### APPROVED PAPERS.

#### APPROVED PAPERS FOR THE WEEK ENDING MAY 2, 1903.

No. 235.

Whereas, It has been determined that tuberculosis of the lungs, or consumption, is a contagious disease, and also that it can be cured, or, at least, arrested, especially in its early stages; and

Whereas, It is one of the great scourges of humanity in this City, as elsewhere; and

Whereas, The present means at the disposal of this City for coping with this dreaded scourge are totally inadequate; and

Whereas, The best and most effective modern scientific methods for treating consumption are, by reason of their expensiveness, out of reach of the poor, who are, nevertheless, the greatest sufferers from the disease; be it

Resolved, That this Board is in favor of the establishment by The City of New York, within the shortest possible time, of a hospital in the near neighborhood of the City for the treatment of consumptives; and

Resolved, That the Commissioner of Charities be and he hereby is requested to prepare a report on the establishment of such a hospital, showing the amount of ground necessary, the proper location, the general type of building required and the probable expense for the land, building and maintenance, and such other details as may be necessary to admit of intelligent action; and

Resolved, That the Commissioner of Charities be and he hereby is requested to submit said report to the Board of Estimate and Apportionment, with a request for an appropriation of the amount of money sufficient to establish and maintain such a hospital; also

Resolved, That the President of the Board of Health be requested to supply an estimate to this Board showing, as near as may be, the total number of persons in this City now suffering from consumption, and giving as careful an estimate as may be of the number of new cases which may be expected to develop each year for the next five years, in order that this Board may have an approximate basis for judging of what hospital accommodation it might probably be necessary to provide in order to take care in a proper manner of all persons stricken with this disease; and

Resolved, That the President of the Board of Health be requested to state to this Board whether, in case sufficient hospital accommodation were provided to take care of all cases of consumption that should develop, there would be any scientific basis for the belief that consumption as a scourge—that is to say, as one of the leading causes of death—could be abolished in this City, and, if so, within what period of time; also

Resolved, That, if there are certain simple physical exercises, requiring little or no apparatus, and which are calculated to ward off consumption from those persons predisposed to it, the President of the Board of Health be and he hereby is requested to print and distribute plain and practical and readily intelligible instructions describing and illustrating such approved methods of lung and chest development, and explaining their object and probable results.

Adopted by the Board of Aldermen April 7, 1903.

Approved by the Mayor April 24, 1903.
