

2025 - Con Edison Equipment Stray Voltage Check

For the year of 2025, the Department of Transportation's Energy Services Unit along with the Department of Transportation's Electrical Inspectors Unit randomly surveyed locations for stray voltage pursuant to NYC Administrative Code Section 19-153 (Local Law 44 of 2004). These locations were at or around Con Edison equipment. Each location was tested using two methods:

- 1) Using HD electric LU-5 low voltage contact detector.
- 2) Using a Fluke 373 clamp meter with a verified good ground 50 ft. outside tested location.

All five boroughs were surveyed. Stray voltage locations and x numbers corresponding to them can be found below

Date of Inspection, Borough, Location, type of Con Edison equipment, and whether stray voltage was found at the location are indicated below.

2025 CON EDISON EQUIPMENT STRAY VOLTAGE CHECK
