## **Introduction**

This report describes the City's efforts to ensure minority and women owned businesses have greater access to public contracting opportunities. The reporting period covers program accomplishments for the first two quarters of Fiscal Year 2014 (July 1, 2013 – December 31, 2013). As per the New York City Administrative Code §6-129(l)1, the report is jointly submitted by the Director of the Mayor's Office of Contract Services (MOCS), as City Chief Procurement Officer, and by the Commissioner of the Department of Small Business Services (SBS).

This report summarizes program activity, prime contract and subcontract utilization data for City-certified Minority and Women-Owned Business Enterprises (M/WBE) and Emerging Business Enterprises (EBE), as well as additional data specified in Section 6-129 of the New York City Administrative Code. The report covers contracts that were registered in the first and second quarters of FY 2014, including procurements that were solicited before LL 1 became effective and subject to LL 129.<sup>1</sup> The M/WBE program is administered by SBS and MOCS.

State law requires that a majority of contracts be awarded to responsible vendors that submit the lowest responsive bids or the best proposal. Despite these limitations, the City continues to make great strides in M/WBE utilization. SBS has worked aggressively to expand opportunities for minority and women-owned firms by connecting them to a comprehensive range of programs that provide management training, procurement technical assistance and other resources to help them navigate and compete in the public procurement marketplace. The City's collective efforts have resulted in awarding of more than \$3.7 billion in contracts to M/WBE firms to date.

## **Changes to the M/WBE Program**

LL 1 strengthened the City's M/WBE program by eliminating the \$1 million cap on contracts to which participation goals apply, significantly increasing the overall number and value of contracts subject to participation goals. Additional changes include: changes to goals in certain ethnic and gender categories the establishment of M/WBE participation goals on all services contracts (construction, professional and standard services); the elimination of goals for goods on contracts valued over \$100,000; the elimination of the Target Subcontracting Percentage (TSP) for the purposes of goal setting; and the establishment of

---

<sup>1</sup> LL 1 amended the law that created the City's M/WBE program, LL 129 of 2005. The new law took effect on July 1, 2013.

participation goals for women in construction services. As the TSP was eliminated, under LL 1 agencies establish one M/WBE participation goal on eligible contracts after determining availability of M/WBEs to perform the work in question.

The new law also increased accountability for City agencies to meet their contracting participation goals, including: quarterly reporting requirements; the creation of an M/WBE Director position that will oversee agency compliance with M/WBE utilization goals and who will convene quarterly meetings with M/WBE officers to discuss agency performance in attaining such goals; and the creation of Performance Improvement Plans for agencies that fail to achieve their annual utilization goals. Finally, the law requires SBS to expand the online directory of certified firms and to perform site visits in connection with certification.

LL 1 became effective on July 1, 2013. This means that the changes to the program applied to solicitations issued after that date, including the elimination of the \$1 million cap and inclusion of standard services for subcontractor participation goals, etc. Solicitations issued prior to July 1 are subject to the requirements of LL 129, meaning, for example, that procurements valued at greater than \$1 million fell outside of the M/WBE program and M/WBE participation was limited to construction and professional services subcontracts valued under \$1 million. During the first two quarters of FY 2014, 99% of the value of all reported prime contracts were subject to LL 129.

### **Expanding the Base of Certified Firms**

SBS continues to increase the participation of M/WBE firms in City contracting by expanding its base of certified firms. During the certification process, a company's ownership and management structure is thoroughly reviewed to ensure the applicant performs the key functions of the business. Minority-owned and women-owned firms who choose not to certify with the City are neither tracked, nor measured, in the City's performance reporting. To that end, SBS has worked hard to simplify certification without compromising review standards. Businesses can apply for M/WBE certification online and track the status of their application using the NYC Business Express website available at <http://nyc.gov/BusinessExpress>. SBS also regularly conducts classes to educate small businesses on the certification process and application requirements. During the first six months of FY 2014, SBS conducted 10 certification workshops for 155

businesses. As part of new LL 1 requirements, SBS will be conducting site visits at firms seeking certification, to support the review process and ensure compliance with certification eligibility criteria.

