The Borough of The Bronx consumes all the supply from the Bronx and Byram rivers, and also about twenty million gallons daily of Croton water delivered through the old aqueduct.

The new aqueduct was shut down and part of its contents blown off on the following days during the quarter: July 5, 12, 18, 28, August 6 and September 24. Rain fell at Croton Lake on twenty-nine days during the quarter.

While, since the beginning of last year, as stated in the first quarterly report and annual report for the same, the consumption of water was given in considerable detail and was based on careful computation from the best available data, I have still reason to think that the margin of error in the results could and should be considerably reduced by improved methods, and I am at present at work to make the necessary arrangements to secure much closer approximations.

The analyses of the various distributing reservoirs for the Borough of Manhattan show an increase in turbidity, free ammonia, microscopic organisms and bacteria over the corresponding quarter for last year. This increase is due partly to meteorological conditions and partly to an increase in the shallow flowage above Croton lake. From a sanitary standpoint, however, the general condition of the water has been practically the same as that supplied during the corresponding quarter for 1905.

The water supplied to the Borough of The Bronx has also shown an increase in turbidity and microscopic growths, due to the presence of such growths in Kensico Reservoir and Rye pond. The deterioration in the physical condition of the water has been entirely due to the unusual weather conditions, but throughout the quarter the water has been perfectly safe for drinking purposes.

On August 1, 1906, a new company, known as Repair Company No. 8, Martin Gleason, Foreman, was organized and made the first report to this office on August 8, 1906.

Of the hydrants found improperly closed and which the men of the repair companies, after examination, have closed properly, about 25 per cent. of the total amount occurred in district of Company No. 5 (Melrose, Harlem river to Burnside avenue and Tremont avenue, Borough of The Bronx), and although the Police have been notified to arrest persons opening hydrants without the customary permit from The Bronx borough office, the opening of hydrants in that vicinity seems to have increased instead of diminished.

BOROUGH OF QUEENS.

During the quarter no complaints were received regarding inadequate supply in the First Ward, although during summer months pressures were considerably reduced, requiring increased supply from the Bowery Bay Building and Improvement Company for fire protection.

In the Third Ward the supply is at present sufficient, but due consideration should be given to future needs. It is desirable that steps be taken by the City to acquire title to the uplands adjacent to the ponds near Bayside Pumping Station, so that the water in these ponds may be protected from contamination, and utilized as a supply after being filtered by means of infiltration galleries or other method. The full yield at the Flushing Pumping Station is being utilized at present; a greater yield may be secured by driving additional large wells to a depth varying between 100 and 125 feet.

The contract of D'Ambra & Tuccillo for laying of mains in the First Ward is progressing satisfactorily and nearing completion. Plans are being prepared for laying additional mains in this ward. All necessary preparations have been made to carry out contract for which bids were submitted on the 26th, and work may proceed as soon as possible.

Plans are being prepared for an increased distribution service in the Third Ward, and if same is carried to completion will prove of much benefit in supplying the demand of a greatly increased service.

Action in the matter of installing a 20-inch supply main from the Bayside Pumping Station to connect with present main at Cemetery Lane and Broadway, supplementing the present 12-inch main, has been postponed until an increased yield is assured from this point, or until the water in Oakland Lake is utilized as a supply after filtration. In the plans being prepared for the Third Ward provision has been made for continuing the present 12-inch line from Orient avenue to City line, to supplement existing 6-inch line.

It is very desirable that the present submerged 12-inch flexible joint main crossing Little Neck creek be relaid; plans for same have already been prepared.

Miscellaneous—Men at work at corporation yard, pumping stations, taking samples of water, operating valves, making soundings, carting material, investigating leaks, repairing private service lines, shutting off and turning on water in new pipe lines, serving notices of shut offs.

BOROUGH OF RICHMOND.

During the quarter examinations and reports have been made on six applications of the Fire Department for new mains and hydrants, and examinations and reports have also been made on a number of applications by the various private companies operating in the Borough of Richmond, for permission to make extensions to their systems.

Permission having been given to Milliken Brothers to construct a temporary trolley line in Western avenue, and also to lay suction mains from the bay to their plant, after the matter had been examined and reported on by this Department, we have supervised and inspected the laying and construction of the same in accordance with the clause inserted by the Board of Estimate and Apportionment in the permit. A permit with a similar provision was issued to the Staten Island Electric Railway Company and their work has also been inspected.

Plans and specifications have been prepared for the laying of forty-nine thousand eight hundred and two (49,802) linear feet of water main, ranging in size from eight to sixteen inches in diameter. As the entire force in the Borough of Richmond consists of three men, a large portion of their time during the quarter was taken up with the preliminary surveys and the preparation of the plans in connection with this proposed extension. The specifications are now in the hands of the printer and the plans are completed, so that it will be possible to advertise the work in a very short time. One hundred and seven (107) new hydrants and one hundred and thirty-two (132) new gate valves have been provided for in connection with the same.

MECHANICAL DIVISION.

BOROUGH OF MANHATTAN AND THE BRONX.

Ninety-eighth Street Pumping Station.

On No. 1 engine, during the past quarter, slight repairs were made to the following extent:

The drain pipe fittings and valves on the water end were thoroughly overhauled and renewed where necessary, and the check valve on the discharge main was repaired. The water end of this pump was entirely overhauled and the old studs in the cylinder head were replaced by new ones. Holes were drilled in the air chamber and a water column mounted. New sections were placed in the steam line of No. 1 engine, the old pipe being in a very poor and leaky condition at the joints.

No. 2 engine received a new jacket pipe and new sections were also put in the steam line of this pump. The T from which the steam line of No. 2 pump branched from the main line was calked and provided with a clamp in order to repair a leak. New studs for the cylinder head on the water end were put in place, it being necessary to drill out the old studs and tap the holes. A water column was mounted on the air chamber and the gate valves on the suction and discharge line were overhauled.

The jacket pipe on No. 3 engine was renewed and new unions were used, and the drain pipe from the stuffing box was replaced with a new one. A spanner wrench was made to order to fit the valves on the water end of this pump. This engine was also provided with an indicator reducing motion, and, as in the case of the other two engines, the old cylinder head studs were replaced with new ones. New joints were made in the steam jacket return line and a new bearing was provided for the compensating cylinder on the left hand side.

Further repairs were made in this station by the renewal of the exhaust line from the air compressor to the feed water heater, and the drain from the feed water heater was repaired. A new auxiliary exhaust line to the feed water heaters was put in, providing steam from the exhaust of the feed pumps. The pipe and fittings on the oil pump in the oil room were overhauled.

In the fire-room new hangers were put in place for the main steam line, and the low-pressure steam line was repaired. The stop valve for the by-pass between the main steam and the low pressure line was overhauled, and the stop valve on the latter line was also ground and renewed.

A storeroom will be built in the Ninety-seventh street end of the coal house for the accommodation of small supplies, and the placing of two manholes for ventilation in the Ninety-eighth street area is contemplated.

One Hundred and Seventy-ninth Street Pumping Station.

In this station during the past quarter new joints were made in the separator piping on No. 2 engine and the piping from the high pressure jacket to the separator was repaired. New joints were made in the steam line of No. 1 engine and the steam line to the Blake engines was calked. Engines 1, 3 and 4 were provided with new brackets and shafts for the valve gear.

In the boiler-room new tubes were placed in No. 1 boiler and the steam line was repaired, the old line being in very poor condition. In making these repairs to the main steam line, new lengths of pipe and new valves were supplied, thus giving practically a new line. In order to connect up the new line it was necessary to shut down the low service pumps for a short time, and the Worthington pump in the High Bridge station was used to keep up the level in the reservoir.

Plans are being prepared for adjustable ventilators on the present monitors on the engine-room roof. It is also proposed to provide this station with an iron and glass office for the use of the Engineman in charge, and a complete new steam line will soon be installed in the engine-room.

The roof over the engine room in this station will require attention within a short time.

High Bridge Pumping Station.

This station has not been in regular service during the last quarter. Pumping has been done only to try the Worthington pump after the repairs had been made, and in helping out the One Hundred and Seventy-ninth Street Station when it was necessary to shut down. The steam radiators in this station are split from freezing. Provision has been made already to overhaul and completely repair the steam heating plant.

Jerome Avenue Pumping Station.

No extensive repairs were made in this station during the past quarter. In July a leak was repaired in the high pressure cylinder head and the bearings of the rock shaft of No. 2 engine were repaired. Later the jacket pumps were repaired and new

keys were fitted to the rock shaft of the air pump of No. 3 engine. A leak developed in the steam line in the engine room, but not of a serious nature. This leak was repaired in August. A complete new steam line will be installed in the engine room within a short time; the contract for this work is let and a partial delivery of the material has been made.

A crack about eight inches long appeared in the flange of the lower casting of the water cylinder of No. 2 Worthington pumping engine. This crack is in what is apparently the strongest part of the pump. It passes through one bolt hole and through the entire flange extending down six inches below the flange. Repairs are now nearly completed on this casting, the patch being ready to bolt on the inside of the lower, or discharge, chamber of the pump cylinder.

Reference has already been made to plans now under preparation to provide adjustable ventilators on the present monitors on the engine room roof.

BOROUGH OF QUEENS.

First Ward—Pumping Station No. 1.

No. 1 engine and the feed pumps were repacked on both the steam and water ends, but owing to a broken nut on the stuffing box it was necessary to shut down No. 1 engine on July 26. No. 2 engine, which was started up at that time, has been in service since.

A new steam line was connected up to a drainage pump in the cellar under the engine room.

The boilers were cleaned thoroughly, and all scale removed, the drums and combustion chambers also receiving careful attention. The boilers were run alternately while this work was being done.

The only repair work at present required in this station is the replacement of the broken nut above referred to and the renewal of one of the guides on the vacuum pump of No. 1 engine.

First Ward, Pumping Station No. 2.

The new No. 2 station is now ready for service and will be in operation as soon as the wells are properly cleaned. The old boiler which was removed from Whitestone and set in the new station was tested up to 176 pounds and no leaks developed.

The work done on the station and the expenditures are here given:

		\$5,510 00

The contractor was unable to finish work on the 16-foot well, owing to the large quantity of water he had to handle, until he could provide himself with a pump of large capacity. The work of cleaning this well consists practically of redigging it, the well being filled with bricks from the walls of the old station, which was destroyed by an explosion.

Third Ward, Pumping Station No. 3.

This station is in good condition at the present time and the recent repairs were not very extensive. In addition to thoroughly cleaning the boilers, including the drums and combustion chambers, the feed water heater was cleaned each week and a new automatic valve attached. A wooden casing was constructed around the lagging of No. 2 engine and varnished. The engine room floor was also cleaned and varnished. The boiler setting was repaired and pointed up and all piping in the boiler room was painted. The steam packing rings of the feed pump were repaired.

Third Ward, Flushing Pumping Station.

As in the other stations the boilers in the Flushing station were cleaned and freed from scale. This station was wired for twenty-two incandescent lights, the power to be obtained from the public service. The cost of the equipment was \$329. Twenty new grate bars were used to replace old ones, and a number of new fire hose and blades were purchased.

The steam piping on the high pressure side of engine No. 1 was renewed, and also the piping to the siphon under the floor.

Third Ward, Bayside Pumping Station.

The work of renewal and repair in the Bayside station during the last quarter consisted in fitting a new disc to and reseating the stop valve on the Holly engine, replacing twenty grate bars and six front bars. Owing to delay in the delivery of the grate bars the boilers could not be changed over for the purpose of cleaning. The boiler room doors were refitted, and the door jams made tight. This work was done by the Department employees. This station is reported to be in excellent condition.

BOROUGH OF RICHMOND.

Tottenville Pumping Station.

The repairs done at this station during the past quarter were very slight and were done by the men in the station. A considerable amount of work will be necessary to bring this station into good shape. The rods on well pumps Nos. 3, 5, 6, 7 and 8 will have to be taken out and new packing put on the valves. No. 3 well needs flushing and cleaning and pipe covering is required on the steam line to the well pumps.

The area included between Eleventh and Twenty-third streets and Seventh avenue and Broadway was nearly completed at the end of the quarter, and it is intended to use that portion of the high-pressure fire system as a low pressure system, in anticipation of the completion of the high-pressure fire stations, thus making immediately available for fire protection not less than 150 hydrants of the most approved and modern type, and over 20,000 feet of mains, from which no water would be drawn for domestic purposes, so that the full pressure will be at all times available for fire protection. For this purpose a temporary connection between the high pressure fire main on Fifth avenue and the low pressure main on the same avenue will be made. The district thereby protected is an important dry goods section, so that the additional protection should have high practical value.

High-Pressure Pumping Stations.

The following contracts were entered into during the quarter:

Suction Mains—

The Continental Asphalt Paving Company being the low bidder for this work, was awarded the contract on August 21, 1906. This contract included the suction mains and appurtenances for the station at Oliver and South streets, and the station at Gansevoort and West streets.

Pumping Station Buildings—

The contracts for building the pumping station buildings at Oliver and South Streets and at Gansevoort and West streets were awarded on September 11, 1906, to T. Cockerill & Sons.

The contracts for the plumbing and gas fitting for these buildings were awarded on September 17, to Frank J. Fee.

Filtration.

The office force have been almost continuously employed in making detail contract plans for that part of the plant to be built first, i. e., the concrete work of eight clear water reservoirs and for forty-two filter beds and appurtenances, such as galleries and conduits. This work is nearly completed.

Plans and specifications have been prepared and a contract made for the construction of an experimental station at the southern end of Jerome Park Reservoir. This station is for the purpose of settling certain questions in regard to the removal of color from the Croton water, and also to test two new and promising methods of washing filter sand, both of which indicate a material reduction in maintenance expenses, and one of which has been successfully in use, on a small scale, in the Brooklyn filter plants. The contract for this work was awarded to Leslie McHarg & Co. on September 25.

The tests relating to the removal of color, which we had begun at the Brooklyn filtering plants, with the aid of Mr. D. Jackson, who has charge of our Mt. Prospect laboratory, during the last quarter, were discontinued on August 21, as the station was needed for the regular work of the department. These tests will be prosecuted at the next experimental station when it goes into commission.

Arrangements were made with the United Water Improvement Company to erect an experimental station adjoining ours at Jerome Park, in order to allow this department to ascertain the merits of the Ozone Purification System, cost of operation and all other matters relating thereto. The cost of installation, maintenance, operation and removal of this experimental station is to be exclusively defrayed by the United Water Improvement Company, and it is specifically provided that in agreeing to the installation and operation of this plant the City in no way binds itself to adopt the Ozone Purification System, whatever the results of the tests may be, nor incur any liability towards the company.

Force and Office Room.

