service Commission for the First District has caused this requisition to be subscribed by its Chairman and Secretary and its official seal to be hereto affixed this day of February, 1910.

(8) If at any time hereafter the said "Wall A" and "Stairway No. 3" shall be removed and another stairway erected to be used in common for the purposes of the Hudson and Manhattan Railroad Company, or its successors or assigns, and a railroad constructed by or under the auspices of the city, the Hudson and Manhattan Railroad Company, its successors or assigns, shall pay for such other stairway the same rental as for the exit that may be removed.

Case 1204

BROOKLYN UNION ELEVATED RAILROAD COMPANY—ACCIDENT ON WILLIAMSBURG BRIDGE ON JANUARY 5, 1910—REPORT

Commissioner Bassett presented a report in regard to the cause of the accident on the railroad of the Brooklyn Union Elevated Railroad Company on the Williamsburg Bridge on January 5, 1910, whereby Henry Firsler was killed and several others were injured, reviewing the facts brought out at hearings upon the matter, and stating that the evidence showed that the collision had been caused by the failure of the motorman of the rear colliding train to apply the air-brakes after the train passed the apex of the bridge westwardly, that the condition of the valves in the motorman's cab after the accident would indicate that the motorman failed properly to inspect and adjust the brake apparatus of the train before it started, and that if the cars had been of steel construction the demolition that occurred in the accident would not, in the Commissioner's opinion, have been nearly so great. On motion, duly seconded, the foregoing report was approved and ordered filed. [See Item No. 108.]

Also City Superintendent Maxwell.

Absent—Mr. Gillespie, Mr. Polk, Mr. Suydam, Mr. Thomas, Mr. Wingate—5.

The Committee on By-Laws and Legislation respectfully reports that it has given careful consideration to the following resolutions offered by Mr. Somers, and adopted at the meeting of the Board of Education held on December 22, 1909 (see Journal, pages 2114-15):

"Resolved, That it be referred to the Committee on By-Laws and Legislation to consider the advisability of amending the By-Laws as follows:

"That section 65 of the By-Laws of the Board of Education be amended so as to provide but one salary for one and the same position, except that the Teachers and Supervisors of boys may receive an additional salary or bonus not to exceed \$180.

"Resolved, That it also be referred to said Committee to consider the advisability of amending said section in the following manner:

"That such revised schedules be put into effect as soon as funds sufficient therefor are provided by the Board of Estimate and Apportionment, and that pending full financial ability, the increases in women Teachers' salaries be paid in annual instalments which shall be not less than 20 per cent. of the difference between the maximum salaries now fixed for men and the maximum salaries now fixed for women occupying the same position, except that for the year 1910 there shall be a flat increase of not less than \$120 per annum for all women Teachers below the 7A grade, and not less than \$120 for all women Teachers of special subjects."

In regard to the first of the above quoted resolutions, the principle involved in the suggested amendment of section 65 of the By-Laws is that of equal pay for men and

women Teachers occupying the same position. As to that principle, your Committee submitted its views to this Board in a report presented on March 27, 1907, disapproving of Senate bill No. 893—the so-called "Equal Pay" or "White" bill—which report was unanimously approved (see Journal, 1907, pages 544-45). The reasons for the Committee's opposition to the bill referred to were set forth in detail in an appendix to a report submitted by it to the Board on June 12, 1907 (see Journal, pages 1006-30).

On May 6, 1909, your Committee presented a report in opposition to Senate bill No. 1210, known as the "Gledhill-Foley bill," which provided salaries for Teachers in various grades without regard to sex, which report was also approved by the Board of Education (see Journal, 1909, pages 660-64 and 790-93).

Your Committee is aware of no change in the situation up to the present time which would justify it in recommending that the Board reverse the action taken by it on the occasions above referred to. Moreover, your Committee would respectfully point out that it is out of the question to recommend at the present time the amendment to section 65 of the By-Laws proposed in the first resolution quoted above, for the reason that the Budget for the year 1910 would not afford sufficient money to justify any change in section 65 as now constituted. Past experience has shown the danger of taking any action of this character.

The reasons hereinbefore set forth for not recommending the proposed amendment to section 65 of the By-Laws are equally applicable to the propositions embodied in the second of the above quoted resolutions. When the By-Laws are amended they must necessarily go into effect, there can be no such thing as a non-operative by-law. Consequently the proposition that "pending full financial ability, the increases in women Teachers' salaries be paid in annual instalments which shall be not less than 20 per cent. of the difference between the maximum salaries now fixed for men and the maximum salaries now fixed for women occupying the same position," and the further proposition that "except that for the year 1910 there shall be a flat increase of not less than \$120 per annum for all women Teachers below the 7A grade, and not less than \$120 for all women Teachers of special subjects," are both illegal and impracticable, and your Committee is compelled to report against them. Furthermore, legislation would be necessary to provide the funds needed to put the proposed increases into effect.