Various community partners help extend the reach of SBS's certification outreach efforts. Businesses can rely on these organizations, including the New York City Council-funded community-based groups that comprise the M/WBE Leadership Association, and the SBS network of Business Solutions Centers located throughout the five boroughs, for assistance in applying for certification. These efforts ensure a higher quality application, making the submission and the certification review process easier and simpler. Between July and December, SBS certified 190 new M/WBEs and recertified 257 M/WBEs, bringing the number of City-certified companies to 3,670 as of January 1, 2014. Our community partners help support the business growth of M/WBEs with marketing workshops, networking events, and business development services. During the reporting period, SBS collaborated with local development corporations, trade associations, industry membership organizations and local chambers of commerce on 41 events to spread the word about the benefits of certification and the range of capacity-building services available citywide to help businesses grow.

### **Emerging Business Enterprise Program**

In 2005, the New York City Council introduced legislation to create a disadvantaged business enterprise program for the City called the "Emerging Business Enterprise program" (or "EBE program") and was signed into law by Mayor Bloomberg as Local Law 12 of 2006 ("LL 12"). Although similar outreach approaches and capacity building initiatives were and continue to be undertaken by SBS to successfully implement the M/WBE and EBE Programs (SBS often targets potential M/WBE and EBE groups simultaneously), the outcomes of such measures are quite different. Consistent with the federal DBE program, eligibility for EBE certification under the City's program requires that applicants satisfy a two prong test of economic disadvantage and social disadvantage. Where social disadvantage is presumed for M/WBEs and further evaluation of social or economic disadvantage criteria is not required for those individuals, the City's EBE program criteria relies on individual and specific determinations of an applicant's disadvantage.

Since inception of the program, 25 applications have been received, and a total of two firms are currently certified as EBEs. Unlike the M/WBE program, limited participation in the EBE Program has made it difficult for City agencies to set goals on contracts. Nevertheless, four contracts (two prime contracts and two

subcontracts) were awarded to an EBE certified firm for a total of \$1,556,576 during the reporting period. See Appendix Tables A, B, E, F, I, J, O and P).

SBS continues to strive towards increasing participation in the EBE program through a wide range of outreach efforts regularly conducted with businesses and community partners. Once increased participation in the EBE program is achieved, City agencies will have sufficient availability of certified firms needed to set feasible goals on their contracts.

## **Selling to Government**

SBS offers M/WBEs selling to government services that help them navigate the City's procurement system. Services are provided through a combination of workshops, courses and one-on-one assistance. To be an effective bidder on City contracts, M/WBEs need to understand the City's procurement rules and maintain the most up-to-date information on their profile in SBS' Online Directory of Certified Businesses ([www.nyc.gov/buycertified](http://www.nyc.gov/buycertified)) and other City procurement systems. In the first two quarters of FY 2014, SBS worked with 124 certified companies to help them understand the City's procurement process and to update their contact information and business profiles. In addition, SBS conducted 163 one-on-one sessions with M/WBEs to provide assistance for responding to contract opportunities, and contract management assistance, including resolution of payments issues. For M/WBEs, it is vital to find the agencies that buy their products and services. In the first six months of FY 2014, SBS informed and connected over 1,690 M/WBEs to contracting opportunities.

During the reporting period, 56 companies attended SBS' regularly scheduled workshop "Selling to Government" – a monthly workshop open to the public that provides firms with the basic concepts of government contracting. SBS also works with the New York City Council through the M/WBE Leadership Association to provide certified firms with more capacity-building services, including help applying for loans and surety bonds, preparing bids and proposals, and marketing to both the public and private sector. In the first two quarters of FY 2014, member organizations sponsored 47 events and hosted 918 one-on-one technical assistance sessions.

As part of technology enhancements to support implementation of LL 1, SBS has been updating the Online Directory of certified businesses. Agencies and prime contractors can now see union affiliations and

bonding levels of certified firms. Searching by company name has been made more flexible, and buyers can also search for firms that are certified as both minority and women owned. In addition, SBS will be able to collect and display more work experience information for certified companies, including the percent of work that was self-performed and specific data pertaining to construction companies.