We have experienced great difficulty in securing additional force and in retaining the good men now in our employ, owing to the greater pay which these men can

obtain elsewhere, especially with the Board of Water Supply, who are much less restricted than we are in the matter of salaries, and also owing to the provision of the Charter under which we cannot appoint as Assistant Engineer in this department any candidate who has not had ten years' practical experience. No such requirement is needed in other departments of the City, nor in those of the Aqueduct Commissioners or Board of Water Supply, which do similar work, and we thus have here an anomalous situation of being unable to appoint as Assistant Engineers men of proved competence who have been for years faithfully discharging the duties of Assistant Engineer, and who, by a simple transfer, can secure the appointment we unjustly withhold from them. It seems obvious that a modification of this provision would be of great advantage to the department, which is now seriously handicapped in its work by the requirements it imposes.

We have not yet secured the additional office space required to conduct our work properly, and our force is not only crowded into the rooms they occupy, but is divided in two floors, the ninth and the fifteenth, with the obvious resulting inconvenience and loss of time. It is expected that arrangements will soon be completed to install the whole engineering force either on the fifteenth or on the ninth floor, as outlined in a previous report.

Yours respectfully,

I. M. DEVARONA, Chief Engineer.

DOCUMENT NO. 3.

Owing to an abnormal increase in the daily consumption of water in this borough on June 28 over that of June 25, 1906 (the increase amounting to 17,417,000 gallons), a letter was addressed to you by the former Chief Engineer, under date of June 28, 1906, recommending that a contract for four engines and four boilers for two temporary pumping stations be not advertised, but that to take the place of said engines and boilers the Board of Aldermen be immediately requested to authorize the expenditure of an amount of money not to exceed \$60,000, without the formality of public letting, for the construction of emergency stations. As yet the resolution has not been adopted by the Board of Aldermen.

Expecting that the resolution would be adopted, pumping engines, boilers, well-points, etc., were obtained for five proposed pumping stations, and the erection of said stations and the installation of the machinery and boilers was begun.

It was estimated that about 15,000,000 gallons of water per day additional was to be added to the supply by installing the new emergency plants. The greater amount, if not the whole of this additional increase in the supply could have been more expeditiously and economically obtained by from time to time sinking and connecting additional wells at several of the existing pumping stations where there are pumping capacities considerably in excess of the yield from the wells, and by cleaning and repairing existing wells at many of the stations than by obtaining the additional supply from the proposed stations, and had their been a sufficient number of properly organized and equipped well gangs in the service, those additional wells could have been installed by the department force in a short time and the old wells cleaned and repaired, and the necessity for calling for the adoption of the above-named resolution could have been avoided; but, unfortunately, it appears that the well branch of the service has not received attention commensurate with its importance.

Pending the planning and execution of the work of installing a system of supply calculated to collect all the available waters in the saturated sands and gravel above and below the blue clay stratum, and a minimum number of tubular wells, and pump the water direct into distribution reservoirs from highly economical plants, it is my intention to recommend that provision be made in next year's Budget for the necessary number of men with whom to establish properly organized well gangs under intelligent direction to systematically clean and repair existing wells and connections and to sink and connect additional wells to keep pace with the constantly increasing demands for more water.

During the quarter improvements to the existing driven well plants, the starting up one new station, a moderate rainfall and the careful management of the supply and distribution systems, we were enabled to get and maintain the height of water in the distribution reservoir normal, and higher than it has been for some years past.

Negotiations have been started looking towards an increase in supply from the temporary stations along the line of the Massapequa infiltration gallery, and from emergency line stations now building and those proposed to be built; also from stations to be built within the borough limits.

It was expected that the supply from the Massapequa infiltration gallery would have increased materially by this time the total supply for the borough, but owing to various causes the contractor has made very slow progress on this gallery, and during the quarter the total amount of pipe laid was 1,430 feet of 36-inch pipe on the west line of the gallery and 1,039 feet of double line of 33-inch pipe laid on the east line of the gallery.

A pumping plant was erected by the City near Seaford, to utilize the supply which might be obtained from approximately 1,300 feet of gallery which had been laid at the west end of the line. This station was started on August 23, and has since been furnishing between three and one-half and four million gallons daily.

On the Wantagh gallery the west leg has been completed, and the east leg has been laid up to Station 5 + 60, the total amount of pipe laid on both legs during the quarter amounting to 2,073 feet. This gallery has yielded an average of over thirteen million gallons daily during the entire quarter, but the yield is reducing on account of the low rainfall.

On March 28 of this year an agreement was made by and between The City of New York and Silas W. Titus, of No. 662 Carroll street, Borough of Brooklyn, to clean and remodel the twenty-one (21) deep wells then in use at the Jameco Pumping Station, install an air lift system, develop the wells to their full extent and to deliver the water into the conduit. At the time Mr. Titus took charge of the wells the total yield from them was about one million eight hundred thousand gallons per day of twenty-four hours; at the end of the quarter Mr. Titus was delivering into the conduit about five million four hundred thousand gallons per day.

In addition to the deep well development mentioned above a contract was made calling for the sinking of wells at the Spring Creek, Aqueduct, St. Albans, Rosedale, Forest Stream, Clear Stream, Wantagh and Massapequa Pumping Stations.

As the water obtained from these wells will not probably interfere with the shallow well supply, any water obtained would be a net gain in the supply, whereas any development of the supply obtained from the saturated sands above the clay bed in the vicinity of surface streams or ponds reduces the surface yield. Therefore the yield of stations like Wantagh and Massapequa Galleries does not represent an increase in the supply equal to the yield of the stations. This is strikingly shown by the reduced gravity supply of the new watershed during this summer, this supply falling as low as eight million gallons at a time.

A temporary plant connected to the new driven well line at the New Lots Pumping Station was started at the beginning of the quarter and a supply of approximately two million gallons per day is being derived from this source.

Early in the quarter typhoid cases were discovered on the Kossel Farm, located on the Jerusalem Turnpike, just east of the east branch of our East Meadow stream. Immediate steps were taken to prevent the pollution of the water, and the supply from East Meadow was turned off and allowed to waste from July 29 to September 15, during which time no water was taken from this source of supply into the conduit.

The total waste from all the ponds on the old and new watershed during the quarter was as follows:

	July.	August.	September.	Total.
Baisleys.....	69,144,500	69,144,500
Springfield.....	4,008,300	4,008,300

Watts.....	20,570,000	20,570,000
Smiths.....
Milburn.....
East Meadow.....	273,990,000	88,388,000	362,378,000
New Bridge.....
Wantagh.....	9,243,000	9,243,000
Massapequa.....	16,790,000	16,790,000
Total.....	126,460,800	273,990,000	88,388,000	488,838,800

Practically all the waste during the quarter was due to the shutting down of the filter plants for various causes, the run-off of the streams being utilized where the water was not filtered; * * *

* * * with the exception of the East Meadow stream, where the waste was due to the pollution of the water referred to above.

The analyses made of the water during the quarter showed the supply to be in excellent condition, and a general improvement over the supply last year.

Distribution System.

The distribution system has been extended in the outlying districts as rapidly as we were able to obtain material from the foundries.

The work of laying the trunk distribution main through Fort Hamilton avenue, under the contract with the Isaac Harris Company was delayed on account of a strike at the valve works, and the main is not as yet completed.

The work of relaying the mains on Wythe avenue and on some of the adjoining streets between Flushing avenue and North Twelfth street has been practically completed and it is expected that tests made in the district will show an ample supply of water available for fire purposes.

The contract for setting additional hydrants on the 20 and 30-inch mains in the borough has been completed, thus greatly increasing the supply of water available for fire purposes along the lines of these mains. This contract provided for only about half of the hydrants required for all the 20 and 30-inch mains in the borough, and an additional contract will be made as soon as the money is available.

The general work of repairing and caring for the distribution mains and their appurtenances has been carried on, but the lack of men makes it impossible to do all the work that is necessary to efficiently look after the system.

The table attached hereto gives in detail the work done in laying mains and setting gates and hydrants during this quarter.

Throughout the distribution system I find that there are numerous cases where mains are not cross-connected and where they are too small for furnishing an adequate supply to fire hydrants, and that certain important districts are inadequately provided for with main feeders; also that a great number of the hydrants are in need of repairs, and that a number of gates on the large trunk mains are inoperative; also that a number of important main lines have no hydrants connected to same.

With the force of men available, the work of repairing the hydrants and defective gates and eliminating dead ends where possible and also cutting in hydrants, progress

must necessarily be slow, and it is hoped that the force may be materially increased during the coming year, and also that the necessary contracts may be entered into to bring the distribution system much nearer to a standard of perfection.

Water Waste Investigation.

The work on the water waste investigation was recommended early in July, and was carried on for four weeks. During this period the inspecting force varied from 16 to 20 and the number of premises examined were 8,500.

The result of the inspection was as follows:

Summary.

District bounded by State street, Hoyt street, Gowanus Canal and East river:

Area, square miles	1.4
Premises inspected	8,500
Leaks found	4,100
Total leakage per day, gallons.....	815,000
Average leakage per defective tap per day, gallons.....	200

Work of Inspection Begun July 2, 1906; Completed July 31, 1906.

Number of Inspectors employed.....	16
Time consumed, working days	25
Average number of premises inspected per day per man.....	21

The good results obtained are very apparent, and I would recommend the appointment of twenty (20) or more Water Waste and Meter Inspectors to be placed under the direction of some assistant in this bureau, whose duty it would be to see that the work of inspection is systematically carried out and properly performed, and where defective plumbing fixtures are found, to see that same are promptly and properly repaired. The cost and expense to the City of this inspection would be amply compensated for by the great saving in the City's water.

Next to metering all premises where City water is used, this house to house inspection and the enforcement of repairs to defective fixtures is the most effective means of checking the waste, and unless authority be obtained to apply meters generally, there should at all times be a systematic inspection system in vogue.

HIGH-PRESSURE FIRE SERVICE STATIONS.

Coney Island System.

At the Coney Island Station a fence has been erected around the portion of the property near the station, and the surrounding grounds have been graded and a top dressing of soil placed and seeded. The station was operated on four alarms for fires in July, none during August and two during September.

There were 3,285,000 gallons of water pumped by the plant, of which slightly less than ten (10) per cent was used for fire purposes, the additional being pumped for the purpose of testing the plant.

Main System.

The work of installing the mains, hydrants and appurtenances in the river front, office building and dry goods districts has materially progressed during the quarter, and it is expected that all of the mains will be completed before the end of the next quarter. The hydrants have all been delivered, with the exception of the fireboat hydrants, which were delayed on account of the question as to the form of nozzle to be used. This question has been settled by the contractor supplying swivel connections for the fireboats and nozzles for the hydrants. The pumps, motors and appurtenances for the high-pressure fire service stations are being constructed, but the work on the buildings has been delayed, and while bids for these stations were received, the contractor has not yet been ordered to begin work.

It has been impossible to make satisfactory arrangements for the salt water suction main as yet, and no progress has therefore been made in the work of preparing and letting this contract.

Plans, specifications and estimates are being prepared to extend this system into the Eastern District and Greenpoint section and along the Gowanus Canal. A request will be made for the necessary appropriation to thus extend the system so that these sections of the borough can obtain the benefits from increased fire protection and reduced fire rates.

Pumping Stations.

The pumping at the Ridgewood Station has been equal to the full capacity of the station, without leaving any adequate reserve for emergencies, and it has been impossible to shut down pumps except for pressing repairs.

The pumps have been operated so continuously that the slip has materially increased, and in the case of the Davidson pumps it is expected that tests which are now being made will show a large percentage of slip. New plungers have already been ordered for the water ends of these pumps, and they will be inserted as soon as possible.

The work of remodeling the Gravesend Pumping Station has been carried on, but the failure of the concern that was to furnish the boilers has seriously retarded the completion of this work.

At the New Lots Station the installation of the new pumps has gone on slowly, the rest of the work being practically completed. A temporary plant at this station has been operated for the entire quarter and has added materially to the supply.

In connection with the pumping stations, I beg to report that upon my assuming charge of this bureau I found most of the pumping plants and their surroundings in almost a deplorable condition, particularly the machinery and boilers in the Ridgewood Station. All of the temporary stations are of frame construction, and none of the stations are provided with fire fighting apparatus of any description, not even fire hose, and the machinery and boilers in most of the stations were in a very bad state of repairs and the boilers in sore need of cleaning; the machinery and boilers in most instances are of a very uneconomical type. In connection with these pumping stations, a matter of the utmost importance to this department, is the lack of proper means of knowing or ascertaining the quantities of coal delivered to the various stations, and whether or not the department receives the coal which is paid for by the city. Also there appears to have been no records kept for many years past of the duties and cost of pumping at the various stations. Under the reorganization contemplated in this branch of the bureau these important records will be regularly worked up and reported quarterly.

To bring these stations up to the proper standard of efficiency will entail a great deal of time and expense.

Line stations have been operated almost continuously with such repairs as we were enabled to make from time to time.

Additional Steel Conduit Line.

The work was continued on the contract for laying the 72-inch steel conduit line, by T. A. Gillespie, contractors, and fair progress made during the summer. Delays in removing the buildings on the property purchased by the city interfered somewhat with the progress of the work, and also difficulty with the Long Island Railroad Company over the crossing at Aqueduct. These obstacles have all been removed, and there is no reason why the work should not make rapid progress from now until cold weather stops further pipe laying.

Surveys have been continued east of Clear Stream so as to definitely locate the line of the proposed extension of the pipe line, and as soon as these surveys are completed maps will be forwarded, showing the land to be acquired.

Ponds, Conduits and Reservoirs.

The usual work of patrolling the ponds and streams and protecting the supply from pollution has been carried out during the quarter.

The following schedule gives a summary of the work done on cleaning closets and cesspools to prevent surface pollution of the supplies:

Near Foster's Meadow Stream.....	443
Near Springfield Stream	723
Near Valley Stream and Pines Brook.....	296
Near Millburn Stream and Schodack Brook.....	237
Near Wantagh and East Meadow Streams.....	299
Near Hempstead	2,560
Along Conduit Line	1,043

The total cost of this work during the quarter was \$1,204.35.

Water Analyses.

During the quarter there have been 1,552 samples of water for the Brooklyn supply analyzed. The following miscellaneous analyses have been made:

Cement	13
Coal	19
Oil	6
Sand	1
Paint	8
Special tests and experiments.....	10

The average condition of the water supply during the quarter was as follows:

Locality.	Turbidity.	Color.	Albuminoid Ammonia.	Free Ammonia.	Chlorine.	Micro-organisms.	Bacteria.
Ridgewood—							
Average influx.....	4	13	.031	.015	9.0	56	301
Basin 1, efflux.....	4	11	.047	.013	184	210
Basin 2, efflux.....	4	11	.058	.012	723	400
Basin 3, efflux.....	5	12	.057	.013	2,053	535
Mount Prospect Reservoir....	4	7	.113	.020	9.8	2,025	103
Average taps.....	4	11	.046	.005	859	175

The general condition of the supply shows an improvement over the corresponding quarter for last year, which would naturally be expected from the increased percentage of driven well water being obtained this year.

