Chris Tran, Project Manager, NYC DEP Stream Management Program To: Leslie Zucker, CCE Ulster County and Adam Doan, Ulster County SWCD From:

Date: May 1, 2017

Ashokan Watershed Stream Management Program 2017-2019 Action Plan Re:

Cornell Cooperative Extension of Ulster County (CCE) and Ulster County Soil & Water Conservation District (SWCD) with support from the NYC Department of Environmental Protection (DEP) have developed the 2017-2019 Action Plan for your review. The purpose of the Action Plan is to identify the Ashokan Watershed Stream Management Program's planned activities, accomplishments, and next steps to achieve recommendations derived from stream management plans and stakeholder input. Program activities were reviewed by our Stakeholder Council at May and November 2016 meetings and their comments are reflected in this 2017-2019 work plan.

The Action Plan is divided into key programmatic areas:

- A. Protecting and Enhancing Stream Stability and Water Quality
- B. Floodplain Management and Planning
- C. Highway Infrastructure Management in Conjunction with Streams
- D. Assisting Streamside Landowners (public and private)
- E. Protecting and Enhancing Aquatic and Riparian Habitat and Ecosystems
- F. Enhancing Public Access to Streams

The Action Plan is updated annually. This proposed plan will run from June 1, 2017 until May 31, 2019, at which time the recommendations will be revised based on new stream assessments and program needs.

### 2017-2019 Action Plan

## Ashokan Watershed Stream Management Program

## Purpose

This Action Plan identifies goals and makes recommendations for implementation by the Ashokan Watershed Stream Management Program for the period 2017-2019. The Action Plan also provides a framework for reporting progress on planned activities to the public.

<u>How to read this document</u>: The Action Plan is organized around key programmatic areas. For each topic area a list of recommendations, derived from Stream Management Plans and the program's working groups, are provided in *italicized text*. Under the list of recommendations, ongoing projects funded through the Stream Management Implementation Program (SMIP) are listed.

### Background

In 1997, the NYC Watershed Memorandum of Agreement (MOA) was reached between New York State, New York City, the U.S. Environmental Protection Agency, watershed communities and counties, and several non-profit environmental organizations. The MOA included establishing a set of watershed partnership programs to help ensure that the NYC water supply watersheds were adequately protected.

The Ashokan Watershed Stream Management Program (AWSMP) was established as a joint effort between Cornell Cooperative Extension of Ulster County (CCEUC), the Ulster County Soil and Water Conservation District (SWCD), and the New York City Department of Environmental Protection (DEP). The three agencies work collaboratively to protect and restore the stability and ecological integrity of streams in the Ashokan Reservoir Watershed.

Action planning in the Ashokan Watershed began with the development of stream management plans for the Broadstreet Hollow Creek in 2003, Stony Clove Creek in 2004, and the Upper Esopus Creek in 2007. In subsequent years, AWSMP completed stream assessments of the Woodland Creek (and reassessment), Beaver Kill, Warner Creek, Birch Creek, Bush Kill, Bushnellsville Creek, Stony Clove Creek (and reassessment), and Stony Clove Creek tributaries.

A Filtration Avoidance Determination (FAD) granted to NYC in 2007 requires DEP and its partners to develop an Action Plan for the coming year to show how the findings and recommendations of the stream management plans will be implemented. The first post-implementation phase Action Plan for the Ashokan Watershed covered the period June 1, 2009 - May 31, 2011. This newest Action Plan covers the period June 1, 2016 - May 31, 2018 and spans new five-year contracts between the DEP and partner agencies CCEUC and SWCD.

The AWSMP moved its primary focus from planning to implementation in 2008. During that year the program staff, with input from local stakeholders, developed a process for distributing funding to watershed communities to help implement stream management plan recommendations (the "Stream Management Implementation Program"). To date, over \$3,200,000 has been allocated to implementation projects throughout the watershed.

# A. Protecting and Enhancing Stream Stability and Water Quality

Includes stream corridor assessments, stream stabilization/restoration projects with a goal to restore stream stability and reduce turbidity; monitoring of stream projects; and outreach, education and technical assistance to encourage stream stewardship.

SUMMARY OF RECOMMENDATIONS IN 2017-2019 ACTION PLAN AND ALLOCATION OF SMIP FUNDING IN SUPPORT OF RECOMMENDATIONS

#### STREAM CORRIDOR ASSESSMENTS

- 1. Continue a program of multi-phased stream corridor geomorphic assessments including: Phase 1-GIS watershed scale assessments for most sub-basins in the watershed; Phase 2 field-based stream feature inventories (SFI) for one stream per year or every other year; and Phase 3 reach to site scale monitoring (e.g. BEHI, geomorphic surveys). The assessments are used to help diagnose stream corridor condition and identify stream erosion hazards and/or water quality impairment that may require treatment. The table below includes candidate streams for assessment in 2016 and 2017. One stream per year may be subject to a rapid Phase 2 reassessment if conditions appear to be degrading.
- 2. Support stream investigations by other organizations in the Ashokan Watershed, with an emphasis on turbidity reduction.
- 3. Pilot methods for measuring bedload sediment in the Esopus Creek watershed. Bedload sediment is an important component of sediment transport that must be understood to better ensure the success of stream restoration projects. However, bedload is expensive data to collect. To explore the feasibility and cost-effectiveness of methods, conduct a small-scale pilot project that tests multiple bedload sampling and monitoring techniques at 1-2 sites and ability to estimate the percentage of the total sediment load contributed by bedload.
- 4. Provide funding for study of stream condition and function, and monitoring of system condition and management practices through the Stream Management Implementation Program (SMIP). A Request for Applications to meet priority science needs was issued in mid-2016, initiating several SMIP-funded projects. One of these projects is a study to develop and publish a new regionally calibrated streambank erosion rate curve. The curve will be derived from field measurements and used for predicting sediment contributions from bank erosion.

#### ASHOKAN WATERSHED STREAM ASSESSMENT PROJECTS

Streams	Location	Current Status
Broadstreet Hollow	Towns of Shandaken and Lexington	Completed 2001
Stony Clove	Towns of Shandaken, Woodstock, Hunter, and	Completed 2003
	Lexington	

Streams	Location	Current Status
Esopus Creek	Towns of Shandaken and Olive	Completed 2007
Woodland Creek	Town of Shandaken	Completed 2008
Beaver Kill	Towns of Shandaken and Woodstock	Completed 2010
Warner Creek	Town of Shandaken and Woodstock	Completed 2010
Birch Creek	Town of Shandaken	Completed 2012
Bush Kill	Towns of Shandaken and Olive	Completed 2012
Bushnellsville Creek	Towns of Shandaken and Lexington	Completed 2013
Stony Clove Creek	Towns of Shandaken and Hunter	Completed mainstem
		reassessment 2013
Woodland Creek	Town of Shandaken	Completed mainstem
		reassessment 2015
Stony Clove Creek Tributaries	Towns of Shandaken and Hunter	Completed 2015
Maltby Hollow Brook	Town of Olive	Completed 2015
Esopus Creek Headwaters	Town of Shandaken, Oliverea Reach	2016-2017
Little Beaver Kill	Town of Woodstock	Anticipated 2017
Fox Hollow Creek	Town of Shandaken	TBD
Peck Hollow	Towns of Shandaken and Lexington	TBD
Ashokan Reservoir Tributaries	Town of Olive and Town of Hurley	TBD

#### ASHOKAN WATERSHED TURBIDITY MONITORING PROJECTS

In summer 2015, DEP began a multi-year geomorphic and suspended sediment/turbidity (SS/T) monitoring study in the Stony Clove Creek watershed and SS/T monitoring study in the Upper Esopus Creek watershed. Work in 2015 included modified Phase 2 SFI and Phase 3 assessments in tributaries to Stony Clove Creek to help inform water quality monitoring station site selection in 2016. Water quality monitoring will be implemented through an agreement with USGS and is anticipated to start in 2016. This work is expected to continue through 2025.

#### ASHOKAN WATERSHED SMIP PROJECTS SUPPORTING STREAM ASSESSMENT & MONITORING (ACTIVE 2017)

Organization	Proposal Title	Proposal Number	Amount	Status	Purpose of Grant
Stantec	BANCS Model	AWSMP-2016-121	\$169,610	Active	Calibrate and validate the BANCS model
Consulting	Calibration and				to predict sediment supply contributed
Inc.	Validation: Ashokan				by bank erosion within the Ashokan
	Watershed Predictive				Watershed.
	Regional Curve				

# STREAM RESTORATION/STABILIZATION PROJECTS TO RESTORE STREAM SYSTEM STABILITY AND/OR REDUCE CHRONIC TURBIDITY INPUTS

7. Identify locations in the Ashokan Watershed that are long-term, chronic suspended sediment/turbidity sources and evaluate the potential efficacy of restoration practices. Annually update and prioritize potential stream restoration and/or channel stabilization projects identified

- through the stream corridor geomorphic assessments. Begin the survey and design process for future turbidity reduction projects.
- 8. SMIP funding for 2014-2019, along with funds provided to SWCD for stream restoration projects, will be used to implement additional projects expected to have a measurable reduction in turbidity. Support efforts to obtain additional funding to pursue this goal.
- 9. Coordinate with the Town of Shandaken and County DPW to conduct a geomorphic assessment of the Esopus Creek at Oliverea. The diagnostic assessment is to provide information needed to treat flood hazards and channel instability in the area.

ASHOKAN WATERSHED STREAM PROJECTS TO RESTORE STREAM STABILITY AND REDUCE CHRONIC SOURCES OF SEDIMENT (ACTIVE 2017)

SWCD	Project 1 at Beaverkill at Van Hoagland Stream Restoration Project	\$TBD	2017
	Treatment of a large failing hill slope (site 1) that is a chronic source of adjoining stream that has become unstable.	suspended sedimen	t, as well as
SWCD	Project 2 at Beaverkill at Van Hoagland Stream Restoration Project	\$TBD	2017
	Treatment of a large failing hill slope (site 2) that is a chronic source of adjoining stream that has become unstable.	suspended sediment	, as well as
SWCD	Woodland Creek at Woodland Valley Landowner Association	\$TBD	2018
34465	troculand of contact troculand valley Landonner / 1550shatton	3100	2010
	Stabilize failing hillslope that is chronic source of suspended sediment an through a historically unstable section of Woodland Creek at the upstrea	nd improve overall st	ream stabilit
Possible 2	Stabilize failing hillslope that is chronic source of suspended sediment an	nd improve overall st	ream stabilit ment.
Possible 2 geomorpl	Stabilize failing hillslope that is chronic source of suspended sediment an through a historically unstable section of Woodland Creek at the upstread 2017-2019 projects (project selection is subject to change pending thic assessments and affected landowner support):	ad improve overall st am extent of develop g annual stream o	oream stabilit oment. orridor 2018

Identify next round of turbidity reduction projects pursuant to 2017 FAD.

#### ASHOKAN WATERSHED SMIP PROJECTS SUPPORTING STREAM RESTORATION (ACTIVE 2017)

Organization	Proposal Title	Proposal Number	Amount	Status	Purpose of Grant
Town of Shandaken	Final Design and Construction Fox Hollow Grade Control by Herdman Bridge	AWSMP-2015-110	\$90,000	Active	Complete 100% design, permitting, and installation of grade control structure on Fox Hollow Creek at the Town of Shandaken Herdman Road bridge.
Ulster County Department of Public Works	Bushkill / Watson Hollow Slope Stabilization	AWSMP-2015-103	\$68,000	Active	Engineering and design for Bush Kill streambank stabilization along Ulster County Rt. 42 in the Town of Olive.

#### Monitoring of Stream Projects

- 10. Annually monitor performance of stream corridor projects funded by the Ashokan Watershed Stream Management Program.
  - a. See table below for specific project requirements.
  - b. Continue to monitor previously completed restoration projects on a case-by-case basis. Special consideration given to monitoring after bankfull and above flows.
  - c. Project monitoring will help guide maintenance intervention when site adjustment is outside the tolerance of the project parameters. See project table above for listing of maintenance work.
- 11. Monitor turbidity and suspended sediment at stream restoration project sites before and after project construction to quantify effects on water quality. To be implemented on a case-by-case basis. A Request for Applications to meet priority science needs was issued in mid-2016, initiating several SMIP-funded projects. One of these projects funds monitoring of suspended sediment and turbidity above and below a planned stream restoration site in the upper Woodland Creek. Monitoring begins in 2017 and will extend for at least one year after project implementation.

#### ASHOKAN WATERSHED SMIP PROJECTS SUPPORTING STREAM MONITORING (ACTIVE 2017)

Organization	Proposal Title	Proposal Number	Amount	Status	Purpose of Grant
USGS S	Suspended Sediment and Turbidity Monitoring in the Woodland Creek Watershed	AWSMP-2016-119	\$29,726	Active	Collect discrete SSC and turbidity data upstream of a Woodland Creek hillslope failure Sediment and Turbidity Reduction Project (STRP) scheduled for treatment in 2017/2018; and collect continuous turbidity and discrete SSC data below the hillslope failure for 1 year before and 1 year after the STRP.

#### ASHOKAN WATERSHED STREAM PROJECTS MONITORING

Stream Project (Year Completed)	Last Surveyed	Monitoring Goals and Permit Requirements
Bush Kill Moran Bioengineering Project (2016)	2016 (As-built)	Begin survey monitoring to track survival rate and growth of live material and overall geomorphic performance.
Stony Clove at Wright Road (2015)	2016	Annual survey and report for ACOE, 2017.
Stony Clove and Warner Creek Confluence (2014)	2016	Completed all permit requirements in 2016. Survey following high flow events and as needed.
Stony Clove Lane (2014)	2016	Completed all permit requirements in 2016. Survey following high flow events and as needed.
Stony Clove at Chichester #1, 2, 3, 4 (2012 – 2013)	2016	Completed all permit requirements in 2015. Survey following high flow events and as needed.
Warner Creek Site 5 (2013)	2016	Completed all permit requirements in 2015. Survey following high flow events and as needed.
Stony Clove at Phoenicia Main Street (2011)	2016	Continue survey monitoring to track sediment deposition fluctuations per DEC permit. Survey following high flow events and as needed.
CSBI Projects	2016	Conduct vegetation monitoring at all CSBI projects on a biannual basis for a period of 5 consecutive years.

# Outreach, Education and Technical Assistance to Encourage Stream Stewardship - Recommendations

- 12. Distribute Stream Stewardship Principles to relevant entities.
- 13. Hold meetings of the AWSMP Stakeholder Council (2-3 per year) and working groups (6-12 per year) to solicit participation and input from local community members.
- 14. Continue to provide outreach to municipal officials, agencies, affected landowners, and the public about findings from stream assessments and planned stream restoration projects. In 2016, AWSMP held two stream walks for watershed residents on the Beaver Kill in Mink Hollow. The second stream walk was followed by a watershed bus tour for landowners and municipal officials, including a stop at future stream restoration project sites. In fall 2016, AWSMP worked with the Town of Olive to hold a presentation of results from the Maltby Hollow Stream Feature Inventory and Bank Erosion Assessment.
- 15. Continue to provide youth education in partnership with the Onteora Central School District to teach stream and watershed science to students through field studies, and after-school and classroom programs. In 2016, the AWSMP reached over 500 students in the School District with hands-on and outdoor education on water, watershed, and stream science. In-school and after-school programming was delivered at the Bennett Intermediate School, and classroom and enrichment programs were delivered at Woodstock and Phoenicia elementary schools.
- 16. Fund public education and outreach activities that promote stream stewardship through the SMIP. In 2016, AWSMP offered 11 SMIP-funded training scholarships to local officials. A SMIP award to the Catskill Interpretive Center (CIC) funded outreach and signage on riparian buffer benefits at a CSBI planting site along a nature trail on the CIC grounds.
- 17. Develop written education and outreach materials for streamside landowners and other watershed stakeholders. Use a variety of media (newsletters, fact-sheets, press, video, and website) to

- disseminate information about the program and encourage stream stewardship (1-2 fact sheets per year).
- 18. Offer trainings that promote an understanding of effective stream and floodplain management strategies for local stakeholders (1 per year). In 2016, AWSMP held a training on how to develop and use Elevation Certificates that was attended by 22 local officials and surveyors.
- 19. Participate in local community events to promote the goals of the Ashokan Watershed Stream Management Program. AWSMP staffed displays and demonstrations at school Earth Days, Scout Camporee, Shandaken Day, Olive Day, and the Ulster County Fair, we did it all in 2016!
- 20. Organize an Ashokan Watershed Conference to provide general education to watershed residents and train municipal officials in specific topics (1 every two years). The 2017 Ashokan Watershed Conference was held April 29, 2017.
- 21. Co-organize a Catskill Environmental Research and Monitoring (CERM) conference to disseminate the results of river and watershed studies (1 every two years). The 2016 CERM Conference was held October 27-28, 2016.
- 22. Hold stream walks and other public engagement events (5-10 per year). In 2016, AWSMP's Family, Fun & Fish Day was a rainy event but the fishing was good! Also in 2016, AWSMP piloted a summer education program to engage youth in streamside learning in collaboration with the Onteora Central School District, Town of Olive Recreation Department, and 4-H Tech Wizards.
- 23. Develop citizen stewardship volunteer programs and opportunities for adult and youth volunteers. In 2016, the AWSMP and community partners organized volunteers to clear invasive plants from two future CSBI planting sites.

ASHOKAN WATERSHED SMIP PROJECTS SUPPORTING EDUCATION, OUTREACH AND TECHNICAL ASSISTANCE TO ENCOURAGE STREAM STEWARDSHIP (ACTIVE 2017)

Organization	Proposal Title	Proposal Number	Amount	Status	Purpose of Grant
Catskill Center for	Riparian Buffer	AWSMP-2015-105	\$9,000	Active	Develop outreach materials and
Conservation &	Demonstration				community engagement, plus
Development	Project at the Maurice D. Hinchey Catskill Interpretive Center				fencing around a riparian buffer demonstration located at the Catskill Interpretive Center in Mt. Tremper.
Cornell Cooperative Extension of Ulster County	2017 Stream & Floodplain Manager Training Scholarships	AWSMP-2016-117	\$20,585	Active	Offer up to 19 scholarships for town and county officials to attend stream and floodplain management trainings in 2017.

## B. Floodplain Management and Planning

Includes floodplain assessments; coordination with floodplain management efforts in the watershed; and outreach, education and technical assistance for floodplain management in the Ashokan Watershed.

SUMMARY OF RECOMMENDATIONS IN 2017-2019 ACTION PLAN AND ALLOCATION OF SMIP FUNDING IN SUPPORT OF RECOMMENDATIONS

#### FLOODPLAIN ASSESSMENT - RECOMMENDATIONS

- 1. Assist communities with the review of flood studies and revisions to the existing Flood Insurance Rate Maps (FIRMs) produced by FEMA.
- 2. Provide SMIP funds for the identification of natural floodplain areas that enhance sediment, debris, and water storage; riparian and aquatic habitat; and flood elevation reductions in downstream areas. Work with local planners and landowners to identify and implement protection strategies for these critical areas.

#### COORDINATION OF FLOODPLAIN MANAGEMENT EFFORTS IN THE WATERSHED - RECOMMENDATIONS

- 3. Promote Town development of Flood Hazard Mitigation Plans and Community Rating System applications in the Ashokan Watershed. In 2016, AWSMP assisted SAFARI (the Town of Shandaken flood advisory committee) with updates to the town flood mitigation plan. In 2018, AWSMP will assist and facilitate, as needed, the mandatory five-year comprehensive review and update of the flood hazard mitigation plan. AWSMP provided SMIP funding to the Town of Shandaken to complete an application to the National Flood Insurance Program's Community Rating System. AWSMP is also funding the Town of Olive's development of a town-wide flood mitigation, in the NYC watershed portion of the town.
- 4. Coordinate with flood commissions and working groups (e.g., SAFARI, NY Rising Community Reconstruction Program) in the watershed. Encourage the prevention of inappropriate development in areas of high flood or erosion risk and foster uses that are compatible with the anticipated flooding and erosion conditions.
- 5. Where existing community structures and facilities are in at-risk locations, support community planning as a next-step where needed, and the application of flood-proofing measures or relocation.
  - In 2016, AWSMP\* assisted the Town of Shandaken with successful funding applications, including for a relocation feasibility study in the hamlet of Phoenicia, and a grant to acquire property (outside the floodplain) for the future relocation of two critical facilities, both of which are currently located within the floodplain. The two critical facilities are the Town Hall and the Town Highway Garage.

- In 2017-18, AWSMP\* will work closely with the Town of Olive to undertake a "Sustainable Communities" planning study in the hamlet of Boiceville that will focus on relocation, elevation, and/or floodproofing alternatives for residents and businesses. This includes, but is not limited to, assisting the Town in its effort to relocate a critical facility (Fire Company #5) in the hamlet of Boiceville to a nearby location outside of the floodplain.
- 6. Assist municipalities with completing and implementing local flood analyses in watershed population centers that require engineering and modeling analysis and public input to select projects that will lower flood elevations. In 2016, the Town of Shandaken completed a Local Flood Analysis (LFA) with AWSMP support for the hamlets of Phoenicia and Mt. Tremper and began LFA implementation. AWSMP attended coordination meetings organized by the Town with the NYSDOT to discuss LFA modeling results for the Rt. 28 bridge in Mt. Tremper to inform a new bridge design. Funding was provided through SMIP to begin an LFA for the hamlets of Shandaken and Allaben in the Town of Shandaken to be completed in 2018. The AWSMP funded and assisted the Town of Olive Flood Advisory Committee with review and development of an LFA for Boiceville and Mt. Tremper that should be completed in 2017.
- 7. Provide \$250,000 in funds for local flood hazard mitigation analysis and \$1,750,000 in funds for LFA-recommended and Town-adopted implementation projects through 2019, and assistance with obtaining additional state and federal funding for project implementation.
- 8. Work with towns to implement mitigation actions included in the 2017 update to the County's All-Hazard Mitigation Plan.
- 9. Assist all Ashokan watershed towns with using information in the County All-Hazard Mitigation Plan and local flood mitigation plan(s) to access state and federal mitigation funding following declared emergencies or for pre-disaster mitigation grant projects.

