Whereas, Many of the numerous "excursion" steamboats and barges that leave this city daily are overcrowded with men, women, and children to such a degree as to render them peculiarly liable to accidents, thus endangering the lives of thousands of our people; and
Whereas, It is clearly in violation of the laws of the United States thus to permit overcrowded vessels to navigate the waters within their jurisdiction, and it appears to be the duty of certain officials of the United States to enforce these laws—a duty which in the port of New York is notoriously neglected, thus rendering it necessary that some other means should be taken to prevent this appalling danger to so many of our citizens; be it therefore

HEALTH DEPARTMENT.

Report of the Sanitary Committee on the Nuisances at the Foot of Ninetv-fifth Street and the Eas River and the Adjacent Districts.

HEALTH DEPARTMENT OF THE CITY OF NEW YORK, NEW YORK, July 31, 1877.

To the Board of Health of the City of New York:

GENTLEMEN—Your Committee has been constantly informed with regard to the condition of the city in the neighborhood of Ninety-fifth street and the East river, and no effort has been spared in the

GENTLEMEN—Your Committee has been constantly informed with regard to the condition of the city in the neighborhood of Ninety-fifth street and the East river, and no effort has been spared in the past to secure its improvement.

As the name "Harlem Flats" indicates, this district consisted originally of low lands partially under water at high tide. The flats extended from Ninety-second street, north, for a mile or more, and from the East river as far west at some points as Fifth avenue. The extension of Madison, Fourth, Lexington, Third, Second, and First avenues, and of the cross streets, by high causeways, resulted in the damming of the tide-waters and the establishment of stagnant ponds. This evil was aggravated by the use of filling on the streets and also on some of the blocks, which was more or less contaminated by garbage and other refuse.

The present Board of Health organized in 1873, and immediately turned its attention to these flats. Since that time the Sanitary Inspectors have been constantly on the alert preventing the use of oftensive materials for filling, making complaints on which were based orders upon owners to fill their lands above high water-mark, and preparing drainage certificates which were forwarded to the Department of Public Works. The efforts of the Board have been measurably successful, and the condition of the district has been very much improved. Many obstacles have, however, been encountered which have prevented all the improvements ordered by the Board from being executed. Private owners have refused to obey the orders of the Board, and tedious litigation has re-ulted, the cases being defeated in the courts, and finally going up to the Court of Appeals. Pending the results of this litigation, and in consequence of one adverse decision by the Court of Common Pleas in one of these Harlem Flat cases, this Department has hesitated to renew the efforts which it had already made to use its utmost power and authority in this district. We are also informed that, by reason of existing l exist as represented.

The fertilizer factory on One Hundred and Sixth street, for instance, was closed by order of this Board over two months ago, as soon as the offensive nature of the operations there conducted became apparent. Since that time there has been no manufacturing conducted there, the only work performed being the barreling and bagging of the finished material on hand. No such manufacture is permitted within the city limits, nor are there any other offensive factories in the district.

being the barreling and bagging of the finished material on hand. No such manufacture is permitted within the city limits, nor are there any other offensive factories in the district.

For the removal of manure from the city it is necessary to indicate certain docks. The dock at the foot of East Ninety-fifth street seemed to be less objectionable for this purpose than any other, and was so indicated. It is not the intention of this Department to permit the accumulation of manure and stable straw within the city limits; but the practical obstacles in the way of its daily removal throughout the entire year have thus far rendered this subject one of the most difficult to manage. Consequently there has been, at two or three points, an accumulation of these materials during the past winter months. This, however, is one of the minor evils affecting this district. The night soil boat at the foot of East Ninety-fifth street, is not in any way objectionable, and no one would be aware of the peculiar character of its contents from any offensive odor emanating from it. Your Committee is aware of the real causes of the annoyance experienced by the residents of this portion of the city.

Ist. The sewer in First avenue runs north and south and discharges its contents through two large openings at One Hundredth street upon the tidal lands between the avenue and the East river. The sewage discharged at this point is largely supplied by the breweries further south, and at low tide diffuses a most offensive odor of sour and decomposing vegetable matter, brewers' grains, etc., together with sewage of the usual character. These odors can be often distinctly recognized west of Third avenue. This evil can only be remedied by the extension of the sewer to the East river, and the filling in of the tidal lands to a height of several feet above the highest high water-mark. The difficulties in the way of the accomplishment of the improvements we have already explained. It is quite possible that new legislation will be required to secure

disseminates odors which have undoubtedly contributed from time to time to the analysis of eneighborhood.

3d. The peculiarly offensive odors of sludge acid from the fertilizer works on Hunter's Point and Newtown Creek are often wafted over the entire area by southeasterly winds.

4th. A very offensive odor was perceived at times in the district, which your Committee recognized as peculiar to the refuse from the manufacture of naphtha or petroleum gas. As there are no gas works in this part of the city where such gas is manufactured, and as there were no deposits of refuse visible, it was for some time impossible to explain the source of this particular nuisance. On some of the cross streets in the district, filling is going on with what appears to be fresh cellar dirt. some of the cross streets in the district, filling is going on with what appears to be fresh cellar dirt. Your Committee succeeded in locating the peculiar stench at some points on this filling, and finally ascertained that the refuse purifying material of the Mutual Gas Works, at East Twelfth street, which has the texture, color, and general appearance of cellar dirt, has been brought on scows, and used for filling. The contractor has been directed to bring no more of this material into the district, and to cover that already there with fresh earth.

In conclusion we would say that the nuisances which we have indicated are for the most part beyond the control of the Health Department, at this time, and that this Board has done and is doing all that it can with the means at its command to reduce them to a minimum. In fact the doing all that it can with the means at its command to reduce them to a minimum. In fact the Harlem Flat district cannot properly be considered healthful until the tide-water is shut out, all the holes which retain stagnant water filled up, a comprehensive system of sewers and drains established, and the level of the entire area raised by filling with good earth several feet above the highest high water-mark. This Board has renewed its orders to the Inspectors to call the attention of the Police to all violations of the Sanitary Code, in the dumping of garbage and other offensive refuse in this district; has requested a special detail of patrolmen to prevent the dumping of manure and stable-straw upon the dock or adjacent land, at the foot of East Ninety-fifth street; has requested the Department of Public Works to extend the sewers at the foot of One Hundredth street to low water-mark, and will request the Department of Docks as soon as cooler weather warrants it to drudge that part of the river which has been filled with refuse from the sewer. of the river which has been filled with refuse from the sewer.

Respectfully submitted,

E. G. JANEWAY, Chairman Sanitary Committee.

C. F. CHANDLER, Commissioner and President.