Contracts.

The following contracts were prepared and forwarded during the quarter:

July 5—For unloading, hauling, storing and trimming semi-bituminous coal required for the Millburn Pumping Station.

July 9—For furnishing centrifugal pumps and engines.

July 24—For hauling and laying water mains and appurtenances in the Borough of Brooklyn.

July 24—For furnishing and delivering cast iron pipe and special castings.

July 25—For furnishing and delivering cast iron flanged pipe, special castings, etc.

August 1—For furnishing and delivering double-nozzle hydrants.

August 24—For furnishing, delivering and laying water mains and removing existing water mains in Flushing, Franklin, Marcy, Metropolitan, Myrtle, Nostrand avenues, etc.

The following are the contracts for which bids were received, together with the names of the lowest bidders and the total amount of their bids on the basis of the Engineer's estimate of the work to be done:

July 3—For furnishing and delivering 80,100 gross tons of anthracite coal; Howard S. Bowne, \$237,569.

July 25—For furnishing, delivering, erecting and connecting four pumping engines, complete, with all appurtenances and appliances, in the remodeled Ridgewood North Side Pumping Station; Davis & Farnum Manufacturing Company, \$340,000.

July 25—For furnishing, delivering and installing superheaters and piping at various pumping stations; Power Specialty Company, \$11,780.

July 25—For furnishing and delivering stop-cocks; Rensselaer Manufacturing Company, \$35,375.

July 25—For setting, replacing and hauling 6-inch hydrant service pipe, fire hydrants and appurtenances; Isaac Harris Company, \$38,028.50.

July 25—For furnishing and delivering deep wells; George W. Phillips, \$17,692.85.

July 25—For furnishing, delivering and laying water mains and appurtenances in Belmont and Fountain avenues, in Crescent street and in the grounds of the New Lots Pumping Station; James P. Graham, \$13,860.25.

August 15—For furnishing, constructing and erecting an engine house for high pressure fire service at Furman and Joralemon streets; Charles H. Peckworth, \$64,422.

August 15—For furnishing, constructing and erecting an engine house for high pressure fire service at Willoughby and St. Edwards streets; Charles H. Peckworth, \$45,423.

August 15—For furnishing, delivering and laying water mains and appurtenances in Utica, Church and Remsen avenues; Hammond & Sloane (Incorporated), \$54,395.

August 29—For furnishing, constructing and erecting a concrete coal shed and culvert and doing all grading, etc., at the new Canarsie Pumping Station; Newman Construction Company, \$37,400.

August 29—For furnishing and erecting a wrought iron fence, with gates, at the Old Ridgewood Pumping Station; John Fox & Co., \$6,966; Leslie M. Harg & Co., \$6,966.

September 19—For furnishing and delivering cast iron stop-cock boxes and covers. Section I., Herron Pump and Foundry Company, \$7,920; W. P. Taylor Company, \$7,920; Hammond & Sloane (Inc.), \$7,920. Section II., Herron Pump and Foundry Company, \$7,920; W. P. Taylor Company, \$7,920; Hammond & Sloane (Inc.), \$7,920.

September 19—For unloading, hauling, storing and trimming semi-bituminous coal required at the Millburn Pumping Station; Harry Blinn, \$2,650.

September 19—For furnishing and delivering cast iron pipe and special castings; United States Cast Iron Pipe and Foundry Company, \$68,375.

September 26—For furnishing, constructing and erecting a machine shop and office on the east side of Logan street, 80 feet north of Atlantic avenue; Charles H. Peckworth, \$37,844.

The amount of contract work being carried on by this Bureau, together with the miscellaneous routine work that is necessary, requires a larger force than is at present employed to adequately supervise the work and keep records of the same and to prepare contracts for new work.

It is therefore imperative that an additional force be assigned to this Bureau, if it is expected to properly plan and carry out the new work, as well as to look after the present work on hand.

Respectfully yours,

J. W. McKAY, Acting Chief Engineer.

The application of the "Bronx Borough Record and Times" for designation as one of the official borough papers of The Bronx, was, without objection, ordered on file.

The Supervisor presented a communication from the Secretary of the Board of Municipal Justices, asking for designation of papers in which to publish the assignment of Justices of that Court for 1907, and the following resolution was then adopted:

Resolved, That the Supervisor be and he hereby is authorized to insert the advertisement for assignment of Justices of Municipal Courts for 1907 in the following newspapers:

New York "Law Journal,"	Brooklyn Daily "Eagle,"
Evening "World,"	Long Island "Star,"
Bronx "Sentinel,"	Staten Island "Star."

The Supervisor then presented the opinion of the Corporation Counsel relative to the request of the Board of Health for permission to install a printing plant to print the indices of vital statistics, etc. Without objection it was ordered that the opinion be printed in the minutes and placed on file. The opinion is as follows:

Law Department,
Office of the Corporation Counsel,
New York, December 6, 1906.

PATRICK J. TRACY, Esq., Supervisor, City Record:

Sir—In reply to your favor of November 24, 1906, with reference to a request by the Department of Health for permission to install a printing plant and purchase supplies necessary therefor to print the indices of births, marriages and deaths recorded in the said Department, I beg to advise you as follows:

Section 1528 of the Charter provides:

"All printing for said City * * * shall be executed and all stationery shall be supplied under contracts to be entered into by said Board of City Record."

Under this provision it is clear that all printing and stationery must be supplied through contracts to be entered into by the Board of City Record, and the only exception to this proviso is found in the last sentence of the section quoted supra. This portion of said section that is material reads:

"Nothing herein contained shall apply to the printing or supplies of stationery for The City of New York * * * where by the concurrent vote of the Mayor, Counsel to the Corporation and Comptroller, it shall be decided to have such printing done or such stationery furnished without contract let after advertisement for bids or proposals, but in such cases such printing shall be done and such stationery procured in the manner and on such terms and conditions as the said officers shall deem to be for the best interests of the City."

The question therefore arises whether under the resolution adopted by the Board of Health, the Mayor, the Corporation Counsel and the Comptroller, if agreeable, have the power to permit the Board of Health to acquire a printing plant and purchase supplies to meet the emergency suggested in the resolution accompanying your communication. I am of the opinion that the power therein contained that " * * * in such cases such printing shall be done and such stationery procured in the manner and on such terms and conditions as the said officers shall deem for the best interests of the City" is not broad enough to authorize the expenditure of moneys for the purchase of a printing plant to be used by the Board of Health in printing the indices of births, marriages and deaths. The policy of the framers of the Charter was to centralize the printing and the purchase of supplies for all Departments in the Board of City Record, and to endeavor to place a construction upon this section of the Charter which would permit the purchase of a printing plant for the Board of Health would open the door to every Department under the City Government to ask for a plant of its own, and it does not seem to me that it is in the best interests of the City, independent of my legal opinion as to the law, that such a practice would conduce to the best interests of the City.

I return: first, letter from the Mayor to the Supervisor; second, letter from the Secretary of the Department of Health to the Mayor, Chairman of the Board of City Record; third, preambles and resolution adopted by the Department of Health, July 11, 1906.

Respectfully yours,
(Signed) WILLIAM B. ELLISON, Corporation Counsel.

Resolved, That this Board hereby approves the said requisition and directs that a voucher be drawn in due form on the Comptroller for the said amount.

Ayes—The Vice-President, Mayor, Comptroller and Commissioners Langdon and Smith.

Nays—None.
Carried.

The Secretary reported that he had transmitted communications as follows to the Board of Estimate and Apportionment and the Corporation Counsel, sending the Seventh and Eighth avenue and Jerome avenue contract for approval as to form:

BOARD OF RAPID TRANSIT RAILROAD COMMISSIONERS,
No. 320 BROADWAY, NEW YORK.

To the Board of Estimate and Apportionment:

Pursuant to the provisions of law, the Board of Rapid Transit Railroad Commissioners for The City of New York herewith transmits to your Honorable Body the form of a proposed contract for the construction of rapid transit railroads in Seventh and Eighth avenues and Jerome avenue, and other streets as described therein, and requests your approval of the said contract for advertising for bids to perform the work therein specified.

Under date of October 11, 1906, this Board addressed a communication to your Honorable Body as to the form in which contracts should be drawn for the Lexington avenue, Seventh and Eighth avenues and Jerome avenue railroads, and stated that if it was deemed "expedient, practicable and in the public interest" to adopt the suggestions contained in the said communication, this Board would cause detailed plans and specifications to be prepared and a form of contract to be drafted. At that time the orders of the Appellate Division approving the said routes had not been finally entered, although they were entered shortly afterwards.

On December 7, 1906, your Honorable Board adopted a resolution containing recommendations as to the form of bids to be asked for various routes, including the Seventh and Eighth avenue and the Jerome avenue routes referred to, which were in accordance with the suggestions contained in the said communication of this Board dated October 11, 1906.

Since the adoption of the said resolution by your Board, the detailed plans and specifications have been prepared, the proposed contract has been drawn and carefully revised, a public hearing, after advertisement, has been held, pursuant to law, and the form of contract herewith transmitted has been finally adopted by this Board. Provision is therein made for inviting alternative bids from contractors, as required by your Board—

1. For construction alone, and
2. For construction, equipment and operation.

The said proposed contract has also been submitted, as required by law, to the Corporation Counsel for his approval as to form.

In witness whereof the Board of Rapid Transit Railroad Commissioners for The City of New York has caused its seal to be hereto affixed and these presents to be signed by its Secretary, this 26th day of March, 1907.

(Signed) BION L. BURROWS, Secretary.

BOARD OF RAPID TRANSIT RAILROAD COMMISSIONERS,
No. 320 BROADWAY, NEW YORK,
March 26, 1907.

Hon. WM. B. ELLISON, Corporation Counsel:

SIR—I beg leave to hand herewith six copies of a proposed contract for the construction of rapid transit railroads on the Seventh and Eighth Avenue and the Jerome Avenue routes, and I am directed by this Board to request your approval of the form of the said contract, as required by the provisions of section 13, chapter 752, Laws of 1894.

If you find the form correct, kindly sign the approval at the place indicated (immediately after the invitation to contractors) and return three copies so approved to me.

This form follows closely that of the Lexington avenue contract, which has already been approved by you.

I am further instructed by the Board to say that they have inserted in the contract an express reference to section 13 of the Labor Law, not because they have elected to contract in this form, but because of your opinion that they cannot be permitted to contract in any other way; that they are advised by their counsel that the said section of the Labor Law is unconstitutional, and that they believe the insertion of its provisions in the contract will operate to the disadvantage of the City by enhancing the cost of the work.

I beg to add that it is, in the opinion of all the members of this Board, including the Mayor and Comptroller, very important that this contract should be ready for advertising at the earliest practicable date.

Respectfully yours,
(Signed) BION L. BURROWS, Secretary.

Communication and resolution of the Board of Estimate and Apportionment were presented as follows:

BOARD OF ESTIMATE AND APPORTIONMENT,
OFFICE OF THE SECRETARY, ROOM 805, No. 277 BROADWAY,
March 28, 1907.

Hon. ALEXANDER E. ORR, President, Board of Rapid Transit Railroad Commissioners,
No. 320 Broadway, New York City:

SIR—I transmit herewith certified copy of a resolution duly adopted by the Board of Estimate and Apportionment March 28, 1907, approving of the proposed form of contract submitted by the Board of Rapid Transit Railroad Commissioners for The City of New York with a communication dated March 26, 1907, for construction alone and for construction, equipment and operation of rapid transit railroads in various streets and avenues in the Boroughs of Manhattan and The Bronx, and known more particularly as the Seventh and Eighth Avenue Route and the Jerome Avenue Subway.

Respectfully,
(Signed) JOSEPH HAAG, Secretary.

Resolved, That the Board of Estimate and Apportionment hereby approves of the proposed form of contract submitted by the Board of Rapid Transit Railroad Commissioners for The City of New York, with a communication dated March 26, 1907, for construction alone and for construction, equipment and operation of rapid transit railroads in various streets and avenues in the Boroughs of Manhattan and The Bronx, and known more particularly as the Seventh and Eighth Avenue Route and the Jerome Avenue Subway.

A true copy of resolution adopted by the Board of Estimate and Apportionment March 28, 1907.

(Signed) JOSEPH HAAG, Secretary.

Communication of the Corporation Counsel was presented as follows:

CITY OF NEW YORK,
LAW DEPARTMENT—OFFICE OF THE CORPORATION COUNSEL,
New York, March 30, 1907.

To the Board of Rapid Transit Railroad Commissioners, No. 320 Broadway, New York City:

SIRS—A communication from your Secretary, dated March 26, 1907, has been received. It reads as follows:

"I beg leave to hand you herewith six copies of a proposed contract for the construction of rapid transit railroads on the Seventh and Eighth avenue and the Jerome

avenue routes, and I am directed by this Board to request your approval of the form of the said contract, as required by the provisions of section 13, chapter 752, Laws of 1894.

"If you find the form correct, kindly sign the approval at the place indicated (immediately after the invitation to contractors), and return three copies so approved to me.

"This form follows closely that of the Lexington avenue contract, which has already been approved by you.

"I am further instructed by the Board to say that they have inserted in the contract an express reference to section 13 of the Labor Law, not because they have elected to contract in this form, but because of your opinion that they cannot be permitted to contract in any other way; that they are advised by their counsel that the said section of the Labor Law is unconstitutional, and that they believe the insertion of its provisions in the contract will operate to the disadvantage of the City by enhancing the cost of the work.

"I beg to add that it is, in the opinion of all the members of this Board, including the Mayor and Comptroller, very important that this contract should be ready for advertising at the earliest practicable date."

Said proposed contracts are herewith returned approved as to form.

Respectfully yours,
(Signed) JOHN L. O'BRIEN,
Acting Corporation Counsel.

Letter of the Chief Engineer and one to him of the Interborough Rapid Transit Company were read as follows, and the matter was referred to counsel for report as to the necessity to amend the general route and plans of the Rapid Transit Railroad at that point:

NEW YORK, April 3, 1907.

Hon. JOHN H. STARIN, Vice-President, Rapid Transit Board:

DEAR SIR—You will remember that in the fall of 1906 the Rapid Transit Board discussed the traffic conditions north of the Ninety-sixth street station, and it was evident that some plan should be adopted which would remedy the congested condition at this place. Since then the Engineers of the Board have been in consultation with the officials of the Interborough Rapid Transit Company, and, after a prolonged discussion of this matter, a plan has been agreed upon involving the construction of two additional tracks on the west side of the present subway and one track on the east side, together with crossovers, this construction extending from Ninety-sixth street to One Hundred and Third street. This plan would effectively relieve the situation, and the estimated cost of the work is about \$850,000. I submit herewith blue print of our drawing No. 1715-A, showing the general layout of the subway at this point and the new additional tracks necessary to carry out this scheme.

