**REVISIONS TO THE NEW YORK CITY DEPARTMENT OF ENVIRONMENTAL PROTECTION STANDARD SEWER AND WATER MAIN SPECIFICATIONS, DATED 7/1/14:**

All references contained below are to the New York City Department of Environmental Protection Standard Sewer and Water Main Specifications, Dated July 1, 2014. Said Standard Sewer and Water Main Specifications are hereby revised as follows:

- a) **Refer** to Pages I-15, Section 10.28 – SALVAGEABLE MATERIALS;  
**Delete** in its entirety the Section;  
**Substitute** the revised Section:

Except as specified below, no salvageable material will be returned to the New York City Department of Environmental Protection regardless of condition. It will become the property of the Contractor for removal and disposal, by the Contractor, away from the site. No salvage of materials is required on contracts with federal funding.

The Contractor must salvage the following water system components removed during construction of the contract:

- All unbroken Metropolitan gate valves (6” thru 20”)
- All unbroken 20” resilient seated gate valves
