MUNICIPAL CIVIL SERVICE COMMISSION.

New York, October 1, 1903.

Hon. SETH LOW, Mayor of The City of New York:

Sir—In pursuance of the provisions of the New York Charter, the Municipal Civil Service Commission presents its report for the quarter ending September 30, 1903. The work which it has accomplished is shown in detail in the statistical tables hereto annexed.

The Commission has had an increasing demand made upon it for examinations and the establishment of eligible lists. It finds that it is not possible to cope with the situation and furnish the list actually asked for unless the examining force is largely augmented. This cannot be done unless the appropriation is substantially increased.

To illustrate the great demands made upon the Commission, we cite two cases—one with reference to the Police Department and the other with reference to the Fire Department. During 1902 about 4,000 persons applied for the position of Patrolman. Of that number 1,200 were found to be physically eligible, and on August 27 of that year we held a mental examination and subsequently established an eligible list containing 351 names. The list was exhausted almost immediately, and the Police Commissioner requested us to furnish him with an additional list of eligibles. We proceeded at once with a second examination, for which about 4,300 persons applied. The mental feature of the examination was held June 10, 1903, and the eligible list formed as a result contained 890 names. We are informed by the Police Commissioner that all of the persons whose names appear on this list will be appointed in the near future, and, therefore, in order that his work shall not be embarrassed, we are now holding a third examination. We hope to establish the next eligible list about the time that the present one is exhausted.

The Commission has just prepared an eligible list for the position of Fireman containing about 270 names, and on October 12 we shall proceed with a second examination. As soon as this is completed we shall begin a third, in order to meet the demands of the Fire Commissioner.

In addition to the foregoing, the tables which are a part of this report show the unprecedented demands that have been made upon us, and which justify the Commission in asking for an increased appropriation.

The Commission some time ago recognized the fact that the Examiners should be confined to their legitimate work and should not be required to perform monitor service. The full time of the Examiners has been devoted to the rating of papers and other persons have been more and more employed to act as Monitors. Up to the present time the Commission has been obliged to appoint Monitors under the provisions of Civil Service Rule 7, which authorizes temporary appointments in cases of emergency. The Commission will hold a competitive examination, however, on October 15 next to establish a list of Monitors, and 640 applications have already been received. The persons employed in this capacity up to the present time have been instructors and students in the universities, colleges and private schools in The City of New York. It is hoped that when the eligible list for Monitor is established it will be found to be made up of candidates of equally high standard.

Our previous reports have dealt with the difficulty experienced in carrying out the provisions of section 1543 of the Charter. Many conferences have been held with the heads of departments, and, with the assistance of the opinion of the Corporation Counsel rendered August 21 last, the difficulties are being solved. The Corporation Counsel holds that in a case where a person is retained without compensation for a continued period the question whether his services have been dispensed with, within the meaning of section 1543, becomes one of fact for the determination of the Civil Service Commission, and that the department must furnish the Commission with the name of each of such persons, together with a statement of the facts in each case. The Commission must determine what constitutes a "continued period" and decide whether the employee affected can be reassigned to work at the pleasure of the department or whether his name must be placed upon the preferred list formed pursuant to section 1543, from which it can be rectified in the manner provided by that section. This was the position taken by the Commission. As a result of the opinion of the Corporation Counsel and our conferences with the heads of departments, the following plan is being followed: Any person who is retained in the service without compensation for thirty days is assumed to be within the provisions of the section, and his name is placed upon the preferred list, unless otherwise ordered by the Commission. In case the name of a person is replaced upon a payroll after having been omitted for a period of thirty days or more, a letter of explanation is forwarded with the payroll and the Commission determines the fact whether the name legitimately appears upon the payroll.

The Corporation Counsel also rendered three other interesting opinions, one concerning promotions (advising the Commission that the rules that control as to promotions are the rules in force at the time at which promotions are to be made, irrespective of what may have been the rules at the time of the appointment of the officer or subordinate who seeks promotion); another relating to the transfer of veterans under the provisions of section 21 of the Civil Service Law (advising the Commission that a

transfer made under this section is a matter of discretion with the Commission, whether or not transfer should be made under section 15 of the Civil Service Law and Civil Service Rule 40. After it is ascertained that the examination for the position held by the person to be transferred is essentially different from that of the position to which transfer is to be made, it would appear that the only way in which a person could gain his transfer is to secure a place upon the eligible list for the position to which transfer is sought; and to a third, relating to the power of a head of a department to reinstate a person who has been dismissed for cause (advising the Commission that where a Commissioner making a dismissal acts judicially he cannot sit and review his own action, and once having ordered removal has no authority to reconsider his own action. In case the action of the Commissioner is ministerial, the removal is an act of mere discretion, and in such case the action based on such discretion may be changed, and where a removal has once been ordered he may rescind the same and reinstate the employee, and in all such cases the department should communicate with the Municipal Civil Service Commission, setting forth the facts in the case).