## **Program Expansion**

**Compete to Win** is a set of capacity building programs for M/WBEs and small businesses administered by SBS. This set of services is designed to help M/WBEs win more contracts with the City and consists of the following services:

Through **Technical Assistance**, firms receive assistance on submitting bids and proposals for City contracts through workshops and one-on-one assistance. Firms receive an introduction to specific industry requirements and standards for the submission of bids and proposals. One-on-one assistance provides firms with guidance on how to improve unsuccessful submissions. SBS has partnered with several city agencies, including HPD, DPR, HRA and DCAS to help M/WBEs submit stronger bids and proposals to increase certified firms' chances of winning. SBS assisted 243 firms in the reporting period.

**Upfront Capital Loan** helps address the challenge that small businesses have in funding initial expenses, or mobilization costs, relating to City contracts (regardless of industry), such as labor and equipment costs. Short-term working capital loans are made available to firms that are awarded City contracts through partnerships with New York Business Development Corporation and Business Outreach Center Capital. Four firms were awarded \$383,221 during the reporting period.

**Bond Readiness** provides construction companies with financial management skills to help them secure surety bonds necessary to compete on City contracts. The service consists of classroom training and one-on-one assistance. During the reporting period, SBS recruited 32 firms to participate in the 2013-2014 class, which started in October 2013.

**NYC Construction Mentorship** provides certified construction firms with greater access to City construction opportunities. Firms receive a customized curriculum of classroom instruction, one-on-one assistance, and an assessment to help them grow their business. In the reporting period, 34 firms received \$8.2 million in contracting opportunities with participating agencies. Firms won 6 contracts with DPR valued at \$8 million

and 28 contracts with HPD valued at \$214,000. During this period, SBS also recruited 48 firms to participate in the 2013-2014 class, which started in October 2013.

Through **NYC Teaming**, M/WBEs and other small businesses learn how to partner with other firms to bid on larger or new markets contract opportunities. In partnership with American Express OPEN, the division of American Express that provides assistance to small business owners, SBS offers a series of workshops and webinars that cover topics such as different types of teaming arrangements, financial and legal issues, responding to RFPs and bids and marketing to potential partners. The series culminates in a matchmaking event that facilitates industry-specific networking, brings firms together with City agency procurement representatives and prime contractors, and provides open RFPs and bids for participants to review with potential partners. NYC Teaming did not have programming activities in the reporting period.

The **Corporate Alliance Program (CAP)** helps connect firms with contracting opportunities in the private sector in collaboration with eleven corporate partners. Becoming a supplier to a large corporation is a major step forward for any small business, providing not only income but credibility, stability, and business relationships that come with experience. With its CAP partners, SBS launched a training series that addresses key issues small businesses face when trying to break into the corporate supply chain. Since the program launched, CAP has held fourteen workshops on “Navigating the Corporate Supply Chain” attended by more than 500 minority and women-owned businesses. 77 firms have graduated from the CAP/Columbia University Construction Mentorship Program launched in 2008.

**Strategic Steps for Growth** is a nine-month executive education program designed for M/WBEs, offered in partnership with the Berkley Center for Entrepreneurship & Innovation at the NYU Stern School of Business. An industry-specific class is also offered for business owners in the media & entertainment fields. The program provides participants with a new professional network, including business experts, university professors, and other business owners, and offers support for every aspect of business operations as well as a focus on capacity-building for City and government contract opportunities for the enrolled M/WBEs and on private-sector opportunities for the enrolled media & entertainment firms. Participants learn the strategic skills needed to run a growing company, and create a custom, three-year growth plan for their businesses. Since the program began in 2010, based on self-reported data from an annual survey conducted each calendar year, 55 M/WBE graduates of four classes have collectively reported securing \$6.4

million in new financing (including loans and lines of credit), creating over 330 new jobs and winning more than \$92 million in government contract awards (City, state and federal) as of December 31, 2012.

## Program Compliance

SBS is currently finalizing a compliance audit of 5% of FY 2012 prime contracts with target subcontracting percentage, and 5% of subcontracts awarded to M/WBE firms. 14 prime contracts and 12 subcontracts are being audited for the covered period. The findings from the FY 2012 audit will be reviewed and shared with the participating agencies, to promote compliance with the program requirements, both by City agencies and prime contractors.

LL 1 establishes the designation of a “Director”, to perform enhanced oversight functions. Former Deputy Mayor Caswell Holloway was appointed the first Director. As required by the law, he convened agency M/WBE officers and commissioners to the first quarterly M/WBE compliance meeting to discuss FY 2013 M/WBE utilization and agency performance. The meeting took place on October 23, and was attended by 41 staff members representing 19 agencies.