ASHOKAN WATERSHED SMIP PROJECTS SUPPORTING COORDINATION WITH FLOODPLAIN MANAGEMENT EFFORTS IN THE WATERSHED (ACTIVE 2017)

Organization	Proposal Title	Proposal Number	Amount	Status	Purpose of Grant
Town of Olive	Local Flood and Feasibility Analysis for Boiceville and West Shokan	AWSMP-2014-100	\$76,631	Active	Analysis of flood conditions and identification of hazard mitigation projects in Boiceville and West Shokan.
Town of Olive	Town of Olive Flood Hazard Mitigation Plan	AWSMP-2014-102	\$24,285	Active	Develop a Town Flood Hazard Mitigation Plan in the NYC Watershed portion of Town of Olive.
Town of Shandaken	Local Flood and Feasibility Analysis for Shandaken and Allaben Hamlets	AWSMP-2016-125	\$115,000	Active	Analysis of flood conditions and identification of hazard mitigation projects in the hamlets of Shandaken and Allaben.

<sup>\*</sup>AWSMP partners with the Ulster County Department of Environment (under agreement with CCEUC) to assist with coordination of floodplain efforts in the Ashokan watershed.

# OUTREACH, EDUCATION AND TECHNICAL ASSISTANCE FOR FLOODPLAIN MANAGEMENT IN THE ASHOKAN WATERSHED - RECOMMENDATIONS

- 10. Continue to provide training and assistance for local floodplain managers and municipal officials in using revised FIRMs (Flood Insurance Rate Maps) and other FEMA datasets, and understanding NFIP requirements.
- 11. Increase access to flood prevention/protection information in the watershed through the AWSMP website, locally available technical publications at AWSMP, local libraries, Town Halls, etc. and through presentations, workshops and other outreach events.
- 12. Continue to provide education through working group meetings on topics such as how to develop Flood Hazard Mitigation Plans; review of floodplain ordinances; participation in FEMA's Community Rating System; implementation of FHM recommendations; access to funding; specialized trainings for surveyors, real estate, and other professionals; and coordination between local, county, and state partners engaged in flood response and flood mitigation.
- 13. Provide funding for Code Enforcement Officers and Floodplain Administrators to attend training sessions on flood related issues and become Certified Floodplain Managers.
- 14. Begin preparing formalized floodplain management education modules, designed to provide educators who do not have extensive training in flood hazard mitigation topics with the information and materials needed to deliver high quality education on floodplain management and related subjects.

ASHOKAN WATERSHED SMIP PROJECTS SUPPORTING COORDINATION WITH FLOODPLAIN MANAGEMENT EDUCATION IN THE WATERSHED (ACTIVE 2017)

Organization	Proposal Title	Proposal Number	Amount	Status	Purpose of Grant
Cornell Cooperative	2017 Stream &	AWSMP-2016-117	\$20,585	Active	Offer up to 19 scholarships for town
Extension of Ulster	Floodplain Manager				and county officials to attend
County	Training Scholarships				stream and floodplain management
					trainings in 2017.

## C. Highway and Infrastructure Management in Conjunction with Streams

Outreach, training and financial assistance to highway departments to encourage the adoption of best management practices.

SUMMARY OF RECOMMENDATIONS IN 2017-2019 ACTION PLAN AND ALLOCATION OF SMIP FUNDING IN SUPPORT OF RECOMMENDATIONS

#### APPLICATION OF HIGHWAY BEST MANAGEMENT PRACTICES TO REDUCE WATER POLLUTION

- 1. Work with the Highway Manager's Working Group to identify roadway infrastructure best management practices that treat sources of turbidity and stream system degradation (e.g., undersized and perched culverts, outfalls that are point sources of sediment discharge collected from diffuse sources of road runoff, etc.).
- 2. Encourage local municipalities, highway departments and NYSDOT, to prioritize vegetation management on critical areas such as roadside ditches and steep slopes to reduce sources of turbidity in the Ashokan Watershed. Develop programs to provide road maintenance crews with additional resources for seeding newly cleaned ditches with native ground cover appropriate for reclamation. An agreement to access shared machinery for mulching seeded areas was implemented in early 2016.
- 3. Continue working with Towns to reduce sediment loadings through application of best management practices for winter road abrasives, mined locally in the Ashokan Watershed, that have a high clay and silt content and are a source of turbidity in the streams in the Ashokan Watershed.

#### REDUCING HYDRAULIC CONSTRICTIONS IN STREAMS: BRIDGES AND CULVERTS

4. Collaborate with state and local highway departments and stream management personnel to develop specifications for applying natural channel design concepts to bridge and culvert rehabilitation and replacement.

STREAM/ROAD STABILIZATION PROJECTS AND IMPLEMENTATION OF BEST MANAGEMENT PRACTICES ON RIGHT OF WAYS

- 5. Collaborate with local, county and state highway departments to apply natural channel design concepts to streambank stabilization along roadsides.
- 6. Seek opportunities to mitigate the impact of public infrastructure (road, railroad, and utility) encroachment on the riparian vegetation community and aquatic habitats by improved planning, management, supplemental plantings and the improved care of existing vegetation.

ASHOKAN WATERSHED SMIP PROJECTS SUPPORTING IMPROVED STREAM/ROAD STABILIZATION AND IMPROVED RIGHT OF WAY (ACTIVE 2017)

Organization	Proposal Title	Proposal Number	Amount	Status	Purpose of Grant
Town of Olive Highway Dept.	Hillside Drive Culvert Replacement over Dry Brook	AWSMP-2015-113	\$274,000	Active	Replace existing culvert with culvert better aligned with stream and able to pass the 100-year flow. Current culvert is a hydraulic constriction and in poor condition. Loss of the culvert would cut off access to 15 homes.
Ulster County Dept. of Public Works	Fischer Bridge over Esopus Creek Construction	AWSMP-2016-115	\$77,300	Active	Post-Irene construction of the Fischer Bridge carrying Oliverea Rd over the Little Panther Kill tributary to Esopus Creek in the Town of Shandaken. Replaces 8-foot diameter pipe with a 61-foot span bridge.
Town of Olive Highway Dept.	Engineering & Design Upper Boiceville Road Culvert Replacement	AWSMP-2016-127	\$13,500	Active	Engineering and hydraulic studies for future replacement of Upper Boiceville Road culvert to reduce hydraulic constriction and maintain fish passage.

# Outreach, Education and Technical Assistance to Highway Managers and Excavation Contractors

- 7. Organize Highway Manager's Working Group meetings with relevant local, county, and state highway personnel to identify shared stream/road concerns and evaluate opportunities to support coordinated effort to use best management practices. Provide guidelines for "repairs" of streams and drainage systems with best management practices advocated by the AWSMP to reduce risk of further instability (2-3 per year).
- 8. Hold a highway manager and contractor training on installation of stream best management practices (1 in 2016-18).
- 9. Provide SMIP funds for highway and infrastructure management projects with benefits to water quality and stream system integrity.

## D. Assisting Streamside Landowners (public and private)

Provide access to training and technical information to increase the knowledge, skills, and capabilities of landowners in the watershed. Also provide support for riparian buffer restoration.

SUMMARY OF RECOMMENDATIONS IN 2017-2019 ACTION PLAN AND ALLOCATION OF SMIP FUNDING IN SUPPORT OF RECOMMENDATIONS

#### ASSESSMENT OF STREAMSIDE PROPERTY ISSUES

1. Work with towns and landowners to identify and document streamside property (public and private) where there are stream stability concerns. Provide this documentation to towns, agencies and landowners to help inform management decisions.

#### STREAMSIDE LANDOWNER FINANCIAL AND TECHNICAL ASSISTANCE

- 2. Offer and encourage participation in landowner incentive programs to encourage voluntary participation in stream and riparian zone protection and enhancement. One such program is the Catskill Streams Buffer Initiative.
- 3. Provide customized Riparian Corridor Management Plans to landowners enrolled in CSBI. These plans highlight the importance of healthy riparian buffers and sustainable streamside property management practices that landowners can implement on their properties.
- 4. Demonstrate soil bioengineering as a feasible bank protection strategy for restoring riparian habitat, streambank stability and improving instream water quality in the Ashokan Watershed through a pilot bioengineering demonstration project on the Bushkill Creek in Town of Olive, NY.
- 5. Focus on multi-phase riparian buffer restoration projects with invasive species removal, management and native plant establishment.
- 6. Review data and perform Geographic Information Systems analysis to identify areas that would benefit from buffer enhancement to improve landowner recruitment into the Catskill Streams Buffer Initiative program.
- 7. Encourage landowner participation in CSBI through showcasing aesthetic value and habitat improvement using a combination of invasive species management and native plant installation at a Riparian Buffer Demonstration Display at the Catskill Interpretative Center.

#### Ashokan Watershed CSBI Projects

2017

In-house design of Ashokan Watershed Bioengineering Project (location TBD)
Installation of 3-5 landowner invasive removal and planting projects
Production of 3-5 landowner specific Riparian Corridor Management Plans
Continue project monitoring – 35 sites scheduled

2018

Continue to assist 3-5 CSBI enrolled landowners with streamside vegetation projects Production of 3-5 landowner specific riparian corridor management plans Installation of streambank bioengineering project (Location TBD)

#### MONITORING OF RIPARIAN BUFFER PLANTINGS

- 8. Monitor performance of riparian buffer plantings funded by the Catskill Streams Buffer Initiative.
  - a. Riparian buffer restoration sites that were installed through CSBI are monitored bi-annually for a period of 5 years after project completion. The monitoring helps inform management decisions on species selection and site characteristics. 35 sites scheduled for 2017, 15 sites in 2018.
  - b. Geomorphic monitoring of Bushkill Creek bioengineering project implementation. As-built survey was completed in 2016, follow-up monitoring to be conducted in 2017.

#### OUTREACH, EDUCATION AND TECHNICAL ASSISTANCE TO STREAMSIDE LANDOWNERS

- 9. Provide site visits and office consultations with watershed landowners, municipalities, contractors and others for designing and implementing best management practices to reduce erosion.
- 10. Develop educational products (fact sheets, guidebooks, videos, etc.) to educate landowners on best management practices, such as riparian planting design and maintenance, and guidelines for proper sizing of private stream crossings.
- 11. Develop several riparian buffer demonstration projects that can be accessed by volunteers and members of the public for educational purposes.
- 12. Develop and encourage volunteer service projects to install, maintain, and enhance riparian buffer demonstration plots; and to collect seeds or cuttings of native plants used in buffers.
- 13. Develop reliable local sources of native plant material for stream and riparian improvement projects. Maintain the 2012 installation of 10,000 live willow plants for cutting beds that will be used in future riparian restoration projects. Continue to identify native local stands for harvest located in the watershed.

ASHOKAN WATERSHED SMIP PROJECTS SUPPORTING RIPARIAN BUFFER RESTORATION (ACTIVE 2017)

Organization	Proposal Title	Proposal Number	Amount	Status	Purpose of Grant
Catskill Center for	Riparian Buffer	AWSMP-2015-105	\$9,000	Active	Education and outreach
Conservation and	Demonstration				focused on a CSBI-funded
Development	Project at the				riparian buffer planting located
	Maurice D. Hinchey				at the Catskill Interpretive
	Catskill Interpretive				Center on St. Rt. 28. Features
	Center				native Catskill plants and
					provides education about the
					care and restoration of riparian
					areas along Catskills streams.

## E. Protecting and Enhancing Aquatic and Riparian Habitat and **Ecosystems**

Support for research and education programs that encourage protection of aquatic and riparian ecosystems.

SUMMARY OF RECOMMENDATIONS IN 2017-2019 ACTION PLAN AND ALLOCATION OF SMIP FUNDING IN SUPPORT OF RECOMMENDATIONS

#### STREAM ECOSYSTEM ASSESSMENT

- 1. Identify riparian areas of particular environmental benefit or concern and create a database of targeted properties for riparian zone improvement programs.
- 2. Continue research, evaluation, and monitoring of aquatic ecosystems in the Watershed to improve stream best management practices. Support the characterization of physical and water-quality regimes and the condition of important species in the watershed by public agencies and interest groups. A Request for Applications to meet priority science needs was issued in mid-2016, initiating several SMIP-funded projects. One of these projects is a study of how stream water temperature varies annually within the Esopus Creek and major tributaries. The study will run through August 2019.
- 3. Provide funding for study of stream condition and function, and monitoring and evaluation of system condition and management practices through the SMIP. A Request for Applications to meet priority science needs was issued in mid-2016, initiating several SMIP-funded projects. One of these projects continues annual fish community survey through 2017-2018 with plans to develop a report on fish community status in 2019. Based on long-term fish monitoring partially supported by AWSMP, in 2016 the USGS published a report on "Long-Term Trends in Naturalized Rainbow Trout Populations in the Upper Esopus Creek 2009-15." A separate SMIP-funded study is examining the effects of introduced White Perch and Alewife on Rainbow Trout populations in the Ashokan Reservoir. A final report for this study is expected in 2018.

OUTREACH, EDUCATION AND TECHNICAL ASSISTANCE FOR AQUATIC AND RIPARIAN HABITAT AND **ECOSYSTEMS** 

- 4. Enhance coordination and information sharing among regulators, scientists, educators and the public.
- 5. Work with regional organizations to develop and disseminate outreach materials and offer public programs on critical invasive species for the West of Hudson Watersheds. In 2017, AWSMP is partnering with the Catskill Regional Invasive Species Program (CRISP) at the Catskill Center to provide education and technical assistance to Oliverea landowners engaged in Japanese Knotweed eradication efforts in the headwaters of the upper Esopus Creek.

- 6. Work with watershed municipalities to evaluate local ordinances such as comprehensive plans, zoning regulations, site plan review laws, subdivision laws and floodplain ordinances to determine if adequate consideration is given to impacts on riparian and aquatic ecosystems.
- 7. Hold Stream Ecosystem Working Group meetings to advise the program on stream system assessment, research, and monitoring needs. Work with the group to coordinate research, assessment, and monitoring projects in the Watershed (1-2 meetings per year, or as needed).
- 8. The AWSMP Stream Ecosystem Working Group is drafting a 10-year update to the 2007 Stream Ecosystem Research & Assessment Strategy for the Upper Esopus Creek. Publish the updated Research, Assessment & Monitoring Strategy for the Upper Esopus Creek. The AWSMP will continue meetings of the Stream Ecosystem Working Group and finalize and publish an updated Research, Assessment & Monitoring Strategy for the Ashokan Watershed in 2017.
- 9. Participate in the inter-basin Riparian Buffers Working Group.
- 10. Integrate recommendations made in the New York Natural Heritage Program's report "Inventory, Classification, and Description of Riparian Natural Community Reference Types for Ashokan Watershed, New York" into riparian restoration designs. The report can be accessed at <a href="http://ashokanstreams.org/publications-resources/technical-data/">http://ashokanstreams.org/publications-resources/technical-data/</a>. AWSMP is referencing this report, along with CSBI guidance, when partners request information on regionally appropriate species to highlight in riparian education projects.

Ashokan Watershed SMIP Projects Supporting Aquatic and Riparian Habitat and Ecosystem Assessment (active 2016)

Organization	Proposal Title	Proposal Number	Amount	Status	Purpose of Grant
USGS	Long-term Trends in Rainbow Trout Growth and Naturalized Populations in the Ashokan Basin	AWSMP-2014-94	\$100,938	Active	Study Rainbow Trout growth in the Ashokan Reservoir and long-term trends in their population sizes in the upper Esopus Creek.

## F. Enhancing Stream-based Recreation and Public Access

Support for projects that improve the quantity and quality of public stream access and enhance stream-based recreational opportunities. These recommendations incorporate community development efforts into stream management.

SUMMARY OF RECOMMENDATIONS IN 2017-2019 ACTION PLAN AND ALLOCATION OF SMIP FUNDING IN SUPPORT OF RECOMMENDATIONS

#### **ENHANCING PUBLIC ACCESS TO THE STREAMS**

- 1. Identify and assess potential stream access sites in the watershed. Investigate opportunities to develop multi-use, low-impact trail systems along the stream corridors. Trails for hiking, biking, cross country skiing and snowshoeing could provide multiple benefits, including drawing visitors to local resorts and increasing user awareness of stream management issues. Make improvements to existing stream access sites. Ensure that any stream access and recreation activities or projects will not harm or degrade the environment and the greater ecology of the stream system.
- 2. Explore opportunities for and impacts of operational adjustments of the Shandaken Tunnel to accommodate the needs of biota along with other stakeholders. Information needs related to this topic were discussed during development of an updated Research, Assessment & Monitoring Strategy for the Ashokan Watershed.
- 3. Work with Stream Access and Recreation Working Group and other stakeholders on developing a plan of action to modify the policy related to recreational releases to the Shandaken Tunnel and ensure mutually beneficial results for all stream users that do no harm. Moving forward, this working group plans to explore options for tunnel operations, and continue to engage in constructive dialogue with State and City officials about future protocols and procedures for Tunnel operations.
- 4. Determine a good area for either new trail construction or existing trail improvement that would provide greater public access to streams. In 2016, AWSMP met with Ulster County planners to review issues related to stream crossings on the Ashokan Rail Trail.
- 5. Monitor conditions at existing public access sites to determine need for repairs, enhancements and/or improvements. Help to address through education and by providing a forum for discussion, any over-use and/or site monitoring issues at popular Esopus Creek access points, if needed.
- 6. Utilize the Town of Shandaken Recreation Master Plan and recreation and access documents from all watershed towns when developing programs and projects. Work closely with Town of Shandaken Parks and Recreation Committee and their counterparts in other watershed towns to develop and execute projects.
- 7. Work with DEP, DEC, County, Town, and other entities to assess possibility of utilizing flood buy-out properties for recreational and educational purposes.

- 8. Explore possibility of creating educational opportunities alongside recreational areas such as interpretative nature trails, wildlife viewing areas, bird observation points, "photo safaris," hiking/biking/walking/running trails, kiosks and educational signage, etc.
- 9. Collaborate with chambers of commerce, tourism industry, and others to promote the area as a destination. This will help spread the message of good stream management to a wider audience and strengthen and improve the local economy. Work with stakeholder groups to prevent degradation of stream resources and sensitive locations from overuse.
- 10. Support development of a protocol for recreational stream safety that includes input and consensus from all stakeholder groups. The protocol will include criteria to identify in-stream safety hazards and mitigation options for those hazards. Potential options may include (but are not limited to) educational/warning signage, hazard avoidance, and hazard removal. The protocol will consider the impacts of any action on human safety, habitat, and stream stability.
  - In 2016, AWSMP stakeholder groups reviewed a risk analysis protocol for management of large wood in streams published by Colorado State University and discussed its possible application. Ulster County SWCD staff and members of the Stream Access and Recreation Working Group will be piloting the protocol in 2017 on a yet-to-be-determined section of the Esopus Creek.
- 11. Develop awareness of Hemlock Woolly Adelgid (HWA) control efforts and remain informed about the impact of the HWA on streams in the Ashokan watershed.

#### **EDUCATION FOR RECREATIONAL USERS OF STREAMS**

- 12. Develop and host major educational events/conferences/meetings devoted to stream access and recreation issues as needed on topics determined by the Stream Access and Recreation Working Group. Past topics have included management of large wood in streams, Shandaken Tunnel recreational releases, and low-level outlet Issues in the Schoharie Reservoir. Potential future topics include: recreational safety, in-stream wood management, potential impact to streams for HWA infestation, laws and policies relating to navigable waterways, and handicap accessibility issues.
- 13. Provide a forum that will give all stakeholders (anglers, whitewater enthusiasts, environmental conservation groups, et. al.) a place to safely let their voices be heard and to improve relationships between these important groups.
- 14. Advocate for and advance educational opportunities in recreational areas to improve knowledge of streams, stream management, and the watershed. Examples of this may include educational signage, kiosks, interpretative trails and photo safaris.