The Interborough Company have expressed a willingness to undertake the construction of these additional tracks, as stated in a letter received from Mr. E. P. Bryan, President of the Company, dated March 27, 1907, copy of which I inclose herewith.

I respectfully recommend to the Board the favorable consideration of the above mentioned plan.

Very truly yours,
(Signed) GEORGE S. RICE, Chief Engineer.

INTERBOROUGH RAPID TRANSIT COMPANY,
Nos. 13 to 21 PARK ROW,
New York, March 27, 1907.

Mr. GEO. S. RICE, Chief Engineer, Rapid Transit Commission, New York City:

DEAR SIR—I beg to acknowledge receipt of your letter of this date, with one print of your drawing 1715-A, showing proposed additional tracks between West Ninety-sixth and One Hundred and Third streets. This is the plan agreed upon in my office between you, your Engineers, our engineers and me.

I have taken this subject up with our board to-day, and our people are willing to carry out the work as provided on this plan, it being the understanding that it is to be treated as an extra under Contract No. 1. You will please take this matter up with your Board and advise me if such is the understanding.

Yours truly,
(Signed) E. P. BRYAN, President.

Letter of the Lawyers' Surety Company of New York was read as follows, and referred to the Comptroller for report:

THE LAWYERS' SURETY COMPANY OF NEW YORK,
No. 66 LIBERTY STREET,
New York, April 3, 1907.

Board of Rapid Transit Railroad Commissioners for The City of New York, No. 320 Broadway, New York City:

DEAR SIRS—On June 18, 1900, the Lawyers' Surety Company of New York became surety upon a bond of the American Bridge Company in the sum of four hundred and fifty thousand dollars (\$450,000), given to John B. McDonald, for the faithful performance of a contract of the American Bridge Company for furnishing the structural steel of the Rapid Transit Railroad of The City of New York, and on September 26, 1905, the bond was reduced to two hundred thousand dollars (\$200,000) upon your consents and the consents of John B. McDonald and the Rapid Transit Subway Construction Company.

The Lawyers' Surety Company is now and has been for a number of years owned by the United States Fidelity and Guaranty Company, and is winding up its affairs as a corporation. Will you kindly inform me if you will consent to our substituting a bond of the United States Fidelity and Guaranty Company in place of the one of this company? We, of course, will draw the new bond and submit it to you for your approval. It will be identical in form with the old one, and will run back to the time of the execution of the Lawyers' Surety Company's bond.

Mr. McDonald and the Rapid Transit Subway Construction Company will consent to this change if we can obtain your approval for the same.

Very truly yours,
(Signed) WILLIAM H. ESTWICK, Resident Attorney.

Letter of the Chief Engineer was read as follows:

NEW YORK, April 1, 1907.

Hon. A. E. ORR, President, Rapid Transit Board:

DEAR SIR—I inclose herewith bill to the Rapid Transit Board transmitted for payment by the attorneys of Mr. George J. Smith, Messrs. Rollins & Rollins, No. 32 Nassau street, which bill is rendered in accordance with agreement on page 4181 of the minutes of the Rapid Transit Board, being for alterations in the building at the southwest corner of Fulton and Hoyt streets, in connection with an entrance to the station.

I have to report that from investigation made this agreement has been carried out by the owner of the building, the party of the first part; and in particular, the party of the first part has made the necessary changes in the building described in Article IV. of the agreement.

I have also obtained a certification from the Chief Engineer of the Rapid Transit Subway Construction Company and the Interborough Rapid Transit Company (parties of the second part) to the effect that there is nothing prejudicial to the payment so far as those companies are concerned.

I therefore certify the bill as correct to be passed to the Comptroller for payment.

Very truly yours,
(Signed) GEORGE S. RICE, Chief Engineer.

The following resolution was moved:

Resolved, That this Board hereby approves the bill of George J. Smith for changes made in the building at the corner of Fulton and Hoyt streets, in the Borough of Brooklyn, City of New York, pursuant to agreement dated June 18, 1906, between George J. Smith, Rapid Transit Subway Construction Company, The City of New York, and others, amounting to the sum of six thousand dollars (\$6,000).

Ayes—The Vice-President, Mayor, Comptroller and Commissioners Langdon and Smith.

Nays—None.
Carried.

Communications of the Corporation Counsel as to examinations of titles of property, the easements of which the Board has already voted to acquire, were presented as follows, and it was understood that the Auditor would draw vouchers for the easements in question:

LAW DEPARTMENT—OFFICE OF THE CORPORATION COUNSEL,
NEW YORK, April 1, 1907.

Board of Rapid Transit Railroad Commissioners:

GENTLEMEN—I have caused the title to the premises situated on the northwesterly side of Westchester avenue, in the Borough of The Bronx, with a frontage of 25 feet on Westchester avenue, 262 feet northeasterly from Prospect avenue, to be examined, and find that Jennie E. Byrne is the owner of and can convey the easements necessary for the construction, maintenance and operation of an elevated railroad in front of said premises, subject to a mortgage made by Ellen M. Chambers to Joseph Hindley, et al., Trustees, dated and recorded July 27, 1894, in the office of the Register of the County of New York, in Section 10, Liber 10, mp 254, in the amount of \$3,500; subject also to a mortgage from Jennie E. Byrne to Elizabeth A. Burke, dated September 4, 1906, recorded September 5, 1906, in Section 10, Liber 90, mp. 286, in the amount of \$2,850.

The purchase price is \$250.

Respectfully yours,
(Signed) G. L. STERLING, Acting Corporation Counsel.

LAW DEPARTMENT—OFFICE OF THE CORPORATION COUNSEL,
NEW YORK, April 1, 1907.

Board of Rapid Transit Railroad Commissioners:

GENTLEMEN—I have caused the title to premises situated on the easterly side of Broadway, in the Borough of Manhattan, extending from a point 62 feet 7½ inches south of the southerly line of Two Hundred and Nineteenth street, running thence north 93 feet 8¼ inches to the centre line of Two Hundred and Nineteenth street, with a frontage of 93 feet 8¼ inches on the easterly side of Broadway, to be examined, and find that on May 10, 1906, the American Real Estate Company was the owner of and could convey the easements necessary for the construction, maintenance and operation of an elevated railroad in front of said premises. On that date the American Real Estate Company did convey and release to The City of New York the easements appurtenant to said premises, by an instrument dated May 10, 1906, and duly recorded in the office of the Register of New York County on July 10, 1906, in Section 8, Liber 30, cp. 108.

Although the certificate of the title company returns the title as being at present in the Interborough-Metropolitan Company, inasmuch as The City of New York agreed to pay the American Real Estate Company for the easements at the time of the said conveyance, the latter company is entitled to and should receive the compensation therefor.

The purchase price is \$936.88.

Respectfully yours,
(Signed) G. L. STERLING, Acting Corporation Counsel.

LAW DEPARTMENT—OFFICE OF THE CORPORATION COUNSEL,
NEW YORK, April 1, 1907.

Board of Rapid Transit Railroad Commissioners:

GENTLEMEN—I have caused the title to premises on the easterly side of Broadway, in the Borough of Manhattan, extending from the centre line of Two Hundred and Twentieth street to the northerly line of Two Hundred and Twentieth street, with a frontage of 31 feet 1½ inches on Broadway, to be examined, and find that on May 10, 1906, the American Real Estate Company was the owner of and could convey the easements appurtenant to said premises necessary for the maintenance, construction and operation of an elevated railroad in front thereof.

On May 10, 1906, the said American Real Estate Company did release and convey to The City of New York the said easements, and it was agreed that the City should pay the compensation at some later date. The said conveyance and release were recorded in the office of the Register of the County of New York on July 10, 1906, in Section 8, Liber 30, cp. 108.

The American Real Estate Company is entitled to receive the compensation, notwithstanding the closing report of the Title Company returns the title at present as being in the Interborough-Metropolitan Company. The purchase price is \$310.94.

Respectfully yours,
(Signed) G. L. STERLING, Acting Corporation Counsel.

LAW DEPARTMENT—OFFICE OF THE CORPORATION COUNSEL,
NEW YORK, April 1, 1907.

Board of Rapid Transit Railroad Commissioners:

GENTLEMEN—I have caused the title to premises situated between the northerly line of Two Hundred and Nineteenth street, running thence southerly to the centre line of Two Hundred and Nineteenth street, having a frontage of 31 feet 1½ inches upon the easterly side of Broadway, and also the premises beginning at the southerly line of Two Hundred and Twentieth street, and running thence north to the centre line of Two Hundred and Twentieth street, with a frontage of 31 feet 1½ inches on the easterly side of Broadway, in the Borough of Manhattan, to be examined, and find that on May 10, 1906, the American Real Estate Company was the owner of and could convey the easements necessary for the construction, maintenance and operation of an elevated railroad in front of said premises.

On May 10, 1906, the said American Real Estate Company did convey and release to The City of New York all of the easements appurtenant to each of the said parcels, which said conveyance and release was recorded in the office of the Register of the County of New York in section 8, Liber 30, chapter 108, on July 10, 1906. It was agreed at the time of such conveyance that The City of New York should afterwards pay the American Real Estate Company for said easements so conveyed.

The Title Company returns that the Interborough-Metropolitan Company is now the owner of said premises, but inasmuch as the American Real Estate Company was the owner when the conveyance and release were given, the amount of compensation agreed upon therefor should be paid to the American Real Estate Company.

The purchase price is \$621.87.

Yours respectfully,
(Signed) G. L. STERLING,
Acting Corporation Counsel.

Offer to release easements was presented as follows and referred to the Comptroller for report:

SOLOMON HANFORD, HENRY B. POGSON,
LAW OFFICES, NO. 40 WALL STREET,
NEW YORK, April 3, 1907.

Secretary of the Rapid Transit Railroad Commission, No. 320 Broadway, New York:

DEAR SIR—As attorney for the Pilgrim Baptist Church, I beg to hand you herewith its offer of the easements on its property for the construction, maintenance and operation of the Rapid Transit Railroad.

Kindly address all communications in this matter to me.

Yours very truly,
(Signed) HENRY B. POGSON.

Secretary of the Rapid Transit Railroad Commission, No. 320 Broadway, New York City:

DEAR SIR—Agreeably with resolution of Board of Trustees of Pilgrim Baptist Church, us thereunto authorizing, we offer The City of New York, at ten dollars (\$10) per front foot, easements for the construction, maintenance and operation of the Rapid Transit Railroad on land now owned by the Pilgrim Baptist Church, situated

on Boston road, lying in Section 11, Block 3005, Lot No. 36, on the land map of The City of New York. The entire frontage is 124.59 feet, as appears from the diagram hereto annexed.

This offer, which is believed to be much less than the real value of said easements, is made with the sole idea of avoiding delays in payment or possible litigation.

Yours very truly,
(Signed) HILAND FLOWERS,
President, Board of Trustees.
(Signed) PERRY T. GOODWIN,
Secretary, Board of Trustees.

Dated March 30, 1907.

The Secretary reported receipt of notice of lien against the New York Tunnel Company by the Maine-McCormick Company, in the sum of \$306.26; also notice of lien against same company by the Long Island Sand Company, in the sum of \$987.80; also notice of lien against same company by the Independent Supply Company, in the sum of \$103.29; and it was understood that the Comptroller would be or had been notified.

The Secretary reported that the Board of Estimate and Apportionment had made an appropriation of \$26,667, compensation of Commissioners for the year 1906, in accordance with requisition of the Rapid Transit Board.

Letter of F. B. Behr, and one of Martin W. Littleton in behalf of Mr. Behr, urging that the Committee on Plans and Contracts grant them a hearing on the matter of the application for a franchise for a railroad from South Ferry to Coney Island, for the use of the Behr monorail system, were presented, and referred to that Committee.

The Secretary reported that he had communicated with the Board of Estimate and Apportionment concerning the readiness of this Board to proceed with the details of the plans and specifications for that portion of the Brooklyn loop lines lying along the extension of Delancey street, between the Bowery and Centre street, suggesting that title be taken by the City at an early date.

The Secretary reported that the Vice-President had signed lease of rooms, No. 59 Pearl street, for one year, ending the 1st of May, 1908, at \$1,778 per annum, as authorized.

Communication of the Eighty-sixth Street and Crosstown Transit Improvement Association, asking for a hearing on a proposal to construct a subway through a part of Central Park and West Eighty-sixth street, was presented, and referred to the Committee on Plans and Contracts.

Letter of the Deputy Comptroller to the Auditor, with opinions of the Corporation Counsel, on the matter of claims for damages to property owners on the easterly side of Park avenue, growing out of the so-called Park avenue deviation, was presented as follows, and the following resolution was moved:

DEPARTMENT OF FINANCE—CITY OF NEW YORK,
March 28, 1907.

Mr. H. A. D. HOLLMAN, Auditor, Board of Rapid Transit Railroad Commissioners:

SIR—Inclosed herewith please find all papers in the matter of the claims of Alton B. Parker, referee, and others, for services rendered in connection with the application of the Rapid Transit Board for the appointment of Commissioners to determine as to the Park avenue deviation, together with original letters of the Corporation Counsel, dated December 31, 1906, December 31, 1906, and January 30, 1907.

Kindly take action as provided therein.

Respectfully,
(Signed) JOHN H. MCCOOEY, Deputy Comptroller.

LAW DEPARTMENT—OFFICE OF THE CORPORATION COUNSEL,
NEW YORK, December 31, 1906.

Hon. HERMAN A. METZ, Comptroller:

SIR—I am in due receipt of your communication bearing date December 17, referring to a prior communication bearing date November 27, transmitting papers in the matter of the application of the Rapid Transit Commission as to the Park Avenue deviation.

You enclose in your letter of December 17 a communication received by you from the Secretary of the Board of Rapid Transit Railroad Commissioners, requesting you to report, as promptly as possible, to that Board upon this matter, it being stated that it is "important that the Board should authorize counsel to move for the confirmation of the report of the Referee, inasmuch as the property owners are about to take similar action."

I have written to you a letter upon this subject of even date, which I think answers the communication of November 27.

There has been some little delay in answering that communication by reason of the fact that it was necessary to institute a very thorough search in the archives of this Department, and to consult the Assistants in this office who had charge of such matters during the administration of Hon. John J. Delany, as Corporation Counsel, to make sure that in no way had the City taken part in the litigation, the expenses of which are referred to in your communications.

Yours respectfully,
(Signed) WILLIAM B. ELLISON, Corporation Counsel.

LAW DEPARTMENT—OFFICE OF THE CORPORATION COUNSEL,
NEW YORK, January 30, 1907.

