## Brooklyn Bridge.

Through six-car elevated train service to and from Park row, during the rush hours, was inaugurated on the Brooklyn Bridge January 27, 1908. Through service over all of the divisions of the Brooklyn elevated railroad system, radiating from the Brooklyn Bridge, is now in operation at all hours of the day and night.

A count was made February 17, 1908, after the tube from the Battery to Borough Hall, Brooklyn, was opened, of passengers using the through train service on the Bridge during the rush hours from 4 to 7 p. m. This count was compared with that made October 17, 1907, the last previous to the opening of the Brooklyn tube.

February 17, 1908, through elevated passengers, without change at the Brooklyn station .....	59,994
October 17, 1907, through elevated passengers, all changing cars at the Brooklyn station .....	52,689

Increase shown on February 17, 1908..... 7,305

This increase does not indicate capacity, as all passengers awaiting trains at the Manhattan station were carried away.

None of the gates controlling the stairway entrances to the elevated loading platforms have been closed against passengers during rush hours since March 19, 1908.

A schedule of a train a minute will be maintained during the rush hour periods.

The change of cars at the Brooklyn end of the Bridge at the periods of greatest inconvenience, morning and evening rush hours, is no longer necessary. The duplication of the Manhattan evening rush hour congestion on the Brooklyn elevated railroad platforms has ceased. Stair climbing to and from the Bridge local trains and the Brooklyn elevated platforms has been eliminated. The five-car Bridge locals have been retired from service. Electricity has taken the place of cable power. The speed of trains has been safely increased across the Bridge from eleven to fifteen miles an hour. The local passengers, formerly carried on the elevated railroad cars and shuttle trains, have been provided with a separate local trolley car service between the Manhattan and Brooklyn stations. The rate of fare, 3 cents for a single trip and two tickets for 5 cents, is maintained on the local car service.

Through rush hour operation was begun under adverse conditions. In order not to interfere with train service, it was necessary to retire the shuttle trains and introduce the elevated trains before all the railroad equipment and paraphernalia were fully installed.

The through rush hour service is being constantly improved, and the completion of the work of installing railings to expedite train loading, electric switches, signals, and other modern railroad devices, will make it possible to more nearly attain the transportation capacity of the Bridge.

The use of the temporary extension across Park row for through elevated railroad service has made possible a rearrangement and improvement of the transportation facilities of the elevated railroad systems running to the Brooklyn Bridge. The elevated railroad terminals in Brooklyn being relieved of the service which is now operated from Park row, are devoted to the operation of additional Brooklyn local service over all the divisions with which they have physical connections. It has also made possible additional facilities for carrying passengers to and from the Battery-Brooklyn tube.

The completion of the overhead trolley approach across Sands street, Brooklyn, which is now well along in construction, will make it possible to add considerably to the facilities for Brooklyn elevated travelers. This approach will run along both sides of the second floor of the Brooklyn station of the Bridge. The Brooklyn railroad companies have signified their intention and willingness to carry passengers during the rush hours from Park row, Manhattan, on trolley cars to the Brooklyn station, and transfer them to the local elevated railroad service overhead, without extra fare. The Brooklyn local elevated service, starting with empty trains from the Brooklyn terminals, will furnish such passengers with an elevated railroad service in addition to that operated from Park row. This increased capacity is measured by the number of trains that are operated from the Brooklyn terminals of the elevated railroads. Passengers using the Brooklyn local elevated service during the morning rush hours will be transferred in the same way at the Brooklyn station to trolley cars running overhead across Sands street to Manhattan.

The trolley car schedule across the Bridge was increased on January 27, 1908, from 300 cars an hour during rush hours to 320 cars. A maximum of 347 cars during the evening rush hour has since been attained.

On February 17, 1908, as compared with October 17, 1907, trolley passenger traffic across the Bridge had fallen off 12,600 passengers during the evening rush period from 4 to 7 p. m. These passengers were probably attracted to the through elevated railroad service, which showed an increase of 7,305 passengers on this evening, and to the tube to Brooklyn.

