## DEPARTMENT OF HEALTH.

### REPORT FOR THE WEEK ENDING AUGUST 16, 1913.

### NEW PROCEDURE IN RELATION TO CONTAGIOUS DISEASES.

A circular of the Department of Health describing the present procedure in the surveillance of diphtheria, scarlet fever and measles, which is now being printed, will shortly be ready for delivery and distribution by the nurses and inspectors of the Division of Infectious Diseases to parents and guardians of children suffering from these diseases. In the meantime, in order that physicians, particularly, may take note of the changes in procedure, the circular is printed in this issue of the Weekly Bulletin. The most noteworthy changes in procedure which are indicated in the new circular are as follows:

1. Insusceptible persons (those who have had diphtheria, measles or scarlet fever), will not be excluded from school while a case of infectious disease still exists at home, providing isolation is being satisfactorily carried out.

2. Cases of measles will be terminated five (5) days after the appearance of the rash, provided such a course is warranted by the clinical condition of the case.

The circular, as prepared for general distribution, will be printed on heavy buff cards, with brass-bound perforations at the top so that the card may be suspended for ready reference. These cards will be printed in English on one side and in either German, Italian or Yiddish on the other side. The circular will read as follows:

### HOW TO KEEP FROM GETTING AND SPREADING CONTAGIOUS DISEASES.

Diphtheria, scarlet fever and measles are very contagious diseases, and are communicated by the patients, or by articles that have recently come in contact with them, especially in the case of diphtheria and scarlet fever.

These diseases must be considered contagious so long as patient is quarantined (kept away from the rest of the family) by the Department of Health.

The contagion is mainly carried by the discharges from the nose and mouth.

To keep from getting these diseases you must keep away from patients who have them.

To keep from spreading these diseases, the sick person must be kept in one room to which no other persons are admitted except the doctor, nurse or attendants.

### Return to School.

If quarantine is observed, the other children and teachers in the family who are insusceptible (have had the disease), or who have no diphtheria bacilli in their throats (as shown by culture) and have been immunized, are not excluded from school. If they are susceptible, they must reside for a suitable period at another address before being allowed to return to school (scarlet fever for five days; measles for fourteen days).

After ending of quarantine, a school certificate will be issued to the patient by the Department of Health Nurse, and other children in the family who have remained on the premises but have not had the disease, can then return to school (after five days in scarlet fever; fourteen days in measles).

### Diphtheria.

Patients suffering from diphtheria must be quarantined until a culture from the nose and throat no longer shows diphtheria bacilli.

If antitoxin is given on the first day and in large enough dose, 99 out of 100 patients get well.

All other persons in family should be protected against the disease by the immediate injection of small doses of diphtheria antitoxin. If cultures from their throats do not show diphtheria bacilli, and quarantine is satisfactory, they may then return to school.

### Scarlet Fever.

Patients suffering from scarlet fever must be quarantined until declared well by a Department doctor.

This will be in from four to six weeks.

### Measles.

Patients suffering from measles will be quarantined until five days after appearance of the rash, if otherwise well.

The chief danger is pneumonia. To avoid it, see that the room is properly ventilated and doctor's orders carefully observed.

### Precautions.

During the illness all unnecessary furniture, such as curtains, carpets and pictures should be removed from the sick-room.

Dogs, cats and other pets should be kept out of the sick-room, as they often carry the disease to others.

Discharges from the mouth, throat and nose should be received on cloths and immediately burned or boiled.

Bed linen, towels, napkins, etc., should be disinfected by soaking in a solution of 2½ per cent. carbolic acid. This should be done before goods are removed from sick-room. These goods should then be boiled in soap suds for one-half hour. The patient's night gowns, sheets, etc., should be soaked in the solution of carbolic acid and washed in hot soap suds.

Dishes and utensils used by the patient should be kept in the sick room until recovery, unless scalded with boiling water before removal.

The nurse or attendant, while in the sick-room, should wear a special gown or other outer garment, completely covering her clothing. On leaving the room, she should soak her hands in a disinfecting solution and then wash them in hot soap suds.

Urine and stools, immediately after being received in a vessel, should be covered with an equal quantity of a solution of one tablespoonful of chloride of lime in one quart of water, and allowed to stand fifteen minutes before emptying.

Upon recovery, the patient should be bathed and hair washed in warm soap suds, then dressed in clean clothes which have not been in the sick-room.

## Disinfection After Illness is Over.

In scarlet fever, when patient recovers, the Department of Health fumigates the rooms and bedding used by the patient. In private houses this may be done under the supervision of the family physician, but he must furnish a certificate to that effect. In diphtheria and measles, when the patient recovers, the sick-room must be thoroughly cleaned and aired. All woodwork and floors in the sick-room should be scrubbed with a hot solution of one pound of washing soda to three gallons of hot water. The patient's night gown, sheets, etc., should be first soaked in the carbolic solution and then boiled in soap suds for one-half hour. Books and toys used by the patient should be destroyed by burning.

If the patient dies or is removed to a hospital, the room with all its contents must be immediately closed up until fumigated by the Department of Health.

If the patient dies, burial within twenty-four hours is required. None but the immediate members of the family may attend the services which must be held at the house.