Hon. HERMAN A. METZ, Comptroller:

SIR—I am in due receipt of your communication bearing date January 7, referring to my opinion dated December 31, 1906, relative to a bill in the matter of claims for damages to property owners on the easterly side of Park avenue.

You quote from my opinion a paragraph, of which the end is: "On the face of the papers they are apparently expenses which should be paid by the Rapid Transit Commission."

You now ask me to advise you if I mean said expenses are properly charged against and should be paid out of the administration account of the Board of Rapid Transit Railroad Commissioners.

In answer to this communication I have to say that the account in question is the proper one from which these expenses should be paid.

In my previous opinion I called your attention to the fact that one of the items of the expenses is a charge for services of a person as expert on behalf of the City. This expense, of course, you will not pay in the absence of proof that in fact an expert was employed on behalf of the City, and even in that case I should advise you to communicate the facts fully to this Department before taking any further action in regard to the proposed payment of such a claim.

It is exceedingly difficult to understand how, under any circumstances, there could have been an expert witness for the City in a proceeding to which the City was not a party.

My previous letter to you on this general question, of December 31, 1906, was quite definite, but as the matter is very important and to avoid any possible misunderstanding as to the position of this Department in regard to the Park avenue claims, I will add a few words at the risk of repetition.

As I stated to you before, the Law Department has no knowledge of what has been done in regard to the Park avenue claims, but has certain information indirectly acquired in regard thereto.

What seems to have happened is this:

The Rapid Transit Commissioners, in aid of their application to the Appellate Division to secure its approval of a change of route in Park avenue, and acting upon the suggestion of the Appellate Division, instituted a proceeding before ex-Judge Parker, as Referee, without notice to the City and without participation in the proceedings by the City, to determine the amount of damages suffered by the abutting property owners by reason of the change of route in question.

The Rapid Transit Commissioners had a perfect right to take any proceedings which were necessary in support of an application which they had the right to make to the Appellate Division, and for that reason I have stated to you already that I think the expenses incurred by the Rapid Transit Commissioners in aid of their application, excepting the bill of the alleged City's expert, might be paid out of the maintenance expenses of the Commission.

I do not admit any liability on the part of the City for any alleged damages caused to abutting property owners by the construction of the rapid transit road in Park avenue on any route other than the legal one. But I feel justified in approving the expenses incurred by the Rapid Transit Commissioners in a proceeding which they had apparently the right to institute as a part of their proceeding to secure the approval of the Appellate Division.

I have learned indirectly that within the last few days Judge Parker's report has been confirmed by the Appellate Division, and that that Court has reiterated its declaration that the damages to the property owners should be paid. It abstains, as did Judge Parker in his report, from saying by whom these expenses are to be paid, and so far as I know, nothing has yet occurred which makes the City liable for the alleged damages.

Indeed, the litigation seems to have proceeded upon the theory that the City was neither a proper or necessary party thereto.

I think the foregoing observations sufficiently state the position of this Department in this matter.

Respectfully yours,
(Signed) WILLIAM B. ELLISON, Corporation Counsel.

Resolved, That this Board hereby approves the following bills in the matter of claims for damages to property owners on the easterly side of Park avenue, from Thirty-fourth to Forty-second street, namely:

Alton B. Parker, referee, fees and expenses.....	\$2,519 57
Theodore Starrett, services in examining Park avenue property, etc., and testifying before the referee.....	1,000 00
J. H. Dinwiddie, services in examining Park avenue property, etc., and testifying before the referee.....	500 00
George B. Post, architect, professional services, preparing drawings and specifications	2,000 00
Mrs. Frances B. Richards, Stenographer.....	828 13
Charles G. Martin, Expert for the City.....	250 00

Communication of Dr. George A. Soper, announcing the practical completion of his investigations on the possible effects of subway dust upon the health of persons who use or work in the subway, was presented, and the Secretary was instructed to request him to prepare and submit his final report.

Letter of the Chief Engineer was read as follows:

New York, April 4, 1907.

Hon. JOHN H. STARIN, Vice-President, Rapid Transit Board:

DEAR SIR—This is to formally report to the Board that the Two Hundred and Seventh street station of the Rapid Transit Railroad was opened to the public on Monday, April 1.

Yours very truly,
(Signed) GEORGE S. RICE, Chief Engineer.

Mr. Rives reported that the bill prepared by the Board for depressing the tracks of the New York Central and Hudson River Railroad Company in Eleventh avenue had been introduced in both houses of the Legislature.

Mr. Rives reported that the invitations to contractors for the Lexington Avenue and the Seventh and Eighth Avenue and Jerome Avenue Rapid Transit Railroads were appearing in the daily newspapers designated by the Mayor and bids would be opened on the 25th of April, at noon.

Miscellaneous communications were referred to respective committees.

The Board then adjourned.

NOTICE OF ASSESSMENTS FOR OPENING STREETS AND PARKS.

IN PURSUANCE OF SECTION 1005 OF the Greater New York Charter, the Comptroller of The City of New York hereby gives public notice of the confirmation by the Supreme Court and the entering in the Bureau for the Collection of Assessments and Arrears of Taxes and Assessments and of Water Rents, to the following-named avenue in the BOROUGH OF QUEENS:

FIRST WARD.

DE BEVOISE AVENUE—OPENING. from Jackson avenue to Ditmars avenue. Confirmed January 25, 1907; entered April 8, 1907. Area of assessment includes all those lands, tenements and hereditaments and premises situate, lying and being in the Borough of Queens, in The City of New York, which, taken together, are bounded and described as follows, viz:

Beginning at a point formed by the intersection of the northeasterly line of Jane street with a line parallel to and 100 feet northwesterly from the northwesterly line of Radde street; running thence northeasterly along said parallel line to its intersection with the southeasterly line of The Crescent; thence northeasterly about 500 feet, more or less, along said southeasterly line to the first angle point; thence continuing northeasterly along a straight line to the point formed by the intersection of the northeasterly line of Grand avenue with the southeasterly line of Cooper street; thence continuing northeasterly along a straight line to the point formed by the intersection of the southerly line of Flushing avenue with the southwesterly prolongation of a line parallel to and 100 feet northwesterly from the northwesterly line of Goodrich street; thence continuing northeasterly along said prolongation and parallel line to its intersection with a line parallel to and 100 feet northeasterly from the northeasterly line of Ditmars avenue; thence southeasterly along said last-mentioned parallel line to its intersection with a line parallel to and 100 feet southeasterly from the southeasterly line of Blackwell street; thence southwesterly along said last-mentioned parallel line to its intersection with the southerly line of Flushing avenue; thence westerly along said last-mentioned parallel line to its intersection with a line parallel to and 100 feet southeasterly from the southeasterly line of Bartow street; thence southwesterly along said last-mentioned parallel line to its intersection with a line parallel to and 100 feet southerly from the southerly line of Jackson avenue; thence westerly along said last-mentioned parallel line to its intersection with a line parallel to and 100 feet southeasterly from the southeasterly line of Rapelje avenue; thence southwesterly along said last-mentioned parallel line to its intersection with the southeasterly prolongation of the northeasterly line of Jane street; thence northeasterly along said prolongation and northeasterly line of Jane street to the point or place of beginning.

The above-entitled assessment was entered on the date hereinbefore given in the Record of Titles of Assessments, kept in the Bureau for the Collection of Assessments and Arrears of Taxes and Assessments and of Water Rents. Unless the amount assessed for benefit on any person or property shall be paid within sixty days after the date of said entry of the assessments, interest will be collected thereon, as provided in section 1016 of the Greater New York Charter.

Said section provides that "If any such assessment shall remain unpaid for the period of sixty days after the date of entry thereof in the said Record of Titles of Assessments, it shall be the duty of the officer authorized to collect and receive the amount of such assessments to charge, collect and receive interest thereon at the rate of seven per centum per annum, to be calculated to the date of payment from the date when such assessment became a lien, as provided by section 159 of this act."

Section 159 of this act provides: "An assessment shall become a lien upon the real estate affected thereby ten days after its entry in the said record."

The above assessment is payable to the Collector of Assessments and Arrears at the Bureau for the Collection of Assessments and Arrears of Taxes and Assessments and of Water Rents, at the Hackett Building, No. 51 Jackson avenue, Long Island City, Borough of Queens, between the hours of 9 a. m. and 2 p. m., and on Saturdays from 9 a. m. until 12 m., and all payments made thereon on or before June 7, 1907, will be exempt from interest, as above provided, and after that date will be subject to a charge of interest at the rate of seven per centum per annum from the date when above assessment became a lien to the date of payment.

CORPORATION SALE OF BUILDINGS AND APPURTENANCES THERETO ON CITY REAL ESTATE.

AT THE REQUEST OF THE COMMISSIONER of the Department of Bridges, public notice is hereby given that the Commissioners of the Sinking Fund of The City of New York, pursuant to a resolution adopted by them on March 13, 1907, by virtue of the powers vested in them by law, will offer for sale at public auction the buildings, parts of buildings, etc., being situated upon land more particularly described as follows:

Being the buildings situated on Madison avenue, between East One Hundred and Thirty-sixth and East One Hundred and Thirty-eighth streets, Borough of Manhattan, and also the buildings situated on East One Hundred and Thirty-eighth street, between the Harlem river and Fifth avenue, Borough of Manhattan, which are more particularly described on a map on file in the office of the Collector of City Revenue, Department of Finance, Room 141, No. 280 Broadway, Borough of Manhattan.

Pursuant to the above resolution, the sale of the above described buildings and appurte-

nances thereto will be held by direction of the Comptroller on

TUESDAY, APRIL 16, 1907,

at 11 a. m., on the premises, upon the following TERMS AND CONDITIONS.

It being understood that the purchasers, at the time of the auction sale, when the said bid is accepted by the City, shall execute a contract with The City of New York for the proper compliance with these terms and conditions, which contract shall provide for liquidated damages at so much per day for each and every day the removal of the buildings, etc., remains incomplete, after the expiration of sixty days from the day of sale. A copy of said contract is on file in the office of the Collector of City Revenue, Department of Finance, Room 141, No. 280 Broadway, Borough of Manhattan.

The buildings and appurtenances thereto will be sold to the highest bidder, who must pay immediately cash or a certified check, drawn to the order of the Comptroller of The City of New York, and must either give a cash bond or an approved bond of a surety company in the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale and of the contract.

All the buildings, structures and parts thereof, their fixtures and foundations of every class and description within the described area are to be torn down to a level two feet below the existing curb, and structures which may exist within any of the buildings, such as engine beds, boiler settings, etc., and all stoops and area walls, shall be torn down to the same level. All partitions, sheds and fences shall be removed from the premises. All brick laid in mortar, all floor beams, joists, studdings, flooring, ceiling, roofing, boards and woodwork of every description, and all gas, water, steam and soil piping shall be removed from the premises. All combustible matter, such as tar and felt roofing, broken laths and fragments of timber, chips, splinters, etc., which are of no value, shall be gathered together by the contractor and burned or carried away. The purchaser, at the sale, shall also shut off and cap all water pipes, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity.

Failure to remove said buildings and appurtenances, or any portion thereof, within sixty days from the day of sale, will work forfeiture of ownership of such buildings or appurtenances or portion as shall then be left standing, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and the said City of New York will without notice to the purchaser, cause the same to be removed and the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner and must be completed within sixty days from the day of sale, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damages and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of the said buildings by the said successful bidder.

Party walls and fences when existing against adjacent property not sold shall not be taken down, but all furrings, plaster, chimneys, projecting brick, etc., on the faces of such party walls, shall be taken down and removed. The walls shall be made permanently self-supporting without the aid of braces, the beamholes, etc., bricked up and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs of the adjacent buildings shall be properly flashed and painted and made water tight where they have been disturbed by the operation of the contractor.

The Comptroller of The City of New York reserves the right on the day of the sale to withdraw from sale any of the buildings or parts of buildings and machinery included in the foregoing parcel.

WE, THE UNDERSIGNED COMMISSIONERS of Estimate and Assessment in the above entitled matter, hereby give notice to all persons interested in this proceeding, and to the owner or owners, occupant or occupants of all houses and lots and improved and unimproved lands affected thereby, and to all others whom it may concern, to wit:

First—That we have completed our supplemental and amended estimate of assessment for benefit, and that all persons interested in this proceeding, or in any of the lands, tenements and hereditaments and premises affected thereby, and having objections thereto, do present their said objections, in writing, duly verified, to us at our office, Nos. 90 and 92 West Broadway, in the Borough of Manhattan, in The City of New York, on or before the 17th day of April, 1907, and that we, the said Commissioners, will hear parties so objecting, and for that purpose will be in attendance at our said office on the 19th day of April, 1907, at 11 o'clock a. m.

Second—That the abstract of our said supplemental and amended estimate of assessment for benefit, together with our benefit maps, and also all the affidavits, estimates, proofs and other documents used by us in making the same, have been deposited in the Bureau of Street Openings in the Law Department of The City of New York, Nos. 90 and 92 West Broadway, in the Borough of Manhattan, in said City, there to remain until the 18th day of April, 1907.

Third—That the limits of our assessment for benefit include all those lands, tenements and hereditaments and premises situate, lying and being in the Borough of The Bronx, in The City of New York, which, taken together, are bounded and described as follows, viz:

Beginning at a point formed by the intersection of the northeasterly line of Adams place with a line parallel to and 100 feet northeasterly from the northeasterly line of East One Hundred and Eighty-second street; running thence southeasterly along said parallel line to its intersection with the northeasterly prolongation of a line parallel to and 100 feet southeasterly from the southeasterly line of that portion of Hughes avenue lying southwest from East One Hundred and Eighty-second street; thence southeasterly along said last-mentioned prolongation and parallel line to its intersection with a line parallel to and 100 feet southeasterly from the southeasterly line of East One Hundred and Eighty-first street; thence northeasterly along said last-mentioned parallel line and its prolongation to its intersection with a line parallel to and 100 feet northeasterly from the northeasterly line of Quarry road; thence northeasterly along said last-mentioned parallel line to its intersection with a line drawn at right angles to Adams place from the point of beginning; thence southeasterly along said right-angled line to the point or place of beginning, as such streets are shown upon the final maps and profiles of the Twenty-third and Twenty-fourth Wards of The City of New York; excepting from said area all streets, avenues and roads or portions thereof heretofore legally opened, as such streets are shown upon our benefit maps deposited as aforesaid.

Fourth—That, provided there be no objections filed to said supplemental and amended abstract, our supplemental and amended last partial and separate final report herein will be presented for confirmation to the Supreme Court of the State of New York, First Department, at a Special Term thereof, Part III, to be held in the County Court House, in the Borough of Manhattan, in The City of New York, on the 28th day of May, 1907, at the opening of the Court on that day.