# Appendix A: Summary of Completed Projects 2009-2016

#### **STREAM ASSESSMENTS**

Streams	Location	Status
Broadstreet Hollow	Towns of Shandaken and Lexington	Completed 2001
Stony Clove	Towns of Shandaken, Woodstock, Hunter, and Lexington	Completed 2003
Esopus Creek	Towns of Shandaken and Olive	Completed 2007
Woodland Creek	Town of Shandaken	Completed 2008
Beaver Kill	Towns of Shandaken and Woodstock	Completed 2010
Warner Creek	Town of Shandaken and Woodstock	Completed 2010
Birch Creek	Town of Shandaken	Completed 2012
Beaver Kill	Town of Shandaken and Woodstock	Completed mainstem reassessment in 2012
Bush Kill	Towns of Shandaken and Olive	Completed 2012
Bushnellsville Creek	Towns of Shandaken and Lexington	Completed 2013
Stony Clove Creek	Towns of Shandaken and Hunter	Completed mainstem reassessment 2013
Woodland Creek	Town of Shandaken	Completed reassessment in 2015
Maltby Hollow Brook	Town of Olive	Completed 2015

### STREAM RESTORATION/STABILIZATION PROJECTS

Town	Project	Goal	Construction Cost	Status
Lexington	Broadstreet Hollow	Full channel restoration. Placement of in-stream structures, channel realignment, and hillslope stabilization.	\$354,066 Total; AWSMP/Local Share \$354,066	Completed 2001
Shandaken	Esopus Creek at Woodland Valley Demonstration	Full channel restoration. Placement of in-stream structures, channel realignment, and hillslope stabilization.	\$1,027,968 Total; AWSMP/Local Share \$591,593	Completed 2003
Shandaken	Woodland Valley Creek at Fawn Hill	Streambank stabilization to protect road.	\$125,000.00 Total: AWSMP/Local Share \$31,250.00	Completed 2010
Shandaken	Stony Clove Creek at Phoenicia (Main St. Bridge)	Post-flood emergency response.	AWSMP/Local Share \$70,819	Completed 2011
Shandaken	Stony Clove at Chichester (Site # 1)	Reduce stream corridor instabilities that lead to chronic turbidity from suspended sediment loading.	\$1,020,369 Total; AWSMP/Local Share \$352,785	Completed 2012
Shandaken	Stony Clove at Chichester (Sites # 2,3,4)	Reduce stream corridor instabilities that lead to chronic turbidity from suspended sediment loading.	\$1,636,255.70 Total; AWSMP/Local Share \$791,129.59	Completed 2013
Shandaken	Warner Creek (Site #5)	Reduce chronic turbidity source and protect Silver Hollow Rd. (Town of Shandaken).	\$495,465.68 Total; AWSMP/Local Share \$284,862.27	Completed 2013
Shandaken	Warner Creek- Stony Clove Confluence	Protect transportation infrastructure and reduce potential future sources of chronic turbidity through grade control to mitigate upstream migration of headcut.	\$1, 585,454.46 Total AWSMP/Local Share TBD	Completed 2014
Shandaken	Stony Clove at Stony Clove Lane	Protect vulnerable properties and reduce source of chronic turbidity.	\$540,146.11 Total AWSMP/Local Share \$135,036.49	Completed 2014

Hunter	Stony Clove Creek at Wright Rd.	Protect vulnerable properties and infrastructure, reduce source of chronic turbidity and enhance habitat and stream stability.	\$1,678,050.14	Completed 2015
Hunter	Stony Clove Hillslope Stabilization	Stabilize failing hillslope that is source for fine sediment and water quality impairment.	\$1,237,177.29	Completed 2016
Woodstock	Beaver Kill at Van Hoagland Road	Project 1 - Reach scale restoration and stabilization of hillslope failure about 400-ft upstream of the Van Hoagland bridge that is a source for fine sediment and water quality impairment.	TBD	Design 2015/16; Implementation 2017
Woodstock	Beaver Kill at Van Hoagland Road	Project 2 - Reach scale restoration and stabilization of hillslope failure about 1,200-ft upstream of the Van Hoagland bridge that is a source for fine sediment and water quality impairment.	TBD	Design 2015/16; Implementation 2017

### STREAM BUFFER PROJECTS

Project	Town	Goal
2010	Multiple	3 projects installed totaling 452 linear feet of bank treated.
2011	Multiple	11 projects installed totaling 2810 linear feet of bank treated.
2012	Multiple	13 projects installed totaling 2590 linear feet of bank treated.
2013	Multiple	8 Projects Totaling 3,350 linear feet, including planting, willow staking, and invasive control
2013 Warner Creek Site 5	Shandaken	Project covered 45,000 sq. ft., or 1.2 acres re-vegetated. Approx. 1500 trees and shrubs and 200 willow stakes.
2013 Phoenicia Main Street	Shandaken	Installation of 800 willows total extending 300' on both banks upstream of bridge.
2013 McKenley Hollow CSBI Site	Shandaken	Installed 130 trees and shrubs plus 225 willow stakes along 250 ft of McKenley Hollow Creek. Also utilized custom seed mix designed by Catskill Center for restoration of native riparian plant communities. 650 linear feet treated.
2013 Amy's Takeaway and Upper Esopus Rod & Gun Club	Multiple	Japanese Knotweed control sites using landscape fabric to cover and attempt to control knotweed at upstream source areas. 205 linear feet treated.
2013 Moran Repair	Olive	Repaired buffer planting damaged during Tropical Storm Irene/Lee. 400 linear feet treated.
2013 Chichester Site 2	Shandaken	Began buffer plantings on portions of the Chichester 2/3/4 restoration project. 260 linear feet treated.
2014	Multiple	4 Projects Totaling 980 linear feet, including planting, willow staking, and invasive control; Assessment and surveying for 2 potential bioengineering sites (Bushkill and Upper Esopus).
2014 Stony Clove Stream Project	Shandaken	Buffer planting along 300 feet of Chichester project. Approximately 600 tree/shrub installed.
2014 UC-DPW Ct. Rt. 47 Slope	Shandaken	Provided buffer planting for DPW project to stabilize steep slope. Approximately 96 tree/shrub installed.
2014 Lerner Planting	Shandaken	Planting along 180 feet of Stony Clove Creek. Installed approximately 94 tree/shrubs
2014 Waldron Planting	Shandaken	Planting and invasive control along 400 feet of Broadstreet Hollow Creek. 379 tree/shrub installed.
2015 Waldron Planting	Shandaken	Native seeding along 300' of Broadstreet Hollow Creek within area 8,183 ft <sup>2</sup> .
2015 Vitalo Planting	Shandaken	Installed 125 trees/shrubs along 275' of Stony Clove Creek within area 6,516 ft <sup>2</sup> .
2015 Trigiani Planting	Woodstock	Installed 110 trees, 150 willows and native seeding along 175' of the Beaver Kill within area 1,345 ft <sup>2</sup> .
2015 BIMA Planting	Shandaken	Installed 210 trees/shrubs along 140' of the Elk Bushkill within area 5,461 ft <sup>2</sup> .
2015 Awan Planting	Hunter	Installed 136 trees/shrubs and 1,200 willows along 170' of Stony Clove Creek within area 3,234 ft <sup>2</sup> .
2015 Chichester Site 2 Hillslope	Shandaken	Installed 500 trees/shrubs and 1,200 willows along 1,010' of Stony Clove Creek within
Stream Project		area 32,176 ft <sup>2</sup> .
2015 Willow Field Planting		
2015 Buffer Planting Monitoring	Multiple	Established and surveyed 29 monitoring plots.

Project	Town	Goal
2015 Technical Assistance Site Visits	Multiple	Conducted 16 landowner technical assistance site visits.
2015 Riparian Corridor Management Plans	Multiple	Completed 26 Riparian Corridor Management Plans for landowners enrolled in CSBI.
2016 Catskill Interpretative Center Demonstration Buffer (CSBI & SMIP)	Shandaken	Established a demonstration riparian buffer display for education & outreach on streamside buffers. Project included volunteer invasive removal, installation of 265 native trees and shrubs, and wildflower pollinator seed mix.
2016 Wright Road CSBI Planting	Hunter	Project involved installation of over 400 native trees and shrubs on a previously restored failing hillslope.
2016 Menla Mountain CSBI Project	Shandaken	Phase 1 of a buffer restoration underway at Menla Mountain Retreat. This project engaged volunteers for invasive species awareness. Nearly 1 acre of invasives have been removed. Phase II is scheduled for Fall 2017 to re-plant with native species.
Moran Bushkill CSBI Bioengineering Project	Olive	600 linear feet of invasive removal, buffer restoration and streambank protection all wrapped in one project that showcases proper buffer management and use of soil bioengineering as a practical approach to streambank and ecosystem protection.
2016 CSBI provided plant materials for landowner installation	Shandaken	The CSBI Program provided plant materials to two separate landowners for self-installation of recommended buffer improvements as they were recommended in Riparian Corridor Management Plans.
2016 Riparian Corridor Management Plans	Multiple	Provided 5 landowner specific Riparian Corridor Management plans for landowners enrolled in CSBI
2016 Technical Assistance Site Visits	Multiple	Conducted 12 landowner technical site visits regarding stream problems and recommendations.
2016 Buffer Planting Monitoring	Multiple	Surveyed 24 sites and 41 individual monitoring plots on CSBI project sites for vegetation

#### PROGRAM COORDINATION

Program Coordination			
Туре	Purpose	Audience	Status
Stakeholder Council	To provide overall guidance and	Project partners, municipal officials, streamside	Meeting 3-4x per yea
(Formerly the Advisory Council)	oversight to the program	landowners and other community members	
Flood Hazard Mitigation Working Group	To exchange information and identify opportunities to improve floodplain management and mitigate flood hazards	Municipal officials, project partners	Meet 3-4x per year
Stream Access & Recreation Working Group	To make recommendations for stream access/recreation improvements in the Ashokan Watershed	Project partners, recreation groups, municipal officials, local business owners	Meet 3-4x per year
Highway Managers Working Group	To exchange information and identify opportunities for technical or financial assistance to improve stream management	Highway managers, project partners	Meet 2-3x per year
Education and Outreach Working Group	To engage local educators in delivering educational programming and incorporate stakeholders into decision making	Project partners, watershed educators	Meet 2x per year Committee inactive 2012-2014; Reactivated 2015
Stream Ecosystem Working Group	To advise on development of a program research, assessment and monitoring agenda	Researchers, resource managers, project partners	Meet 1-2x per year
Grant Review Committee	To review grants to the SMIP and make recommendations for funding	Project partners	Meet based on need

#### **SMIP PROJECTS**

Education and Outreach							
			Award				
Organization	Proposal Title	Proposal Number	Amount	Status	Purpose of Grant		

Bennett Elementary School	Watershed Detectives Program	AWSMP-2011-1	\$4,500	Complete	Expand the Scientist in Residence Program at Bennett Elementary School located in Boiceville, NY with the addition of a new Watershed Detective's program for the 2011/2012 school year. Hands-on program that introduces students to watershed topics: basic watershed morphology, hydrologic cycle, where their drinking water comes from, learning about negative impacts from overdevelopment, pollution, erosion, etc.
Ulster County Soil and Water Cons. District	Rosgen Level 2 - UC SWCD	AWSMP-2010-2	\$2,235	Complete	The Ulster County Soil & Water Conservation District requested \$6,586 to send staff member James Wedemeyer to attend River Morphology and Assessment training (Rosgen Levels II and III) in Shepherdstown, WV.
Ulster County Soil and Water Cons. District	Rosgen Level 3 - UC SWCD	AWSMP-2010-3	\$4,097	Complete	The Ulster County Soil & Water Conservation District requested \$6,586 to send staff member James Wedemeyer to attend River Morphology and Assessment training (Rosgen Levels II and III) in Shepherdstown, WV.
Ashokan-Pepacton Watershed Chapter- Trout Unlimited	Leaping Trout Art Project	AWSMP-2010-4	\$925	Complete	The Leaping Trout Art Project was used to stimulate local awareness of Trout Unlimited and conservation issues in the Ashokan Watershed. The funds were used to cover the cost of printing a brochure containing the Leaping Trout Trail Map, a 4" x 9" rack card and maintaining the project website.
Catskill Center for Conservation and Development	Catskill Kiosk Panel Project	AWSMP-2010-12	\$5,000	Complete	Interpretative kiosk along Route 28 in the Town of Shandaken, NY discussing the role and importance of the Catskill Park and the NYC Watershed. The kiosk is located near the site of the proposed Catskill Interpretive Center in Mount Tremper. The kiosk serves as a way to inform visitors to the area about what the Catskill Mountain region has to offer as well as issues facing the watershed and local ecology.
Ulster County Cornell Coop. Extension	Roadside Drainage Class for Highway Staff	AWSMP-2010-23	\$874	Complete	Training for Ashokan Watershed Highway Departments on ditch and culvert best management practices.
Town of Woodstock	Woodstock Watershed Education Project	AWSMP-2010-26	\$4,400	Complete	Education and outreach for Town of Woodstock Wetlands and Watercourse Law. Outreach and educational materials for town residents, local board members and businesses.
Phoenicia Library	Jerry Bartlett Memorial Angling Collection Improvement	AWSMP-2011-37	\$10,000	Complete	Outreach and education to anglers of all ages and the general public about the links between robust fish and macroinvertebrate populations a water quality through workshops, presentations and events, digital exhibits and web design.

Ulster County Soil and Water Cons. District	Rosgen Level 4 - UC SWCD	AWSMP-2010-51	\$5,000	Complete	The Ulster County Soil & Water Conservation District requested \$5,000 to cover the costs associated with Rosgen Level IV trainings for James Wedermeyer. The trainings are to be held in October of 2011 at Pilot View, Inc. Dobson, North Carolina. They were awarded the full \$5,000 requested.
Ulster County Dept. of Public Works	Rosgen Level 1 - UC DPW	AWSMP-2011-52	\$3,000	Complete	Ulster County Department of Public Works requested \$2,980 to send a stormwater specialist, Brendan Masterson, to Applied Fluvial Geomorphology (Rosgen Level I) training.
Ulster County Cornell Coop. Extension	Floodplain Manager Association Training Grant	AWSMP-2011-65	\$2,445	Complete	Provide five scholarships for Town Floodplain Law administrators to attend the NYS Watershed Association Conference
Town of Shandaken	Floodplain Manager Training and Certifications	AWSMP-2013-71	\$1,455	Complete	Send the Shandaken Town Supervisor, Code Enforcement Officer, and Highway Superintendent to the NYSFSMA 2014 conference and Certified Floodplain Manager training; and sit for CFM exam.
Town of Woodstock	Floodplain Manager Training and Certification	AWSMP-2013-72	\$485	Complete	Send Town of Woodstock Code Enforcement Officer to the NYSFSMA 2014 conference and Certified Floodplain Manager training; and sit for CFM exam.
Town of Hurley	Floodplain Manager Continuing Education	AWSMP-2013-73	\$325	Complete	Send Town of Hurley Code Enforcement Officer to the NYSFSMA 2014 conference and Certified Floodplain Manager training.
Ulster County Dept. of Environment	Floodplain Manager Certification and Continuing Education	AWSMP-2013-75	\$810	Complete	Send two Ulster County staff to the NYSFSMA 2014 conference and Certified Floodplain Manager training; and sit for CFM exam.
Ulster County Dept. of Public Works	Wildland Hydrology Course Training for UCDPW Staff	AWSMP-2013-76	\$3,186	Complete	Send Ulster County Civil Engineer, Andrew Emrich to Applied Fluvial Geomorphology Training (Rosgen Level I) in Shepardstown, WV.
Town of Lexington	NYSFSMA Annual Conference Attendance Plus CFM Test	AWSMP-2013-85	\$988	Complete	Send Town of Lexington Code Enforcement Officer to the NYSFSMA 2014 conference and Certified Floodplain Manager training; and sit for CFM exam.
Town of Olive	NYSFSMA Annual Conference Attendance Plus CFM Test	AWSMP-2014-86	\$2,199	Complete	Send Town of Olive Building Inspector and Code Enforcement Officer to NYS Floodplain and Stormwater Manager's Association Annual Conference from April 27 -29, 2015 and take CFM exam.
Town of Woodstock	NYSFSMA Annual Conference Attendance and CFM Continuing Education	AWSMP-2014-88	\$1,312	Complete	Send Town of Woodstock Floodplain Administrator to NYS Floodplain and Stormwater Manager's Association Annual Conference from April 27 -29, 2015 and maintain CFM accreditation.
Ulster County Dept. of Public Works	Applied Fluvial Geomorphology Training for Ulster County DPW Staff	AWSMP-2014-89	\$3,410	Complete	Send UC DPW staff to Rosgen Level II training from March 15 - 20, 2015.
Town of Shandaken	NYSFSMA Annual Conference Attendance and CFM Continuing Education	AWSMP-2014-99	\$3,842	Complete	Send Town of Shandaken Supervisor, Highway Superintendent, Planning Board Chair, and new Code Enforcement Officer/Floodplain Manager to NYS Floodplain and Stormwater Manager's

					Association Annual Conference from April 27 -29, 2015 and acquire or maintain CFM accreditation.
Cornell Cooperative Extension	2016 Stream & Floodplain Manager Training Scholarships	AWSMP-2015- 111	\$20,500	Complete	Offer up to 14 scholarships for town and county officials to attend stream and floodplain management trainings in 2016.
Infrastructure	T				
Organization	Proposal Title	Proposal Number	Award Amount	Status	Purpose of Grant
Town of Woodstock	Van Hoagland Road Bridge Replacement	AWSMP-2011-29	\$200,000	Complete	Extend Van Hoagland Bridge by 20' to remove hydraulic constriction.
Ulster County Soil and Water Cons. District	Bradkin Road Culvert Replacement	AWSMP-2010-31	\$107,480	Complete	Replace undersized culvert that was washed out in Oct 2010 flood with appropriately sized culvert.
Ulster County Dept. of Public Works	Woodland Valley at Fawn Hill	AWSMP-2010-41	\$35,075	Complete	Stabilize a failing hillslope that endangers a road. Provides matching funds to a FEMA HMGP grant received by the Town of Shandaken.
Town of Woodstock	Van Hoagland Bridge Hydraulic Study	AWSMP-2011-57	\$5,000	Complete	Engineering services to conduct a hydraulic analysis prior to replacing the Van Hoagland Bridge.
Ulster County Dept. of Public Works	Maben Hollow Bridge Repair and Expansion - Post Irene	AWSMP-2011-67	\$29,300	Discontinued	Install a new abutment and bridge deck for the Maben Hollow Bridge on Esopus Creek that was damaged during Tropical Storm Irene. The new bridge has a 20-foot increased span length to improve hydraulic capacity.
Ulster County Dept. of Public Works	County Route 47 Culvert Replacement —Post Irene	AWSMP-2011-68	\$77,300	Discontinued	Engineering to determine appropriate sizing and design of a culvert replacement for the Hillside Drive crossing.
Town of Olive	Engineering for Dry Brook at Hillside Drive Bridge Replacement	AWSMP-2013-69	\$20,000	Complete	Engineering through 60% design to determine appropriate sizing and design of a culvert replacement for the Hillside Drive crossing.
Town of Shandaken Highway Dept.	Engineering for Woodland Creek at Fawn Hill Rd. Bridge Grade Control	AWSMP-2013-78	\$10,000	Complete	Engineering for grade control downstream of the Fawn Hill Bridge to stop headcut moving toward bridge.
Town of Shandaken Highway Dept.	Conceptual Design for Fox Hollow Creek at Fox Hollow Rd. Bridge Grade Control by Panther Mountain Trail	AWSMP-2013-79	\$10,000	Complete	Conceptual design for project to stop headcut moving toward the upper bridge on Fox Hollow Rd. across from Panther Mountain Park entrance. Retaining walls are failing and endangering the bridge and streambanks.
Town of Shandaken Highway Dept.	Engineering for Fox Hollow Creek at Herdman Rd. Bridge Grade Control	AWSMP-2013-80	\$10,000	Complete	Engineering for grade control to prevent headcut and scour endangering the Herdman Rd. bridge off Fox Hollow Rd.
Town of Woodstock	Silver Hollow Creek at Silver Hollow Rd Culvert Replacement	AWSMP-2013-81	\$50,000	Discontinued	Replace flood-damaged culvert with precast concrete box culvert. Project at the Intersection of Silver Hollow Rd. and Lane Rd.
Ulster County DPW	Mine Hollow Culvert Replacement	AWSMP-2014-90	\$60,000	Complete	Replace and upsize culvert on Mine Hollow, a tributary to the Bushkill in the Town of Olive.
Planning					
Organization	Proposal Title	Proposal Number	Award Amount	Status	Purpose of Grant

Town of Woodstock	Habitat Mapping for the Town of Woodstock	AWSMP-2010-24	\$29,000	Complete	Develop a large-format habitat map and a report describing terrestrial, wetland, and stream habitats; their relationship to maintaining groundwater and surface water resources; the plants and animals of conservation concern that may use the habitats; and detailed conservation recommendations. Maps to aide the town with planning, development and conservation decisions.
RCAP Solutions Community Resources	SAFARI Coordination with Mitigation Plan	AWSMP-2011-34	\$10,000	Complete	Assist the Town of Shandaken with research and assembly of documentation of elevation certificates, repetitive loss areas, and information to support plan development, information meeting planning, advertising and coordination, other public outreach as needed.
Town of Shandaken	Phoenicia Mitigation Phase 1	AWSMP-2011-55	\$32,771	Complete	Develop a design to reduce flooding from Stony Clove in Phoenicia at Rt. 212 bridge.
Town of Shandaken	Phoenicia Flood Resiliency Planning and Outreach	AWSMP-2011-56	\$92,500	Complete	Hire a consultant to develop a flood hazard mitigation plan for the Town of Shandaken that provides overall coordination and improves communication of flood risks, develops flood mitigation measures and strategies, and materials for an application to FEMA's Community Rating System.
Town of Shandaken	Engineering Services for Pine Hill Trail Network	AWSMP-2013-70	\$5,000	Complete	Develop plans for a hiking/ biking trail network with stream access and crossings interconnecting Smith Park to Main St., the Morton Memorial Library, and the Town of Shandaken Historical Museum (all town owned).
Town of Shandaken	Local Flood and Feasibility Analysis for Phoenicia and Mt. Tremper	AWSMP-2013-84 AWSMP-2014- 101	\$72,000 \$20,850	Complete	Analyze flood conditions and identify hazard mitigation projects in Phoenicia and Mt. Tremper.
Town of Olive	Local Flood Analysis for Boiceville and West Shokan	AWSMP-2014- 100	\$76,631	Complete	Conduct Local Flood Analysis on the study areas of Boiceville and West Shokan to develop plans that will enhance floodplain/stream management and mitigate or remedy flood issues in Olive.
Town of Olive	Town of Olive Flood Hazard Mitigation Plan	AWSMP-2014- 102	\$24,285	Complete	Develop a town-wide flood hazard mitigation plan that covers portions of the Town of Olive outside the LFA study areas and within the NYC Watershed.
Research and Monito	ring				
Organization	Proposal Title	Proposal Number	Award Amount	Status	Purpose of Grant
SUNY New Paltz	Rock Snot in Sick Rivers	AWSMP-2010-8	\$4,984	Complete	A research project to investigate the causes of invasive algae didymosphenia geminate "didymo." In particular this project sought to find the causes of algae blooms in streams infested with didymo and whether certain factors such as climate, land use, water chemistry or hydrology play a role in the growth and spread of didymo. Funds were used to purchase field supplies for experimentation and sampling and

					decontamination equipment.
USGS Aquatic	Use of Telemetry to Assess Effects of Shandaken Tunnel on Trout	AWSMP-2010-9	\$8,159	Complete	Purchase telemetry equipment used by USGS, DEC, DEP, CCE, and Cornell University to research river trout movements.
USGS Aquatic	Quantitative Assessment of Water Quality in the Upper Esopus Creek	AWSMP-2010-10	\$27,080	Complete	Sample fish communities and habitat conditions at sites throughout the Esopus Creek Watershed in the summer of 2010.
NY State Museum/Geological Survey	Applied 3-Dimensional Geologic Mapping in Ulster County, NY	AWSMP-2010-13	\$38,037	Complete	Conduct geological mapping in the Ashokan Watershed area.
Ulster County Cornell Coop. Extension	Trimble GPS Unit	AWSMP-2010-14	\$8,375	Complete	Purchase a Trimble GPS for watershed- related data collection efforts.
USGS Aquatic	Quantitative Assessment of Fish, Macroinvertebrate, and Periphyton Communities in the Upper Esopus Creek	AWSMP-2010-19	\$79,700	Complete	Conduct water quality quantitative assessments in the Upper Esopus Creek. Assess fish and algae populations in the Upper Esopus, the effect of the Shandaken Portal on aquatic organisms, the potential effects of Phoenicia water quality on aquatic organisms, and quantify water quality, sediment load and turbidity throughout the Upper Esopus and in the seven major tributaries to the Esopus for 1-3 years. Characterize temporal and spatial trends in biological indices and water quality. Work conducted in 2011 and 2012 (2011 field survey).
USGS Aquatic	Use of Telemetry to Assess Effects of Shandaken Tunnel on Trout	AWSMP-2010-20	\$86,800	Complete	Study the effects of discharges from the Shandaken Tunnel on trout populations in the Upper Esopus Creek. Define the effects turbidity and sedimentation have on the local economy, trout populations, and quality of drinking water in the Upper Esopus Creek and Ashokan Reservoir.
USGS	Quantitative Assessment of Water Quality in the Upper Esopus Creek	AWSMP-2010-22	\$90,990	Complete	Study water quality of the upper Esopus Creek. Conduct sampling to characterize fish and other aquatic organisms as well temperature, hydrology, turbidity, sediment and other variables. Work conducted in 2010 and 2011 (2010 field sampling water quality parameters).
SUNY New Paltz	Rock Snot in Sick Rivers	AWSMP-2010-8	\$4,984	Complete	Investigate the causes of the invasive didymosphenia geminate, "didymo" algae blooms in streams and whether factors such as climate, land use, water chemistry or hydrology play a role in the growth and spread of didymo. Funds were used to purchase field supplies for experimentation and sampling and decontamination equipment.
USGS Aquatic	Use of Telemetry to Assess Effects of Shandaken Tunnel on Trout	AWSMP-2010-9	\$8,159	Complete	Purchase telemetry equipment used by USGS, DEC, DEP, CCE, and Cornell University to research river trout movements.
USGS	Monitoring Turbidity, Suspended Sediment	AWSMP-2011-27	\$209,750	Complete	Extend Beaver Kill gage by 1 year and install gage on Warner Creek, collect and