## Qualified Joint Venture Agreements

During the first two quarters of FY 2014, two certified M/WBEs participated in one qualified joint venture agreement, in which the percentage of profits to the M/WBE vendor exceeded 25% of the total profit. The joint venture contract was awarded in Professional Services (Architecture/Engineering) industry. Both partners were certified M/WBEs - Black American and Asian American companies.

Industry	Total Dollar Value	Number of contracts	Ethnicity	Value to M/WBE	Percent
Architecture/Engineering	\$806,142	1	Black	\$403,071	50%
Architecture/Engineering	\$806,142	1	Asian	\$403,071	50%

## **Locally-based Enterprise Program**

Although the Locally Based Enterprises (LBE) program is not referenced in Administrative Code §6-129, LBE is a certification category administered by SBS and the applicability of the LBE program in City procurement is impacted by the MWBE program. When first established, the LBE program was designed to promote the growth of small construction firms through greater access to contracting opportunities with the City. Generally, the program requires agencies to utilize LBEs as prime or subcontractor on specific construction contracts. However, the number of contracts subject to the LBE program has substantially decreased in recent years due to other goal setting programs established by the City, State and federal government. Under the LBE program rules, contracts are excluded from the program if they are federally or State funded and their requisite goal programs apply. Federal construction is generally subject to the Disadvantaged Business Enterprise program and State contracts are subject to various goals requirements as well, including Article 15-A of the New York State Executive Law. As many City construction contracts are federally and State funded and subject to subcontracting goals under those programs, they are not covered by the LBE program. With the creation of the City's M/WBE program, M/WBE subcontracting goals are applied to City funded construction contracts in lieu of LBE goals. Accordingly, this further limits the applicability of the LBE requirements. With the support of the Council, we have worked to ensure that M/WBE goal requirements are attached to these contract opportunities.

During the first two quarters of FY 2014, SBS certified 4 firms as LBEs, bringing the total number of LBE certified firms to 41. Many of our LBEs are also certified as minority and women owned businesses and can be considered for targeted subcontracting opportunities on City construction projects. During the reporting period, LBEs won \$2,072,906 in prime and subcontract awards (only \$287,279 was awarded to LBEs that are not M/WBEs).

## **Efforts to Reduce or Eliminate Barriers to Competition**

Since the implementation of the M/WBE program, the City has undertaken a number of efforts to reduce barriers for M/WBEs and small businesses that are competing for contracts and currently doing business with the City. As mentioned above, SBS launched a bond readiness program to help firms secure surety bonds for larger City construction projects, and enrolled the second class for this program in the reporting period.

In July 2013, the City raised the dollar limit from \$5,000 to \$20,000 for micro purchases, a type of procurement under which agencies may buy goods, services or construction from any available vendor at a fair price, without formal competition. Micro purchases are an area where agencies have consistently achieved high M/WBE utilization, and this change will make procuring from qualified certified firms easier.

To make it easier to do business with the City, agencies are required to post all solicitation materials through the City Record Online, allowing vendors to identify opportunities and download relevant materials from one convenient, online location. SBS also continues to assist companies in expediting their payment requests from prime contractors and City agencies.

## **Prime Contracts**

Table 1 below summarizes prime contracts awarded by City agencies' during the first and second quarters of FY 2014. M/WBEs were awarded almost \$180 million in prime contracts in this reporting period. The prime contracts in this table include industries and awards pursuant to methods subject to the M/WBE program.

Certain procurement methods are excluded from the M/WBE program – i.e., emergency procurements, intergovernmental procurements, interagency and government-to-government procurements, and sole source procurements. See, NYC Administrative Code § 6-129(q) (iii)-(vi). In addition, all human services contracts, contracts to non-profit organizations and procurements where state or federal funding restrictions either preclude the imposition of local goals or override local goals by imposing analogous state or federal goals are also excluded. See § 6-129(q)(i)-(ii). The subsequent discussion of M/WBE performance only includes contracts subject to the M/WBE Program.