In connection with this matter your Committee would call attention to the fact that Special Committees were appointed by the Board of Education in the years 1907 and 1908 to revise the schedules of salaries applicable to the teaching and supervising staff, which Special Committees gave hearings to all persons interested and tentatively submitted to the Board revised schedules of salaries which excluded the idea of equal pay but provided for equitable increases of salary. The amounts necessary for placing these revised schedules in effect—totaling approximately \$3,000,000—were included in our estimates for the years 1908 and 1909 (see Journal, 1907, pages 1030, 1082 and 1386-1402, and Journal, 1908, pages 771, 780 and 1232-1250), but were not allowed. The amount of \$3,493,103.11 was included in the estimate for the present year, but was disallowed by the Board of Estimate and Apportionment.

Your Committee would also call attention to the provisions of section 1542 of the Charter, to the effect that the expenditures for any purpose or object in any one year shall not exceed the amount appropriated by the Board of Estimate and Apportionment for such purpose or object; and any action by the Board of Education looking to the increase of Teachers' salaries when no funds for the same have been appropriated would be a plain and flagrant violation of the statute.

Your Committee would call attention to the further fact that, in accordance with a preamble and resolution adopted by the Board of Education on December 22, 1909 (see Journal, pages 2113-14), a Committee of Five has been appointed to appear before the Board of Estimate and Apportionment to urge the appropriation of such additional funds as will enable the Board of Education to pay the proposed increased salaries of Teachers included in the estimate for the year 1910, and, if legislation be necessary, to request the co-operation of the Board of Estimate and Apportionment to effectuate the same. It is respectfully submitted that until said Committee of Five has made its report to the Board it would not be proper for the Committee on By-Laws and Legislation to take any action in the matter of increasing the salaries of Teachers.

In conclusion, your Committee, for the reasons above set forth, is of the opinion that it is not feasible or practicable to comply with the terms of the resolutions offered by Mr. Somers.

The following resolution is submitted for adoption:

Resolved, That the Committee on By-Laws and Legislation be and it is hereby discharged from further consideration of the resolutions hereinbefore quoted.

The President put the question whether the Board would approve the report of the Committee on By-Laws and Legislation and adopt the resolution attached thereto, and it was decided in the affirmative.

On motion, the Board adjourned at 6.03 o'clock p. m.

A. EMERSON PALMER, Secretary.

Each and every bid must be accompanied by a deposit of cash or certified check in a sum equal to 25 per cent. of the amount of the bid, except that a minimum deposit of \$50 will be required with all bids, and that a deposit of \$500 will be sufficient to entitle bidders to bid on any or all of the buildings.

Deposits of unsuccessful bidders will be returned within twenty-four hours after successful bidders have paid purchase price in full and given security, and those of successful bidders may be declared forfeited to The City of New York by the Comptroller upon the failure of the successful bidder to further comply with the requirements of the terms and conditions of the sale as set forth hereinafter.

Successful bidders will be required to pay the purchase money and deposit the required security within twenty-four hours of the receipt of notification of the acceptance of their bids.

The Comptroller reserves the right to reject any and all bids and to waive any defects or informalities in any bid should it be deemed in the interest of The City of New York to do so.

All bids must state clearly (1) the number or description of the building or buildings bid for, (2) the amount of the bid, (3) the full name and address of the bidder.

All bids must be enclosed in properly sealed envelopes, marked "Proposals to be opened April 13, 1910," and must be delivered, or mailed in time for their delivery, prior to 11 a. m. of that date, to the "Collector of City Revenue, Room 141, No. 280 Broadway, New York City," from whom any further particulars regarding the buildings to be disposed of may be obtained.

The buildings will be sold for immediate removal only, subject to the following

### TERMS AND CONDITIONS.

The buildings and appurtenances thereto will be sold to the highest bidder, who must pay cash or a certified check drawn to the order of the Comptroller of The City of New York, and must also give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of \$50, the sum of \$50 shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but not to the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the building or buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal, nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or of any of these conditions shall forthwith void the sale and cause immediate forfeiture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing therein or permitting the occupancy of any such building by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

The sale will be as of the condition of the property on date of delivery thereof to the purchaser. The City of New York will not be responsible for any change or loss which may occur in the condition of the buildings, or their appurtenances, between the time of the sale thereof and the time of delivering possession to the purchaser, after being properly vacated of all tenants. The sale and delivery to purchaser will be made as nearly together as the circumstance of vacating the structures of their tenants will permit.

