The Construction or Executive Committee present herewith the following communication received from the Computation.

received from the Comptroller:

CITY OF NEW YORK—FINANCE DEPARTMENT, COMPTROLLER'S OFFICE, May 27, 1890.

Hon. J. C. DUANE, President, Aqueduct Commission:

SIR—I desire to call your attention to the fact that this Department has been advised by the Counsel to the Corporation that the provisions of the act of Legislature of 1890, known as the Weekly Payment Bill, apply only to persons receiving a per diem compensation, and inasmuch as about forty of the employees of the Aqueduct Commissioners receive a per diem compensation, it will be necessary to provide for the payment of their wages weekly after July 1, 1890.

In view of the fact that the Paymaster's office of the Finance Department will be severely taxed in point of time to carry out the provisions of said law, and inasmuch as much time is consumed in making payment to the employees of the Aqueduct Commissioners, necessitating travel from New York City to Croton Dam, I would respectfully request that payments of wages of said per diem men employed by the Aqueduct Commissioners shall, after July 1, be made by the Purveyor, Mr. W. W. Proctor, under a resolution of your Board, and upon his furnishing an adequate bond in the penal sum of \$2,500 for the faithful performance of such duties, so defined by resolution of your Board.

Respectfully, THEO, W. MYERS, Comptroller.

—and recommend the adoption of the following resolution:

Resolved, That in addition to the duties now performed by W. W. Proctor as Purveyor of the Aqueduct Commissioners, he shall, on and after July 1 next, take charge of the payments that are required to be made weekly to Laborers and others employed on the New Aqueduct; and he is hereby required to furnish a bond in the penal sum of \$2,500 for the faithful performance of said additional duties; the said bond to be approved by the Counsel to the Corporation as to form, and by the Comptroller as to the sufficiency of the sureties therein.

by the Comptroller as to the sufficiency of the sureties therein.

On motion of Commissioner Tucker, the report was approved and the resolution adopted. The Committee also reported in favor of the adoption of the following resolution:

Resolved, That upon the recommendation of the Chief Engineer, an appropriation of \$945 is hereby made to be expended as follows: \$150 for connecting the boilers with the hoisting engines at Shaft 25; \$55 for providing and placing a 2-inch galvanized iron water pipe (about 400 feet long), required for making the necessary connections with the boiler-house at said shaft; \$200 for providing and placing a timber platform at Shaft 21, and \$45 for iron lining required for Shaft 17½.

The same was adopted by the following vote:

Affirmative—Commissioners Duane, Tucker, Scott and Howe—4.

The Committee also reported in favor of the adoption of the following resolution:

Resolved, That the communication submitted by E. T. Lovatt, attorney for O'Brien & Clark, on May 16, 1890, be and the same is hereby taken from the table, and the Secretary is directed to transmit the same to the Counsel to the Corporation as an act of justice to the contractors, and call his attention to the fact that the Commissioners are awaiting a reply upon the question as to the payment of damages for overtime submitted by them on May 27, 1889, under Clause M of the contract for the construction of the New Aqueduct, and that the Commissioners are unable to act in the matter until the opinion on this question is received.

On motion of Commissioner Scott, the same was adopted.

On motion of Commissioner Scott, the same was adopted.

The Committee also reported in favor of the adoption of the following preamble and resolutions

Whereas, The Chief Engineer of this Commission has certified in writing that Brown, Howard & Co., have completely performed and carried out the provisions of the contract made with this Commission on the 20th day of December, 1884, for constructing Section 4 of the New Aqueduct, and has stated from actual measurements the whole amount of work done and materials fur ished under and according to the terms of said contract, and of the true value thereof; now, therefor be it

under and according to the terms of said contract, and of the true value thereof; now, therefor be it

Resolved, That the Aqueduct Commissioners do accept the work done and materials furnished
by Brown, Howard & Co., under the contract made with this Commission on the 20th day of
December, 1884, for constructing Section 4 of the New Aqueduct, and that a proper voucher for
the final payment for work done and materials furnished under said agreement be approved by the
Commissioners and certified to the Comptroller for payment.

Resolved, That the Comptroller be and he is hereby requested to withhold payment upon the
final estimate for Section 4, when transmitted to him, until the receipt of the opinion of the Counsel
to the Corporation upon the question as to the payment of damages for overtime, submitted on May
27, 1889, relative to the order for lining the whole conduit with masonry.

The same were adopted by the following vote:

O'Brien & Clark, contractors, an extension of time of thirty days from June I next in which to complete the work on said section, providing their bondsmen shall, within ten days from the date hereof, enter into stipulations continuing their obligations for and during the completion of said contract under said extension of time, which is hereby allowed to them as further time for the performance of said contract.

On motion of Commissioner Tucker, the same were adopted.

On motion of Commissioner Scott, the hearing of the order to show cause by Heman Clark, contractor for the construction of Section 10B of the New Aqueduct, why the further work of con struction of said section should not be discontinued, owing to the fact that the work is unnecessarily and unreasonably delayed, and for his failure to comply with the orders and directions of the Chief Engineer, and the further completion of said section done under the direction and supervision of the Aqueduct Commissioners, as provided in Clause P of the contract for the construction of said section, adjourned to this day, was postponed until Wednesday next, June 4, 1890, at 3 o'clock P. M.

The hearing of the charges preferred by the Chief Engineer against Inspector of Masonry Edward O'Shea was then taken up.

O'Shea was then taken up. O'Shea was then taken up.

The Secretary then read said charges; whereupon Mr. Meyer S. Schloss, as attorney for said Edward O'Shea, filed a written answer to the same, and also a certificate of C. R. Ellison, Medical Doctor, stating that said O'Shea was unable to perform duty between May 5 and 8, 1890.

Patrick G. Moynihan, an Inspector of Masonry, was sworn and examined at length in substantiation of said charges, and the evidence recorded by the Stenographer.

No evidence was offered on the part of said Edward O'Shea; whereupon, on motion of Commissioner Scott, the hearing was closed, and the evidence taken ordered reduced to writing and submitted to the Construction or Executive Committee.

TO THE PEOPLE OF THE CITY OF NEW
York:

It becomes my duty as Commissioner of Public Works and custodian of the many and immense interests involved in the City's water supply, to briefly present to the people of the City the present condition of the supply, and the extreme necessity for care and economy in the use of the water.

For a number of years past and up to the present time, the old Aqueduct and the Bronx river conduit have delivered in the City all the water which they are capable of carrying, the supply thus remaining stationary when the City has been constantly growing in population, buildings, manufactures and commerce, creating new and additional demands upon the water service. The consequence is that at certain seasons of the year, notably in extreme cold weather, when the habit of wasting water from faucets to prevent freezing in the pipes prevails, and in warm and dry weather, when various methods of waste are in vogue, the daily consumption exceeds the supply which can by any possibility be received through the old Aqueduct and the Bronx river conduit, the excess of consumption being drawn from the city reservoirs, diminishing the depth of water and the pressure in the distributing mains. There is no possibility of increasing the water supply received in the City until the new Aqueduct is brought into operation, and in the meantime the only reliance for a fair and equal distribution of water throughout the city is care and economy in its use on the part of the people. Already the depth of water in the reservoirs is being diminished at the rate of one inch per day, and if this should continue for any length of time, the pressure in the distributing mains would be so reduced that it would be impossible to deliver water in thousands of houses located on high ground, and in some other locations even in the basements or cellars.

I, therefore, most earn