Seats can now be had in the trolley cars during the morning and evening rush periods. Making allowances for normal increase, there is available for passengers desiring to take trolley cars from Park row to the second floor of the Bridge station in Brooklyn, comfortable and ample facilities.

## Williamsburg Bridge.

At the Manhattan end of the bridge the subway station, extending for three blocks under Delancey street, is nearing completion. The elevated railroad and surface car systems of Brooklyn will be accommodated in this station. Track and platform facilities for eight-car elevated railroad trains have been provided. Eight loops for use by the trolley cars have been built. The connection between the Brooklyn end of the bridge and the elevated structure on Broadway, Brooklyn, is completed. This connection marks an innovation in elevated railroad construction. It is a slightly structure, with stone ballasted tracks which will introduce noiseless train operation.

The use of the Manhattan subway station will permit the operation of elevated railroad trains across the Williamsburg Bridge for the first time since it was open to the public.

In the new station the present surface car capacity of the bridge, now limited by terminal facilities, will be doubled. The station is equipped with modern railroad appliances, and is of durable and artistic construction. Passengers entering and leaving trains and cars will use separate stairways and platforms, and congestion at loading and unloading points will be eliminated.

The station is designed to form part of the subway loop connecting the Williamsburg, Manhattan and Brooklyn Bridges. With the completion of the subway loop being built by the Public Service Commission, a City Hall station and intermediate stations will be provided for the Williamsburg Bridge. This will divert thousands of passengers from the Brooklyn Bridge to the Williamsburg Bridge. People living

convenient to the elevated roads that will run across the Williamsburg Bridge must now use the Brooklyn Bridge in order to reach, by a direct route, destinations south of and contiguous to City Hall.

Quick completion of the subway loop, with arrangements for its operation, which is a matter to be determined by the Public Service Commission, will furnish a potent source of relief to the Brooklyn Bridge and usefulness to the other bridges which it will connect.

## Manhattan Bridge.

The anchorages are ready for cable making operations. The framing of the temporary foot bridges, from which the cables will be strung, has been started.

The steel towers are very nearly completed. The saddles for the cables are now being placed upon them.

The manufacture of the wire required for the cables, and the manufacture of the structural steel required for the suspended span, is progressing at Trenton, N. J., and Phoenixville, Pa. The plant required at the bridge site for the erection of the cables is being installed.

The approaches to the bridge are being cleared of buildings. Arrangements have been made to immediately begin the manufacture of steel required for both the Manhattan and Brooklyn approaches.

## Blackwells Island Bridge.

On March 18, 1908, a section of steel work, which closed the last gap in the all-steel connection from Manhattan to Queens, was swung into place.

The work of finishing the steel superstructure from the Manhattan shore to the Queens shore is nearly completed.

The Department has made preparation for beginning the roadway paving, foot-walk flooring, installation of railroad tracks and the erection of railings and ornamental tower tops.

The construction of approaches is being hurried.

## Henry Hudson Memorial Bridge.

The designing of the main span arch has gone ahead satisfactorily. The preparation of general and detail contract drawings is proceeding.

## University Heights Bridge.

This bridge, connecting East One Hundred and Eighty-fourth street, in The Bronx, with Two Hundred and Seventh street, in Manhattan, was opened for public use January 8, 1908.

## The New Madison Avenue Bridge.

The manufacture of steel in the shops has been going ahead during the winter. Preparations have been made to begin work on the site.

## Borough Bridges.

The Borough bridges have been operated, cleaned and repaired by the usual forces in the employ of the Department with very little outside assistance.

The construction of the new bridge over Pelham Bay Narrows, in the Borough of The Bronx, is progressing.

The construction of the new bridge across Dutch Kills, at Borden avenue, in the Borough of Queens, continues.

Respectfully,

J. W. STEVENSON,  
Commissioner of Bridges.

## PROPOSALS FOR CONSTRUCTION OF RAPID TRANSIT LINES IN BROOKLYN.

## INVITATION TO CONTRACTORS.

(FLATBUSH AVENUE EXTENSION, NASSAU STREET TO WILLOUGHBY STREET, MANHATTAN BRIDGE, NO. 1.)