Fifth—In case, however, objections are filed to said supplemental and amended abstract of estimate of assessment for benefit, the notice of motion to confirm our supplemental and amended last partial and separate final report herein will stand adjourned to the date to be hereafter specified, and of which notice will be given to all those who have theretofore appeared in this proceeding, as well as by publication in the City Record, pursuant to sections 981 and 984 of the Greater New York Charter, as amended by chapter 658 of the Laws of 1906.

SECOND SUPPLEMENTAL PROCEEDINGS.

NOTICE OF APPLICATION FOR THE APPOINTMENT OF COMMISSIONERS OF APPRAISAL.

TOWNS OF SOUTHEAST AND CARMEL, PUTNAM COUNTY.

PUBLIC NOTICE IS HEREBY GIVEN that it is the intention of the Corporation Counsel of The City of New York to make application to the Supreme Court of the State of New York for the appointment of Commissioners of Appraisal under chapter 499 of the Laws of 1883, as amended. Such application will be made at a Special Term of the Supreme Court, to be held in and for the Ninth Judicial District, at the Court House in White Plains, Westchester County, N. Y., on May 13, 1907, at 10 o'clock in the forenoon of that day, or as soon thereafter as counsel can be heard. The object of such application is to obtain an order of the Court appointing three disinterested and competent freeholders, one of whom shall reside in the County of New York and the other two of whom shall reside in the county in which the real estate hereinafter described is situated, to act as Commissioners of Appraisal under said act and discharge all the duties conferred by the said act and the acts amendatory thereof and relating thereto, upon such Commissioners of Appraisal, for the purpose of providing an additional supply of pure and wholesome water for The City of New York.

The real estate sought to be taken is situated in the Towns of Carmel and Southeast, in the County of Putnam and State of New York.

The following is a brief description of the real estate sought to be taken, a reference to the date and place of filing of the map:

All those tracts or parcels of land to be acquired in fee for the construction of the Croton Falls Reservoir (Reservoir K), as shown on a certain map entitled "Department of Water Supply, Gas and Electricity, Exhibit No. 2 of 1906, Property Map No. 1, of additional lands required for the construction of the Croton Falls Reservoir (Reservoir K) in the Towns of Carmel and Southeast, Putnam County, New York (Third Taking)," adopted by the Aqueduct Commissioners, October 30, 1906, and filed in the County Clerk's office at Carmel, November 16, 1906, which are bounded and described as follows:

First Tract—Beginning at a point in the Town of Carmel and County of Putnam, and in the boundary of lands of The City of New York, which point is the northeasterly corner of parcel No. 61 of said lands, and running thence along the boundary of said parcel of said lands, north 70 degrees 14 minutes west 604.7 feet; thence leaving the said boundary of said parcel of said lands, north 18 degrees 33 minutes east 160.7 feet; thence north 3 degrees 57 minutes west 730.0 feet; thence north 10 degrees 07 minutes west 675.6 feet; thence north 21 degrees 12 minutes west 771.7 feet; thence curving to the left with a radius of 262.0 feet, 202.5 feet; thence north 65 degrees 29 minutes west 617.7 feet; thence north 10 degrees 51 minutes east and crossing a brook 1,375.6 feet; thence north 43 degrees 18 minutes west 499.9 feet to a point in

NINTH JUDICIAL DISTRICT.

Westchester and Putnam Counties—Croton Falls Reservoir (Highways).

PUBLIC NOTICE IS HEREBY GIVEN that it is the intention of the Corporation Counsel of The City of New York to make application to the Supreme Court of the State of New York, under chapter 490 of the Laws of 1883 and the laws amendatory thereof and supplemental thereto, at a Special Term of the Supreme Court, in the Ninth Judicial District, to be held at the Court House in White Plains, in the County of Westchester, N. Y., on the 18th day of May, 1907, at the opening of the Court on that day, or as soon thereafter as counsel can be heard, for an order of the Court approving the highway system, as shown on the map hereinafter referred to, and permitting The City of New York to permanently discontinue the roads hereinafter described as roads to be discontinued and to construct the new roads hereinafter described, such new roads to be used as public highways forever.

A motion will also be made for the appointment of Commissioners of Appraisal, as required by said act and the acts amendatory thereof, to act as Commissioners of Appraisal and to ascertain the compensation to be made to the owners of and all persons interested in the real estate as the term "real estate" is defined in said act, laid out on said map, as proposed to be taken or affected for the purposes indicated by said act.

Said highway system, together with the roads to be discontinued and the new roads to be constructed by the City are shown on a map entitled "Department of Water Supply, Gas and Electricity, Exhibit No. 4, of 1906. Property map for the acquisition of the use and possession of real estate acquired or used for railroad, highway and other public purposes required for the construction of the Croton Falls Reservoir (Reservoir "K"), in the Towns of Carmel and Southeast, Putnam County, and Somers, Westchester County, New York (highway map)," one copy of which was filed in the office of the Register of Westchester County on November 15, 1906, as Map No. 1674, and another copy of which was filed in the office of the Clerk of the County of Putnam on the 16th day of November, 1906.

SECTION No. 5.

NOTICE OF APPLICATION FOR THE APPOINTMENT OF COMMISSIONERS OF APPRAISAL.

PUBLIC NOTICE IS HEREBY GIVEN that it is the intention of the Corporation Counsel of the City of New York to make application to the Supreme Court of the State of New York for the appointment of Commissioners of Appraisal, under chapter 724 of the Laws of 1905, as amended. Such application will be made at a Special Term of the Supreme Court, to be held in and for the Third Judicial District, at the Court House in the City of Kingston, Ulster County, N. Y., on May 18, 1907, at 10 o'clock in the forenoon of that day, or as soon thereafter as counsel can be heard. The object of such application is to obtain an order of the Court appointing three disinterested and competent freeholders, one of whom shall reside in the County of New York, and at least one of whom shall reside in the county where the real estate hereinafter described is situated, to act as Commissioners of Appraisal under said act and discharge all the duties conferred by the said law and the acts amendatory thereof upon such Commissioners of Appraisal, for the purpose of providing an additional supply of pure and wholesome water for The City of New York.

The real estate to be acquired herein is situated in the Town of Olive, and is to be acquired in fee for the purpose of furnishing an additional supply of pure and wholesome water to The City of New York.

The following is a statement of the boundaries of the lands to be acquired herein, with a reference to the date and place of filing of the map:

All the parcels herein described are to be acquired in fee and are colored pink on the map hereinafter referred to.

NOTICE OF APPLICATION FOR THE APPOINTMENT OF COMMISSIONERS OF APPRAISAL.

PUBLIC NOTICE IS HEREBY GIVEN

that it is the intention of the Corporation Counsel of The City of New York to make application to the Supreme Court of the State of New York for the appointment of Commissioners of Appraisal under chapter 724 of the Laws of 1905, as amended. Such application will be made at a Special Term of the Supreme Court to be held in and for the Third Judicial District at the Court House in the City of Kingston, Ulster County, N. Y., on April 20, 1907, at 10 o'clock in the forenoon of that day, or as soon thereafter as counsel can be heard. The object of such application is to obtain an order of the Court appointing three disinterested and competent freeholders, one of whom shall reside in the County of New York, and at least one of whom shall reside in the county where the real estate hereinafter described is situated, to act as Commissioners of Appraisal under said act and discharge all the duties conferred by the said law and the acts amendatory thereof upon such Commissioners of Appraisal for the purpose of providing an additional supply of pure and wholesome water for The City of New York.

The real estate to be acquired herein is situated in the Town of Olive, Ulster County, and is to be acquired for the purpose of furnishing an additional supply of pure and wholesome water to The City of New York.

The following is a statement of the boundaries of the lands to be acquired herein with a reference to the date and place of filing of the map.

All the parcels herein described are to be acquired in fee and are colored pink on the map hereinafter referred to.

Resolved, That the Board of Estimate and Apportionment, in pursuance of the provisions of section 280 of the Greater New York Charter, hereby gives notice that the following is the proposed area of assessment for benefit in this proceeding:

Beginning at the intersection of a line midway between Third street and Fourth street with the southerly line of Jackson avenue and running thence southwardly and always along a line midway between said Third street and Fourth street and the prolongation of the same to a point distant 100 feet southerly from the southerly side of Thomson avenue, said distance being measured at right angles to the line of Thomson avenue; thence westwardly and parallel with Thomson avenue to the intersection with the prolongation of a line midway between First street and Lincoln avenue; thence northwardly along said line midway between First street and Lincoln avenue and the prolongation thereof to the southerly side of Woodside avenue; thence northwardly to a point on the northerly side of Riker avenue midway between First street and Woodside avenue; thence northwardly to a point on the southerly side of Jackson avenue midway between First street and New street; thence northwardly at right angles to the line of Jackson avenue to a point distant 100 feet northerly from the northerly side of the said avenue; thence eastwardly parallel with Jackson avenue to the intersection with a line drawn at right angles to the line of Jackson avenue and passing through the point described as the point or place of beginning; thence southwardly to the point or place of beginning.

Resolved, That this Board consider the proposed area of assessment at a meeting of the Board to be held in The City of New York, Borough of Manhattan, in the City Hall, on the 19th day of April, 1907, at 10.30 a. m., and that at the same time and place a public hearing thereon will then and there be had.

Resolved, That the Secretary of this Board cause these resolutions and a notice to all persons affected thereby to be published in the City Record for ten days prior to the 19th day of April, 1907.

Dated, April 6, 1907.

NOTICE IS HEREBY GIVEN THAT the Board of Estimate and Apportionment of The City of New York, deeming it for the public interest so to do, proposes to change the map or plan of The City of New York so as to establish lines and grades of a number of streets and avenues within the territory bounded by Jackson avenue, Woodside avenue, Middleburg avenue, Bliss street, Thomson avenue, Manly street and Borden avenue, in the First Ward, Borough of Queens, and that a meeting of said Board will be held in the Old Council Chamber, City Hall, Borough of Manhattan, City of New York, on April 19, 1907, at 10.30 o'clock a. m., at which said proposed change will be considered by said Board; all of which is more particularly set forth and described in the following resolutions adopted by the Board on March 22, 1907, notice of the adoption of which is hereby given, viz.:

Resolved, That the Board of Estimate and Apportionment of The City of New York, in pursuance of the provisions of section 442 of the Greater New York Charter, as amended, deeming it for the public interest so to do, proposes to change the map or plan of The City of New York by establishing lines and grades of a number of streets and avenues within the territory bounded by Jackson avenue, Woodside avenue, Middleburg avenue, Bliss street, Thomson avenue, Manly street and Borden avenue, in the First Ward, in the Borough of Queens, City of New York, more particularly shown on a map or plan submitted by the President of the Borough of Queens, and dated January 28, 1907, supplementing a map or plan adopted by the Board of Estimate and Apportionment on the 15th day of February, 1907.

Resolved, That this Board consider the proposed change at a meeting of the Board, to be held in the City Hall, Borough of Manhattan, City of New York, on the 19th day of April, 1907, at 10.30 o'clock a. m.

Resolved, That the Secretary of this Board cause these resolutions and a notice to all persons affected thereby that the proposed change will be considered at a meeting of the Board, to be held at the aforesaid time and place, to be published in the City Record for ten days continuously, Sundays and legal holidays excepted, prior to the 19th day of April, 1907.

Dated April 6, 1907.

BOARD OF RAPID TRANSIT RAILROAD COMMISSIONERS.

INVITATION TO CONTRACTORS.

LEXINGTON AVENUE ROUTE.

THE CITY OF NEW YORK (HEREIN-after called The City), acting by its Board of Rapid Transit Railroad Commissioners (hereinafter called the Board), contemplates building a rapid transit railroad along the routes described below. By this advertisement The City invites proposals to construct such railroad upon the routes and in accordance with the detailed plans and specifications adopted therefor. Such proposals may be submitted for any one or more of the eleven separate parts of which such railroad consists, as hereinafter stated.

The points within the City between which the said several parts of the said road are to run and the route or routes to be followed, are briefly as follows:

Section 5-O-3: This part of Section 5-O, as described in the routes and general plan, begins at Lexington avenue and One Hundred and Twenty-ninth street and runs southerly under Lexington avenue to a point about 50 feet north of One Hundred and Third street.

Section 5-O-2: Begins at the southerly end of Section 5-O-3, and runs southerly under Lexington avenue to a point about 50 feet north of Seventy-first street.

Section 5-O-1: Begins at the southerly end of Section 5-O-2, and runs southerly under Lexington avenue to a point between Forty-second and Forty-third streets, the southerly end of Section 5-O, as described in the routes and general plan.

Section 5-A: Begins at the southerly end of Section 5-O, as described in the routes and general plan, and runs thence under private property, Forty-second street and private property again to a point in Park avenue, between Thirty-eighth and Forty-first streets, at which a junction can conveniently be made with the existing subway.

Section 5-B: Begins at the northerly end of Section 5-O, above described, and runs thence northerly under the Harlem river to the Borough of The Bronx, where it continues under Third avenue and Morris avenue and then curves under private property to a point in One Hundred and Forty-ninth street, between Morris avenue and Cortlandt avenue, at which a junction can conveniently be made with the present subway.

Section 5-C-1: This part of Section 5-C, as described in the routes and general plan, begins at the northerly end of Section 5-O above described, and runs thence northerly under Lexington avenue and the Harlem river to the Borough of The Bronx, and then continues under Park avenue to One Hundred and Fifty-sixth street.

Section 5-C-2: This part of Section 5-C consists of a spur beginning at a point on the main line of the route of Section 5-C at Park avenue and One Hundred and Forty-ninth street, and runs under private property, One Hundred and Fifty-third street, Exterior street and Sedgwick avenue to the intersection of Sedgwick avenue and One Hundred and Sixty-fourth street.

Section 5-C-3: This part of Section 5-C consists of a loop beginning in the Borough of The Bronx at a point in Park avenue between One Hundred and Fifty-first and One Hundred and Fifty-second streets, and runs thence northwesterly and westerly under private property and connects with the spur Section 5-C-2 above described near the point where the centre line of said spur would intersect One Hundred and Fifty-first street if produced.

Section 5-D-3: This part of Section 5-D, as described in the routes and general plan, begins at the southerly end of Section 5-O, above described, in Lexington avenue, between Forty-second and Forty-third streets, and runs thence southerly under Lexington avenue to a point about half way between Thirty-sixth and Thirty-seventh streets, at which point the tracks will diverge into two branches. One of these branches will curve southwesterly under private property to Thirty-sixth street, and then run westerly under Thirty-sixth street, curving southerly into Fifth avenue, and then under Fifth avenue to a point where it will be rejoined by the second branch diverging as above stated. The second branch will run from the said point of divergence southerly and westerly under Lexington avenue and Thirty-fifth street to Fifth avenue, where it will rejoin the branch first above described at a point between Thirty-fourth and Thirty-fifth streets.