SUNY - New Paltz	Concentrations, and Sediment Loads in the Beaver Kill and Warner Creek Watersheds  Characterization of Suspended Sediment	AWSMP-2011-58	\$5,000	Complete	analyze sediment and turbidity samples, measure streamflow and develop a stage-to-discharge rating curve at both streamgages, and analyze how suspended sediment concentration and associated turbidity were impacted by stream restoration and stabilization projects.  Study the effects of suspended sediment on Warner Creek's ecology and
SUNY - New Paltz	in Warner Creek  Role of Suspended Sediment on Warner Creek's Ecology	AWSMP-2011-59	\$5,000	Complete	geomorphology.  Extend work on Warner Creek to conduct Stony Clove Creek watershed characterization. Covers the stipend of a SUNY New Paltz senior geology student.
SUNY New Paltz	Didymo in Esopus Creek: Identification of Bloom	AWSMP-2011-60	\$7,400	Complete	Study didymo algae blooms in the Esopus Creek. Continues work done in 2011 to identify locations of didymo, measure water chemistry (a precursor to didymo infestation), test cleaning agents to determine functionality, and continue public education and outreach on techniques to prevent the spread of didymo.
Syracuse University	Bank Erosion Assessment and Analysis in Stony Clove Creek, 2001-2012	AWSMP-2011-61	\$45,000	Complete	Resurvey 27 Bank Erosion Monitoring Sites (BEMS) along Stony Clove Creek and establish 10-12 new BEMS. Collect detailed measurements of elevation and calculate the volume of eroded material. Assess methodologies for suitability. Collect samples of stream bank material for physical characterization. Study streamflow data. Identify events most likely to have caused erosion.
USGS Aquatic	Impact of Climate Change (floods) on Stream Ecosystems in the Catskills	AWSMP-2011-62	\$30,000	Complete	Assess the impacts of historic August 2011 flooding on the Upper Esopus Creek ecosystem, quantify short and long term rates of ecosystem recovery, characterize the effects of emergency channel repairs on the stream ecosystem, and provide data needed to help mitigate negative ecosystem impacts that may occur more frequently than in the past.
The Research Foundation SUNY New Paltz	Assessing the Impact of Groundwater and Heterogeneous Glacial Deposits on Streambank Erosion in the Stony Clove Creek Watershed	AWSMP-2013-74	\$30,001	Complete	Study detailed glacial geology and groundwater-surfacewater interactions at study sites along the Stony Clove Creek and Warner Creek to inform understanding of streambank erosion dynamics and treatment options.
Restoration	1				
Organization Town of Woodstock	Proposal Title  Beaver Kill Channel  Protection	Proposal Number AWSMP-2011-16	Award Amount \$5,700	Status Complete	Purpose of Grant  Repair a breached section of steam bank on outside stream bend. During medium and high flows, this section diverts into a channel behind the streambank. Repair a stacked rock wall constructed on both sides of stream.

Town of Woodstock Hwy Dept.	Beaver Kill at Mink Hollow Projects	AWSMP-2011-17	\$102,900	Complete	Projects to mitigate stream and road damages along Mink Hollow Road in the Town of Woodstock. Includes: above Van Hoagland Road reconnect the floodplain previously blocked by berms; stabilize the creek bed below a failed rock wall; and remove the buildup of LWD threatening to move the creek closer to Mink Hollow Rd.
Town of Shandaken	Stony Clove at Phoenicia	AWSMP-2011-18	\$234,000	Complete	Implement a stream restoration project to reduce Phoenicia flooding from the Stony Clove.
Ulster County Soil and Water Cons. District	Stony Clove at Chichester Site 1	AWSMP-2011-21	\$431,337	Complete	Implement a stream restoration project to improve channel stability and water quality on the Stony Clove Creek (Chichester #1).
Town of Shandaken	Mitigation Grant Match Funds (Brown Road)	AWSMP-2011-63	\$200,000	Discontinued	Provides matching funds to a HMGP grant to mitigate Brown Road.
Ulster County Dept. of Public Works	Maltby Hollow Brook Restoration - Post Irene	AWSMP-2011-66	\$10,475	Complete	Maltby Hollow Brook's main channel was altered during tropical storm Irene. In order to mitigate potential dangers of flooding from future rainfall events, the County is going to remove the trees, excess sediment and debris in Maltby Hollow Brook and stabilize banks.
Ulster County SWCD	Stony Clove Creek at Wright Road Stream Restoration	AWSMP-2015- 112	\$500,000	Complete	Local match for the EWP for the Stony Clove Creek at Wright Road stream project, in the Town of Hunter, Greene County, NY.
Town of Olive	Maltby Hollow Stream Feature Inventory and Erosion Site Assessment	AWSMP-2014-87	\$30,219	Complete	Conduct a stream feature inventory and assess bank erosion on the Maltby Hollow Creek, a tributary to the Bush Kill.

### **Introduction:**

A comprehensive Stream Corridor Management Plan (SCMP) for the West Branch Delaware River was completed in 2005 and the East Branch Delaware River (EBDR) was completed in December 2007 by the Delaware County Soil & Water Conservation District (DCSWCD) Stream Corridor Management Program, New York City Department of Environmental Protection (NYCDEP), and Delaware County Planning Department (DCPD). Since their adoption, DCSWCD in partnership with DCPD and NYCDEP have been implementing the 36 recommendations contained in the two plans following priorities established in the Action Plan for each basin. This Action Plan update for the period 2017-2019 combines the previously separate Action Plans for each basin into a combined Action Plan for the entire upper Delaware Watershed within the New York City water supply watershed.

During the development of the West and East Branch Delaware River SCMPs, a Project Advisory Committee (PAC) was formed to represent the interests of local officials, residents, businesses, and agencies living and working in the Cannonsville and Pepacton Reservoir watersheds. The PAC assisted in the preparation of the SCMP recommendations and is now working collaboratively to guide the Stream Corridor Management Program (SCMPr) in the implementation of the recommendations. The PAC is assisted by four sub-committees with the following focus: Fisheries and Recreation, Education and Outreach, Highway Infrastructure, and Floodplain Management. These sub-committee contribute their expertise to furthering the fulfillment of the relevant recommendations of the SCMP.

The implementation of the recommendations are accomplished through the following program elements;

- ❖ Delaware Watershed Stream Management Implementation Program Grant (SMIP)
- ❖ Local Flood Hazard Mitigation Program (LFHMP)
- ❖ Catskill Stream Buffer Initiative (CSBI) Funding
- Demonstration Project Funding
- ❖ Conservation Reserve Enhancement Program (CREP) Assistance
- Stream Corridor Management Program Technical Assistance and General Support

# 1. <u>Delaware Watershed Stream Management Implementation Grant Program</u> (SMIP)

The Delaware Watershed Stream Management Implementation Program (SMIP) Grants, established in 2010, fund eligible stream and floodplain water quality protection construction projects and programs that advance the Stream Management Plan recommendations for municipalities that have adopted the Stream Corridor Management Plan and signed a Memorandum of Agreement with the Delaware County Soil and Water Conservation District.

The SMIP grant funds are offered through an annual application process with grants targeted to fulfill the SCMPr priorities and the recommendations of the stream management plans. The following section reviews the proposed Action Items related to the administrative aspects of the SMIP.

#### A. SMIP Administrative Action Items:

- 1. Update the grant application, review and award process for SMIP. (SCMPr Staff, NYC DEP, PAC)
  - Continue an open enrollment for Local Flood Analysis projects
- 2. Maintain information on the status of awarded grants and future grant rounds through the Catskillstreams.org website (SCMPr Staff, NYC DEP)
- 3. Regularly prepare and distribute press releases on the accomplishments of the recipients of SMIP grants. (SCMPr Staff, grant recipients)
- 4. Expand the scope of the SMIP grant funding to support flood hazard mitigation projects identified through the Local Flood Analysis (LFA) under the LFHMP
- 5. Create opportunities for the delegation of project design tasks to grant recipients, their consultants or consultants to DCSWCD.
- 6. Award additional grants in 2017 and 2018

# SMIP grants to be completed in 2017-2018 are listed below:

	Education and Outreac	h							
Due in at Title	Aunlinut	Scheduled for	Funding						
<u>Project Title</u>	<u>Applicant</u>	<u>Completion</u>	<u>Awarded</u>						
Walton School Gravel Study	Village of Walton	Completed	\$9,000						
Recreation and Habitat Improvements									
Project Title	Applicant	Scheduled for	<u>Funding</u>						
		Completion	<u>Awarded</u>						
East Branch Recreation Access Plan	Water Discovery Center	Completed	\$55,750						
Ice House Boat Launch	Town of Walton	Completed	\$82,900						
Hamden Covered Bridge Boat Launch	Town of Hamden	Completed	\$55,718						
Hoyt's Park Boat Launch	Catskill Development Foundation & Village of Delhi	Completed	\$61,200						
Village of Delhi River Walk Design	Village of Delhi	Completed	\$39,750						
	Highway/Infrastructure	e							
Project Title	<u>Applicant</u>	Scheduled for Completion	<u>Funding</u> Awarded						
Little Delaware Streambank stabilization	Town of Bovina	November 2017	\$138,672.50						
Medium Hydraulic Structure Study	DCDPW	November 2017	\$197,996						
Holiday Brook Stream bank stabilization	Town of Andes	Completed	\$37,742						
Gulf Brook Stream bank stabilization	Town of Andes	Completed	\$62,664						
Odell Lake Road Culvert Replacement	Town of Harpersfield	November 2018	\$182,620						
	Planning and Assessmer	nt

Stabilization									

SMIP grant funds are offered to stakeholders to implement recommendations of the stream management plans and to further the evolving priorities of DCSWCD, NYCDEP and the watershed communities. The following sections detail activities supported by the SMIP grant to implement plan recommendations.

#### A Prioritization of Identified Stream Intervention Projects Action Items:

- 1. Implement Floodplain Reclamation projects in collaboration with Municipalities. These projects will be identified in the Local Flood Analysis plans. (SCMPr Staff)
- 2. Complete approved Delaware Watershed Stream Management Implementation Grant Program projects within the East and West Branch of the Delaware River watershed. A complete list of SMIP grants can be found on catskillstreams.org website. (SCMPr Staff and Sponsor)

#### **B.** Enhance Recreation Opportunities Action Items:

- 1. Provide technical assistance to communities to enhance streamside recreational opportunities. (DCPD, SCMPr staff, NYC DEP)
- 2. Continue to work with the East Branch Recreation and Fisheries subcommittee in the implementation of the East Branch Recreation Access Plan. (DCPD, SCMPr staff, NYC DEP)
- 3. Continue to work with West Branch communities and stakeholder groups on improving recreation access on the West Branch Delaware River (DCPD, SCMPr staff, NYCDEP)
- 4. Continue to provide technical assistance to the West Branch Recreation sub-committee for the boat launches along the West Branch Delaware River.

#### C. Enhancement of Watershed Fisheries Action Items:

- Provide technical assistance and general direction to local grass-roots efforts, watershed associations and fisheries organizations to enhance existing fisheries. (DCPD, SCMPr staff, NYC DEP)
- Work with the Delaware County Chamber of Commerce, Central Catskills Chamber of Commerce, and the Recreation and Fisheries sub-committees to promote recreational fishing in the Cannonsville and Pepacton Reservoirs and support the new boating program through outreach promotional activities such as sponsored fishing days, boating safety and fishing safety courses, etc. (SCMPr Staff, DCPD, NYC DEP, EBDR Recreation and Fisheries subcommittee, CWC, DC Chamber of Commerce)
- Encourage groups to work with municipalities to apply for funding through SMIP for projects that improve fish habitat, angling opportunities and an understanding of and appreciation for the aquatic ecosystem (SCMPr Staff, DCPD, NYC DEP, PAC)

# 2. Local Flood Hazard Mitigation Program

In response to major flood events in 2006 and 2011, the Delaware Stream Corridor Management Program partners have advanced the proposal for a watershed wide flood hazard mitigation effort that will identify the most beneficial projects for reducing flood related losses and water quality impacts and provide funds to implement those projects. In coordination with the CWC and at the request and direction of municipal government, the program will assist with the analysis, planning, funding, design and construction of hazard mitigation projects beginning during this Action Plan period. This effort will require the cooperation of all relative government entities, utilize the support of consultants and rely on the local knowledge of community leaders and residents. Funds will be made available for projects through the SMIP.

#### A. Flood Hazard Mitigation and Flood Recovery Action Items:

- 1. Provide assistance to the Delaware County Planning Department and Delaware County Emergency Services through steering committee meetings for the regular updates of the Multi-Jurisdictional All-Hazards Mitigation Plan. (DCSWCD SCMPr Coordinator)
- 2. Provide documentation of completed flood hazard mitigation projects to the Hazard Mitigation Coordinator. Enhance the All-Hazard Mitigation Plan through the development of Local Flood Hazard Mitigation Plan (LFHMP) by the implementation of the All-Hazards Mitigation Plan. (SCMPr Staff)
- 3. Provide assistance as requested by the Director of Emergency Services to the Emergency Operations Center during flood related events. (SCMPr Staff)
- 4. Maintain a list of historic problem areas where streams impact infrastructure during flood events and correlate to stream gage stage heights. (SCMPr Staff)
- 5. Work with communities to understand, utilize and revise FEMA floodplain maps. (DCPD, NYC DEP Project Manager, NYSDEC, SCMPr Staff)
- 6. Provide scholarship for training opportunity for Certified Floodplain Managers (CFM) and Code Enforcement credits
- 7. Work with communities to update local ordinances, laws and comprehensive land use plans to incorporate elements of the Stream Corridor Management Plan its recommendations and stream stewardship principles. (DCPD, SCMPr Staff)
- 8. Provide technical assistance to municipalities with emergency stream intervention measures during flood recovery. (SCMPr Staff)
- 9. Support educational programs for the public and school students that promote a better understanding of meteorology, hydrology, hydraulics and flood issues. (DCPD, SCMPr Staff)
- 10. Design and implement flood mitigation practices including but not limited to floodplain reclamation, scientific channel dimensioning, and natural stream design techniques throughout the Delaware Watershed. (SCMPr Staff, DEP)

- 11. Implement the Local Flood Hazard Mitigation Program including the development and refinement of program rules, guidelines, procurement documents as well as providing guidance and outreach to participating communities, support of the consultants, and input on the identification and prioritization of projects. Provide assistance with the acquisition of grant funds and technical support for project design and construction (implementation). (DCSWCD staff, DC Planning staff, NYC DEP)
- 12. Provide funds for the Local Flood Analysis process and recommended flood hazard mitigation stream projects through the SMIP.
- 13. Complete work with the following Flood Commissions currently involved with the LFA process:
  - Walton Flood Commission
    - i. West Branch Delaware River Tributaries (East Brook, West Brook, Third Brook)
  - East Branch Delaware Flood Commission including:
    - i. Fleischmanns
    - ii. Middletown
    - iii. Clovesville
    - iv. Arkville
  - Delhi Flood Commission
  - Hamden Flood Commission
  - Andes Flood Commission

# 3. Catskill Streams Buffer Initiative (CSBI) funding

Catskill Streams Buffer Initiative (CSBI), established in 2009, provides a mechanism whereby streamside landowners, with property within the New York City Watershed, can receive technical assistance, educational materials, planning assistance, and funding to improve and maintain their riparian (streamside) areas. CSBI is a part of the overall Stream Management Program, and is a compliment to other existing stream management programs. The CSBI program focuses on improving riparian buffer protection for private, non-agricultural landowners who are not covered or supported through other riparian protection programs within the East and West Branch Delaware River watersheds.

The overall goals of CSBI are to inform and assist landowners in better stewardship, and to work with landowners to identify practices to improve their riparian (streamside) areas, through proper management, protection, restoration, or enhancement. To achieve these goals, CSBI will assist riparian landowners throughout the Delaware Watershed by providing:

- 1) Access to technical assistance through their DCSWCD concerning their streamside property.
- 2) Development of Riparian Corridor Management Plans (RCMP) to create awareness about riparian management issues specific to individual properties.
- 3) Development of Best Management Practices (BMP) and prescriptive measures to improve landowner management of their riparian buffer in order to enhance the function and condition of the riparian buffer.
- 4) Assistance with installation of riparian buffer improvement measures, such as native plantings, and other prescriptive projects.
- 5) Educational materials and activities as needed by landowners to understand the critical role of their buffer and how to maintain it in optimal functioning condition.

The Action Items associated with these goals for the years 2017 – 2019 are identified below.

# A. Stream Corridor Management Plans for Non-Agricultural Riparian Landowner Stewardship Action Items

- Continue the implementation of the Catskill Streams Buffer Initiative (CSBI) through the DCSWCD Stream Corridor Management Program Contract funded by NYC DEP. (DCSWCD CSBI Coordinator, NYC DEP CSBI Coordinator)
- 2. Periodically review and update the protocol for prioritizing the implementation of the Catskill Streams Buffer Initiative and strategies for soliciting participation in the program. (DCSWCD CSBI Coordinator, SCMPr Coordinator, NYC DEP CSBI Coordinator)
- 3. Development of a minimum of 10 Riparian Corridor Management Plans (RCMP) per year. (DCSWCD CSBI Coordinator, DCSWCD SCMPr Staff)
- 4. Implement a minimum of 5 Riparian Corridor Management Plans per year by means of contractual planting services (DCSWCD CSBI Coordinator).

CSBI Riparian Corridor Management Plans									
Project Title	<u>Location</u>	Scheduled for							
<u></u>		<u>Completion</u>							
East Platner Brook Knotweed	Town of Delhi	2017							
Control									
Willow Drive Stabilization	Arkville	2017

- 5. Implement 1 demonstration or educational Riparian Corridor Management Plan per year. (DCSWCD CSBI Coordinator)
  - a. Educational RCMP implementation:
  - b. Conduct a volunteer planting educational workshops with community groups and local student.
  - c. Conduct a volunteer potting-up educational workshop with local high schools students, SUNY Delhi college students and BOCES students.

CSBI Student/Educational Projects									
<u>Project Title</u>	<u>Location</u>	Scheduled for Completion	Project Type						
SUNY Delhi Outdoor Education Center Spring Planting (NYC Students)	Town of Delhi	Ongoing 2017 – 2019	Student Planting						
Margaretville School TU Planting	Village of Margaretville – Pavilion Park	April 2017	Student Planting						
DCMO BOCES Student Planting	Walton Area	Ongoing Yearly 2017 - 2019	Student Planting						
Potting-Up Activity – DCMO BOCES	DCSWCD Office	Completed 2015	Student Workshop						

6. Education and outreach for CSBI shall be accomplished by facilitating at least one riparian workshop for landowners per year. Education and outreach shall also be accomplished by active participation at relevant local events, direct mailings, web site usage, and local media. (DCSWCD CSBI Coordinator)

CSBI Educa	tion & Outreach Events	
Project Title	<u>Location</u>	<u>Date</u>
Riparian Buffer Working Group – Invasive species Talk	Kingston	February 2017
Trout Unlimited Streamside Planting	East Branch Delaware – Arkville	April 2017
Walton Walton 4H Outreach events	Village of Walton	Yearly 2017 - 2019
Riparian Walk/Workshop – Pavilion Park	Village of Margaretville	July 2017
Forestry Festival – Stream Table / Riparian Buffer Display	Village of Margaretville	July 2017 - 2019
Cauliflower Festival – Stream Table / Riparian Buffer Display	Village of Margaretville	September 2017 - 2019

7. Secure landowner license and maintenance agreements for long-term access by DCSWCD and NYCDEP to facilitate ongoing maintenance and monitoring. (DCSWCD CSBI Coordinator)

- 8. Develop planting plans as requested for applicable stream program projects in coordination with stream program staff. (DCSWCD SCMPr Staff and DCSWCD CSBI Coordinator)
- 9. Develop and implement a monitoring program for riparian buffer projects to identify project success and effectiveness. (DCSWCD CSBI Coordinator, NYC DEP CSBI Coordinator)
  - a. Monitoring protocol developed for all implemented CSBI (and supplemental) projects.