As required by LL 1, the M/WBE performance data (see Appendix – Tables A - P) is summarized separately for each of the following categories: MBE, WBE, minority women (both MBE and WBE certified), and total M/WBE. MBEs include all minority owned businesses, regardless of gender. WBEs include all women-owned businesses regardless of race.

In those areas of procurement where agencies have greater discretion to target procurements to M/WBEs, (i.e., micro purchases and small purchases), M/WBE utilization remains strong. In July of 2013, the Procurement Policy Board changed the micro purchase level from \$5,000 to \$20,000, increasing the value

of contracts that agencies may award without competition. By the end of the second quarter of FY 2014, M/WBEs had been awarded almost \$14.5 million worth of micro purchases, or 26% of the dollar value of all such awards. Additionally, for small purchases (purchases valued between \$20,000 and \$100,000) the M/WBE utilization rate was 32% of the dollar value of all such awards (almost \$15 million awarded).<sup>2</sup>

Table 1 – FY 2014, 1 <sup>st</sup> and 2 <sup>nd</sup> Quarter Utilization – Prime Contracts Subject to the M/WBE Program

<sup>2</sup> The strong and continuing improvement in small purchase participation correlates with a policy change promulgated in the City's Procurement Policy Board (PPB) rules in FY 2009. This change enhanced M/WBEs' ability to compete effectively for small purchases by increasing the number of small purchases that were solicited solely from competitors (M/WBE and non-M/WBE) drawn randomly from City bidder lists.

During the reporting period, contracts valued at more than \$100,000, but below one million dollars, had an M/WBE utilization rate of 10% of the total dollar value of all such awards (which represents over \$10 million). For contracts valued above one million dollars, the M/WBE utilization rate was 2% (valued at almost \$140 million). However, there was robust M/WBE utilization on contracts valued between \$1 million and \$5 million: M/WBEs obtained 22% of the dollar value of such awards. There were a low number of contracts with a value greater than \$5 million awarded overall in the reporting period (101 contracts). Of those, five contracts were awarded to M/WBEs. Agency-by-agency and certification category details corresponding to the table above are included in the Appendix to this report (Tables A - B).

Of the total of 14,784 prime contracts awarded during the first half of FY 2014, 13,679 were subject to LL 1, though the vast majority (13,420) were micro purchases and therefore, valued at \$20,000 or less. Although these LL1 contracts represent 93% of all prime contracts awarded in the reporting period, they only represent 1% of the total dollar value. Only 28 prime contracts valued above \$100,000 were awarded during the reporting period. MWBEs won 12% of contract value of such awards valued between \$100,000 and \$1 million, and 16% of contract value of awards above \$1 million. For more details, see Appendix – Tables E - F.

Most prime contracts reflected in the data (except the professional services contracts, for example) are required by New York State law to be procured via competitive sealed bid. Under General Municipal Law (GML) § 103, agencies must, for the overwhelming majority of the contracts covered by the program, accept the lowest responsible bid and may not give a bidder preference because of its M/WBE status. City agencies' efforts to achieve their prime contract M/WBE participation goals are thus limited to such means as increased outreach and training aimed at encouraging M/WBEs to bid successfully on various procurements. Even for work not covered by GML § 103, such as professional services contracts, GML § 104-b precludes agencies from pursuing social policy goals unrelated to the procurement of goods and services, including M/WBE status. Thus, the City wide goals for prime contract awards must be viewed as aspirational and agencies' performance may only be evaluated in terms of their efforts to make progress toward achieving the goals in light of the limited tools available to them for that purpose.

The M/WBE program does not cover all of the City's procurements. In keeping with Federal constitutional case law, the program is "narrowly tailored" to address the gender and race/ethnic-based disparities identified in a study commissioned by the New York City Council and released in 2005 (and later updated by

the City in 2011 to support the changes codified in LL 1). For procurements with Federal and State funding, agencies must comply with either the Federal Disadvantaged Business Enterprise (DBE) program or the Empire State M/WBE program.