From the last mentioned point the route of this section will run southerly under Fifth avenue along Madison square and into Broadway; thence southerly under Broadway to a point about half way between Seventeenth and Eighteenth streets.

Section 5-D-2: Begins at the southerly end of Section 5-D-3, and runs thence southerly under Broadway, Vesey street, Church street, Trinity place and Greenwich street to a suitable terminus under Battery Park.

The general plan of construction calls for a railroad placed in subways or tunnels. The road is intended to be operated by electricity or some other power not requiring combustion within the tunnels, and the motors are intended to be capable of moving trains at a speed of not less than forty miles per hour for long distances, exclusive of stops.

For all of Sections 5-O-1, 5-O-2, 5-O-3 and 5-A there will be four tracks. For Section 5-B there will be two tracks. For Section 5-C-1 and Section 5-C-2, there will be two tracks. In the loop above described as Section 5-C-3, there will be one track. For Section 5-D-3 there will be four tracks as far south as the point between Thirty-sixth and Thirty-seventh streets, where the line diverges as above described; there will be two tracks from the point of divergence through Thirty-sixth street and Fifth avenue to the point where the lines reunite and two tracks from the point of divergence through Lexington avenue and Thirty-fifth street to the point in Fifth avenue where the lines reunite, and for the remainder of the distance southerly under Fifth avenue and Broadway there will be four tracks.

For Section 5-D-2 there will be four tracks. For Section 5-D-1 there will be four tracks to the Chambers street station. South of the Chambers street station southerly under Broadway, Vesey street, Trinity place and Greenwich street there will be two tracks. Additional tracks for terminal purposes are to be constructed under Battery place and Battery Park. Suitable stations, as shown on the plans, together with cross-overs, turnouts and sidings, as may be necessary, are to be provided.

The tracks are to be of standard gauge. The tunnels are to have a height of not less than 13 feet in the clear, and a maximum width of 15 feet for each track, except at stations, curves, etc., where the width may be increased. The roof of the tunnels is generally to be as near the surface of streets as street conditions and grades will permit, but will be depressed whenever necessary to avoid grade crossings as well as where approaching the Harlem river. The roof and sides of the tunnels will be of iron or steel and masonry.

Entrances to stations will in general be placed within private property, rights in which will be acquired for the purpose.

Construction is to be generally carried on by means of tunnelling or excavation under cover, except as may be otherwise specially provided in the contract, or in places where the Board shall give express permission to construct by open excavation. In the City Hall Park, Battery Park or other places under the jurisdiction of the Department of Parks, all trees injured or destroyed in the course of construction are to be replaced by the contractor under the direction and to the satisfaction of said Department.

The Board has included in the detailed plans for construction, provisions for pipe galleries through and along the principal longitudinal streets of all portions of the route except Sections 5-A and 5-C-3. Bids for the construction of the railroad on any one or more of these sections must be accompanied by bids for the construction of the pipe galleries appurtenant to such section or sections; and if not so accompanied will not be considered by the Board. The Board reserves the right to accept a bid for the construction of any section of the railroad and at the same time to reject the accompanying bid for pipe galleries.

The Board has also included in the detailed plans for construction, provisions for third tracks in Thirty-fifth and Thirty-sixth streets, and for two additional tracks under Greenwich street, Battery place and Battery Park south of Morris street, and additional station and terminal facilities in Battery Park. Such additional tracks and facilities are intended ultimately to form part of other railways heretofore duly authorized and approved. Bids for the construction of Sections 5-D-3 and 5-D-1 must be accompanied by separate bids for the construction of such additional tracks and station and terminal facilities; and if not so accompanied will not be considered by the Board.

If proposals satisfactory to the Board are received for the construction of one or more of the several parts of the road as above described, the Board may contract (subject to the approval of the Board of Estimate and Apportionment as provided by law) for those parts for which satisfactory proposals are received, reserving the right to make a separate contract or separate contracts thereafter for the remaining part or parts.

A fuller description of the said routes is set forth, and other requirements, provisions, details and specifications are stated in the printed form of contract now on file in the office of the Board, No. 320 Broadway, Borough of Manhattan, and in the detailed drawings therein referred to, at which office copies of the contract and of the form of bond and contractor's proposal may be had on application. The contract drawings may be inspected at the same office. The printed form of contract and the detailed drawings are to be deemed a part of this invitation.

The words "the railroad" wherever used hereafter in this invitation are to be construed to mean the part or parts included in any contract entered into in pursuance hereof.

Payments to the contractor for construction will be made monthly as the work proceeds, as provided in the form of contract.

The work of construction (including pipe galleries and the additional tracks and terminal facilities above mentioned) is to be completed as soon as practicable, and within the periods mentioned in the form of contract.

Proposals may be submitted for construction alone; or, at the option of the bidder, for construction, equipment, maintenance and operation.

In case a satisfactory proposal is received from any person, firm or corporation to construct, equip, maintain and operate the railroad, the contract will provide for maintenance and operation for a term of twenty years, and for a renewal thereof for a further term of twenty years from the expiration of the original term, all as stated in the form of contract; the contractor to pay an annual rental for the use of the railroad which shall be ascertained as stated in the form of contract and which shall begin as soon as any portion of the railroad shall be declared by the Board to be ready for operation.

SEALED BIDS OR PROPOSALS WILL BE RECEIVED AT THE SAID OFFICE OF THE BOARD, AT NO. 320 BROADWAY, BOROUGH OF MANHATTAN, CITY OF NEW YORK, UNTIL

THURSDAY, APRIL 25, 1907,

AT 12 O'CLOCK NOON, AT WHICH TIME OR AT A LATER DATE TO BE FIXED BY THE BOARD THE PROPOSALS WILL BE PUBLICLY OPENED.

Proposals shall be in the form prescribed by the Board, copies of which may be obtained at the office of the Board.

Each proposal must be signed and acknowledged and also verified by an affidavit of the bidder (or if it be a corporation then by an officer thereof) to the effect that the several matters therein stated are in all respects true. If the proposal is made by a firm, it will be sufficient if the proposal is signed and acknowledged, and the affidavit sworn to, by one member of the firm.

Each proposal must specify an office within The City of New York at which notices may be delivered; and delivery of a notice at such office shall be deemed a sufficient delivery and notice to the bidder.

Each proposal or bid must contain the name and place of residence of the person or persons making the same, the names of all persons interested with him therein, and if no other person so interested it shall distinctly state that fact; and if the bidder shall be a corporation, there shall be submitted a certified copy of its certificate of incorporation, with a certificate of the amount of stock paid in in cash, and the names and business addresses of all officers and directors of the corporation shall be stated; also, that it is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of the corporation, or any member or employee of the Board, is interested, directly or indirectly, as contracting party, partner, stockholder or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Bidders shall specify separately in their proposals the amounts for which they will construct each separate part as described above; the amounts for which they will construct pipe galleries; and the amounts for which they will construct the additional tracks and station and terminal facilities above mentioned if they bid on Section 5-D-1 or 5-D-3. They may, however, make their bid for any one section of this proposed railroad conditional upon either the ac-

ceptance or rejection of their bid for any one or more of the other sections which they shall specify, or upon the acceptance or rejection of their bids for any other rapid transit railroad construction submitted by them at the same time. The price stated for the construction of each separate part shall include the furnishing of all materials and the performance of all labor requisite to the complete construction of such part, including all sewer and street construction and reconstruction and other work caused by or incidental to the construction of the same as set out in the proposed form of contract.

Bidders who submit proposals to construct and also equip, maintain and operate the railroad must specify in their proposals, in addition to the matters hereinbefore contained, the following:

(A) An estimate of the cost of the equipment of the railroad upon which the proposal is based. The word "equipment" includes motors, cars, machinery, power houses, all real estate upon which any such power houses shall stand, rails, ties, ballast, telephone and telegraph appliances, and other real and personal property as specified in the form of contract. Such equipment is to remain the property of the contractor, but will be subject to a lien of the City to secure performance by the contractor of all the obligations of the contract, including the payment of rental under the lease during its entire term and during any extension thereof.

(B) The maximum fare (not to exceed 5 cents) which will be charged a single passenger for a continuous ride over the whole or any part of the railroad.

(C) What transportation facilities over railways connecting or to connect with the rapid transit railroad the contractor will assure to the City, specifying separately in Schedule "A," forming part of the proposal, the connecting lines over which a continuous trip shall be assured to passengers for a single fare not exceeding 5 cents without change of cars; in Schedule "B," forming part of the proposal, the connecting lines over which a continuous trip shall be assured to passengers for a single fare not exceeding 5 cents, but with or without change of cars at the option of the contractor, and in Schedule "C," forming part of the proposal, the connecting lines over which a continuous trip shall be assured to passengers with or without change of cars at the option of the contractor, for fares exceeding 5 cents per trip but within limitations to be specified.

No proposal will be allowed to be withdrawn for any reason whatever after it shall have been deposited with the Board.

The Board is not obliged by law to accept any of the proposals received by it, but may reject all such proposals and readvertise, or may accept any of such proposals as will in the judgment of the Board best promote the public interest and award a contract or contracts accordingly, subject to approval by the Board of Estimate and Apportionment, as required by law. If any part or parts of the road are not contracted for, the Board reserves the right to make a separate contract or separate contracts thereafter for the remaining part or parts.

The award of the contract or contracts (if awarded) will be made by the Board within fifteen days after the opening of the proposals. The bidder or bidders whose proposal shall be accepted shall in person or by duly authorized representative attend at the said office of the Board within ten days after the delivery of a notice by the Board that the proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment; and such bidder or bidders shall then deliver a contract in the form referred to, duly executed with its execution duly proved.

At the time of the delivery of a contract the contractor will be required to furnish security to the City as follows:

(1) By depositing in cash or approved securities for each part of the road for which the contract is made the following amounts, viz.:

For Section 5-O-1.....	\$125,000 00
For Section 5-O-2.....	125,000 00
For Section 5-O-3.....	125,000 00
For Section 5-A.....	25,000 00
For Section 5-B.....	150,000 00
For Section 5-C-1.....	100,000 00
For Section 5-C-2.....	50,000 00
For Section 5-C-3.....	5,000 00
For Section 5-D-1.....	150,000 00
For Section 5-D-2.....	150,000 00
For Section 5-D-3.....	150,000 00

If the contract covers two or more parts of the road, the deposit shall be the aggregate of the deposits required in respect of each of the several parts contracted for.

(2) By giving a bond in a penalty equal to the amount of the deposit as above required. At the option of the contractor, cash or approved securities may be deposited instead of giving a bond.

If securities are deposited for any purpose under this contract they must be of the character of securities in which savings banks may invest their funds and must be approved by the Board. Bonds must be in one of the forms annexed to the form of contract.

In addition, and as further security to the City, 10 per cent. of each amount certified from time to time to be due to the contractor will be retained until the railroad is completed.

Each bidder must state in his proposal the names and places of business of the proposed sureties on the bond proposed to be given, and describe any securities proposed to be deposited.

Bidders whose proposals are otherwise satisfactory to the Board may, in case the sureties or securities named by them are not approved by the Board, substitute in their proposals the names of new sureties or a different schedule of securities approved by the Board; but such substitution must be made within five days after notice of disapproval by the Board, unless this period is extended by the Board.

In case of failure or neglect to execute and deliver the contract or to make the required deposit or to execute and deliver the required bond, such bidder or bidders will, at the option of the Board, be deemed either to have made the contract or to have abandoned the contract. In the latter case the Board shall give notice thereof to the defaulting bidder or bidders. And the Board may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Board, it will be to the best interest of the City to contract with, or may by new advertisement invite further proposals. The defaulting bidder or bidders shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other contractor over the amount of the bid of such defaulting bidder or bidders, and without abatement by reason of any increase of rental which such excess may produce to the City.

Every proposal must, when submitted, be enclosed in a sealed envelope indorsed "Proposal for Constructing Rapid Transit Railroad (Lexington Avenue Route) Sections—" and must be delivered to the Board or to its secretary; and in the presence of the person offering the proposal it will be deposited in a sealed box in which all proposals will be deposited. No proposals will be received or deposited unless accompanied by a certified check drawn upon a National or State bank or trust company within The City of New York and satisfactory to the Board, payable to the order of the Comptroller of The City of New York, for an amount equal to ten per cent. of the deposit above required to

be made upon the delivery of a contract for construction of the section or sections of the proposed Rapid Transit Railroad to which such proposal relates.

If the Board shall give notice to any bidder that his or its proposal is accepted and the contract is approved by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Board, to execute and deliver the contract and make the deposit in cash or securities, and to execute and deliver the bond with sureties, then this invitation to contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damages by it sustained by reason of such failure, and in such case the bidder hereby absolutely assigns to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

Such check must not be inclosed in the sealed envelope containing the proposal, but must be separately delivered to the Board or to its secretary, who will give a proper voucher for the deposit.

All such deposits made by bidders whose proposals shall not be accepted by the Board will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder or bidders will be returned when the contract is executed and its provisions as to security are complied with.

THE BOARD OF RAPID TRANSIT RAILROAD COMMISSIONERS FOR THE CITY OF NEW YORK.

INVITATION TO CONTRACTORS.

SEVENTH AND EIGHTH AVENUE AND JEROME AVENUE SUBWAY ROUTES.

THE CITY OF NEW YORK (HEREIN after called The City), acting by its Board of Rapid Transit Railroad Commissioners (hereinafter called the Board), contemplates building a rapid transit railroad along the routes described below.

By this advertisement The City invites proposals to construct such railroad upon the routes and in accordance with the detailed plans and specifications adopted therefor. Such proposals may be submitted for any one or more of the fifteen separate parts of which such railroad consists as hereinafter stated. The points within the City between which the said several parts of the said road are to run, and the routes to be followed, are briefly as follows, beginning at the southerly end of the said routes and continuing to the northerly end thereof:

Section 4-D-1: Begins at a terminal under the Battery Park and then runs northerly under Greenwich street to a point thirty feet north of the northerly side of Morris street.

Section 4-D-2: Begins at the northerly end of Section 4-D-1 and runs northerly under Greenwich street and West Broadway to the centre line of Chambers street. This section will also include what is designated as the Barclay street loop.

Section 4-C: Begins at the northerly end of Section 4-D-2 and runs northerly under West Broadway to West Fourth street.

Section 4-B: Begins at the northerly end of Section 4-C and runs under Washington square to the intersection of Waverly place and Macdougall street and then under private property to Sixth avenue near the corner of Clinton place and then under Greenwich avenue to West Eleventh street. It then passes under private property to a point near the corner of Seventh avenue and West Twelfth street and continues northerly under Seventh avenue to a point about half way between Twenty-fifth and Twenty-sixth streets.