CSBI Yearly Project Monitoring							
Year Monitored	Number Projects Sites						
2015	33						
2016	23						
2017	26						
2018	19						
2019	19						

- b. Monitoring protocol was developed for invasive species monitoring of CSBI planting project locations.
- 10. Develop local resources to maintain availability of native vegetation planting stock as needed. (DCSWCD CSBI Coordinator)
  - a. Conduct bare-root transplant to containers event with Walton Central School and DCMO BOCES to secure supplemental plants and species for CSBI planting projects.
  - b. Work with SUNY Delhi summer interns to maintain plant stock for planting projects.
- 11. Provide technical assistance to streamside landowners through ongoing coordination with the West-of-Hudson Riparian Buffers Working Group.
- B. Implement a Variable Width Riparian Buffer Pilot Program Action Items
  - CSBI will initiate a process defining eligible sites and for implementing variable width buffers. (DCSWCD CSBI Coordinator and NYC DEP CSBI Coordinator with NYC DEP and DCSWCD staff input)
  - 2. Identify potential sites for demonstration of a variable width riparian buffer pilot project. Implement one demonstration project. (SCMPr Staff, DEP Staff, WAP Staff)
    - a. Produce planting and riparian buffer plan for the More Stream Restoration Project in the Town of Hamden along the West Branch of the Delaware River. The reach is approximately 1000 linear feet and construction was completed in 2016.

- C. Implement a Riparian Buffer Pilot Program on Fallow Lands with the USDA Conservation Reserve Enhancement Program (CREP) in Delaware County, Action Items
  - 1. Execute an updated shared services agreement with the WAC to provide CSBI funding to hire a Planner ("WAC Planner") or provide CSBI funding for existing WAC Planners to complete tasks for the duration of the Pilot Program. Provide CSBI funding to serve as the local match needed to implement CREP on fallow lands.
  - 2. Develop a prioritization process for providing technical and financial assistance to the Watershed Agricultural Council for fallow land CREP-CSBI projects and identify roles and responsibilities in implementation. (CREP-CSBI Pilot Program Working Group)
  - 3. Conduct stream evaluation and assessments to determine Pilot Program eligibility, including if stream instability issues will preclude projects. Training and ongoing assistance to support evaluations and assessments. (CREP-CSBI Pilot Program Working Group)
  - 4. Provide design support for the development and approval of conservation plans (Riparian Corridor Management Plans) and implementation of projects that facilitate CREP enrollment. (CREP-CSBI Pilot Program Working Group).
  - 5. Provide CSBI cost-share funding to the Watershed Agricultural Council to facilitate fallow land CREP enrollment. (SCMPr Coordinator, SCMPr Staff, NYC DEP Project Manager)
  - 6. Monitor and evaluate the success of the CREP-CSBI projects (SCMPr Staff)
  - 7. Develop a set of evaluation metrics and report to assess the effectiveness of the Pilot Program (CREP-CSBI Pilot Program Working Group)

CREP-CSBI Pilot Program Working Group shall include: SCMPr Coordinator, SCMPr PE, NYC DEP Project Manager, WAC Program Managers and Planner(s), DCSWCD and DEP CSBI Coordinators, NRCS.

#### D. Invasive Species Management Action Items

- 1. Continue to work collaboratively with Delaware County Solid Waste Facility to compost Japanese Knotweed. (SCMPr staff, DCDPW)
  - a. Continue to treat invasive species such as Japanese knotweed on CSBI project sites with a variety of methods including herbicide application and monitor the effectiveness of methods.
  - b. Conduct a Japanese Knotweed pull and clean up educational workshop with local community groups and SUNY Delhi college students.

CSBI Invasive Species Control Projects								
<u>Project Title</u>	<u>Location</u>	Scheduled for Completion						
Beech Hill Knotweed Control	Town of Andes	Completed 2016						
Walton Knotweed Pull-Delaware Ave – Walton 4H	Village of Walton	Ongoing 2017 - 2019						

Chambers Hollow Knotweed	Town of Hamden	Ongoing 2017 -
Control		2019
Bussey Hollow Knotweed Control	Town of Andes	Ongoing 2017 - 2019
Mead Road Knotweed Control	New Kingston	Ongoing 2017 - 2019
Kelly's Kayaks Knotweed Control	Halcottsville	Ongoing 2017 - 2019
Depot Street Knotweed Control	Fleischmanns	Ongoing 2017 - 2019
Ballantine Park Knotweed Control	Town of Andes	Ongoing 2017 - 2019

- 2. Continue to participate in Catskill Regional Invasive Species (CRISP). (SCMPr staff, DCPD)
- 3. Working with program partners and local agencies on developing Japanese knotweed control focus group.

# 4. Demonstration Project Funding

Demonstration projects utilize new and innovative stream management techniques with educational value. These projects make use of fluvial geomorphic principles and the scale of the project may vary from localized activities such as stream bank stabilization to more extensive stream restoration projects.

#### A. Debris Management Action Items

- 1. Develop a Delaware County protocol for municipalities to manage woody debris in stream systems. (DCSWCD SCMPr Coordinator, NYC DEP Project Manager, DCDPW)
- 2. Design and implement two demonstration projects that utilize the woody debris protocol developed by the SCMPr. (SCMPr Staff)
- 3. Undertake a periodic review of the woody debris protocol developed by the SCMPr. (SCMPr Staff, NYC DEP Staff)

#### **B.** Stream Gravel Deposition Issues Action Items

- Develop and implement an educational and outreach program to teach municipal leaders and community members about the specific stream processes involved in the mobilization and transport of gravel and debris. Continue to promote training in Post-Flood Stream Intervention practices. (SCMPr Staff)
  - a. Continue to support the Walton Central School students with the gravel study that was funded with a SMIP grant to study sediment issues in streams near the bridges in the Village of Walton. The SMIP grant was completed in 2015, but the program will continue the gravel study in the environmental class curriculum.
- 2. Encourage one or two municipalities to apply for grant funding through the SCMPr to scientifically study stream reaches with identified gravel deposition issues for potential case studies to be used in Item 1. This could be accomplished through the Local Flood Hazard Mitigation Analysis process. (SCMPr Staff)
- 3. Design and implement two demonstration projects that utilize the existing gravel management protocol developed by the SCMPr. (SCMPr Staff)
  - a. Continue to photo monitor the Post-Flood Emergency Stream Intervention project located in the Town of Hamden on Launt Hollow stream that was completed in 2009. The Hamden Highway Department maintains the steam channel to the proper width and depth for approximately 100 linear feet whenever the stream capacity is compromised with gravel.
- 4. Undertake a periodic review of the gravel maintenance protocol developed by the SCMPr. (SCMPr Staff, NYC DEP Staff)

#### C. Utilize Existing Funding Sources Action Items

- 1. Continue to explore opportunities for utilizing grant funding sources to match SCMPr funds for implement recommendations. (DCSWCD SCMPr Coordinator)
- 2. Train staff and others within the watershed on how to prepare grant applications for obtaining additional funds for matching SCMPr funds.

#### D. Demonstration Projects for Construction in 2017 and 2018

- 1. Water Street Floodplain Restoration, WBDR Walton
  - a. This project is a recommendation from the Local Flood Analysis Plan on the West Branch Delaware River main stem written by a consultant, Milone and Mac Broom Inc., for the Walton Flood Commission. The project consists of reclaiming floodplain 9 ½ acres along Water Street and vegetate the floodplain with grass and riparian shrubs.
- 2. Mill Street Floodplain Restoration, EBDR Fleischmanns
  - a. This project is to complete Phase 2 of the Natural Resource Conservation Service's Emergency Watershed Protection projects that was built in 2013. Reclaiming the floodplain along the right streambank and the removal of Mill Street bridge was put on hold until the property completed the flood buyout. The project will consist of regrading a bankfull bench that is 3 foot higher than streambed with a slope of minimum 2% towards Vly Creek stream. Place topsoil and vegetate bankfull bench with grass and riparian shrubs and place willow stakes in the joints of rip rap. Rip rap will be placed upstream and downstream of the project to match existing top of bank.
- 3. Hardscrabble Streambank Restoration, EBDR Roxbury
  - a. This project was recommended by the PAC members to fund as a demonstration project for stabilization of steep embankment. Erosion located on the outside bend of a steep cobble embankment will be stabilized with a toe revetment, stream channel dimensions, and bioengineering.
- 4. Close Hollow, EBDR Andes
  - a. This project was recommended by the PAC members to fund as a demonstration project for streambed restoration. To stabilize the erosion of the streambed that is causing the road shoulder to fail by elevating the streambed with grade control structures.
- 5. Mill Brook Streambank Stabilization, EBDR Hardenburgh
  - a. This project was recommended by the PAC members to fund as a demonstration project for streambed restoration. Erosion located on the outside bend of a steep cobble embankment will be stabilized with a toe revetment, stream channel dimensions, and bioengineering.

- 6. Bull Run Streambank Repair, EBDR Middletown
  - a. This project was recommended by the PAC to fund as a demonstration project for streambank repair of a 2013 Emergency Watershed Protect project upon request from the Town of Middletown Supervisor. The streambed has been stabilized using 3 hardened riffle structures and the toe of the embankment is protected with rip rap, which are still working. The steep embankment failed in the spring of 2016 and the top area liquefied with the frost thawing out of the soil and sent the whole face sliding down in a debris flow.

# 5. Conservation Reserve Enhancement Program (CREP) Assistance

Provide assistance for the implementation of Conservation Reserve Enhancement Program (CREP) in agricultural areas where streambank stability issues make those lands ineligible for buffer enhancement under the CREP's guidelines.

- A. Integration of the Stream Corridor Management Program and the Watershed Agricultural Program Action Items
  - Provide stream assessment training to Watershed Agricultural Program planning and technical staff to identify and classify impaired stream segments during the development or revision of individual Whole Farm Plans. (SCMPr and WAP Staff)
  - 2. Continue to implement the MOU between DCSWCD and the Watershed Agricultural Council (WAC) and its protocols for providing technical assistance to the Watershed Agricultural Program. (DCSWCD SCMPr Coordinator, DCSWCD Executive Director, and DCSWCD Technical Coordinator, NYCDEP Project Manager)
  - 3. Provide assistance to the WAP Planning Staff in techniques for proper placement and planning of stream related agricultural Best Management Practices. (DCSWCD SCMPr Staff)
    - a. Complete work on the following CREP streambank stabilization projects
      - i. Laura Phoenix Farm
      - ii. Willard Frisbee Farm
  - 4. Provide engineering approval, technical support, and individual project design assistance to Watershed Agricultural Program engineers and technicians as per the Protocol identified in action item #2 above. (DCSWCD SCMP Coordinator, SCMP Professional Engineer, and DCSWCD SCMP Staff)
- B. Provide Technical Support to the USDA Conservation Reserve Enhancement Program (CREP) Action Items
  - Continue to develop the prioritization process for providing technical and financial assistance to the WAP on CREP projects. (SCMPr Coordinator, NYC DEP Project Manager, WAP Program Managers)
  - 2. Provide stream evaluation and assessment assistance to the Watershed Agricultural Program planners to determine if stream instability issues will preclude CREP enrollment. Training and ongoing assistance. (SCMPr Coordinator, SCMPr PE, SCMPr technicians, and NYC DEP as needed)

- 3. Provide design assistance and engineering approval to the Watershed Agricultural Program engineers and technicians in the preparation of approved stream stabilization designs and projects that facilitate CREP enrollment. (SCMPr Coordinator, SCMPr PE, SCMPr technicians, and NYC DEP as needed)
- 4. Continue to provide funding to the Watershed Agricultural Program for stream stabilization projects that facilitate CREP enrollment. (SCMPr Staff)
- 5. In cooperation with the Watershed Agricultural Program, evaluate stream instability issues for remediation on existing CREP sites. (SCMPr Coordinator, SCMPr PE, and SCMPr Technicians)
- 6. Provide funding to the Watershed Agricultural Program for stream projects that stabilize existing CREP sites. (SCMPr Staff)
- 7. Continue to monitor and evaluate the success of the bank stabilization projects. (SCMPr Staff)
- C. Enhance the Implementation of CREP on NYC Watershed Cropland and Explore Long Term CREP Contracts Action Items
  - Develop an interagency working group to prepare a white paper requesting USDA / FSA to enhance rental payments for CREP riparian buffers on cropland. (WAP Staff, DEP Staff, SCMPr Staff)
  - Explore options to maintain riparian buffers after CREP contract expiration and submit written recommendations. Development of an interagency advisory committee with Delaware County. (WAP Staff, SCMPr Staff, DEP Staff, DC Staff)

# 6. <u>Stream Corridor Management Program Technical Assistance and General Support</u>

Stream Corridor Management Program staff from each of the partnering agencies (the Delaware County Soil and Water Conservation District, New York City Department of Environmental Protection and Delaware County Planning Department) provide technical, planning and educational support for a range of stakeholders on water quality related issues such as floodplain management, flood response and recovery, debris and infrastructure management, property protection, aquatic habitat and recreation concerns. Support can include assessments, plans, designs, training workshops and general advice to stakeholders.

# A. Provide Assistance to Community Watershed Groups/Associations and Government Entities Action Items

- 1. Provide technical assistance and general direction to community watershed groups/association and government entities. (DCPD, SCMPr staff, NYC DEP)
  - a. East Branch Delaware Flood Commission
  - b. Walton Flood Commission
  - c. Delhi Flood Commission
  - d. Hamden Flood Commission
  - e. Andes Flood Commission

- f. Coalition of Watershed Towns
- g. Recreation Access groups (Catskill Foundation and Water Discovery Center)

#### B. Participation with the Delaware County Action Plan (DCAP) Action Items

1. Attend regular meetings of the Delaware County Action Plan (DCAP) and advocate for inclusion of Stream Corridor Management Plan and its recommendations into all relevant components of the DCAP. (DCPD Director, DCSWCD Executive Director, SCMPr Coordinator)

#### C. Participation with the Catskill Watershed Corporation Action Items

- 1. Provide technical assistance as requested for stream related CWC funded projects. (SCMPr Staff, NYC DEP Staff, CWC Staff)
- 2. Explore ways to coordinate stream related education and outreach efforts (such as Catskill Streams and Watershed Education Program) with CWC. (SCMPr Staff, CWC Staff)
- 3. Coordinate with CWC on Local Flood Hazard Mitigation Program including the analysis of flood problems, identification and funding of potential mitigation projects. (Executive Directors and staff of DCSWCD, NYC DEP, DC Planning, and CWC)

# D. Provide Annual Floodplain Development Permit Training for Municipal Officials Action Items

- 1. Provide opportunity for annual floodplain development permit training for local municipal officials. (PAC, SCMPr Staff, NYC DEP, NYS DEC)
- 2. Development opportunity for Municipal Officials to obtain credits for participating in educational activities. (DCPD, SCMPr Staff)
- 3. Support training of Floodplain Administrators (Code Officers), Planners and Stream Managers in various aspects of floodplain management through State and Federal programs to enable them to achieve and maintain Certification as Floodplain Managers through the Association of State Floodplain Managers. (DEC, FEMA, ASFM)

#### E. Enhance Local Land Use Laws and Ordinances Action Items

- Provide assistance to local municipalities in development of stream components in local comprehensive plans, local laws and local management practices. (PAC, DCPD, SCMPr Staff, NYC DEP)
- 2. Provide technical assistance to local municipalities to enhance local laws and local management practices. (PAC, DCPD, SCMPr Staff, NYC DEP)

#### F. Streamline Stream Work Permitting Action Items

1. Work in cooperation with NYS DEC, US Army Corps of Engineers, NYC DEP, and DCDPW to enhance the authority thresholds of the DCSWCD General Permit as delegated by the NYS DEC

for approved stream management practices within the County. (SCMPr Staff, NYC DEP RRE and SMP staff, US Corps of Engineers, DCDPW, Highway Subcommittee)

#### G. Provide Technical Assistance to Local Highway Departments Action Items

- 1. Provide technical assistance and support on the Medium Hydraulic Structure Study SMIP contract to evaluate watershed culverts for hydraulic capacity and prioritize them for upgrade through the SMIP. (DCDPW, SCMPr Staff)
- 2. Provide technical assistance and educational support to municipalities for sizing and the design of routine culvert replacements. (SCMPr Staff, DCDPW)
- 3. Enable municipalities to apply for funding through the SMIP grants for infrastructure projects causing stream instability and/or water quality issues. (SCMPr Staff, DCDPW)
- 4. Attend regular meetings of Municipal Highway Superintendents and keep them up to date on status of SWCD projects, training opportunities and flood recovery efforts.
- Advise and assist WBDR and EBDR communities and the DCPD with updates to the local Highway Management Plans to address best management practices as they relate to roadway and stormwater infrastructure improvements. (SCMPr Staff, DCPD, DCDPW and EBDR communities)
- 6. Provide technical assistance to highway departments and DCDPW by reviewing potential stream crossings including; large culverts and bridges. (SCMPr Staff, DCDPW and EBDR communities)
- 7. Continue to support best management practices for construction of stream crossings through the SMIP by allowing the acquisition of necessary equipment (i.e. dewatering pumps, hydroseeder, etc.) (SCMPr Staff, DCPD, DCDPW and PAC)

#### H. Geomorphic Assessments at Bridges and Culverts Action Items:

- Support the completion of Delaware County Department of Public Work's (DC DPW) evaluation
  of Medium Hydraulic Structures (culverts) funded through the Delaware Watershed Stream
  Management Implementation Program grants. (SCMPr Program Coordinator, DCSWCD
  Engineering staff, DEP Project Manager and DEP Stream Engineering Coordinator and DCDPW)
- 2. Continue to give advice and/or fund municipalities through the grants program for the replacement of publicly owned stream crossing structures that are causing stream instability and/or water quality issues. (SCMPr Staff)

#### I. Continuation of Geomorphic Research / Assessments Action Items

- 1. Perform Rosgen Level II assessment of Steele Brook in Delhi. (SCMPr Staff, Delhi Flood Commission)
- 2. Identify other river segments requiring geomorphic assessment and management plans. As needed, procure consulting services for the completion of this action item.

#### J. Adopt Principles of Stream Stewardship at the Municipal Level Action Items

1. Adoption completed for the following:

Towns:

Andes
Bovina
Deposit
Franklin
Halcott
Hamden
Harpersfield
Kortright
Masonville
Meredith

Middletown Roxbury Sidney Stamford Tompkins Walton Villages:

Delhi Hobart Margaretville Fleischmanns Stamford Walton

- 2. Promote and secure plan adoption and extension of MOUs within East and West Branch Delaware communities. (DCPD, SCMPr Staff)
- 3. Encourage municipalities to continue to develop stream stewardship requirements in their local comprehensive plans and land use regulations. (DCPD, SCMPr Staff, NYCDEP)
- 4. Encourage municipalities to continue to participate in the PAC and Sub-committees. (SCMPr Staff, NYC DEP, DCPD)
- K. Develop a Process for Updating the East and West Branch Delaware River Stream Corridor Management Plan Action Items
  - Work with the Project Advisory Committee and it's Sub-Committees to initiate a
    comprehensive review of the East and West Branch Delaware River Stream Corridor
    Management Plan and initiate a process to update the plan as required. (PAC, DCPD, SCMPr
    Staff, DEP staff)
- L. Expand Public Education and Outreach Efforts Action Items
  - 1. Fund and implement education and outreach activities identified and prioritized by the Project Advisory Committee Education and Outreach sub-committee. (PAC, SCMPr Staff)
  - 2. Continue to educate municipalities and communities on the importance of floodplain function and the benefits of preserving floodplains, and opportunities for improving flood protection and reducing flood damages through the refinement and use of digital flood insurance rate maps (DFIRMs), the participation in the LFHMP, and other State/Federal programs such as the Community Rating System. (DCPD Staff, SCMPr Staff, NYSDEC)

- 3. Develop and implement an education and outreach effort to support the LFHMP for a range of involved and affected stakeholders including community officials, involved outside government agencies, landowners, residents and not for profit groups. (DCSWCD staff, DC Planning Department staff, Department of Watershed Affairs, NYCDEP, CWC)
- 4. Work with area schools and BOCES programs to educate students and promote awareness of stream process, floodplain preservation and streamside vegetation. Develop and promote a stream awareness program that can be used in area schools and with youth groups. (SCMPr Staff, DCPD staff, NYCDEP, CWC, BOCES and area schools)
- Provide training and outreach to area real estate agents and bankers about the importance of preserving floodplains and the required disclosures of floodplain development permitting requirements. (SCMPr Staff, DCPD staff and NYCDEP)
- 6. Provide up-to-date information to the catskillstreams.org website as well as support for the revision and maintenance of the Catskill Streams website.
- 7. Participate in the West-of-Hudson watershed-wide education and outreach efforts.
- 8. Maintain an up to date project status and education outreach information on the DCSWCD website.

#### M. Scientifically-Based Post-Flood Emergency Stream Intervention Action Items

- 1. Provide Post-Flood Emergency Stream Intervention training to contractors, local municipalities, and agencies on an as needed basis. (Workshop, SCMPr Staff, NYC DEP Project Managers)
  - a. Provide technical assistance to the State wide Emergency Stream Intervention, on an as needed basis.
    - i. Post-Flood training has become a widely accepted practice that is being recognized throughout the State as the preferred practice for stream mitigation after the flood. Many agencies have requested training, which is being provided through Soil and Water Conservation District across New York State as well as through NYS DEC.
- 2. Continue to provide technical assistance to municipalities with emergency stream intervention measures during flood recovery. (SCMPr Staff)
- Continue to provide technical review assistance to local planning and town boards when working on projects that include streams, culverts or floodplain infringements. (DCPD, SCMPr Staff)

# Rondout Neversink Stream Program

2017 –2019ActionPlan

PO Box 256, 273 Main Street Grahamsville, NY 12740 (845) 985-2581 www.rondoutneversink.org

TO: Mark Vian, Project Manager, NYC DEP Stream Management Program FROM: Karen Rauter, Sullivan County Soil & Water Conservation District

DATE: May 15, 2017

RE: Rondout Neversink Stream Management Program 2017-2018 Action Plan

Sullivan County Soil & Water Conservation District and NYC Department of Environmental Protection have developed the 2017-2019 Action Plan for your review. The purpose of the Action Plan is to identify the Rondout Neversink Stream Program's planned activities, goals to accomplish and next steps in support of recommendations derived from stream management plans and Committee/stakeholder input. The current plan was updated and reviewed by our staff team, Watershed Advisory Group including municipal stakeholders in March 2017.

