## Family Fishing Day at Lake Gleneida Attracts Nearly 100 People

### Additional high-resolution images from the event are posted on [DEP's Flickr page](#)

Nearly 100 people attended Family Fishing Day at Lake Gleneida on Saturday, April 29. The event in Carmel attracted families from Putnam County, Westchester County, Dutchess County, Connecticut and parts of New York City. It was hosted by the New York City Department of Environmental Protection (DEP) and co-sponsored by the state Department of Environmental Conservation. Experts were on hand to teach kids how to fish, and the state encouraged families to enjoy the great outdoors by waiving its fishing license requirements for the day. Photos from the event and a list of future family fishing days can be found on DEP's watershed [Facebook](#) page.

DEP manages New York City's water supply, providing more than 1 billion gallons of high-quality water each day to more than 9.5 million New Yorkers. This includes more than 70 upstate communities and institutions in Ulster, Orange, Putnam and Westchester counties who consume an average of 110 million total gallons of drinking water daily from New York City's water supply system. This water comes from the Catskill, Delaware, and Croton watersheds that extend more than 125 miles from the City, and the system comprises 19 reservoirs, three controlled lakes, and numerous tunnels and aqueducts. DEP has nearly 6,000 employees, including almost 1,000 scientists, engineers, surveyors, watershed maintainers and other professionals in the watershed. In addition to its \$70 million payroll and \$166 million in annual taxes paid in upstate counties, DEP has invested more than \$1.7 billion in watershed protection programs—including partnership organizations such as the Catskill Watershed Corporation and the Watershed Agricultural Council—that support sustainable farming practices, environmentally sensitive economic development, and local economic opportunity. In addition, DEP has a robust capital program with \$20.7 billion in investments planned over
