## **Introduction**

### **Context**

The *Citywide Statement of Needs for Fiscal Years 2026 and 2027* (the “Statement of Needs” or “Report”), is compiled by the Department of City Planning (“City Planning” or “DCP”), as required annually under Section 204 of the City Charter. The primary purposes of this document are to inform communities of the City’s facility siting needs in upcoming years, the specific criteria for selecting the locations of those facilities and to provide an opportunity for community input via community boards and borough presidents.

New York City has a population of approximately 8.8 million people spread across many neighborhoods with diverse conditions and needs (U.S. Census Bureau, 2020). To continue making City services readily available to all New Yorkers, it is important that agencies have appropriate facilities strategically located throughout the five boroughs and the region. This document is one of many tools that help City agencies make effective and equitable siting decisions, and specifically covers new facilities as well as the relocation, expansion, or consolidation of existing facilities.

### **Process**

Concurrent with the public release of each year’s Statement of Needs, the document is submitted for review to the City Council and elected officials. Within 90 days of publication, the borough presidents, borough boards, and community boards may submit written comments to City Planning. During the same comment period, the borough presidents may propose locations for any new City facilities if the locations are consistent with the *Criteria for the Location of City Facilities* and with the specific siting criteria in the Statement of Needs.

Comments and proposed locations from Borough Presidents and Community Boards for any proposals cited in the FY 2026-2027 Report may be submitted via e-mail to [SON\\_DL@planning.nyc.gov](mailto:SON_DL@planning.nyc.gov), or alternatively by mail to the Director of City Planning, 120 Broadway, 31<sup>st</sup> Floor, New York, N.Y. 10271. At the end of the 90-day comment period, City Planning shares this feedback with the relevant City agencies for consideration during the siting process, uses it to inform other planning processes, and publishes the comments on the [Statement of Needs website](#).

### **Contents**

The Statement of Needs identifies new facilities the City plans to site and existing facilities the City plans to close, expand or reduce significantly in size during the next two fiscal years. Significant expansions and reductions are defined as the addition or discontinuance of the use of real property which would expand or reduce the size or capacity of a facility by 25 percent or more.

The facility siting actions proposed include anticipated property acquisitions or site selections funded in the City’s capital budget, as well as leases or contracts that would newly establish or significantly expand a facility. The Report contains proposals for which [Uniform Land Use Review Procedure \(ULURP\), Section 195 applications](#), or contract approvals that are anticipated during fiscal years 2026 and 2027.

The needs identified in the Report reflect desired implementation timetables but do not necessarily reflect funding availability. Some of the proposals included in the Report may be eliminated or deferred beyond fiscal years 2026 and 2027 due to factors such as funding availability and space constraints.

## Document Structure

This document is organized as follows:

1. *Executive Summary* – Summary of all active needs, trends in facility types, space details, and siting criteria for facility proposals.
2. *Citywide Summary* – Summary data tables reflecting the City's needs across broad categories including facility function, and timing. The summary is divided into three sections:
  - a. Summary of New Proposals (FY 2026-2027)
  - b. Summary of All Recent Proposals (FY 2016-2027)
  - c. Borough-specific Proposal Summaries (FY 2016-2027)
3. *New Proposals for Comment* – Detailed information on each new proposal in the FY 2026-2027 Statement of Needs. The new proposals are organized by borough.
4. *Appendix A* – Status of Previous Proposals from the FY 2025-2026 Statement of Needs, organized by borough and including detailed information on each proposal.
5. *Appendix B* – Contact information of agency liaisons for borough presidents and community boards seeking further information about the proposals.
6. *Appendix C* – Summary of Department of Education Needs.
7. *Appendix D* – List of all Proposals by Agency.

## Additional Information

As part of a continuing program to provide the necessary tools for informed public participation in the process for the siting of City facilities, City Planning maintains the *Facilities Database*. This online geographic database contains over 36,000 city, state, federal, and non-profit health, social service, public safety, educational, recreational, transportation, and waste management facilities. It is a helpful tool to research existing City facilities and can be a resource in providing feedback on the Statement of Needs. This database is easily explorable via an interactive web map, the [NYC Facilities Explorer](#). More information and direct data downloads are also available on the [DCP website](#) under [BYTES of the BIG APPLE](#).

