

Report to the City Council pursuant to LL50 of 2011

Reporting Period: Fiscal Year 2020

From: Mayor's Office of Contract Services (MOCS)

Section A A list of vendors that provided information pursuant to subdivision c of this section, in connection with covered solicitations; and

Section B Disaggregated by food product and processed food: (a) the total dollar value of New York state food products procured by agencies; (b) the total dollar value of food products from outside of New York state procured by agencies during their listed New York state availability periods; and (c) the total dollar value of all other food products from outside of New York state and processed food from facilities outside of New York state

For the FY 2020 reporting period, MOCS worked to improve upon the data collection process for the Local Law 50 report. In addition to gathering information on food related purchases from the City's Financial Management System, we reached out to all City agencies to independently confirm what, if any, food-related procurements agencies completed. This helped ensure that no potentially relevant procurements would be missed.

Survey Changes We sought to increase the number of survey responses we received from vendors by leveraging vendor contact information in the PASSPort system. Using those verified vendor details, we then issued the Local Law 50 survey asking vendors to provide the details of their food-related procurements with the City, including whether they procured their foods from New York State sources or elsewhere, what types of foods were procured, and whether they were procured in season or out of season. For the FY 2020 reporting period and future reports, the vendor survey has been updated to better identify the total dollar value of foods purchased from New York State and to further clarify the instructions to vendors in order to avoid confusion in filling out the survey.

The above changes will be carried forward to future Local Law 50 Reports as we continue to identify and implement new efficiencies for the tracking of information relating to New York State food procured by City agencies and vendors.