The Commission has also been advised by the Corporation Counsel that under the provisions of chapter 606, Laws of 1902, the Brooklyn Public Library is no longer a municipal department, but a private corporation, and that the employees of that institution are therefore not subject to the Civil Service Law and the rules and regulations established thereunder. In all of these cases the Commission has been governed by the opinions of the Corporation Counsel and has carried out his recommendations.

Special care has been exercised in accepting applications for positions in the labor class from persons who claim to be citizens through naturalization. In these cases we have required the production of naturalization certificates, and these have been verified before the applications have been accepted. A number of these "certificates" have been found to be fraudulent, and in some cases genuine certificates have been presented by persons other than those to whom they were issued. The applications of those who are detected in attempting to deceive the Commission have been rejected, and the certificates produced by them referred to the United States authorities. In all about 150 papers have been confiscated by this Department.

Respectfully submitted,

WILLIS L. OGDEN, President.

BOROUGH OF BROOKLYN.

Sections 39 and 106 of the Plumbing Rules and Regulations of the Borough of Brooklyn are hereby amended to read:

Sec. 39. "All connections between lead pipes and between brass or copper pipes must be made by means of wiped solder joints, and all floor flanges of all sanitary fixtures and all connections between said fixtures and waste or soil pipes, where said connections are on outlet or sewer side of trap, shall be made without the use of red lead, putty, plaster, cement or any other similar substance."

Sec. 106. "All earthenware traps must have heavy brass floor plates, soldered to the lead bends, or, where brass or iron pipes are used, to be screwed to the same and bolted to the trap flange, and the joint to be made gas-tight without the use of red or white lead or any similar substance or rubber washers, the use of which, in the making of said connections, is hereby prohibited, and no device for such connections will be permitted to be used unless it has been approved by the Bureau of Buildings."

The Plumbing Rules and Regulations for the Borough of Brooklyn are hereby amended by adding the following sections:

PART XVI.

Gas Piping and Fixtures.

Sec. 161. Hereafter the gas piping and fixtures in all new buildings and all alterations and extensions made to the gas piping or fixtures in old buildings must be done in accordance with the following rules, which are made in accordance with the provisions of section 89 of the Building Code.

For additional requirements of public buildings, theatres and places of assembly, see Part XXI. of the Building Code.

Sec. 162. Before the construction or alteration of any gas piping in any building or part of any building, a permit must be obtained from the Superintendent of Buildings. This permit will be issued only to a registered plumber and in conjunction with the permit for plumbing and drainage. Application must include all floor plans complete, showing each and every outlet and the number of burners to go on each outlet. Small alterations may be made by notifying the Bureau of Buildings, using the same blank forms provided for alterations and repairs to plumbing.

Sec. 163. Before any fixtures are connected with the gas piping, a permit must be obtained from the Superintendent of Buildings, application for same to be made on forms furnished by the Bureau of Buildings.

Sec. 164. All gas pipe shall be of the best quality wrought iron and of the kind classed as standard pipe and shall weigh according to the following scale:

3/8-inch, 0.56 pounds per foot;
1/2-inch, 0.85 pounds per foot;

1-inch, 1.67 pounds per foot;
1 1/4-inch, 2.24 pounds per foot;
2-inch, 2.68 pounds per foot;
2 1/2-inch, 3.61 pounds per foot;
3-inch, 5.75 pounds per foot;
3 1/2-inch, 7.54 pounds per foot;

No pipe allowed of less than 3/8 inch in diameter.

Sec. 165. All fittings (excepting stop cocks or valves) shall be of malleable iron.

Sec. 166. There shall be a heavy brass straightway cock or valve on the service pipe immediately inside the front foundation wall.

Iron cocks or valves are not permitted.

Sec. 167. Where it is not impracticable so to do, all risers shall be left not more than five feet from front wall.

Sec. 168. No pipe shall be laid so as to support any weight (except fixtures) or be subjected to any strain whatsoever. All pipe shall be properly laid and fastened to prevent becoming trapped, and shall be laid, when practicable, above timbers or beams instead of beneath them. Where running lines or branches cross beams they must do so within thirty-six inches of the end of the beams, and in no case shall the said pipes be let into the beams more than two inches in depth. Any pipe laid in a cold or damp place shall be properly dripped, protected and painted with two coats of red lead and boiled oil or tarred.