THE City of New York, acting by the Public Service Commission for the First District, by this advertisement invites proposals to construct that part of the proposed Fourth Avenue Subway in the Borough of Brooklyn which begins at the northern side of Nassau Street and runs thence under said Flatbush Avenue Extension to a point about 20 feet north of the centre line of Willoughby Street.

The general plan of construction calls for a four-track subsurface Railroad, but the Contractor will not be required under the contract proposed to provide or lay tracks, ties or ballast. A station between Tillary Street and Johnson Street will be constructed, and suitable cross-overs, turn-outs and sidings are also to be provided, all as indicated on the detailed plans of construction. The tunnels are to have a height of not less than thirteen (13) feet in the clear, and a maximum width of fifteen (15) feet for each track, except at curves, etc., where the width may be increased. The roof of the tunnels is generally to be as near the surface of the street as street conditions and grades will permit. The roof and sides of the tunnels will be of iron or steel and masonry. Entrances to the station are intended to be placed within private property, rights in which will be acquired for the purpose, or on the streets, or on the sidewalks adjacent to private property, as indicated on the plans.

The manner of construction shall be by open excavation unless otherwise provided in the contract or directed by the Commission; such portions of the street, however, where the work may not be completed and the backfill is not placed at the expiration of fifteen months from the time of executing the contract, must be substantially boarded over to permit freedom of traffic, if so ordered by the Commission.

In the detailed plans for construction, provisions for pipe galleries along the line of the tunnel are included. Bids for the construction of the railroad must be accompanied by a separate bid for the construction of the pipe galleries above referred to, as it is essential for the City to separate the cost of the railroad from the cost of the pipe galleries. The Commission reserves the right to accept a bid for construction of the railroad and at the same time to reject the accompanying bid for pipe galleries.

Bidders must visit the location of the railroad and station to be built under this contract and note the present conditions along the line of the proposed railroad. The buildings standing within the lines of the said Flatbush Avenue Extension are being, or are to be, demolished and the materials removed by other contractors.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated in the printed form of contract now on file in the office of the Commission, No. 154 Nassau Street, in the Borough of Manhattan, and in the detailed drawings therein referred to, at which office copies of the contract and of the form of bond and contractor's proposal may be had on application. The contract drawings may be inspected at the same office. The printed form of contract and the detailed drawings are to be deemed a part of this invitation.

Partial payments to the contractor will be made monthly as the work proceeds, as provided in the form of contract.

The work of construction (including pipe galleries) is to be completed as soon as practicable, and within twenty-four months from the date of delivery of the contract.

Sealed bids or proposals will be received at the said office of the Commission, at No. 154 Nassau Street, in the Borough of Manhattan, The City of New York, until

FRIDAY, THE 8TH DAY OF MAY, 1908,

at 12 o'clock noon, at which time or at a later date to be fixed by the Commission the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

The proposal must contain a statement, in the form prescribed, of the quantities and unit values upon which the bid is based. Such statement shall be merely for the information of the Commission to enable it to determine upon what basis the proposal is made and for no other purpose whatsoever, and the Commission shall not be bound in any way to make payments or value work done, upon the basis of such quantities and unit values contained in such statement.

No proposal will be allowed to be withdrawn for any reason whatever after it shall have been deposited with the Commission.

The award of the contract or contracts (if awarded) will be made by the Commission within twenty days after the opening of the proposals. The bidder whose proposal shall be accepted shall in person or by duly authorized representative attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment; and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the contractor will be required to furnish security to the City by giving a bond in the penalty of one hundred and fifty thousand dollars. At the option of the successful bidder cash or approved securities may be deposited instead of giving a bond. If securities are deposited in place of a bond under this contract, they must be of the character of securities in which Savings Banks may invest their funds and must be approved by the Commission. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten per cent. of each amount certified from time to time to be due to the contractor will be retained until the work is fully completed.

Bidders whose proposals are otherwise satisfactory to the Commission may, in case the sureties or securities named by them are not approved by the Commission, substitute in their proposals the names of new sureties or a different schedule of securities approved by the Commission; but such substitution must be made within five days after notice of disapproval by the Commission, unless this period is extended by the Commission.

