Yours respectfully,

J. A. BENSEL, Commissioner.

Department of Docks and Ferries, Office of the Engineer-in-Chief,
New York, January 29, 1906.

J. A. BENSEL, Esq., Commissioner of Docks:

Sir—I have the honor to submit the following report of work done under my charge and supervision for the quarter ending December 31, 1905:

Battery Wall, North River.

The existing platforms at this locality and the steamboat landing have been maintained during the quarter. A cluster of piles was driven and braced about 15 feet westerly of the Liberty boat landing.

Rector Street Section, North River.

The work at this section is being done under authorization of the Commissioner of Docks of the 16th of December, 1903, and is at the cost and expense of the owners of the property to be improved. The wall has been practically completed for a portion of the section on either side of Pier, new 7, and during the quarter earth filling has been deposited in the rear of that portion of the bulkhead wall built.

Cedar Street Section, North River.

By action of the Commissioner of Docks of December 10, 1902, a section of the bulkhead wall was authorized in the vicinity of Cedar street, extending from the middle of the block between Carlisle and Albany streets northerly to a point 40 feet southerly of the northerly line of Cedar street. This work included the removal of the old structures and Piers, old 13 and 14, together with the sheds thereon. The building of the wall proper was practically completed during a prior quarter and filling has been placed in rear of the wall built. A pier to be known as Pier 11 has been finished as far as it is intended for the present, and the building of a ferry rack at the outer end of this pier preparatory to work to be done by the Central Railroad Company of New Jersey is in progress.

Boiler House on Pier, New 34, North River.

An addition to the boiler house on this pier for housing the electric plant has been built by the Southern Pacific Company under permit from the Commissioner of Docks.

Chelsea Section, North River.

On the 28th of December, 1900, the Board of Docks authorized the construction of a section of the bulkhead wall between Bloomfield and West Twenty-third street. Large property interests in this vicinity have in the past been acquired and extensive work done towards the construction of the wall until at present the section is very nearly completed. During the past quarter the work on the section has been in progress, and 349 linear feet of new wharfage room has been made thereby. Earth filling is being placed in rear of that portion of the wall already built. Temporary sewers have been built at West Seventeenth, West Eighteenth, West Nineteenth, West Twentieth and West Twenty-second streets. Buildings occupying the ground over a portion of the section have been condemned for the use of the Department and are being removed by the purchasers.

Fire at the Terminal of the Delaware, Lackawanna and Western Railroad Company and the Central Railroad Company of New Jersey Ferry.

On the 20th of December, 1905, a disastrous fire occurred in these premises starting at the upper end of the ferry house of the Delaware, Lackawanna and Western Railroad Company, and in a short time destroying both the terminal of that company and of the Central Railroad Company of New Jersey adjoining the same on the south. The companies affected by this fire immediately started to rebuild the destroyed structures. The ferry racks of the Delaware, Lackawanna and Western Railroad Company were still in condition to be used and that ferry has continued to make its landings at its own ferry racks. The condition at the Central Railroad of New Jersey Ferry was, however, so bad that that company made an arrangement with the Erie Railroad Company by which their boats are to land at one of the slips of the Erie. Plans have been filed for the new buildings and the work of reconstruction has been begun.

Pier, New 53, North River.

The work of concreting the deck of this pier has been done during the quarter.

Pier, New 57, North River.

A temporary approach to this pier has been built to facilitate the berthing of the Municipal ferry boats.

Pier, New 59, North River.

The work of constructing a new pier to be known as Pier 59, has been in progress during the quarter.

West Forty-second Street Section, North River.

By an order from the Engineer-in-Chief, dated 14th of November, 1905, the sections originally known as West Forty-second street section, West Forty-third street section extended and West Forty-third street section, were consolidated, and during the quarter the wall was practically completed with the exception of the coping for all the portion except that extending across the foot of West Forty-second street.

Pier 83, North River.

A contract has been prepared and let for constructing a new pier foot of Forty-third street, and work has been in progress.

Claremont Section, North River.

The work at this section is being done under resolution of the Board of Docks passed November 16, 1900. During the past quarter no work on the wall proper has been in progress, but an extension to the pier foot of One Hundred and Thirty-third street is being built by the force of the Department.