Sec. 169. No gas pipe shall be laid in cement or concrete unless the pipe and channel in which it is placed are well covered with tar, nor within six inches of an electric wire, excepting where they immediately join outlets.

Sec. 170. All drops must be set plumb and securely fastened, each one having at least one soldered strap. Drops and outlets less than $\frac{3}{4}$ of an inch in diameter shall not be left more than one inch below plastering, centre-pieces or woodwork.

Sec. 171. All outlets and risers shall be left capped until covered by fixtures.

Sec. 172. No unions or running threads shall be permitted. Where necessary to cut out to repair leaks or make extensions, pipe shall be again put together with right and left couplings.

Sec. 173. No gasfitters' cement shall be used, except in putting fixtures together.

Sec. 174. All gas brackets and fixtures shall be placed so that the burners of same are not less than three feet below any ceiling or woodwork, unless the same is properly protected by a shield, in which case the distance shall not be less than eighteen inches.

No swinging or folding gas brackets shall be placed against any stud partition or woodwork.

No gas bracket on any lath and plaster partition or woodwork shall be less than five inches in length, measured from the burner to the plaster surface or woodwork.

Gas lights placed near window curtains or any other combustible material shall be protected by a proper shield.

Sec. 175. Gas outlets for burners shall not be placed under tanks, back of doors or within four feet of any meter.

Sec. 176. All buildings shall be piped according to the following scale:

Pipe $\frac{3}{8}$ inch, 26 feet, 3 burners;

Pipe $\frac{1}{2}$ inch, 36 feet, 6 burners;

Pipe $\frac{3}{4}$ inch, 60 feet, 20 burners;

Pipe 1 inch, 80 feet, 35 burners;

Pipe $1\frac{1}{4}$ inches, 110 feet, 60 burners;

Pipe $1\frac{1}{2}$ inches, 150 feet, 100 burners;

Pipe 2 inches, 200 feet, 200 burners;

Pipe $2\frac{1}{2}$ inches, 300 feet, 300 burners;

Pipe 3 inches, 450 feet, 450 burners;

Pipe $3\frac{1}{2}$ inches, 500 feet, 600 burners;

Pipe 4 inches, 600 feet, 750 burners.

Sec. 177. Outlets for gas ranges shall have a diameter not less than required for six burners, and all gas ranges and heaters shall have a straightway cock on service pipe.

Sec. 178. When brass piping is used on the outside of plastering or woodwork it shall be classed as fixtures.

Sec. 179. All brass tubing used for arms and stems of fixtures shall be at least No. 18 standard gauge and full size outside, so as to cut a full thread. All threads on brass pipe shall screw in at least 5-16 of an inch. All rope or square tubing shall be brazed or soldered into fittings and distributors, or have a nipple brazed into the tubing.

Sec. 180. All cast fittings, such as cocks, swing joints, double centres, nozzles, etc., shall be extra heavy brass. The plugs of all cocks must be ground to a smooth and true surface for their entire length, be free from sand-holes, have not less than $\frac{3}{4}$ of an inch bearing (except in cases of special design), have two flat sides on the end for the washer, and have two nuts instead of a tail screw. All stop pins to keys or cocks shall be screwed into place.

Sec. 181. After all piping is fitted and fastened and all outlets capped up, there must be applied by the plumber, in the presence of an Inspector of the Bureau of Buildings, a test with air to a pressure equal to a column of mercury 6 inches in height, and the same to stand for five minutes; only mercury gauge shall be used. No piping shall be covered up, nor shall any fixture, gas, heater or range, be connected thereto until a card showing the approval of this test has been issued by the Superintendent of Buildings. And, again, when all fixtures are hung, a similar test shall be applied in exactly the same manner, excepting that one burner fixture will be omitted to permit of applying a pump and gauge. On the Inspector's report of this test as above, a final approval card in duplicate will be issued by the Superintendent of Buildings.

Sec. 182. No meter will be set by any gas company until a certificate is filed with them from the Bureau of Buildings certifying that the gas pipes and fixtures comply with the foregoing rules.

Sec. 183. When for any reason, it may be impracticable to comply strictly with the foregoing rules, the Superintendent of Buildings shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the Superintendent of Buildings.

J. EDW. SWANSTROM, President of Borough of Brooklyn.

WILLIAM M. CALDER, Superintendent of Buildings, Borough of Brooklyn.