In case of failure or neglect to execute and deliver the contract or to make the required deposit or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case the Commission will give notice thereof to the defaulting bidder. And the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interest of the City to contract with, or may by new advertisement invite further proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other contractor over the amount of the bid of such defaulting bidder.

Every proposal must, when submitted, be enclosed in a sealed envelope endorsed "PROPOSAL FOR CONSTRUCTING RAPID TRANSIT RAILROAD—FLATBUSH AVENUE EXTENSION, NASSAU STREET TO WILLOUGHBY STREET," and must be delivered to the Commission or to its Secretary; and in the presence of the person offering the proposal it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a certified check drawn upon a National or State Bank or Trust Company within The City of New York and satisfactory to the Commission, payable to the order of the Comptroller of The City of New York, for the sum of twelve thousand five hundred dollars.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, or make a deposit in cash or securities, then this invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damages by it sustained by reason of such failure; and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions as to security are complied with.

##### INVITATION TO CONTRACTORS.

(FOURTH AVENUE FROM TENTH STREET TO TWENTY-SEVENTH STREET.)

THE City of New York, acting by the Public Service Commission for the First District, by this advertisement, invites proposals to construct that part of the proposed Fourth Avenue Subway in the Borough of Brooklyn between points on Fourth Avenue 10 feet north of the north line of Tenth Street and 15 feet south of the south line of Twenty-seventh Street.

The general plan of construction calls for a four-track subsurface Railroad, but the contractor will not be required under the contract proposed to provide or lay tracks, ties or ballast. Two stations, one between Prospect Avenue and Seventeenth Street, and one between Twenty-fifth Street and Twenty-sixth Street, will be constructed; and suitable cross-overs, turnouts and sidings

are also to be provided, all as indicated on the detailed plans of construction. The tunnels are to have a height of not less than thirteen (13) feet in the clear, and a maximum width of fifteen (15) feet for each track, except at curves, etc., where the width may be increased. The roof of the tunnels is generally to be as near the surface of the street as street conditions and grades will permit. The roof and sides of the tunnels will be of iron or steel and masonry. Entrances to the stations are intended to be placed within private property, rights in which will be acquired for the purpose, or on the streets, or on the sidewalks adjacent to private property, as indicated on the plans.

The manner of construction shall be by excavation in open trench, unless otherwise provided in the contract or directed by the Commission.

In the detailed plans for construction, provisions for pipe galleries along the line of the railroad are included. Bids for the construction of the railroad must be accompanied by a separate bid for the construction of the pipe galleries above referred to, as it is essential for the City to separate the cost of the railroad from the cost of the pipe galleries. The Commission reserves the right to accept a bid for construction of the railroad and at the same time to reject the accompanying bid for pipe galleries.

Bidders must visit the location of the railroad and stations to be built under this contract and note the present conditions along the line of the proposed railroad.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated in the printed form of contract now on file in the office of the Commission, No. 154 Nassau Street, in the Borough of Manhattan, and in the detailed drawings therein referred to, at which office copies of the contract and of the form of bond and contractor's proposal may be had on application. The contract drawings may be inspected at the same office. The printed form of contract and the detailed drawings are to be deemed a part of this invitation.

Partial payments to the contractor will be made monthly as the work proceeds, as provided in the form of contract.

The work of construction (including pipe galleries) is to be completed as soon as practicable, and within twenty-four months from the date of delivery of the contract.

Sealed bids or proposals will be received at the said office of the Commission, at No. 154 Nassau Street, in the Borough of Manhattan, The City of New York, until

FRIDAY, THE 8TH DAY OF MAY, 1908,

at 12 o'clock noon, at which time or at a later date to be fixed by the Commission the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

The proposal must contain a statement, in the form prescribed, of the quantities and unit values upon which the bid is based. Such statement shall be merely for the information of the Commission, to enable it to determine upon what basis the proposal is made and for no other purpose whatsoever, and the Commission shall not be bound in any way to make payments or value work done, upon the basis of such quantities and unit values contained in such statement.

