Statement of Basis and Purpose of Proposed Rule

Local Laws 198 and 199 of 2019 enacted important changes in the provisions of law relating to the Business Integrity Commission and the commercial waste industry. Local Law 198 expanded the power of the Commission to include enforcement of traffic safety requirements for vehicles used in the collection, removal, transportation or disposal of trade waste. Local Law 199, codified in Title 16-B of the New York City Administrative Code, required that the geographic area of New York City be divided into 20 Commercial Waste Zones (CWZs). This proposed rule implements those local laws. Among other things, the Commission proposes to:

- Modify some rules that affect trade waste licensees once particular commercial waste zones are implemented, specifically indicating which sections will no longer apply to carters within designated CWZs.
- Modify traffic safety reporting rules that affect trade waste licensees and registrants. Such rules are not necessary since the Commission’s authority was expanded to include traffic safety requirements for vehicles used in the collection, removal, transportation or disposal of trade waste.
- Require the surrender of Commission-issued trade waste license plates upon the disposition of a vehicle that has been issued such license plates, and
- Clarify the recycling requirements for self-hauler registrants – that is, any person registered by the Commission to handle trade waste generated in the course of operation of such person’s business.

In addition, the proposed rule would increase the maximum rate that a licensee may charge for the collection, removal, disposal, or recycling of trade waste. This increase reflects the inflation of trade waste disposal and hauling costs that has occurred since the maximum rates were last amended in 2022. The Commission primarily considered the United States Bureau of Labor Statistics Producer Price Index and available data from the trade waste industry in determining the rate cap increase.

The Commission’s authority for these rules is found in Sections 1043(a) and 2101(b) of the New York City Charter.

§ 1. The definition of “special trade waste district” set forth in section 1-01 of subchapter A of chapter 1 of Title 17 of the Rules of the City of New York is REPEALED; and such section is further amended by adding the following definitions in the appropriate alphabetical order:

Awardee. The term “awardee” means an entity with whom the Department of Sanitation enters into an agreement for the provision of commercial waste collection services pursuant to section 16-1002 of the Administrative Code.

Designated carter. The term “designated carter” or “carter” means a licensee that is authorized to provide commercial waste collection services pursuant to an agreement between an awardee and the Department of Sanitation entered into pursuant to section 16-1002 of the Administrative

Code. The term “designated carter” may describe the awardee or another licensee that the awardee has designated to fulfill the terms of such agreement as specified therein, and provided further that notwithstanding any other provision of this section, the term “designated carter” may also include a person that the awardee has designated to fulfill the terms of such agreement as specified therein who is operating in accordance with the provisions of Title 16-A of the Administrative Code and the rules promulgated pursuant to such title and who is authorized by the commission to collect certain categories of commercial waste without a license.

Designated recyclable materials. The term "designated recyclable materials" means materials that have been designated for recycling by the Department of Sanitation in 16 RCNY § 1-10(a).

Final implementation date. The term “final implementation date” means the last day of the transition period.

Single stream collection and recycling. "Single stream collection and recycling" means a system in which designated recyclable metal, glass and plastic, and designated recyclable paper, are placed in the same bags or bins by the generator. Such bags and/or the contents of such bins are placed into one waste hauling truck, separate from solid waste and organic waste, and are delivered directly to a recycling processing facility. Such recycling processing facility must be designed to receive, separate and process for reuse or sale commingled loads of designated recyclable metal, glass and plastic, and designated recyclable paper.

Transition period. The term “transition period” means the period between the implementation start date established by the Department of Sanitation for a commercial waste zone and the final implementation date established by such Department for such zone.

A written contract must provide that the licensee must remove the customer's waste from the location designated by the customer. A sample standard contract form must be submitted to the Commission when an application for a license is submitted, and a licensee must submit any subsequent changes in the standard form to the Commission thirty (30) days' prior to implementing such change. Nothing in this provision shall be construed to prevent a licensee from negotiating terms at variance with the standard form contract, except that a licensee must not vary such contract in any manner identified by the Commission as inconsistent with the purposes of Chapter 1 of Title 16-A of the Code by the Commission after review of such standard form. Upon the final implementation date for a particular commercial waste zone, licensees who are designated carters will not be subject to the requirements of this paragraph in such zone.

Licensees who operate in any zones that have not been implemented will continue to be subject to the requirements of this paragraph.

(3) A licensee must not discontinue service to any customer, or raise the rates charged to such customer, unless at least fourteen (14) days' written notice to the customer is given. No contract for the removal, collection, or disposal of waste shall provide that a licensee may discontinue service upon shorter notice. Upon the final implementation date for a particular commercial waste zone, licensees who are designated carters will not be subject to the requirements of this paragraph in such zone. Licensees who operate in any zones that have not been implemented will continue to be subject to the requirements of this paragraph.

(4) A written contract that does not meet the requirements of Federal, State, or Local Law is voidable by either party.

An assignee or subcontractor of contracts for the removal, collection, or disposal of trade waste notify, within fifteen (15) days of the effective date of such assignment or subcontract, each party to a contract so assigned of such assignment or subcontract and of the right of such party to terminate such contract upon thirty (30) days' notice during the three (3) months after receiving notice of such assignment or subcontract. Such notification must be by certified mail with the receipt of delivery retained by the assignee or subcontractor and must be upon a form approved by the Commission. Where no written contract exists with a customer for the removal, collection, or disposal of trade waste, a company that assumes such trade waste removal from another company must provide such customer with notification within fifteen (15) days of such assignment or subcontract, on a form approved by the Commission by certified mail with the receipt for delivery retained by the assignee or subcontractor, that a new company will be providing such trade waste removal, and that the

customer has the right to terminate such service. A licensee must not enter into a subcontract before receiving express approval for the subcontracting arrangement from the Commission. Upon the final implementation date for a particular commercial waste zone, licensees who are designated carters will not be subject to the requirements of this paragraph in such zone. Licensees who operate in any zones that have not been implemented will continue to be subject to the requirements of this paragraph.