The Action Plan is divided into key programmatic areas:

- A. Protecting and Enhancing Stream Stability and Water Quality
- B. Floodplain Management and Planning
- C. Highway and Infrastructure Management in Conjunction with Streams
- D. Assisting Streamside Landowners (Public and Private)
- E. Protecting and Enhancing Riparian and Aquatic Habitat
- F. Stream Stewardship Education and Outreach

This program does not address Enhancing Public Access to Streams as in other basin Action Plans because the watersheds are predominantly in the Catskill Forest Preserve with significant New York State DEC access points to the stream. Overuse issues are prevalent and RNSP and DEP staff teams coordinate with regional municipal and state partners to disseminate public information and raise awareness about conservation law. This document lists the program's (RNSP staff-driven) and grant-driven Education and Outreach activities in Section F.

The Action Plan is updated annually and recommendations are fully revised biannually. This proposed plan will be implemented from May 2017-May 2019.

The Rondout Neversink Stream Program (RNSP) was established in a partnership among Ulster and Sullivan County Soil & Water Conservation Districts (UCSWCD & SCSWCD) and NYC Department of Environmental Protection (DEP) in 2009 as part of the Filtration Avoidance Determination (FAD) issue to DEP by the Environmental Protection Agency. For practical purposes, a field office was established in Grahamsville at Neversink Town Hall in 2010 when through an MOU, Sullivan County SWCD contracted with DEP to conduct Stream Management Planning in this unique area to serve the two remote towns in Rondout and Neversink basins: Town of Neversink (Sullivan County) and Town of Denning (Ulster County). Stream Management Plans (SMPs) were completed for the three major river corridors in the basin: Chestnut Creek, Rondout Creek and East and West Branches of Neversink River.

The SMPs provide a road map for improved stream and floodplain management. Initiatives include the Stream Management Implementation Program (SMIP), Catskill Streams Buffer Initiative (CSBI), stream and floodplain restoration projects, stream and watershed assessments, flood hazard analysis and mitigation, and education and outreach programs.

The following Action Plan summarizes the programs and projects that SCSWCD will be leading within the Rondout and Neversink Basins between May 2017 and May 2019, and includes Action Plan updates through May 1, 2018. SCSWCD and its Watershed Advisory Group will lead the effort for each action item, and work cooperatively with watershed partners including Denning, Neversink, Ulster and Sullivan Counties, NYC DEP, NYS DEC, and CWC. Funding sources for action items is provided by NYC DEP in contract CAT-443 through February 2020. This Action Plan identifies goals to address Stream Management Plan and Local Flood Analysis recommendations for implementation by Rondout Neversink Stream Program in the period 2017-2019. See the Projects tab at <a href="https://www.rondoutneversink.org">www.rondoutneversink.org</a> for restoration activities by year from 2011-2016. A successor contract is currently being scoped in discussion with DEP. Projects in this plan will depend on available funds.

How to read this document: The Action Plan is organized around key program areas. For each topic area there is a list of recommendations, derived from Stream Management Plans and Local Flood Hazard Mitigation Plans in conjunction with Program stakeholders, in *italicized text*. Under the list of recommendations, tables list planned projects to be carried out by the staff team and through the Stream Management Implementation Program (SMIP).

# A. Protecting Stream Stability & Water Quality

These actions may include: stream corridor assessments, stream stabilization/restoration projects with a goal to restore stream stability and reduce targeted pollutants; monitoring and maintenance of stream projects; and outreach, education and technical assistance to encourage stream stewardship.

#### Stream Corridor Assessment and Monitoring Recommendations

- 1. Complete a watershed assessment of tributaries in Rondout and Neversink watersheds that have yet to be assessed. Assessments identify and prioritize sediment sources, erosion hazards, and potential water quality impairments and associated treatment opportunities.
- 2. Review existing water quality data and identify, as far as is possible, the most significant water quality impairments.
- 3. Identify locations of potential water quality impairments including: sources of pollution from upland areas and within the stream channel such as significant glacial lake clay exposures and sources of contaminants from road runoff and households, and make prioritized recommendations for their treatment.
- 4. Identify, monument and survey selected sites of bank erosion, assess their relative stability, and make prioritized recommendations for their treatment.
- 5. Monitor constructed stream restoration sites to document the projects' status and performance. Monitoring includes measurements and analysis of geomorphic form, rock structures and vegetation. Data is collected to monitor project stability and vegetation establishment.
- 6. Establish Riparian Reference Reaches.

#### Stream Restoration and Stabilization Recommendations

1. Identify locations where roads, bridges, or culverts and water quality may be threatened by SMP-prioritized bank erosion, or are otherwise unstable or threatened, and make prioritized recommendations for their treatment.

- 2. Identify locations where water quality may be threatened by bank erosion, and make prioritized recommendations for their treatment.
- 3. Identify locations of stream instabilities contributing to water quality impairment and make prioritized recommendations for their mitigation or treatment.
- 4. Implement stream stability restoration projects that have been identified through field assessments or prioritized in management plans.

# B. Floodplain Management and Planning

Includes floodplain assessments; coordination with floodplain management effort in the watershed; and outreach, education and technical assistance for floodplain management.

# Local Flood Analysis and Floodplain Assessment Recommendations

- 1. Identify locations where roads, bridges, or culverts may be threatened by flooding, and make prioritized recommendations for their treatment.
- 2. Identify locations where improved or residential areas may be threatened by flooding, and make prioritized recommendations for their treatment.
- 3. Support flood hazard mitigation efforts to reduce the impacts from flooding such as impacts to public safety, homes and businesses, infrastructure and the natural environment.
- 4. Through LFA, provide resources to help WOH municipalities: confirm that there is a significant flood hazard in the target area through engineering analysis; use engineering analysis to develop a range of hazard mitigation alternatives; the primary focus of the analysis is to identify the potential for reducing flood elevations through channel and floodplain restoration, as the first alternative to other hazard mitigation solutions; evaluate both the technical effectiveness and the benefit/cost effectiveness of each solution, and compare different solutions to each other for the most practical, sustainable outcome.

# Floodplain Management Coordination, Education and Outreach Recommendations

- 1. The SCSWCD can support local municipalities in the use of FIRM maps.
- 2. Municipalities in the watershed can conduct a review of current floodplain ordinances and adopt revisions as appropriate. Revisions should reflect current building trends, new technologies, compliance and integrated broader community plans as appropriate.
- 3. Support municipal exploration of Community Rating System as a feasible activity.
- 4. Access to flood prevention/protection information can be established and supported throughout the basins.

- 5. Watershed municipalities, working with local and state agencies, can support periodic training sessions on flood related issues. Audiences can include municipal leaders, code enforcement staff, planning boards, landowners, realtors, lending institutions and others.
- 6. Watershed municipalities can facilitate development of a flood damage reporting system to track types of flooding, their location and the costs associated with flood damage.
- 7. Stream and floodplain management guidelines, which integrate stream form and function, can be developed for use during post flood response.

C. Highway and Infrastructure Management in Conjunction with Streams

Outreach, training and financial assistance to highway departments (two Counties and two Towns) to encourage the adoption of best management practices. Early detection and rapid response to control and eradicate invasive species.

# Highway Infrastructure and Stormwater Management Recommendations

- 1. Provide support for County and Town Highway Departments for vegetation management on critical areas such as roadside ditches and steep slopes.
- 2. Watershed municipalities can evaluate winter road abrasive procedures to address abrasive quality, application methods and spring sweeping.
- 3. The Town and County Highway Departments and NYSDOT can integrate geomorphology principles in all new projects and routine maintenance activities related to the streams and tributaries.
- 4. Work with local highway departments to minimize the negative effects of bank armor through the use of vegetation within and above the armor. Replant existing rip rap. This will increase the effectiveness and strength of the rip rap and cool water temperatures through shading and reducing the thermal effects of heated rock.
- 5. Work with the Denning and Neversink Highway Departments to identify opportunities to address infrastructure that is leading to stream instability and water quality degradation.
- 6. Study potential for science-based criteria for selective stream gravel management and decisions about impacts of Large Wood.

# Recommendations for Outreach and Technical Support to Highway Departments, Stormwater Managers and Contractors

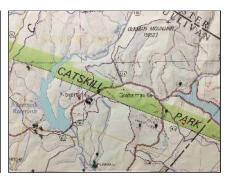

1. Provide municipal highway departments and local contractors with hands-on training in various stream management activities. Conduct field days, workshops and demonstration projects to meet this goal.

- 2. Educate and train municipal highway departments in stream process, and provide them with information about how maintenance of road systems and other public infrastructure may impact local waterways.
- 3. Provide education and outreach to municipal highway departments, stormwater managers and contractors to improve their ability to recognize changes in stream stability and impacts to water quality that may be associated with infrastructure management activities and to understand the impact of management actions.

# D. Assisting Streamside Landowners (Public and Private)

Provide access to training and technical assistance to increase the knowledge, skills and capabilities of landowners in the watershed. Also provide support for riparian buffer restoration.

# Catskill Streams Buffer Initiative Recommendations

- 1. Preserve and protect existing riparian buffers and provide for improved stewardship.
- 2. Protect/enhance the stream corridor through the establishment of effective forested buffers. Stream buffers will offer some measure of protection against encroaching land uses and act to protect public and private property.
- 3. Assist landowners with their efforts to protect and maintain healthy riparian buffers, address invasive species, and improve the condition of unstable or degraded riparian areas.
- 4. Provide assistance with managing and preventing the spread of Japanese knotweed and other invasive species.
- 5. Provide assistance for streamside landowners to maintain diverse and healthy riparian buffers of at least 35- 100 feet using native shrubs, trees and other woody vegetation.

Project Name	Waterbody	Status	Expected Completion	Project Description	Length (ft)	Designer	Cost

Route	Chestnut	final proposal		Control Hillslope			estimate
55	Creek	from vendor	2017	Stabilization/Revegetation	110	SCSWCD	from vendor

Fall 2017 and beyond projects to be determined.

#### Outreach, Education and Technical Assistance to Streamside Landowners

- 1. Provide streamside landowners detailed technical information on the establishment and maintenance of riparian buffers.
- 2. Provide stakeholders technical assistance that will guide restoration of stream system stability and help to maintain ecological integrity. Technical assistance can range from a landowner consultation to activities that will help meet the priorities of protecting water quality and establishing riparian buffers.

- 3. Provide long-term access to technical assistance to landowners and municipalities for assessment of their stream-related problems, and development of effective management strategies and to supervise stream project implementation.
- 4. Educate streamside landowners by providing a basic understanding of fluvial process, factors impacting streambank stability and water quality, and management decisions for the promotion of a healthy stream.
- 5. Characterize current riparian vegetation management in the watershed and make prioritized recommendations for changes that can improve ecosystem integrity.
- 6. Educate municipal leaders by providing a basic understanding of fluvial process, with an emphasis on how local decision makers can support stream health through their leadership and provide information on the multiple benefits which can be realized by protecting stream and watershed health.

E. Protecting and Enhancing Aquatic and Riparian Habitat

Support for research and education programs that encourage protection and good stewardship of aquatic and riparian ecosystems.

## Stream and Ecosystem Assessment Recommendations (Fisheries)

- 1. Complete watershed assessments of tributaries within the Rondout and Neversink watersheds. During the studies, identify sediment sources, erosion hazards, and potential water quality impairments and associated treatment opportunities.
- 2. Review existing water quality data and identify, to the extent possible, the most significant water quality impairments.
- 3. Identify locations of potential water quality impairments including; sources of pollution from upland areas and within the stream channel, such as significant glacial lake clay exposures, and sources of contaminants from road runoff and households, and make prioritized recommendations for their mitigation.
- 4. Detailed Fisheries Assessments, including quantifying pre- and post-restoration habitat conditions; address stakeholder inquiries about reductions/changes to seasonal macro invertebrate populations across the watershed.
- 5. Originally prioritized as Debris Management, this recommendation has evolved to include scientific inquiry into the impacts and nuances/benefits to further Large Wood and Sediment on the entire dynamic river system. This research will be used for both stakeholder education and restoration planning.

## F. Stream Stewardship Education and Outreach

Support for projects that engage the community through targeting diverse stakeholders/audience ages on stream health and stewardship. Includes honoring local knowledge, illuminating land use history and providing context for future use of best management practices; includes partnership with three major educational institutions: Frost Valley YMCA, Tri Valley Central School and Time and the Valleys Museum.

### Stream Stewardship Education and Outreach Recommendations

- 1. Collaborate with local and regional partners to enhance education and outreach efforts related to stream and floodplain management, sediment and erosion control, and other topics critical to sound watershed management.
- 2. Maintain a watershed website to provide information to all stakeholders.
- 3. Develop publications focused on stream management which can be provided to watershed stakeholders and/or used in training workshops.
- 4. Host an annual watershed conference for the community to promote stream management and stewardship awareness.
- 5. Increase public and technical awareness about the importance of the Rondout and Neversink watersheds and ecosystems by providing educational workshops for a variety of stakeholders including riparian landowners, municipal leaders, planning boards, code enforcement personnel, highway departments, local businesses, contractors, developers and educators.
- 6. Increase technical awareness about stream science, water quality protection and best management practices by providing educational workshops for a variety of stakeholders including riparian landowners, municipal leaders, planning boards, code enforcement personnel, highway departments, local businesses, contractors, developers and educators.
- 7. Develop detailed science-based guidelines to stream management and natural channel design which are readily available to those entities responsible for stream activities in Rondout and Neversink watersheds.

Re: Schoharie Watershed Stream Management Program 2017-2019 Action Plan

The Greene County Soil and Water Conservation District (GCSWCD) and the NYC Department of Environmental Protection (DEP) have collaborated with the Schoharie Watershed Advisory Committee (SWAC) to develop the 2017 – 2019 Action Plan. The Action Plan provides the Schoharie Watershed Stream Management Program's activities, projects and programs that are planned for 2017-2019 as well as program accomplishments.

The Action Plan is divided into key programmatic areas:

- A. Protecting and Enhancing Stream Stability and Water Quality
- B. Floodplain Management and Planning
- C. Highway and Infrastructure Management in Conjunction with Streams
- D. Assisting Streamside Landowners (Public and Private)
- E. Protecting and Enhancing Aquatic and Riparian Habitat
- F. Enhancing Public Access to Streams

The Action Plan is updated and revised annually. This plan will be implemented from May 2017 – May 2019.

## Schoharie Watershed Stream Management Program 2017-2019 Action Plan

## **Purpose**

This Action Plan identifies stream management goals, presents a subset of stream management plan recommendations and identifies current implementation initiatives by the Schoharie Watershed Stream Management Program for the period 2017-2019. The Action Plan also provides the current status or progress of each action item.

How to read this document: The Action Plan is organized around key programmatic areas. For each topic area, a list of recommendations, derived from Stream Management Plans and program staff, are provided in *italicized* text. Following the recommendations, the ongoing projects, programs and activities, including those that are funded through the Stream Management Implementation Program (SMIP), are listed.

## **Background**

The Schoharie Watershed Stream Management Program (SWSMP) was established in a partnership between the Greene County Soil & Water Conservation District (GCSWCD) and NYC Department of Environmental Protection (DEP) in 1997 as part of the Filtration Avoidance Determination (FAD) issued to DEP by the Environmental Protection Agency. Stream Management Plans have been completed for each major river corridor in the Schoharie Watershed and each plan includes a set of general recommendations, and project specific recommendations, which provide a "road map" for improved stream and floodplain management. In addition to supporting the FAD, many SWSMP projects also target reductions to in-stream sources of suspended sediments as part of DEP's Shandaken Tunnel State Pollution Discharge Elimination System (SPEDES) permit established in September 2006. The SWSMP seeks to advance state-of-the-art watershed management projects, policies and programs to improve and protect the Schoharie's water resources. Initiatives include the Stream Management Implementation Program (SMIP), the Catskill Streams Buffer Initiative (CSBI), stream and floodplain restoration projects, stream and watershed assessments, flood hazard analysis and mitigation, and education and outreach programs.

The following Action Plan summarizes the programs and projects that GCSWCD will be leading within the Schoharie Basin between May 2017 and May 2019, and includes action plan updates through May 1, 2017. The GCSWCD will lead the efforts for each action item, and work cooperatively with watershed partners including, but not limited to, the Schoharie Watershed Advisory Committee (SWAC), NYCDEP, NYSDEC, CWC and watershed municipalities. Funding sources for our action items include, Stream Management Implementation Program (SMIP), Catskill Streams Buffer Initiative (CSBI), Watershed Assistance Program (WAP), Water Resources Development Act (WRDA), Catskill Watershed Corporation (CWC), DEP/GCSWCD Schoharie Watershed Stream Management Program (Contract), Federal Emergency Management Agency (FEMA), and Natural Resource Conservation Service Emergency Watershed Protection Program (EWP).

## **Program Administration**

The Schoharie Watershed Stream Management Program requires on-going administrative and organizational support to implement stream management efforts. Many of the program administration action plan items began in 2007 and will continue through the duration of the stream management program. Additional action items may be added as the program evolves and as program goals are refined.

Action Item	Partners	Description	Funding	Status
Program Administration and Implementation	NYCDEP, GCSWCD, MSMA, SWAC GCSWCD, NYCDEP,	The GCSWCD has developed an effective and efficient process for implementation of the stream management plans for Schoharie Creek and its associated tributaries. These efforts help to fulfill the NYCDEP FAD obligations. Development and implementation of the program is an ongoing process.  Facilitate coordination between the agencies with stream	NYCDEP/ GCSWCD SMP Contract NYCDEP/ GCSWCD	On-going
Inter-Agency Coordination	NYSDEC, USACOE	management responsibilities. This is a key component of SMP implementation.	SMP Contract	On-going
Schoharie Watershed Advisory Committee (SWAC)	Schoharie Basin Municipalities, Technical Advisors, GCSWCD, NYCDEP	The organizational structure of the Schoharie Watershed Advisory Committee (SWAC) was developed in early 2008. After the kick off meeting in May 2008, the SWAC has met regularly throughout the years, developed program materials to initiate a stream management plan implementation process, and identified projects for implementation. Administrative support for the SWAC remains an on-going activity, with SWAC member reappointments, town readoption of SMPs, signing of MOUs to collaborate on stream issues, regular municipal updates and SWAC meetings.	NYCDEP/ GCSWCD SMP Contract	Organized May 2008, meet 2-3x per year
Catskill Streams Website	NYCDEP, GCSWCD Schoharie SMP Contract	The GCSWCD will continue to provide logistical support in the development and maintenance of the Catskill Streams Website as a valuable tool for sharing information with watershed stakeholders. The GCSWCD will also continue to maintain and update the District's website.  GCSWCD will continue to maintain its Plant Material Center, stocked with species native to the Catskills, in a way necessary to hold over/grow out native plant material to be used at stream restoration sites. Tasks include the ordering of plant material, willow harvesting, maintaining an inventory of the plants in the PMC, clearing plants of harmful weeds, watering as frequently as necessary and repotting materials if they outgrow their containers.	NYCDEP/ GCSWCD SMP Contract	On-going
Program	GCSWCD		Contract	On-going
Operation and Maintenance	NYCDEP, GCSWCD, Landowners	The GCSWCD, NYCDEP and project partners will work to maintain project sites throughout the Schoharie Creek watershed. This may include, but is not limited to, supplemental planting, bioengineering, minor repairs, general maintenance and assessments as needed.	NYCDEP/ GCSWCD SMP Contract	On-going, maintenance plan developed annually in Spring

## A. Protecting and Enhancing Stream Stability and Water Quality

Protecting and enhancing stream stability and water quality may include: stream corridor assessments; stream stabilization/restoration projects with a goal to restore stream stability and reduce targeted pollutant; monitoring and maintenance of stream projects; and outreach, education and technical assistance to encourage stream stewardship.

#### STREAM CORRIDOR ASSESSMENT AND MONITORING RECOMMENDATIONS

- 1. Complete a watershed assessment of tributaries within the Schoharie Creek Watershed that have yet to be assessed and conduct updated assessments of sub-basin streams to record current conditions. These tributaries should be studied to identify and prioritize sediment sources, erosion hazards, and potential water quality impairments and associated treatment opportunities.
- 2. Review existing water quality data and identify, to the extent possible, the most significant water quality impairments.
- 3. Identify locations of potential water quality impairments including; sources of pollution from upland areas and within the stream channel such as significant glacial lake clay exposures, and sources of contaminants from road runoff and households, and make prioritized recommendations for their mitigation.
- 4. Identify, monument and survey selected sites of bank erosion, assess their relative stability, and make prioritized recommendations for their treatment.
- 5. Monitor constructed stream restoration sites to document the projects' status and performance. Monitoring will include measurements and analysis of geomorphic form, rock structures, and vegetation. Monitoring will be performed in accordance with Army Corps of Engineers permit requirements as well as GCSWCD/NYCDEP annual assessments of the need for additional monitoring. Data will be collected to monitor project stability and vegetation establishment.