All the material of the buildings, sheds, walks, structures and cellars of whatever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the exterior walls of the buildings and their foundations and the sidewalks and curb in front of said buildings, extending within the described area shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point. The exterior walls and their foundations shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building. Where there is no curb the elevation of the surrounding ground shall be considered curb level. All wells, cess-pools, sinks, etc., existing on the property must be filled to the level of the surrounding ground with clean earth.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street, and the opening of the main sewer in street shall be properly closed in compliance with the directions of the Bureau of Sewers, Borough of Brooklyn, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed.

The permit for all opening in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances or any part thereof within thirty days from the day of possession will work forfeiture of ownership of such buildings, appurtenances or portion as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and The City of New York will, without notice to the purchaser, cause the same to be removed and the costs and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike

manner, and must be completed within thirty days from the day of possession, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Where party walls are found to exist between buildings purchased by different bidders, the materials of said party walls shall be understood to be equally divided between the separate purchasers.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furnishings, plaster, chimneys, projecting brick, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beam-holes, etc., bricked up, and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs of adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the contractor.

The Comptroller of The City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids; and it is further

Resolved, That, while the said sale is held under the supervision of the Commissioners of the Sinking Fund, the Comptroller is authorized to cause the sale to be advertised and to direct the sale thereof as financial officer of the City.

Each parcel must be bid for separately and will be sold in its entirety, as described in above advertisement.

Each and every bid must be accompanied by a deposit of cash or certified check in a sum equal to 25 per cent. of the amount of the bid, except that a minimum deposit of \$50 will be required with all bids, and that a deposit of \$500 will be sufficient to entitle bidders to bid on any or all of the buildings.

Deposits of unsuccessful bidders will be returned within twenty-four hours after successful bidders have paid purchase price in full and given security, and those of successful bidders may be declared forfeited to The City of New York by the Comptroller upon the failure of the successful bidder to further comply with the requirements of the terms and conditions of the sale as set forth hereinafter.

Successful bidders will be required to pay the purchase money and deposit the required security within twenty-four hours of the receipt of notification of the acceptance of their bids.

The Comptroller reserves the right to reject any and all bids and to waive any defects or informalities in any bid should it be deemed in the interest of The City of New York to do so.

All bids must state clearly (1) the number or description of the building or buildings bid for, (2) the amount of the bid, (3) the full name and address of the bidder.

All bids must be inclosed in properly sealed envelopes, marked "Proposals to be opened April 1, 1910," and must be delivered, or mailed in time for their delivery, prior to 11 a. m. of that date to the "Collector of City Revenue, Room 141, No. 280 Broadway, New York City," from whom any further particulars regarding the buildings to be disposed of may be obtained.

The buildings will be sold for immediate removal only, subject to the following

**TERMS AND CONDITIONS.**

The buildings and appurtenances thereto will be sold to the highest bidder, who must pay cash or a certified check drawn to the order of the Comptroller of The City of New York, and must also give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of \$50, the sum of \$50 shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but unfinished at the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the building or buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal, nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or any of these conditions shall forthwith void the sale and cause immediate forfeiture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing therein or permitting the occupancy of any such building by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

The sale will be as of the condition of the property on date of delivery thereof to the purchaser. The City of New York will not be responsible for any change or loss which may occur in the condition of the buildings, or their appurtenances, between the time of the sale thereof and the time of delivering possession to the purchaser, after being properly vacated of all tenants. The sale and delivery to purchaser will be made as nearly together as the circumstance of vacating the structures of their tenants will permit.

All the material of the buildings, sheds, walks, structures and cellars of whatsoever nature, with

their exterior and interior fixtures, appurtenances and foundations of all kinds, except the exterior walls of the buildings and their foundations and the sidewalks and curb in front of said buildings, extending within the described area shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point. The exterior walls and their foundations shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building. Where there is no curb the elevation of the surrounding ground shall be considered curb level. All wells, cesspools, sinks, etc., existing on the property must be filled to the level of the surrounding ground with clean earth.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street, and the opening of the main sewer in street shall be properly closed in compliance with the directions of the Bureau of Sewers, Borough of The Bronx, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed.

The permit for all opening in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances or any part thereof within thirty days from the day of possession will work forfeiture of ownership of such buildings, appurtenances or portion as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and The City of New York will, without notice to the purchaser, cause the same to be removed, and the costs and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and must be completed within thirty days from the day of possession, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Where party walls are found to exist between buildings purchased by different bidders, the materials of said party walls shall be understood to be equally divided between the separate purchasers.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furnishings, plaster, chimneys, projecting brick, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beam-holes, etc., bricked up, and wall pointed and made to exclude wind and rain and present a clean exterior. The roofs of adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the contractor.

The Comptroller of The City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids; and it is further

Resolved, That, while the said sale is held under the supervision of the Commissioners of the Sinking Fund, the Comptroller is authorized to cause the sale to be advertised and to direct the sale thereof as financial officer of the City.

## PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

## NOTICE TO CONTRACTORS.

## GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures. Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