### Prime Contracts with M/WBE Participation Goals

Under the M/WBE program, larger prime contracts with anticipated subcontracting are subject to participation goals. During the reporting period, agencies awarded 144 new prime contracts subject to M/WBE participation requirements (under either LL 129 or LL 1). As mentioned above, M/WBE participation goals for individual procurements are established differently under LL 129 and LL 1 due to the elimination of the \$1 million cap, the Target Subcontracting Percentage and the inclusion of standard services in subcontracting goals. In order to present the data in the most transparent manner, this section of the report presents data concerning M/WBE subcontracting participation goals by the local law that applied to the procurement. Accordingly, prime contracts with M/WBE subcontracting participation goals that were solicited before July 1, 2013 and subject to LL 129,<sup>3</sup> are presented separately from such contracts solicited after that date, which are subject to LL 1.<sup>4</sup>

As shown in Table 2, agencies registered 127 contracts subject to M/WBE participation goals during the reporting period that were solicited prior to July 1, 2013, and therefore subject to the participation requirements as established by LL 129. For more details, see Appendix – Tables G - H.

---

<sup>3</sup> LL 129 sets subcontracting goals for prime contracts in the construction and professional services areas only. These goals apply to prime contracts regardless of value, but may only be set for subcontracts valued below one million dollars. Subcontractor participation goals are set for three groups (Black American, Hispanic American and women owned firms) in the professional services area, but not for Asian American firms. Similarly, in construction, goals are set for three groups (Black American, Hispanic American and Asian American owned firms), but not for women owned firms. Each of these exclusions stems from the City's 2005 disparity study, which failed to identify any statistically significant procurement disparities in those areas. Similarly, the study did not find statistically significant disparity for M/WBEs in subcontracts for standardized services.

<sup>4</sup> Under LL 1, M/WBE subcontractor participation goals may be set on construction, professional and standard services contracts for all ethnic and gender categories with the exception of Asians in professional services.

## Subcontracts

There was strong M/WBE utilization in approved subcontracts during the reporting period. As shown in Table 4, 51 prime contracts that were registered during the reporting period and that were subject to goals established pursuant to LL 129 yielded a total of 268 subcontract approvals. Of the 268 approved subcontracts, 110 were awarded to M/WBE firms. The subcontracts awarded to M/WBEs represent 49% of the value of all qualifying subcontracts. For more details, see Appendix – Table K - L.

Table 4 - FY 2014, 1st and 2nd Quarter - Approved Subcontracts on FY 2014 Registered Primes Subject to Participation Goals - LL 129 Contracts									
Prime Contracts			Subcontracts						
Industry	#	\$	Sub Industry	Size Group	Total M/WBE			Total	
					#	\$	%	#	\$

				>\$20K, <=\$100K	3	\$249,923	100%	3	\$249,923
				>\$100K, <=\$1M	3	\$1,304,387	93%	4	\$1,405,032
<b>Total</b>	<b>51</b>	<b>\$253,039,519</b>	<b>Total</b>	<b>110</b>	<b>\$13,449,441</b>	<b>49%</b>	<b>268</b>	<b>\$27,259,390</b>	

As shown in Table 5, of the 17 prime contracts that were subject to LL 1 participation goals, two prime contracts had approved subcontract awards. These two contracts yielded a total of seven subcontracts, two of which were awarded to M/WBE firms. The subcontracts awarded to M/WBEs represent 37% of the value of all qualifying subcontracts. For more details, see Appendix – Table M - N.

Table 5 - FY 2014, 1st and 2nd Quarter - Approved Subcontracts on FY 2014 Registered Primes Subject to Participation Goals and Solicited After July 1, 2014									
Prime Contract			Subcontract						
Industry	#	\$	Sub Industry	Size Group	Total M/WBE			Total	
					#	\$	%	#	\$

				>\$100K, <=\$1M	1	\$693,000	37%	3	\$1,867,800
			Professional Services	<=\$20K	1	\$2,500	100%	1	\$2,500
			Standard Services	<=\$20K	0	\$0	0%	1	\$165
<b>Total</b>	<b>2</b>	<b>\$2,767,367</b>	<b>Total</b>	<b>2</b>	<b>\$695,500</b>	<b>37%</b>	<b>7</b>	<b>\$1,871,015</b>	

It is worth noting that for many of the covered contracts, especially in the construction arena, considerable subcontracting activity occurs in later phases of projects. Longer term trends can be derived from a review of the active prime contracts registered between FY 2007 and the second quarter of FY 2014 that were subject to M/WBE participation goals as established pursuant to LL 129. As shown in Table 6, these open contracts yielded a total of 488 subcontracts of which 180 were awarded to M/WBEs. Among such approved subcontracts, the share of the total dollar value awarded to certified M/WBE firms was a strong 42% of all qualifying subcontracts. For more details, see Appendix – Table O - P.

