Staten Island SAFE Disposal Event is Saturday, October 22

Event Provides Residents Easy Option for Disposal of Potentially Harmful Household Items

Residents looking to dispose of potentially harmful household materials may do so at the **Staten Island SAFE** (Solvents, Automotive, Flammables, and Electronics) Disposal event, held this **Saturday, October 22**, at the Midland Beach parking lot. Residents driving to the free event should approach from Slater Blvd. The drop-off event is rain or shine, from 10 a.m. to 4 p.m.

Household products such as **pesticides, strong cleaners, mercury-containing devices, paints, automotive fluids, and medications** may be brought to the drop-off event. Residents can also bring **electronics**, which may longer be left for curbside collection due to a New York state law.

To identify harmful products, look for items marked DANGER, WARNING, POISON, or CAUTION. Please also bring other materials stored in your home that you know may be harmful. Only NYC residential waste will be accepted.

“Our SAFE Disposal events give city residents a quick, convenient way to dispose of potentially harmful products, the items many of us have in under the sink, or in the back of a closet,” said Commissioner Garcia. “We are also thankful to our partners in helping make these events a success year after year.”

Events were held earlier this season in Brooklyn, the Bronx, Queens and Manhattan.

Examples of Accepted Items

- Automotive products such as motor oil, transmission fluid, and auto batteries
- Personal care items like unwanted medicines or cosmetics
- Thermometers
- Syringes (clearly labeled and packaged in a “sharps” container or other leak proof, puncture-resistant container)
- Household products such as pesticides, paint, hazardous cleaners, spent compact fluorescent light bulbs
- Electronics, such as computers, televisions, and printers.

Residents unable to attend these events should visit www.nyc.gov/safedisposal or contact 311 for year-round options to handle items such as automotive products, batteries, cell phones, electronics, fluorescent lamps, latex paint, mercury devices, and syringes.

Materials collected are either recycled, blended for fuel, or sent to licensed hazardous waste treatment facilities for safe disposal.

Electronics are responsibly recycled or refurbished for reuse through [e-cycleNYC](#).

Unwanted medications are managed by environmental police and incinerated to prevent unintentional poisonings or entry into the water supply.

About the New York City Department of Sanitation

The Department of Sanitation (DSNY) promotes a healthy environment through the efficient management of solid waste and the development of environmentally sound long-range planning for handling refuse, including recyclables. The Department operates 59 district garages and manages a fleet of 2,022 rear-loading collection trucks, 450 mechanical brooms and 365 salt/sand spreaders. The Department clears litter, snow and ice from approximately 6,000 miles of City streets and removes debris from vacant lots as well as abandoned vehicles from City streets.