No proposal will be allowed to be withdrawn for any reason whatever after it shall have been deposited with the Commission.

The award of the contract or contracts (if awarded) will be made by the Commission within twenty days after the opening of the proposals. The bidder whose proposal shall be accepted shall in person or by duly authorized representative attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment; and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the contractor will be required to furnish security to the City by giving a bond in the penalty of one hundred and fifty thousand dollars. At the option of the successful bidder cash or approved securities may be deposited instead of giving a bond. If securities are deposited in place of a bond under this contract, they must be of the character of securities in which Savings Banks may invest their funds and must be approved by the Commission. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten per cent. of each amount certified from time to time to be due to the contractor will be retained until the work is fully completed.

Bidders whose proposals are otherwise satisfactory to the Commission may, in case the sureties or securities named by them are not approved by the Commission, substitute in their proposals the names of new sureties or a different schedule of securities approved by the Commission; but such substitution must be made within five days after notice of disapproval by the Commission, unless this period is extended by the Commission.

In case of failure or neglect to execute and deliver the contract or to make the required deposit or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case the Commission will give notice thereof to the defaulting bidder. And the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interest of the City to contract with, or may by new advertisement invite further proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other contractor over the amount of the bid of such defaulting bidder.

Every proposal must, when submitted, be enclosed in a sealed envelope endorsed "PROPOSAL FOR CONSTRUCTING RAPID TRANSIT RAILROAD—(FOURTH AVENUE, TENTH STREET TO TWENTY-SEVENTH STREET)" and must be delivered to the Commission or to its Secretary; and in the presence of the person offering the proposal it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a certified check drawn upon a National or State Bank or Trust Company within The City of New York and satisfactory to the Commission, payable to the order of the Comptroller of The City of New York, for the sum of twelve thousand five hundred dollars.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, or make a deposit in cash or securities, then this Invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damages by it sustained by reason of such failure; and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the owner-

ship of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions as to security are complied with.

The general plan of construction calls for a four-track subsurface Railroad, but the Contractor will not be required under the contract proposed to provide or lay tracks, ties or ballast. A station at Thirty-sixth Street will be constructed; and suitable cross-overs, turnouts and sidings are also to be provided, all as indicated on the detailed plans of construction. The tunnels are to have a height of not less than thirteen (13) feet in the clear, and a maximum width of fifteen (15) feet for each track, except at curves, etc., where the width may be increased. The roof of the tunnels is generally to be as near the surface of the street as street conditions and grades will permit. The roof and sides of the tunnels will be of iron or steel and masonry. The contract drawings may be inspected at the same office. The printed form of contract and the detailed drawings are to be deemed a part of this invitation.

Partial payments to the contractor will be made monthly as the work proceeds, as provided in the form of contract.

The work of construction (including pipe galleries) is to be completed as soon as practicable, and within twenty-four months from the date of delivery of the contract.

Sealed bids or proposals will be received at the said office of the Commission, at No. 154 Nassau Street, in the Borough of Manhattan, The City of New York, until

at 12 o'clock noon, at which time or at a later date to be fixed by the Commission the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

The proposal must contain a statement, in the form prescribed, of the quantities and unit values upon which the bid is based. Such statement shall be merely for the information of the Commission to enable it to determine upon what basis the proposal is made, and for no other purpose whatsoever, and the Commission shall not be bound in any way to make payments or value work done, upon the basis of such quantities and unit values contained in such statement.

No proposal will be allowed to be withdrawn for any reason whatever after it shall have been deposited with the Commission.

The award of the contract or contracts (if awarded) will be made by the Commission within twenty days after the opening of the proposals. The bidder whose proposal shall be accepted shall in person or by duly authorized representative attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment; and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

the Commission, unless this period is extended by the Commission.

In case of failure or neglect to execute and deliver the contract or to make the required deposit, or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case the Commission will give notice thereof to the defaulting bidder. And the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interest of the City to contract with, or may, by new advertisement invite further proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other contractor over the amount of the bid of such defaulting bidder.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

The contract must be bid for separately.

The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done.