## Waivers

During the reporting period, vendors sought a total of 128 requests for waivers of the M/WBE participation requirements. Of those requests, 19 were denied, while 61 were approved as full waivers and 48 were approved as partial waivers, see Appendix – Table Q. Since waivers may be granted only to vendors that demonstrate both the capacity to perform the prime contract without subcontracting and a prior contracting history of doing similar work without subcontracting, some of the waivers that were granted involved repeated requests from the same firms, as they sought multiple bidding opportunities. Thus, the 109 full and partial waivers were granted to a total of only 51 individual firms. Waivers are determined during the pre-bid stage of the procurement. Thus, most of the vendors that received waivers did not ultimately win the contracts for which they were competing.

During the reporting period, a total of 7 contracts were registered where a winning vendor obtained either a full or partial waiver of the TSP.

- VERNON HILLS CONTRACTING CORP. received a partial waiver from the 31% TSP originally specified by the Department of Parks and Recreation (DPR) to 17%. This contract was registered on July 5, 2013 (Registration number CT184620131429117).
- A RUSSO WRECKING INC received a partial waiver from the 16% TSP originally specified by the Department of Housing and Preservation and Development (HPD) to 11%. This contract was registered on October 9, 2013 (Registration number CT180620141406033).
- A RUSSO WRECKING INC received a partial waiver from the 10% TSP originally specified by the HPD to 3%. This contract was registered on December 10, 2013 (Registration number CT180620141410582).
- HALCYON CONSTRUCTION CORP received a partial waiver from the 30% TSP originally specified by the DPR to 12%. This contract was registered on July 11, 2013 (Registration number CT182620131430258).
- EN-TECH CORP received a full waiver from the 3% TSP originally specified by the Department of Design and Construction. This contract was registered on July 11, 2013 (Registration number CT185020131429778).
- NEDERMAN, LLC received a partial waiver from the 10% TSP originally specified by the Fire Department to 5%. This contract was registered on November 21, 2013 (CT105720141404833 Registration number).
- The RAND CORPORATION received a full waiver from the 15% TSP originally specified by the Human Resources Administration (HRA). This contract was registered on October 2, 2013 (Registration number: MMA106920146200256).

## Large-Scale Procurement Approvals

Prior to soliciting procurements with an anticipated value of over \$10 million, City agencies are required to seek MOCS approval to determine whether it is practicable to divide the proposed contract into smaller contracts and whether doing so would enhance competition among M/WBEs. During the reporting period, there were 63 registered contracts for which MOCS conducted large-scale procurement reviews. A full list is shown below. The value of the 63 approved contracts shown in the table below is almost \$6 billion dollars.

Approximately 69% of the large scale approvals in the first and second quarters of FY 2014 fell into one category: unique/unusual good or service. These approvals were for projects in which separate and smaller contracts would not enhance M/WBE opportunities.

Table 7 - FY 2014, 1st and 2nd Quarter - Large Scale Procurements

### Complaints, Modifications and Noncompliance

There were two findings of noncompliance during the reporting period. The prime contractor was unable to fulfill its M/WBE subcontracting requirements on two “as needed emergency sewer repair contracts” initially awarded by DDC and later transferred to DEP. The contractor asserted that the reason why they failed to meet their participation goals was because work orders issued under the contracts did not require sufficient work initially identified for M/WBE subcontractors (“as needed” contracts have a general scope of services, with specific assignments determined through subsequently issues work orders). The contractor failed to timely apply for a post-award modification for these two contracts and given the complexities associated with a procurement initiated by one agency and transferred to another, the City failed to closely monitor the contractor’s progress in meeting its M/WBE goals and to work with the vendor to identify other ways to meet its goals. MOCS found that because the contractor may have qualified for a post award modification and has surpassed its M/WBE participation requirements on all its other contracts, it was not in the City’s best interest to issue an enforcement action given the complications associated with the transfer of the contract from one agency to another.

## Appendix – Additional Data for the First Two Quarters of FY 2014