The Department of Health, in order to prevent the spread of the above diseases—

1. Placards the door of the premises.
2. Excludes from school all susceptible persons living in quarantined premises.
3. Prohibits work of any kind being done in the rooms of the family, such as tailoring, laundering, etc. Closes stores that have connection with the sick-room.
4. Compels susceptible persons living in infected premises whose occupation has to do with milk or food, to stop work or reside elsewhere.

A Nurse of the Department of Health visits the premises at suitable intervals to see that the above regulations are complied with. If they are disobeyed, the Department of Health will, in its judgment, remove the patient to one of its hospitals.

## DEATH RATE FOR WEEK ENDING AUGUST 9, 1913.

During the past week there were reported 1,390 deaths against 1,269 deaths during the corresponding week of last year, the respective rates being 13.50 and 12.73. This increase of 121 deaths and .77 in the rate is to be attributed to the exceptionally warm weather that prevailed during the past week, the mean temperature for the week being approximately 8 degrees higher than that of the corresponding week of last year. This is borne out by the increased number of deaths reported from diarrhoeal diseases and sunstroke. There was also an increase of 36 deaths from violence, under which heading falls from windows and fire-escapes, accidental drownings, and other deaths which may be indirectly attributed to the warm weather, are included. The increased number of deaths from diarrhoeal diseases is reflected in the number of deaths of children under one year of age, which heading shows a slight increase. Deaths from heart diseases show an increase of 35 deaths, although this is somewhat offset by the reduction in the number of deaths reported from Bright's disease and nephritis. There was a slight increase in the number of deaths from measles, but the other infectious diseases showed a reduction.

Notwithstanding the fact that the death rate for the past week was .77 of a point higher than the death rate for the corresponding week of last year, there were relatively only 79 more deaths, when we take into consideration the increase in the population.

The death rate for the first 32 weeks of 1913 is lower than that for the corresponding period of last year, the rates being 14.57 and 14.74, respectively.

## DEATH RATE FOR WEEK ENDING AUGUST 16, 1913.

During the week just ended there were 1,250 deaths reported with a rate of 12.14, against 1,362 deaths with a rate of 13.73 for the corresponding week of last year. There were actually 112 fewer deaths; but if the increase of the population is taken into consideration, there was a saving of 160 lives. The deaths from diarrhoea were 42 fewer; the deaths under one year of age also show a gratifying decrease. There were no deaths reported from sunstroke. There were 4 more deaths reported from pulmonary tuberculosis than were reported during the corresponding week of last year. The rate, however, is lower for the past week. Comparing the past week with the week ending August 9, 1913, there were 140 fewer deaths reported, the reduction in the number of deaths from diarrhoeal diseases and of deaths under one year of age being largely responsible for this reduction in the mortality. The death rate for the first 33 weeks of 1913 is lower than that of the corresponding period of 1912, the rates being 14.57 and 14.79 respectively.

#### NOTICE TO BIDDERS AT SALES OF OLD BUILDINGS, ETC.

TERMS AND CONDITIONS UNDER WHICH BUILDINGS, ETC., WILL BE SOLD FOR REMOVAL FROM CITY PROPERTY.

THE BUILDINGS AND APPURTENANCES thereto will be sold to the highest bidder, who must pay cash or certified check, drawn to the order of the Comptroller of The City of New York, and must also give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of \$50, the sum of \$50 shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but unfinished at the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the building or buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal, nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or any of these conditions shall forthwith void the sale and cause immediate forfeiture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing therein or permitting the occupancy of any such building by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

The sale will be as of the condition of the property on date of delivery thereof to the purchaser. The City of New York will not be responsible for any change or loss which may occur in the condition of the buildings, or their appurtenances between the time of the sale thereof and the time of delivering possession to the purchaser, after being properly vacated of all tenants. The said delivery to the purchaser will be made as nearly together as the circumstances of vacating the structures of their tenants will permit.

All the material of the buildings, sheds, walks, structures and cellars of whatsoever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the exterior walls of the buildings and their foundations and the sidewalks and curb in front of said buildings, extending within the described area shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point. The exterior walls and their foundations shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building. Where there is no curb the elevation of the surrounding ground shall be considered curb level. All wells, cesspools, sinks, etc., existing on the property must be filled to the level of the surrounding ground with clean earth.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street, and the opening of the main sewer

in street shall be properly closed in compliance with the directions of the Bureau of Sewers in the Borough in which the buildings are situated, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed.

The permit for all opening in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances, or any part thereof, within thirty days from the day of possession will work forfeiture of ownership of such buildings, appurtenances, or portion as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and The City of New York will, without notice to the purchaser, cause the same to be removed, and the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and must be completed within thirty days from the day of possession, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless, The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Where party walls are found to exist between buildings purchased by different bidders, the materials of said party walls shall be understood to be equally divided between the separate purchasers.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furnishings, plaster, chimneys, projecting brick, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beam-holes, etc., bricked up, and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs and adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the contractor.

The Comptroller of The City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids; and it is further

Resolved: That, while the said sale is held under the supervision of the Commissioners of the Sinking Fund, the Comptroller is authorized to cause the sale to be advertised and to direct the sale thereof as financial officer of the City.