STREAM ASSESSM	STREAM ASSESSMENTS AND MONITORING									
Action Item	Partners	Description	Funding	Status						
Stream Inventory and Assessment	NYCDEP, GCSWCD	Stream Feature Inventories (SFI) are an on-going priority to assess baseline conditions and identify potential projects. The Huntersfield Creek, Red Kill and Little West Kill SFIs, were completed in 2016; post-processing and geodatabase management will continue in 2017. The Batavia Kill SFI will be conducted in 2017. Tributaries to assess in 2018 will be determined in winter, 2017.	NYCDEP/ GCSWCD SMP Contract	Active						
Monitoring of Restored Stream Reaches	NYCDEP, GCSWCD	Annual monitoring of restored stream reaches provides valuable information on the effectiveness of restoration practices in addition to fulfilling the permit requirements associated with these projects. Monitoring includes a visual inspection of the reach, photo documentation, pebble counts, and a survey of monumented cross sections and the longitudinal profile.	NYCDEP/ GCSWCD SMP Contract	Years 1, 2, 3 and 5 post- construct ion						

		I		
		Annually, the GCSWCD and project partners monitor the native riparian vegetation that has been installed along streambanks within the Schoharie watershed. Riparian plantings are completed in conjunction with the installation of natural channel designed (NCD) stream restoration projects and CSBI projects. Vegetation provides for increased stability as trees and shrubs		
		continue to mature, and it is a critical component to the long-		Annually
		term success of these types of projects. Annual vegetation	NYCDEP/	Schedule
		monitoring provides valuable information on the effectiveness of	GCSWCD	updated
Vegetation	NYCDEP,	restoration practices in addition to fulfilling the permit	SMP	in
Monitoring	GCSWCD	requirements associated with these projects.	Contract	January

#### STREAM RESTORATION AND STABILIZATION RECOMMENDATIONS

- 1. Identify locations where roads, bridges, or culverts and water quality may be threatened by SMP prioritized bank erosion, or are otherwise unstable or threatened, and make prioritized recommendations for their treatment.
- 2. Identify locations where improved or residential areas and water quality may be threatened by bank erosion, and make prioritized recommendations for their treatment.
- 3. Identify locations of stream instabilities contributing to water quality impairment and make prioritized recommendations for their mitigation or treatment.
- 4. Implement stream stability restoration projects that have been identified through field assessments or prioritized in management plans.
- 5. Governmental landowners in the Schoharie Creek watershed should manage their lands using natural channel stability concepts, and should serve as a model for other watershed landowners.

STREAM RESTO	STREAM RESTORATION AND STABILIZATION								
Action Item	Partners	Description	Funding	Status					
Batavia Kill Restoration at Red	GCSWCD,	A full-channel restoration project located on the Batavia Kill at the border of Ashland and Prattsville is in the assessment and design phase. This project will develop a plan to stabilize eroding streambanks and to protect water quality by reducing fine sediment sources along this high-turbidity producing reach of stream. The design will address over a mile of severely degraded stream. The assessment, design, permitting and implementation are in progress, and construction is planned for	GCSWCD/ NYCDEP SMP						
Falls	NYCDEP	2018-2019.	Contract	Active					
Batavia Kill		A full channel restoration project of approximately 4,000 feet of streambank along the Batavia Kill that has experienced significant rates of erosion and lateral migration. Full restoration will involve natural channel design to realign the channel and stabilize the bed and bank using a combination of rock structures and bioengineering. Along both sides of the	SMIP, GCSWCD/						
Restoration at	GCSWCD,	restored stream, the riparian buffer will be enhanced or	NYCDEP SMP						
Kastanis	NYCDEP	established with native seed, shrubs and trees; the buffer width	Contract	Active					

		will range from 20 feet to 300 feet. Design and installation are planned for 2017.		
Rion Stream Restoration	SCSWCD.	Assessment and design of the Rion stream restoration project in Conesville. The stream project will follow the buyout of a	SMIP	
Assessment and	GCSWCD,	flood hazard property. Assessment and design will begin in	GCSWCD/NYCDEP	
Design	NYCDEP	2017.	SMP Contract	Active

#### STREAM STEWARDSHIP EDUCATION AND OUTREACH RECOMMENDATIONS

- 1. Collaborate with local and regional partners to enhance education and outreach efforts related to stream and floodplain management, sediment and erosion control, and other topics critical to sound watershed management.
- 2. Maintain a watershed website to provide information to watershed stakeholders.
- 3. Develop publications focused on stream management which can be provided to watershed stakeholders and/or used in training workshops.
- 4. Host a Schoharie Watershed Month with various events planned for watershed residents and visitors to promote awareness and stewardship.
- 5. Increase public and technical awareness about the importance of the Schoharie Creek watershed and ecosystem by providing educational workshops for a variety of stakeholders including, riparian landowners, municipal leaders, planning boards, code enforcement personnel, highway departments, local businesses, contractors, developers and educators.
- 6. Increase technical awareness about stream science, water quality protection and best management practices by providing educational workshops for a variety of stakeholders including, riparian landowners, municipal leaders, planning boards, code enforcement personnel, highway departments, local businesses, contractors, developers and educators.
- 7. Develop detailed, science based guidelines to stream management which are readily available to those entities responsible for stream activities in the Schoharie Creek watershed. Guidelines must emphasize natural channel stability.

STREAM STEWARDSHIP EDUCATION AND OUTREACH								
<b>Action Item</b>	Funding	Status						
	NYCDEP,	The GCSWCD continues to work with NYCDEP and others to develop and implement a comprehensive education and outreach strategy with goals submitted annually in January. The GCSWCD will help identify training needs and plan training activities for a wide range	GCSWCD/ NYCDEP SMP					
Annual Education and	GCSWCD,	of audiences; training activities may be basin-wide or	Contract,					
Outreach Plan	SWAC	specific to individual sub-basins.	WAP, CWC	Annually				

	I		I	I
	GCSWCD,	Community involvement and awareness is important for promoting the protection of streams and their watersheds.

## B. Floodplain Management and Planning

Floodplain management and planning may include: floodplain assessments; coordination of floodplain management efforts in the watershed; and outreach, education and technical assistance for floodplain management in the Schoharie Watershed.

#### LOCAL FLOOD ANALYSIS AND FLOODPLAIN ASSESSMENT RECOMMENDATIONS

- 1. Identify locations where roads, bridges, or culverts may be threatened by flooding, and make prioritized recommendations for their treatment.
- 2. Identify locations where improved or residential areas may be threatened by flooding, and make prioritized recommendations for their treatment.
- 3. Support flood hazard mitigation efforts to reduce the impacts from flooding such as impacts to public safety, homes and businesses, infrastructure and the natural environment.
- 4. Through LFA provide resources to help WOH municipalities: confirm that there is a significant flood hazard in the target area through engineering analysis; use engineering analysis to develop a range of hazard mitigation alternatives; the primary focus of the analysis is to identify the potential for reducing flood elevations through channel and floodplain restoration, as the first alternative to other hazard mitigation solutions; evaluate both the technical effectiveness and the benefit/cost effectiveness of each solution, and compare different solutions to each other for the most practical, sustainable outcome.

LOCAL FLOOD ANALYSIS AND FLOODPLAIN ASSESSMENT					
Action Item	Partners	Description	Funding	Status	
	GCSWCD,	In 2016, the Town of Conesville formed a Flood Advisory			
	NYCDEP,	Committee (FAC) and began to work with consultants in 2016 -			
	Town of	2017 on a Local Flood Analysis (LFA). The LFA will help to	SMIP,		
	Conesville,	determine the causes of flooding, investigate and analyze the	NYCDEP/

Local Flood Analysis	Tannersville	investigate and analyze the overall potential of specific	SMP Con	Active	

	projects, and projects in combination, in an attempt to mitigate flood damages and hazards.	

#### FLOODPLAIN MANAGEMENT COORDINATION, EDUCATION AND OUTREACH RECOMMENDATIONS

- 1. The GCSWCD should support local municipalities in the use of FIRM maps.
- 2. Municipalities in the watershed should conduct a review of current floodplain ordinances and adopt revisions as appropriate. Revisions should reflect current building trends, new technologies, compliance and integrated broader community plans as appropriate.
- 3. Schoharie Watershed municipalities should evaluate participation in the FEMA Community Rating System.
- 4. Access to flood prevention/protection information should be established and supported throughout the Schoharie Creek Watershed.
- 5. Watershed municipalities, working with local and state agencies, should support periodic training sessions on flood related issues. Audiences should include municipal leaders, code enforcement staff, planning boards, landowners, realtors, lending institutions and others.
- 6. Watershed municipalities should facilitate development of a flood damage reporting system to track types of flooding, their location and the costs associated with flood damage.
- 7. Stream and floodplain management guidelines, which integrate stream form and function, should be developed for use during post flood response.

FLOODPLAIN MANAGEMENT COORDINATION, EDUCATION AND OUTREACH					
Action Item	Partners	Description	Funding	Status	
		The NYCDEP flood buyout program is currently being			
		developed. GCSWCD will help to facilitate the program			
	NYCDEP,	and may serve as the technical and outreach lead for some			
	GCSWCD,	Schoharie Watershed municipalities. The program will	NYCDEP/		
	Schoharie	begin with erosion hazard buyout properties. Planning	GCSWCD		
NYCDEP Flood	Watershed	and implementation of the program is scheduled for 2017-	SMP		
Buyout Program	Municipalities	2019.	Contract	Active	

## C. Highway and Infrastructure Management in Conjunction with Streams

Highway and infrastructure management in conjunction with streams may include: best management practices (BMPs) to improve infrastructure and stream intersections; stormwater management; and outreach, training and financial assistance to infrastructure managers to demonstrate BMPs.

#### HIGHWAY, INFRASTRUCTURE AND STORMWATER MANAGEMENT RECOMMENDATIONS

- 1. Local municipalities, Greene County Highway Department and NYSDOT should place a priority on vegetation management on critical areas such as roadside ditches and steep slopes.
- 2. Watershed municipalities should evaluate winter road abrasive procedures to address abrasive quality, application methods and spring sweeping.
- 3. The Town and County Highway Departments and NYSDOT should integrate geomorphology principles in all new projects and routine maintenance activities related to the Schoharie Watershed.
- 4. Work with local highway departments to minimize the negative effects of bank armor through the use of vegetation within and above the armor. Replant existing rip rap. This will both increase the effectiveness and strength of the rip rap and cool water temperatures through shading and reducing the thermal effects of heated rock.
- 5, Work with the SWAC Highway Committee to identify opportunities to address infrastructure that is leading to stream instability and water quality degradation.

HIGHWAY, INFRASTRUCTURE AND STORMWATER MANAGEMENT					
Action Item	Partners	Description	Funding	Status	
Critical Area Seeding	GCSWCD, NYCDEP, County & Municipal	All of the SMPs and the SWAC Highway and Infrastructure subcommittee recommend that local municipalities, county highway departments and NYSDOT should place priority on vegetation management on critical areas such as roadside ditches and steep slopes. GCSWCD continues to partner with all highway departments to provide critical area seeding for roadside ditches and slopes using the district's hydroseeder and power mulcher. In 2016, the program launched a slope stabilization fund through SMIP to address prioritized slopes	SMIP, NYCDEP/ GCSWCD Schoharie		
and Slope Stabilization Program	Highway Departments	with reinforced vegetative treatments for highway departments that attended a mandatory training in April, 2016.	SMP Contract	On- going	
Kaaterskill United Methodist Church Stormwater/Rain Harvesting Project	NYCDEP, GCSWCD, Kaaterskill United Methodist Church	Several stormwater management practices are proposed to treat the water from the roof drainage and provide storm water infiltration. These include rooftop rain harvesting (gutter system), and above ground cistern to capture the runoff and serve as a water source for the community garden, and four rain gardens to provide stormwater filtration and infiltration. A detailed design is in progress and construction is planned for spring of 2018.	SMIP NYCDEP/ GCSWCD	Active	
Schoharie Watershed Stream Crossing/ Culvert Design	Highway Superintendents Subcommittee, NYCDEP, GCSWCD	To support local highway departments two SMIP grants have been awarded (\$50,000 & \$30,000) to fund engineering design services to ensure prioritized culverts/embankments are designed properly. County Route 2 culvert is being designed using these monies. The culverts are upgraded to reduce stream instability and associated pollutants, allow for proper conveyance and passage of aquatic organisms.	SMIP	On- going	

		After the winter season, highway crews sweep road abrasives		
		using different machines. Greene County owns a sweeper		
		with a vacuum that is effective at collecting leftover sand		
		material and cleaning out stormwater structures. Given its		
	Highway	limited availability, purchasing another one for the		
	Superintendents	mountaintop communities will allow more road miles to be		
	Subcommittee,	cleaned and maintained across the mountaintop, thereby		
Street Sweeper with	NYCDEP,	reducing the amount of abrasives washing into ditches and		
Vacuum	GCSWCD	waterways.	CWC, SMIP	Active
		The project will replace a culvert that conveys stream flow		
		from the Little West Kill under County Route 2. The existing		
		culvert alignment has contributed to localized streambank		
	GCHD,	instabilities and discontinuity of sediment transport. The		
	GCSWCD,	replacement culvert will improve road stability, flow	SMIP,	
County Route 2	NYCDEP,	conveyance, sediment transport continuity, habitat	NYCDEP/	
Culvert Upgrade,	Town of	connectivity and aquatic organism passage. Design and	GCSWCD,	
Little West Kill	Lexington	construction are targeted for 2017.	GCHD	Active
Hunter Wetlands	Mountaintop	Install a remediation implementation project to address the		
Leachate Treatment	Towns,	problems with the Hunter Landfill Wetland Treatment System		
System Remediation -	GCSWCD,	effluent discharges. Design will be completed in 2017 with		
Implementation	NYCDEP	construction in 2018.	SMIP	Active

### RECOMMENDATIONS FOR OUTREACH AND TECHNICAL SUPPORT TO HIGHWAY DEPARTMENTS, STORMWATER MANAGERS, AND CONTRACTORS

- 1. Provide municipal highway departments and local contractors with hands-on training in various stream management activities. Conduct field days, workshops and demonstration projects to meet this goal.
- 2. Educate and train municipal highway departments in stream process, and provide them with information about how maintenance of road systems and other public infrastructure may impact local waterways.
- 3. Provide education and outreach to municipal highway departments, stormwater managers and contractors to improve their ability to recognize changes in stream stability and impacts to water quality that may be associated with infrastructure management activities and to understand the impact of any management action they may take.

OUTREACH & TECHNICAL SUPPORT TO HIGHWAY DEPARTMENTS, STORMWATER MANAGERS & CONTRACTORS					
Action Item	Partners	Description	Funding	Status	
		This training targets contractors, engineers, local government			
		and watershed residents and provides knowledge about why			
		stormwater is a concern and information on the new GP-0-			
		15-002 permit. The training also informs participants about			
		the requirements of stormwater pollution prevention plans			
NYS DEC endorsed		(SWPPP). Participants learn about erosion and sediment			
Erosion and Sediment		control practices and how to perform site inspections, and			
Control Required	NYSDEC,	how to obtain technical assistance on erosion and sediment			
Construction Activity	NYCDEP,	control problems. GCSWCD hosted a training in 2017 and	NYCDEP,		
Training	GCSWCD	will target 2019 for the next session.	GCSWCD	Active	

		Develop, design, and implement a highway ditch		
		stabilization workshop for local highway departments.		
		Attendance will be mandatory for those interested in		
		applying for funding through the Mountaintop Highway		
	NYCDEP,	Ditch Stabilization Project (awarded by SMIP). This	GCSWCD

Workshop	Prescott	follow in 2017	Contract	Active

## D. Assisting Streamside Landowners (Public and Private)

Assisting public and private streamside landowners may include: providing access to training and technical information to increase water resource knowledge, skills and capabilities of landowners; and providing technical assistance and programmatic support for stream issues and riparian restorations.

#### CATSKILL STREAMS BUFFER INITIATIVE

- 1. Preserve and protect existing riparian buffers and provide for improved stewardship.
- 2. Efforts should be made to protect/enhance the stream corridor through the establishment of effective forested buffers. Stream buffers will offer some measure of protection against encroaching land uses and act to protect public and private property.
- 3. Assist landowners with their efforts to protect and maintain healthy riparian buffers, address invasive species, and improve the condition of unstable or degraded riparian areas.
- 4. Provide assistance with managing and preventing the spread of Japanese knotweed and other invasive species.
- 5. Provide assistance for streamside landowners to maintain diverse and healthy riparian buffers of at least 35-100 feet using native shrubs, trees and other woody vegetation.

CATSKILL STREAMS BUFFER INITIATIVE						
Action Item	Partners	Description	Funding	Status		
		Replant a large section of Batavia Kill streambank adjacent to Tompkins				
		Quarry. Project was on hold due to a change in ownership from				
	GCSWCD,	Tompkins Quarry to the Town of Ashland. A planting plan has been				
Tompkins Riparian	NYCDEP,	developed and GCSWCD will obtain landowner agreement with the				
Project	Ashland	Town of Ashland to proceed with planting in 2016 and 2017.	CSBI	Active		
		Riparian planting project to restore approximately 300 linear feet of				
		streamside vegetation along the East Kill. GCSWCD has a 5 year				
		landowner agreement for this property. The Greene County Highway				
		Department restored the stream channel. GCSWCD installed willow				
		stakes along 300 feet of streambank. Additional trees and shrubs will be				
Benjamin Property	GCSWCD,	planted on the site. Project site will be evaluated to determine				
Planting	NYCDEP	vegetation needs in 2017.	CSBI	Active		
		Riparian planting project to restore approximately 200 linear feet of				
		streamside vegetation along the Batavia Kill just upstream of the				
	GCSWCD,	confluence with the Schoharie Creek in Prattsville at the Everett Conine				
	NYCDEP,	Memorial Field. Plant an additional 550 linear feet of streamside				
Prattsville Ball	Town of	vegetation along the Schoharie Creek at the same property. Project is on

#### OUTREACH, EDUCATION AND TECHNICAL ASSISTANCE TO STREAMSIDE LANDOWNERS

- 1. Provide streamside landowners detailed technical information on the establishment and maintenance of riparian buffers.
- 2. Provide stakeholders technical assistance that will guide restoration of stream system stability and help to maintain ecological integrity. Technical assistance can range from a landowner consultation to activities that will help meet the priorities of protecting water quality and establishing riparian buffers.
- 3. Provide long-term access to technical assistance to landowners and municipalities for assessment of their stream-related problems, and development of effective management strategies and to supervise stream project implementation.
- 4. Educate streamside landowners by providing a basic understanding of fluvial process, factors impacting streambank stability and water quality, and management decisions for the promotion of a healthy stream.
- 5. Characterize current riparian vegetation management in the watershed and make prioritized recommendations for changes that can improve ecosystem integrity.

6. Educate municipal leaders by providing a basic understanding of fluvial process, with an emphasis on how local decision makers can support stream health through their leadership and provide information on the multiple benefits which can be realized by protecting stream and watershed health.

OUTREACH, EDUCATION AND TECHNICAL ASSISTANCE TO STREAMSIDE LANDOWNERS						
Action Item	Partners	Description	Funding	Status

## E. Protecting and Enhancing Aquatic and Riparian Habitat and Ecosystems

Protecting and enhancing aquatic and riparian habitat and ecosystems may include: support for research and education programs that encourage protection of aquatic and riparian ecosystems; and support for comprehensive and community planning efforts that incorporate watershed protection.

#### STREAM AND RIPARIAN ECOSYSTEM ASSESSMENT RECOMMENDATIONS

- 1. Conduct a study to monitor summer season stream temperatures along the Schoharie Creek and associated impacts on fisheries. Study will assess if cold water fish communities are thermally limited, and locate areas where habitat improvements might mitigate these impacts, and areas of thermal refuge that may need protection.
- 3. Review existing water quality data and identify, to the extent possible, the most significant water quality impairments.
- 4. Identify locations of potential water quality impairments including; sources of pollution from upland areas and within the stream channel, such as significant glacial lake clay exposures, and sources of contaminants from road runoff and households, and make prioritized recommendations for their mitigation.
- 5. Characterize the status of stream ecosystem health utilizing existing fish and insect population data, and outlining the general threats to ecosystem health and integrity.
- 6. Conduct a watershed aquatic habitat study including; mapping habitats and associated characteristics throughout Schoharie Creek, characterization of fish species presence or absence in those habitats, establish target fish community structure based on regional and historic fish community data, and make recommendations for improvement of habitat for target community.
- 7. A habitat assessment should be conducted in the Schoharie Creek and major tributaries, with particular attention paid to thermal refuge for cold water fish.

STREAM AND RIPARIAN ECOSYSTEM ASSESSMENT							
Action Item	Partners	Description	Funding	Status			
		During development of SMPs for the various sub-basins, the					
	A WAR CO ED	GCSWCD and NYCDEP identified the need for further evaluation

Improvements	GCSWCD,	Habitat and Recreation Subcommittee the GCSWCD will prioritize					
Strategy	TU, SWAC	recommendations for fisheries improvements in 2017-2018.	TBD	Active			

#### WATERSHED PROTECTION AND COMMUNITY PLANNING RECOMMENDATIONS

- 1. Establish and maintain a comprehensive program that supports localized efforts and mobilization of the public for stream stewardship and the coordination of agencies, interest groups, municipalities, and stakeholders in community planning and watershed protection.
- 2. Watershed municipalities should evaluate their existing land use regulations, and adopt provisions which will protect stream corridor resources including wetlands, floodplains and floodways and provide additional local review for proposed development in these special areas.
- 3. A watershed-wide evaluation of regulations, including ordinances and zoning laws, should be undertaken. The evaluation should seek to identify regulatory gaps and determine if the current laws and ordinances adequately protect the watershed and encourage municipalities to update their regulations as needed.
- 4. Establish and support a Project Advisory Committee consisting of representatives of all significant stakeholder groups to coordinate the implementation of stream management plans.
- 5. Watershed municipalities should evaluate local ordinances such as comprehensive plans, zoning regulations, site plan review laws, subdivision laws and floodplain ordinances to determine if adequate consideration is given to riparian buffer impacts.
- 6. Watershed communities should integrate the evaluation of stormwater impacts on stream systems as they develop and implement comprehensive stormwater management plans which will protect water quality and reduce impacts on stream morphology.

## F. Enhancing Public Access to Streams

Enhancing public access to streams may include: support for projects that improve the quantity and quality of public stream access and enhance stream-based recreational opportunities; and support for projects that provide water resource educational materials at public access points. These recommendations incorporate community development efforts into stream management.

#### ENHANCING PUBLIC ACCESS TO STREAMS RECOMMENDATIONS

- 1. Public access for fishing should be enhanced along the Schoharie Creek stream corridor. Additional public access, as well as improvements to parking and access trails, is representative of the type of activities that may be possible.
- 2. Investigate opportunities to develop multi-use, low impact trail systems along the stream corridor.