Section 4-O-1: Begins at the northerly end of Section 4-B and runs northerly under Seventh avenue to the southerly line of Fortieth street.

Section 4-O-2: Begins at the northerly end of Section 4-O-1 and runs northerly to the northerly side of Forty-third street, passing under the existing subway.

Section 4-O-3: Is an alternative for Section 4-O-2. It begins at the northerly end of Section 4-O-1 and runs northerly so as to afford a suitable connection extending under Seventh avenue at Broadway or Times square to a point near Forty-third street, where a junction can be made with the existing subway.

Section 4-A: Begins near the intersection of the centre line of Seventh avenue with the northerly line of Forty-third street at the northerly end of Section 4-O-2, above described, and runs thence northerly under Seventh avenue to the Central Park, and thence under the Central Park to Central Park West, near the intersection of Sixty-second street.

Section 4-AA-1: Begins at the northerly end of Section 4-A and runs thence under Central Park West to about the centre of the Plaza at the intersection of Central Park West with One Hundred and Tenth street.

Section 4-AA-2: Begins at the northerly end of Section 4-AA-1 and runs northerly under Eighth avenue to a point between One Hundred and Forty-ninth and One Hundred and Fiftieth streets. It then runs under Macomb's lane to One Hundred and Fifty-third street and forms a loop under One Hundred and Fifty-fourth street and private property, coming back to Eighth avenue. It also includes a spur running northerly along Eighth avenue to a point about half way between One Hundred and Fifty-fourth and One Hundred and Fifty-fifth streets.

Section 15-A: Begins at the northerly end of Section 4-AA-2 and runs thence northerly under Eighth avenue and private property to and under the Harlem river, and under private property in the Borough of The Bronx to a point under One Hundred and Sixty-second street west of Ogden avenue. It then continues easterly under One Hundred and Sixty-second street and private property to a point in the westerly side of Jerome avenue about opposite its intersection with the centre line of One Hundred and Sixty-fourth street produced, and thence continues under Jerome avenue to a point about half way between One Hundred and Sixty-fourth and One Hundred and Sixty-fifth streets.

Section 15-AA-1: Begins at the northerly end of Section 15-A and runs northerly under and along Jerome avenue to a point about half way between One Hundred and Eighty-fourth street and Fordham road.

Section 15-AB-1: Begins at the northerly end of Section 15-AA-1, and runs northerly under Jerome avenue to the point of junction of Jerome avenue with Woodlawn road, opposite the Woodlawn Cemetery.

Sections 4-H-1 and 4-H-2 hereinafter described are alternatives for Sections 4-C, 4-B, 4-O-1, 4-O-2, 4-O-3 and 4-A above mentioned. If the said six last mentioned sections, or any of them, are contracted for, Sections 4-H-1 and 4-H-2

will not be included in the contract for which proposals are now invited.

Section 4-H-1: Begins at the northerly end of Section 4-D-2 above described and runs northerly under Hudson street to a point between Eleventh street and Bank street, and then under Eighth avenue to the northerly line of Twenty-third street.

Section 4-H-2: Begins at the northerly end of Section 4-H-1 and runs northerly under Eighth avenue and Central Park West to the point near the intersection of Sixty-second street at which the northerly end of Section 4-A above described is located.

The general plan of construction calls for a railroad placed in subway or tunnels. The road is intended to be operated by electricity or some other power not requiring combustion within the tunnels, and the motors are intended to be capable of moving trains at a speed not less than forty miles per hour for long distances, exclusive of stops. There will be four tracks from the terminal in Battery Park to about One Hundred and Fiftieth street. There will be two tracks in the Macomb's lane loop and two tracks from One Hundred and Fiftieth street and Eighth avenue northerly under the Harlem river and Jerome avenue.

There will be a single-track loop constituting a part of Section 4-D-2 which will begin under West Broadway at a point near Murray and Warren streets and then pass under private property, Greenwich street and Barclay street to a point near the northwest corner of West Broadway and Barclay street.

Suitable stations as shown on the detailed plans, together with crossovers, turnouts and sidings as may be necessary, are also to be provided.

The tracks are to be of standard gauge. The tunnels are to have a height of not less than 13 feet in the clear, and a maximum width of 15 feet for each track, except at stations, curves, etc., where the width may be increased. The roof of the tunnels is generally to be as near the surface of streets as street conditions and grades will permit, but will be depressed whenever necessary to avoid grade crossings as well as where approaching the Harlem river. The roof and sides of the tunnels will be of iron or steel and masonry.

Entrances to stations will in general be placed within private property, rights in which will be acquired for the purpose.

Construction is to be generally carried on by means of tunnelling or excavation under cover, except as may be otherwise specially provided in the contract, or in places where the Board shall give express permission to construct by open excavation. In Battery Park, Washington square and Central Park, or other places under the jurisdiction of the Department of Parks, all trees injured or destroyed in the course of construction are to be replaced by the contractor under the direction and to the satisfaction of said Department.

The Board has included in the detailed plans for construction, provisions for pipe galleries through and along the principal longitudinal streets except in those portions described above as Section 15-A and a part of Section 4-O-2.

Bids for the construction of the railroad on any one or more of these sections must be accompanied by bids for the construction of the pipe galleries appurtenant to such section or sections; and if not so accompanied will not be considered by the Board. The Board reserves the right to accept a bid for the construction of any section of the railroad and at the same time to reject the accompanying bid for pipe galleries.

If proposals satisfactory to the Board are received for the construction of one or more of the several parts of the road as above described, the Board may contract (subject to the approval of the Board of Estimate and Apportionment as provided by law) for those parts for which satisfactory proposals are received, reserving the right to make a separate contract or separate contracts thereafter for the remaining part or parts.

A fuller description of the said routes is set forth, and other requirements, provisions, details and specifications are stated in the printed form of contract now on file in the office of the Board, No. 320 Broadway, Borough of Manhattan, and in the detailed drawings therein referred to, at which office copies of the contract and of the form of bond and contractor's proposal may be had on application. The contract drawings may be inspected at the same office. The printed form of contract and the detailed drawings are to be deemed a part of this invitation.

The words "the railroad" wherever used hereafter in this invitation are to be construed to mean the part or parts included in any contract entered into in pursuance hereof.

Payments to the contractor for construction will be made monthly as the work proceeds, as provided in the form of contract.

The work of construction (including pipe galleries and the additional tracks and terminal facilities above mentioned) is to be completed as soon as practicable, and within the periods mentioned in the form of contract.

Proposals may be submitted for construction alone; or, at the option of the bidder, for construction, equipment, maintenance and operation. In case a satisfactory proposal is received from any person, firm or corporation to construct, equip, maintain and operate the railroad, the contract will provide for maintenance and operation for a term of twenty years, and for a renewal thereof for a further term of twenty years from the expiration of the original term, all as stated in the form of contract; the contractor to pay an annual rental for the use of the railroad which shall be ascertained as stated in the form of contract and which shall begin as soon as any portion of the railroad shall be declared by the Board to be ready for operation.

SEALED BIDS OR PROPOSALS WILL BE RECEIVED AT THE SAID OFFICE OF THE BOARD, NO. 320 BROADWAY, BOROUGH OF MANHATTAN, CITY OF NEW YORK, UNTIL

THURSDAY, APRIL 25, 1907,

AT 12 O'CLOCK NOON, AT WHICH TIME OR AT A LATER DATE TO BE FIXED BY THE BOARD THE PROPOSALS WILL BE PUBLICLY OPENED.

Proposals shall be in the form prescribed by the Board, copies of which may be obtained at the office of the Board.

Each proposal must be signed and acknowledged and also verified by an affidavit of the bidder (or if it be a corporation then by an officer thereof) to the effect that the several matters therein stated are in all respects true. If the proposal is made by a firm, it will be sufficient if the proposal is signed and acknowledged, and the affidavit sworn to, by one member of the firm.

Each proposal must specify an office within The City of New York at which notices may be delivered; and delivery of a notice at such office shall be deemed a sufficient delivery and notice to the bidder.

Each proposal or bid must contain the name and place of residence of the person or persons making the same, the names of all persons interested with him therein, and if no other person be so interested, it shall distinctly state that fact; and if the bidder shall be a corporation, there shall be submitted a certified copy of its certificate of incorporation, with a certificate of the amount of stock paid in in cash, and the names and business addresses of all officers and directors of the corporation shall be stated; also that it is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of the corporation, or any member or employee of the Board, is interested, directly or indirectly, as contracting party, partner, stockholder or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Bidders shall specify separately in their proposals the amounts for which they will construct each separate part as described above; and the amounts for which they will construct pipe galleries. They may, however, make their bid for any one section of this proposed railroad conditional upon either the acceptance or rejection of their bid for any one or more of the other sections which they shall specify, or upon the acceptance or rejection of their bids for any other Rapid Transit Railroad construction submitted by them at the same time.

The price stated for the construction of each separate part shall include the furnishing of all materials and the performance of all labor requisite to the complete construction of such part, including all sewer and street construction and reconstruction and other work caused by or incidental to the construction of the same as set out in the proposed form of contract.

Bidders who submit proposals to construct and also to equip, maintain and operate the railroad, must specify in their proposals in addition to the matters herebefore contained, the following:

(A) An estimate of the cost of the equipment of the railroad upon which the proposal is based. The word "equipment" includes motors, cars, machinery, power houses, all real estate upon which any such power houses shall stand, rails, ties, ballast, telephone and telegraph appliances, and other real and personal property as specified in the form of contract. Such equipment is to remain the property of the contractor, but will be subject to a lien of the City to secure performance by the contractor of all the obligations of the contract, including the payment of rental under the lease during its entire term and during any extension thereof.

(B) The maximum fare (not to exceed five cents) which will be charged a single passenger for a continuous ride over the whole or any part of the railroad.

(C) What transportation facilities over railways connecting or to connect with the Rapid Transit Railroad the contractor will assure to the City, specifying separately in Schedule A forming part of the proposal the connecting lines over which a continuous trip shall be assured to passengers for a single fare not exceeding five cents without change of cars; in Schedule B, forming part of the proposal the connecting lines over which a continuous trip shall be assured to passengers for a single fare not exceeding five cents, but with or without change of cars at the option of the contractor; and in Schedule C, forming part of the proposal the connecting lines over which a continuous trip shall be assured to passengers with or without change of cars at the option of the contractor, for fares exceeding five cents per trip but with limitations to be specified.

No proposal will be allowed to be withdrawn for any reason whatever after it shall have been deposited with the Board.

The Board is not obliged by law to accept any of the proposals received by it, but may reject all such proposals and readvertise, or may accept any of such proposals as will in the judgment of the Board best promote the public interest and award a contract or contracts accordingly, subject to approval by the Board of Estimate and Apportionment, as required by law. If any part or parts of the road are not contracted for, the Board reserves the right to make a separate contract or separate contracts thereafter for the remaining part or parts.

The award of the contract or contracts (if awarded) will be made by the Board within fifteen days after the opening of the proposals. The bidder or bidders whose proposal shall be accepted shall in person or by duly authorized representative attend at the said office of the Board within ten days after the delivery of a notice by the Board that the proposal is accepted and that the contract is approved by the Board of Estimate and Apportionment; and such bidder or bidders shall then deliver a contract in the form referred to, duly executed with its execution duly proved.

At the time of the delivery of a contract, the contractor will be required to furnish security to the City as follows:

(1) By depositing in cash or approved securities for each part of the road for which the contract is made the following amounts, viz.:
For Section 4-D-1..... \$25,000 00
For Section 4-D-2..... 50,000 04
For Section 4-C..... 100,000 00
For Section 4-B..... 100,000 00
For Section 4-O-1..... 60,000 00
For Section 4-O-2..... 20,000 00
For Section 4-O-3..... 20,000 00
For Section 4-A..... 100,000 00
For Section 4-AA-1..... 200,000 00
For Section 4-AA-2..... 200,000 00
For Section 15-A..... 60,000 00
For Section 15-AA-1..... 100,000 00
For Section 15-AB-1..... 100,000 00
For Section 4-H-1..... 200,000 00
For Section 4-H-2..... 175,000 00

If the contract covers two or more parts of the road, the deposit shall be the aggregate of the deposits required in respect of each of the several parts contracted for.

(2) By giving a bond in a penalty equal to the amount of the deposit as above required. At the option of the contract, cash or approved securities may be deposited instead of giving a bond.

If securities are deposited for any purpose under this contract they must be of the character of securities in which savings banks may invest their funds and must be approved by the Board. Bonds must be in one of the forms annexed to the form of contract.

In addition, and as further security to the City, 10 per cent. of each amount certified from time to time to be due to the contractor will be retained until the railroad is completed.

Each bidder must state in his proposals the names and places of business of the proposed sureties on the bond proposed to be given, and describe any securities proposed to be deposited.

Bidders whose proposals are otherwise satisfactory to the Board may, in case the sureties or securities named by them are not approved by the Board, substitute in their proposals the names of new sureties or a different schedule of securities approved by the Board; but such substitution must be made within five days after notice of disapproval by the Board, unless this period is extended by the Board.

In case of failure or neglect to execute and deliver the contract or to make the required deposit or to execute and deliver the required bond, such bidder or bidders will, at the option of the Board, be deemed either to have made the contract or to have abandoned the contract. In the

latter case the Board shall give notice thereof to the defaulting bidder or bidders. And the Board may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Board, it will be to the best interest of the City to contract with, or may by new advertisement invite further proposals. The defaulting bidder or bidders shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other contractor over the amount of the bid of such defaulting bidder or bidders, and without abatement by reason of any increase of rental which such excess may produce to the City.

Every proposal must, when submitted, be inclosed in a sealed envelope indorsed "Proposal for Constructing Rapid Transit Railroad (Seventh Avenue Route, etc.), Sections ——" and must be delivered to the Board or to its Secretary; and in the presence of the person offering the proposal it will be deposited in a sealed box in which all proposals will be deposited. No proposals will be received or deposited unless accompanied by a certified check drawn upon a national or State bank or trust company within The City of New York and satisfactory to the Board, payable to the order of the Comptroller of The City of New York, for an amount equal to 10 per cent. of the deposit above required to be made upon the delivery of a contract for construction of the section or sections of the proposed rapid transit railroad to which such proposal relates.

If the Board shall give notice to any bidder that his or its proposal is accepted and the contract is approved by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Board, to execute and deliver the contract and make the deposit in cash or securities, and to execute and deliver the bond with sureties, then this invitation to contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damages by it sustained by reason of such failure, and in such case the bidder hereby absolutely assigns to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

Such check must not be inclosed in the sealed envelope containing the proposal, but must be separately delivered to the Board or to its Secretary, who will give a proper voucher for the deposit.

All such deposits made by bidders whose proposals shall not be accepted by the Board will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder or bidders will be returned when the contract is executed and its provisions as to security are complied with.

PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