SEALED BIDS OR ESTIMATES WILL BE received by the Commissioner of Docks at Pier "A," foot of Battery place, in The City of New York, until 12 o'clock noon, on

THURSDAY, NOVEMBER 5, 1903.

for the right to dump and fill in behind the new bulkhead wall between the northerly side line of West One Hundred and Thirty-first street and the southerly side line of West One Hundred and Thirty-third street, on the North river, Borough of Manhattan, beginning at a point in the rear of the bulkhead wall near the northerly side of the pier at the foot of West One Hundred and Thirty-first street, North river; thence extending northerly along the rear of the bulkhead wall to the southerly side of West One Hundred and Thirty-third street; thence inshore or westerly along the southerly side of West One Hundred and Thirty-third street about 67 feet to the face of the old crib bulkhead thereat; thence extending southerly along the face of the old crib bulkhead to a point where said crib bulkhead intersects the bulkhead near the northerly side line of West One Hundred and Thirty-first street; thence extending westerly about 78 feet along said crib bulkhead, or close row piles, approximately along the northerly side of West One Hundred and Thirty-first street, to the point of beginning.

TERMS AND CONDITIONS OF SALE.

The filling will be put in to a height of about 5 feet or less above mean high-water mark over the above-described area.

The privilege to fill in the said described area will be sold to the highest bidder, one-half the price for such right or privilege must be paid at the time of sale and the remaining half when one-half of the work of filling in has been completed.

The total estimated quantity to be filled in is about 23,750 cubic yards, more or less. This total estimated quantity of 23,750 cubic yards is approximate only and is estimated without allowance for sinkage or settlement below the mud line. The Department is not bound in any way by such estimate, and bidders must satisfy themselves of the actual quantity required to fill in the above-described area by examination of the premises or such other means as they may prefer, the intention of the Department being to fill in the whole of the said premises behind the bulkhead wall, and no allowances will be made to the purchaser from the purchase price on account of any discrepancy which may be found between the above estimated quantity and the actual amount of filling required. The purchaser will be required to place the filling in accordance with the following specifications:

All the filling shall, unless otherwise directed, be placed directly in the rear of the bulkhead wall and carried from the bulkhead wall toward the shore until the bank of same has been carried out at the finished grade for a distance of about 40 feet from the face of the bulkhead wall, at which time, if so directed by the Engineer, the filling may be commenced from the shore toward the crib.

All material must be dumped and filled in only in such manner, at such points and in such order or procedure and at such times and seasons as may, from time to time, be directed, and the work of filling in may be entirely suspended for such periods of time as may be directed. The purchaser shall have no claim for damage or for any allowance from the purchase money on account of such suspension of the work.

All directions shall be given by the Engineer, and whenever the word "Engineer" is used in these specifications it refers to and designates the Engineer-in-Chief of the Department of Docks and Ferries, or such officer or employee as may be designated by him.

Rip-rap stone coming directly on or against the bulkhead wall must be deposited carefully in such manner as will not injure the same.

All the filling, except as otherwise specified herein, shall be of ashes, cellar dirt, broken stone, etc., entirely free from garbage or any organic matter objectionable in the opinion of the Engineer.

At any section of the bulkhead wall the filling shall be brought up level with the top of the coping at such section, and no higher, unless otherwise directed, and will be placed at such grade at its inshore end as may be directed by the Engineer.

The filling shall be commenced within five days after the date of the receipt of a notification from the Engineer that the work, or any part of it, is ready to be begun, and shall be completed within one hundred and fifty days from the date of the receipt of said notification. If at any time during the progress of the work it shall be deemed necessary to order the suspension of the whole or any part of the filling by the reason of the non-completion of the bulkhead wall, or for any other cause that the Commissioner of Docks may deem fit and proper, the time for the completion of said filling shall be extended so much as it may have been delayed by such suspension.

In case the purchaser at any time does not proceed with the work of filling in to the satisfaction of the Commissioner of Docks, the said Commissioner may at once terminate the privilege of filling in and proceed to have the remainder of the filling in done by other parties in such way and manner as he deems proper.

The purchaser shall, during the work of filling in and at all times until the completion thereof, take all necessary precautions and place proper guards for the prevention of accidents, and put up and maintain at night sufficient lights, and he shall indemnify and save harmless The City of New York from all damages and costs to which it may be put by reason of injury to the person or property of another resulting from negligence or carelessness in the performance of the work or guarding the same.

No bid or estimate will be considered unless accompanied by a certified check drawn to the order of the Commissioner of Docks, or money to the amount of twenty-five per centum of the amount of the bid, which amount shall be applied in the case of the successful bidder to the first one-quarter of the amount of the filling to be deposited; twenty-five per centum to be paid when the first one-quarter of filling has been completed; twenty-five per centum additional when one-half the filling has been completed, and the balance, twenty-five per centum, when three-quarters of said filling has been completed.

The Commissioner reserves the right to reject all bids or estimates if he shall deem it to be for the interest of the City so to do.

Dated THE CITY OF NEW YORK, October 1, 1903.