ENHANCING PUBLIC ACCESS TO STREAMS							
Action Item	Partners	Description	Funding	Status			
Lexington Riverfront Access Park	NYCDEP, GCSWCD, Town of Lexington, SWAC, FEMA, NYDOS	The Town of Lexington plans to expand the Schoharie Creek Park (Lexington Pocket Park) by purchasing two additional parcels, along County Route 13a, through the FEMA Property Acquisition Program. The project aims to enhance public outdoor recreation and education along the Schoharie Creek. Components of the project may include a low impact path, a shade structure, and signage/informational kiosk. The Schoharie Watershed Advisory Committee approved funding the riverfront access park contingent upon FEMA, and other regulatory, approvals for development of park-like amenities on the buyout parcels. Pending permitting, this project may proceed in 2017.	SMIP	Active			
Ashland Town Park	Ashland, GCSWCD, NYCDEP	The project entails signage, seeding/riparian planting, and to support efforts to provide public access to the Batavia Kill. Signage was installed in 2016. Riparian plantings will be installed in spring 2017.	SMIP	Active			

#### STREAM ACCESS EDUCATION AND OUTREACH RECOMMENDATIONS

- 1. Develop an interesting, hands-on display and accompanying presentation that could travel with staff or volunteers to public places. Include the definition of a watershed, how people affect the watershed in their daily lives, the importance of a healthy watershed and what they can do to help improve water quality.
- 2. At public stream access sites, provide educational materials, such as signage, that may lead to an increased stewardship ethic for the stream.

## Appendix A: Summary of Completed Projects May 2007 – May 2016

## PROGRAM ADMINISTRATION

<b>Action Item</b>	Partners	Description	Funding	Status
		The GCSWCD and NYCDEP worked with NYSDEC to evaluate		
		alternatives and to offer training to address the complexity of		
		achieving turbidity control during construction. Two staff		
		members have been trained as Certified Professional Erosion and		
		Sediment Control Specialists, one has been trained as a Certified		
		Professional in Stormwater Quality and the majority of staff were		
		trained as part of the NYSDEC 4-hour erosion and sediment		
		control certification. GCSWCD is also qualified to teach the 4-		
	GCSWCD,	hour E/S control certification. GCSWCD purchased dewatering		
Restoration	NYCDEP,	equipment for stream projects and routinely prepares stormwater	NYCDEP/	Completed
Project Permits	NYSDEC	pollution prevention plans for all size projects.	GCSWCD	2007
		To manage the many projects and priorities in the action plan, the		
		GCSWCD needs staffing and resources to provide overall project		
		administration. In 2007, a staffing plan was developed along with		
Program		a new intergovernmental agreement between GCSWCD and		
Administration	GCSWCD,	NYCDEP that began in January 2009 and will fund watershed	NYCDEP/	Completed
Staffing Plan	NYCDEP	activities through January 2014.	GCSWCD	2007
		The GCSWCD and NYCDEP collaborated to establish a project		
		office within the Schoharie Watershed. The GCSWCD and WAP		
		identified and secured a Mountaintop project office in		
		Tannersville. The office is used by various local, regional, and		
		state committees working on watershed protection (e.g. Schoharie		
	GCSWCD,	Watershed Advisory Committee, subcommittees of the SWAC,		
	GCWAP,	Mountaintop Supervisory & Mayors Association, WOH Education	NYCDEP/	Completed
Program Office	NYCDEP	& Outreach committee, etc.).	GCSWCD	2008
		To successfully implement a multi-year riparian buffer program it		
		was necessary to work with NYSDEC, USACOE, and NYCDEP		
	GCSWCD,	to develop a general permit to allow for rapid planning and		
	NYCDEP,	installation of riparian buffers. The general permit applies to		
Riparian Buffer	NYSDEC,	minor (less than 300 ft.), short-term impacts such as, bank	NYCDEP/	Completed

General		contractors for work including but not limited to, installing		
Contracting	GCSWCD,	stormwater management practices, drainage improvements, and	NYCDEP/	Completed
Specification	NYCDEP	stream projects.	GCSWCD	2009
		All Greene County municipalities within the Schoharie Basin and		
		sub-basins (Batavia Kill, East Kill and West Kill watersheds) and		
	Schoharie	the Town of Conesville (Manor Kill) have adopted the relevant		
	Basin	SMPs and signed Memoranda of Understanding (MOU) with		
	Municipalities,	GCSWCD and SCSWCD, respectively. Annual reviews occur		
	Conesville,	with the municipalities per the MOU and provide an update on		Completed
	GCSWCD,	current action items within the municipality, while also seeking		2009,
Local Adoption	SCSWCD,	input from municipal officials in identifying potential future	NYCDEP/	renewed
of SMPs	NYCDEP	projects based on local needs.	GCSWCD	as needed
		The organizational structure of the Schoharie Watershed Advisory		
		Committee (SWAC) was developed in early 2008. After the kick		
		off meeting in May 2008, the SWAC has met regularly throughout		
	Schoharie	the year, developed program materials to initiate a stream		
	Basin	management plan implementation funding application process,		
Schoharie	Municipalities,	and identified initial projects for implementation. Although		
Watershed	Technical	administrative support for the SWAC remains an on-going		Organized
Advisory	Advisors,	activity, the effort to establish local representation and		May 2008,
Committee	GCSWCD,	implementation of the SMP, coupled with technical agency	NYCDEP/	meet 2-3x
(SWAC)	NYCDEP	support, has been accomplished.	GCSWCD	per year

Plant Materials				
Program:		In 2014, there were 20,401 Greenbelt plants delivered to the		
Greenbelt Plant	NYCDEP,	GCSWCD Plant Materials Center; 14,571 of the plants were	NYCDEP/	Completed
Material	GCSWCD	repotted. In 2015, approximately 5,830 plants were repotted.	GCSWCD	2015
		The GCSWCD, NYCDEP and project partners worked to maintain		
		project sites throughout the Schoharie Watershed. Maintenance		
		activities included:		
		Lanesville – supplemental plantings of trees and shrubs within the		
		floodplain along the left streambank, and willow stake height		
		maintenance.		
		Apple Hill - installation of 500 additional willow stakes along		
		outside of meander bends through project length; supplemental		
		plantings of 1,765 trees and shrubs; fertilized planted material.		
		ACR Parking Area – spread soil along access road and driveway	NYCDEP/	
		entrance; seeded and mulched site with riparian mix and triple rye.	GCSWCD	
	NYCDEP,	Shoemaker – developed a planting plan; seeded site with riparian	Schoharie	
Operation and	GCSWCD,	mix; fertilized the site.	SMP	Completed
Maintenance	Landowners	Griffin Road – fertilized planted trees and shrubs.	Contract	2016

Action Item	Partners	Description	Funding	Status
Batavia Kill Stream Walkover	NYCDEP/ GCSWCD	Collected erosion data along the Batavia Kill in the Towns of Windham, Ashland and Prattsville.	NYCDEP/ GCSWCD	Completed 1997

<b>Action Item</b>	Partners	Description	Funding	Status
		Windham- Batavia Kill: a NYS DOT Article 15 stream		
		disturbance permit was flagged by DEC Region 4 for potential		
		inclusion of a natural channel design approach. The project,		
	NYCDEP,	designed and implemented by GCSWCD, established a	NYCDEP/	
Holden Stream	GCSWCD	geomorphically appropriate channel and floodplain bench and	GCSWCD,	Completed
Restoration	NYSDOT	included riparian plantings which restored floodplain function.	NYSDOT	2007
Restoration	TTBDOT	Town of Prattsville- Batavia Kill: GCSWCD/NYCDEP	NIBBOI	2007
		completed a full geomorphic based restoration of a +/- 1800 foot		
		reach on the lower Batavia Kill. The project addressed severe		
Conine Farm Stream	NYCDEP,	slope instability, reduced sediment loading and protected private	NYCDEP/	Completed
Restoration	· ·	· · · · · · · · · · · · · · · · · · ·		2008
Restoration	GCSWCD	property.	GCSWCD	2008
		Town of Hunter- Esopus Basin: repairs were made on the		
		Lanesville Demonstration Stream Restoration Project. Most		
		adjustments were associated with gullying on a high slope failure		
		caused by poor drainage on the terrace above the slope, which		
Lanesville Stream		had not been addressed as part of the restoration project. Other		
Restoration Project	NYCDEP,	adjustments were made in rock vane elevations and additional	NYCDEP/	Completed
Repairs	GCSWCD	bioengineering was added to mitigate gullying.	GCSWCD	2008
		Repairs to a restoration project GCSWCD implemented in 2000.		
		The April 2005 flood damaged two dewatering wells which then		
		failed to relieve artesian conditions and a mud boil returned,		
		causing chronic turbidity. GCSWCD modified the damaged rock		
Broadstreet Hollow		structures and hired a well drilling subcontractor to attempt to		
Stream		rehabilitate the dewater wells. The subcontractor found the well		
(BSH) Restoration		heads had broken and couldn't be rehabilitated. After reviewing		
Project	NYCDEP,	all options, a decision was made to abandon the wells and	NYCDEP/	Completed
Repairs	GCSWCD	monitor the projects stability.	GCSWCD	2008
•		Town of Jewett- East Kill: excessive erosion, following 2005		
		and 2006 floods, caused damage to project grading and rock		
		structures, including 4 rock vanes and 2 cross vanes. The site		
		was originally vegetated by Conservation Reserve Enhancement		
		Program (CREP), but the seedlings never became established,		
		limiting project success. This restoration included: removal or		
		modification of damaged rock and cross vanes, treatment of the		
		back channel area to reduce frequency of flows in the back		
		channel and promote use of primary channel, bank grading,		
		vegetative stabilization to reduce erosion, and establishment of		
		riparian buffer along restored reach. Also, a bankfull bench was		
			NYCDEP/	
Faber Farm Stream	NVCDED	added, 1,179 larger trees were planted, willow stakes and	GCSWCD,	Completed
	NYCDEP,	approximately 1,000 feet of willow fascines were installed, along		Completed
Restoration	GCSWCD	with many shrubs, sedges, and herbaceous seed.	ACOE	2008
		Town of Ashland- Batavia Kill: GCSWCD completed planting		
		on the streambanks and floodplains at the lower end of the		
		project reach. Also, compensatory wetland areas were planted		
		with appropriate species. Limited site cleanup work on		
Ashland Connector	NYCDEP,	access/staging areas was completed, and the project was	NYCDEP/	Completed
Reach	GCSWCD	surveyed as part of routine project monitoring schedule.	GCSWCD	2008

Schoharie Street Stabilization	NYCDEP, GCSWCD	Village of Hunter: stabilization of approximately 120 feet of high stream bank to protect infrastructure and private property. Project includes stacked and pinned riprap and vegetated beds. The GCSWCD and NYCDEP also added additional riparian buffer plantings on the opposite bank. Additional plantings including balled and burlapped river birch trees, were added fall 2009.	NYCDEP/ GCSWCD	Completed 2009
West Kill Restoration Project, Long Road	NYCDEP, GCSWCD	Town of Lexington: completed a full geomorphic restoration of approximately 2,400 linear feet of stream on the West Kill in Spruceton Valley. The site had significant bank failure and clay exposures in bank and stream bed. Wetland delineation, archaeological investigation and final survey of site conducted.	NYCDEP/ GCSWCD	Completed 2009
Oakwood Pistol Club	NYCDEP, GCSWCD, CWC	Town of Prattsville: GCSWCD led the CWC Stream Program streambank projection project. Engineering services were contracted for this project; design plans and specifications have been submitted for permit, and construction completed.	CWC Stream Corridor Protection Grant	Completed 2009
Windham Golf Course Streambank Project	NYCDEP, GCSWCD, CWC	Primarily a CWC project with GCSWCD assistance. The project provided for the removal of failed sheet piling, armoring of the toe and sloping of the bank, and planting of approximately 155 feet of streambank.	CWC, NYCDEP/ GCSWCD	Completed 2009
Sugar Maples Stream Restoration	NYCDEP, GCSWCD	Town of Windham- Batavia Kill Tributary: removed mortared stone walls that confined a tributary and restored the stream to a natural shape and meander pattern. Floodplain grading was performed and the site was seeded with wetland and riparian seed mixes. GCSWCD hosted a student planting with three schools to install 1,584 herbaceous plugs, 340 willow stakes, 250 trees and shrubs, and 7 willow fascines. The project was designed to restore wetland functions and approximately 700 feet of stream that was historically channelized and confined by mortared stone walls.	NYCDEP/ GCSWCD, ACOE	Completed 2010
Wright Stream Bank Stabilization/ Riparian Project	NYCDEP, GCSWCD, SCA	A bankfull bench of approximately 1,200 feet was constructed and 3,127 feet of the streambank were re-vegetated. A rock installation was completed by the project contractor, while plantings were installed by GCSWCD staff and SCA service project hosted by GCSWCD.	NYCDEP/ GCSWCD, CWC, ACOE	Completed 2010
Wright Stream Bank Stabilization/ Riparian Project Enhancement	NYCDEP, GCSWCD	The previously constructed project was modified and enhanced with additional vegetative treatments in 2011 and monitoring initiated in 2012.	NYCDEP/ GCSWCD	Completed 2011
Vista Ridge Floodplain Restoration	NYCDEP, GCSWCD	This project improved the immediate project area and the aggraded reach upstream, by reducing a backwater condition at the Vista Ridge bridge. The project also enhanced the riparian buffer, reduced the risk of failure of Vista Ridge and Colgate Lake Roads, reduced erosion of silts and clays, and provides for improvement of the habitat value of the reach.	NYCDEP/ GCSWCD, ACOE	Completed 2011
Holden Stream Restoration Project	NYCDEP, GCSWCD	Phase 1 of the project was completed in 2011; continued construction was postponed due to Hurricane Irene. Project construction completed in 2012. The project included streambank and channel excavation to achieve stable geometry, installation of in-stream stabilization structures and a variety of bioengineering techniques along 3,500 feet of stream channel.  Over 6,000 trees were planted along the restored stream channel.	NYCDEP/ GCSWCD	Completed 2011-2013
Windham Country Club Repairs	NYCDEP, GCSWCD	Windham- Batavia Kill: There were significant damages sustained at the Windham Country Club. Topographic data was collected to support cost, material and labor estimates for implementation of the repair work. GCSWCD provided technical support to the project due to the extensive damage that occurred along the stream corridor.	NYCDEP/ GCSWCD	Completed 2012

East Kill Restoration at Apple Hill	NYCDEP, GCSWCD	Project components included the realignment and resizing of 3,500 feet of channel, the installation of 23 rock structures, and installation of extensive bioengineering treatments and riparian plantings over the 11 acre site. These efforts will improve water quality, reduce risk to humans and property, reduce erosion and excessive sediment loading, restore floodplain function, and improve aquatic and terrestrial habitat.	NYCDEP/ GCSWCD, SMIP, ACOE, EWP	Completed 2012
NYS Route 42 West Kill Slope Failure	GCSWCD NYCDEP NRCS	Town of Lexington: The project addressed a large slope failure along a 1,400 foot reach of the West Kill, just downstream of the Pushman Bridge on NYS 42. The project included stream bank and channel excavation, and the installation of in-stream stabilization structures to achieve stable geometry. Practices include rock riffles, random boulder clusters, log boulder revetment and dry rock riprap with willow stakes to establish an armored flood plain bench at the toe of the slope, upper portions of the slope were hydroseeded and staked, and an as-built survey and plans have been prepared.	NYCDEP/ GCSWCD, EWP	Completed 2013
Conine Project Repairs	NYCDEP, GCSWCD	Town of Prattsville: The purpose of this work was to repair a project that was damaged during Irene in 2011. The repair project measured approximately 2,200 linear feet in length, with a disturbance area of 11 acres. Extensive earthwork required to restore original grades, and included excavation and placement of over 52K cubic yards of material. The project included the repair and reconstruction of 5 j-hook vane structures, two cross vanes, and a constructed riffle. Biotechnical measures taken included live staking and fascines, seeding native riparian and wetland seed mixes, and developing a 7.1 acre riparian zone.	FEMA NYCDEP/ GCSWCD	Completed 2013
Maier Farm Project Repairs	NYCDEP, GCSWCD	Town of Ashland- Batavia Kill: The purpose of the project was to repair a portion of a project constructed in 1999 that sustained damage during Irene in 2011. Damages included streambank erosion, structural damage to rock structures, channel migration and land loss, and excess sedimentation. Earthwork was completed to restore original grades. The reconstruction of two j-hooks and repair of one cross vane provided channel grade control, stream bank stabilization, and habitat enhancement. Bioengineering, including live staking and fascines, along with the establishment of a one acre riparian zone was completed.	FEMA NYCDEP/ GCSWCD	Completed 2013
Brandywine Project Repairs	NYCDEP, GCSWCD	Town of Ashland- Batavia Kill: The project addressed damages sustained to the Brandywine restoration site during Irene in 2011.	FEMA NYCDEP/ GCSWCD	Completed 2014
Ashland Connector Reach Project Repairs	NYCDEP, GCSWCD	Town of Ashland- Batavia Kill: The project addressed damages sustained to the Ashland Connector Reach during Irene in 2011.	FEMA NYCDEP/ GCSWCD FEMA	Completed 2014
Long Road Project Repairs	NYCDEP, GCSWCD	Town of Lexington- West Kill: The project addressed damages sustained to the Long Road restoration site during Irene in 2011.	NYCDEP/ GCSWCD FEMA	Completed 2014
Lanesville Project Repairs	NYCDEP, GCSWCD	Village of Hunter- Stony Clove: The project addressed damages sustained to the Lanesville restoration site during Irene in 2011.	NYCDEP/ GCSWCD	Completed 2014
Ashland Well Heads Protection Project	NYCDEP, GCSWCD	Town of Ashland- Batavia Kill: The project addressed damages sustained to the Ashland Wells Head restoration site during Irene in 2011.	NYCDEP/ GCSWCD, EWP, ESD	Completed 2014
Shoemaker Project Repairs	NYCDEP, GCSWCD	Damages sustained on the Shoemaker Stream Restoration project on the West Kill were repaired in 2014 and 2015.	FEMA, NYCDEP/ GCSWCD	Completed 2015
Manor Kill Stream Restoration	SCSWCD, GCSWCD,	A full-channel restoration project was installed adjacent to the Conesville Town Park in order to stabilize eroding streambanks	SMIP, NYCDEP/ GCSWCD,	Completed 2015

	NYCDEP, Conesville	and protect water quality by reducing fine sediment sources along this reach of stream.		
Schoharie Creek Stabilization and Riparian Restoration	GCSWCD,	Located along the Schoharie Creek, this project involved restoring 750 linear feet of erosion with clay exposures by grading the bank and stabilizing the toe with rock and bioengineering treatments. A 50-100 feet wide riparian buffer was established by planting native tree and shrub species along	SMIP, GCSWCD,	Completed
at Kozak	NYCDEP	1,500 feet of streambank.	NYCDEP	2016
Batavia Kill Restoration at Big Hollow Project	GCSWCD, NYCDEP,	Repair of damages sustained on the Big Hollow Stream Restoration project on the Batavia Kill were completed in 2016.	FEMA, NYCDEP/ GCSWCD Schoharie	Completed
Repairs	FEMA	Design, permitting and bidding were complete in 2013.	GCSWCD/ NYCDEP Schoharie SMP	2016
West Kill Restoration at Shoemaker	GCSWCD, NYCDEP	Constructed to mitigate turbidity and excess sediments from clay-rich sources, reduce flood hazard erosion risk and improve ecological integrity.	Contract/ SEMO, FEMA	Completed 2016

ENHANCING PUBLIC ACCESS TO STREAMS					
Action Item	Partners	Description	Funding	Status	
		GCSWCD worked with the Town of Prattsville on a master			
		plan for redevelopment of Conine Field. Key conservation			
		issues included fishing access point, knotweed management, a			
		riparian buffer planting and a conservation easement on sections			
	GCSWCD,	of the property adjoining the Batavia Kill and Schoharie Creek			
Prattsville Conine	NYCDEP,	and a stormwater pollution prevention plan retrofitting the site	NYCDEP/	Completed	
Park	Prattsville	to meet current standards for new construction.	GCSWCD	2008	
		GCSWCD assisted the Town of Windham with the			
		development of a public access area on a NYCDEP owned			
		parcel in the hamlet of Windham. The GCSWCD completed a			
	GCSWCD,	site design, Stormwater Pollution Prevention Plan and other	NYCDEP/		
Windham Creamery	NYCDEP,	documents. The design included the construction of parking	GCSWCD,	Completed	
Pond	Windham	area and athletic fields and was left to the town to complete.	Windham	2008	
Town of Windham	GCSWCD,	GCSWCD provided conceptual plans to the Town of Windham	NYCDEP/		
(Police Anchor	NYCDEP,	to assist with assessment and planning for public use of a 65	GCSWCD,	Completed	
Camp)	Windham	acre parcel located in the Batavia Kill watershed.	Windham	2010	

		GCSWCD and NYCDEP completed a parking area and access		
Achland Eiching	GCSWCD,	to an existing public fishing area on the Batavia Kill at the		
Ashland Fishing			NVCDED/	Commissed
Access	NYCDEP,	Ashland Connector Reach Restoration Project. The access	NYCDEP/	Completed
Enhancements	Ashland	includes an information kiosk.	GCSWCD	2010
		All stream management plans recommend enhancing public		
	GCSWCD,	access of the streams for fishing. Along many of the streams		
	NYCDEP,	within the Schoharie Watershed, there are public fishing access		
Promote Increased	Recreation &	points; existing access locations have been mapped. Through		
Recreational Use of	Habitat	the Recreation and Habitat category, multiple stream access	NYCDEP/	Completed
Watershed Streams	Subcommittee	parks have been and will continue to be supported by SWAC.	GCSWCD	2010
	GCSWCD,	The Town of Prattsville was approved for SMIP funding		
	NYCDEP,	October 2009; this grant was closed in August 2012, due to site		
Prattsville Stream	Prattsville,	constraints and significant flood damage throughout Prattsville		Completed
Access Parking	SWAC	during Hurricane Irene in 2011.		2012
		GCSWCD and NYCDEP assisted Town of Windham and the		
		Windham Area Recreation Foundation with installation of a		
		public, non-motorized, multi-use trail along a 65 acre parcel		
	GCSWCD,	located along the Batavia Kill. SWAC/SMIP funds were used to		
	NYCDEP,	cover the cost of materials for a boardwalk and footbridges. The	NYCDEP/