Between Spuyten Duyvil and Mt. St. Vincent.

The New York Central and Hudson River Railroad Company are widening the present railroad embankment between these two points, and rip-rap is being deposited along the line of the widening under permit from the Commissioner of Docks.

Marginal Street, North River.

A contract awarded during a previous quarter with the Sicilian Asphalt Paving Company has been in progress. Under this contract the work of laying concrete foundations and asphalt pavement on the marginal street along the North river has been done. Repairs have also been made where necessary to the asphalt pavement already laid by the Uvalde Asphalt Paving Company under their various bonds to maintain the pavement in good condition. The granite pavement along certain portions of the water front where necessary has been taken up from time to time and relaid to grade.

Whitehall Terminal.

The work of constructing a new ferry terminal at this point for the Municipal ferry to Staten Island has been begun. A portion of the old ferry house was removed, and a new slip is in course of construction. A contract is being prepared and will shortly be let for the erection of a new ferry house at this point.

Sewer at Pier, New 4, East River.

A wooden barrel sewer has been constructed across the marginal street through the bulkhead wall and extending to outer end of this pier by the Department of Sewers under permit from the Commissioner of Docks.

Old Slip Section, East River.

The Commissioner of Docks on the 7th of December, 1904, issued the necessary authorization for the construction of the bulkhead wall from the northerly side of Pier, new 7, where it joins the Broad street section to the westerly side of Burling slip, East river. This stretch of wall is divided into two sections, the Old slip section and the Maiden lane section. The Old slip section extends from the northerly or upper end of the Broad street section and runs along the established bulkhead line to a point opposite the southerly line of Wall street. This section contemplates the erection of four new piers to be known as Piers 8, 9, 10 and 11. During the quarter the work of constructing the bulkhead wall proper has been in progress, and contracts have been awarded for building the piers.

Pier 8, East River.

The work of constructing this pier has been in progress during the quarter. The outer end of the pier has been completed, and work is now suspended pending the completion of the bulkhead-wall at the inner end.

Pier 9, East River.

A contract has been prepared and will shortly be let for constructing this pier.

Pier 10, East River.

A contract has been awarded for constructing this pier and the work is in progress.

Pier 11, East River.

The work of constructing this pier has been in progress during the quarter. The outer end of the pier has been completed, and work is now suspended pending the completion of the bulkhead-wall at the inner end.

Storage of Concrete Material on Pier 8, East River.

It having been thought advisable to provide a place in the lower part of the City where concrete material could be stored, the outer end of this pier was fitted up with derrick for handling material, and broken stone, sand and cement have been stored at this locality.

Maiden Lane Section, East River.

By authorization of the Commissioner of Docks, dated 7th of December, 1904, the construction of the bulkhead-wall along this stretch of water front has been ordered. The work extends from the southerly line of Wall street, where it joins the Old slip section, to about the southerly line of Burling slip, and work on the bulkhead-wall proper has been in progress during the quarter. This section includes Piers 12, 13, 14 and 15. Pier, new 12, was built in 1901.

Pier, New 13, East River.

Contract No. 927 has been awarded for the construction of this pier and the work has been in progress.

Pier 14, East River.

The work of building this pier under Contract No. 905 was completed on the 9th of December, 1905.

Pier 15, East River.

The work of building this pier under Contract No. 897 has been completed, and shed foundations have been built on the pier by the lessees under permit from the Commissioner of Docks.

Fulton Section, East River.

This section of the bulkhead-wall was authorized by the Board of Docks on the 26th of April, 1901. This resolution was amended by action of the Commissioner of Docks on the 7th of December, 1904. During the present quarter the work of constructing the bulkhead-wall proper has been in progress, and a retaining wall was constructed to retain earth filling. This section embraces within its limits Piers, new 16, 17 and 18. Pier, new 16, was built in 1901. Pier, new 17, was built during a previous quarter. During the present quarter a steel shed has been erected at the outer end of Pier 16 by C. H. Mallory & Co.

Pier, New 18, East River.

PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