## 1. Executive Summary

The Statement of Needs provides an annual snapshot of the City's aggregate siting needs and contains updates on the needs identified in previous years. The proposed facilities included in this report are considered in light of the City's overall budget, urgency of need, and underlying real estate dynamics. Recently, reports have helped to illustrate the lasting impacts of the COVID-19 pandemic with the number of SON proposals dropping below historical averages; however, this year indicates a robust facility need amongst a wide array of agencies. The Report is useful for making informed and cost-effective decisions around real estate for City facilities. By collecting and analyzing citywide demand for physical space, the City is better prepared to make strategic real estate decisions that can take advantage of the City's scale to both improve the delivery of City services for all New Yorkers and reduce costs to taxpayers.

In any given year, the City's aggregate siting needs may vary significantly. Sometimes they reflect policy decisions to add or remove facilities from specific locations. In other instances, the number of needs may reflect coincidental expiration of long-term leases for many properties in a single year. For this reason, comparisons to previous years can be misleading as a barometer of government expansion. The summary below aims to give a sense of the underlying dynamics around current City facility planning.

### **New Proposals (FY 2026-2027 report):**

- There are 15 new proposals in this Report, down nine proposals from last year and below the historical average over the last ten years (25).
- Most new proposals are relocations (5), which commonly result from expiring leases or increased staffing. The next most common new proposals are expansion and consolidation (4).
- New Proposals are spread among Brooklyn (6), Manhattan (5), Staten Island (2), The Bronx (1) and one facility with a to be determined location.
- The 15 new proposals total an estimated 740,054 square feet of floor area. This is slightly down from last year's new proposal total of 764,224 square feet of floor area. The breakdown of facility types is as follows:
  - Six are service sites, representing 214,548 square feet of needs, which provide services directly to the public. Examples include the expansion of the New Lots Avenue branch of the Brooklyn Public Library (BPL) and the relocation of Human Resources Administration's (HRA) Administrative Offices. The largest service need is 82,000 square feet for a new space request for the Department of Cultural Affairs' (DCLA) Studio Museum.
  - Five are for office purposes, representing 111,597 square feet of needs, which are facilities that support government administrative work. Examples include the consolidation of the Department of Health and Mental Hygiene (DOHMH) Williamsburg facility and the expansion of the office of the Brooklyn District Attorney. The largest office need is 35,000 square feet for the relocation of Administration for Children's Services' (ACS) Administrative District 1 office.
  - Four are operational sites, representing 413,909 square feet of needs, which support city operations, including maintenance, storage, public safety, and other non-clerical/administrative work. Examples include the Department of Sanitation's (DSNY) relocation of the Bronx District 2 Garage and the New York Police Department's (NYPD) consolidation of their Property Clerk Facility. The largest operational need, 276,135 square feet is for the Department of Sanitation's (DSNY) relocation of its Greenpoint Warehouse.

### **All Recent Proposals (FY 2026-2027):**

- There are 108 total facility proposals from the current (FY 2026-2027) and the past (FY 2016-

2026) Statement of Needs cycles. Since last year:

- 21 are “in progress” and 14 have been “implemented,” meaning that a site has been identified and the siting process is underway or complete. This can be compared to last year’s report in which 8 proposals were “in progress” and 13 were “implemented”.
- 66 proposals are “ongoing”, “modified”, or “new proposals” (collectively categorized as “active”), meaning that the City is still actively looking for a site or that the formal siting process (ULURP or Section 195 application) has not yet begun. Last year’s report contained 101 sites in the “active” category indicating a 34% decrease in overall siting needs being pursued this year over last year.
- 7 proposals have been “cancelled” in the past year. A project can be cancelled for a variety of reasons but mainly because the facility is no longer needed, or OMB denied the request for the specific facility.
- 15 “ongoing” proposals first appeared in the Statement of Needs over five years ago and are still being pursued. These include NYPD’s proposal for the relocation of the Pier 76 Tow Pound and the Bronx Tow Pound. Facilities like these can be difficult to site due in part to the significant square footage and industrial zoning that is required.
- Of the 66 “active” proposals:
  - The highest number of sites are operational (26), representing more than 1.5 million square of need (58% of the City’s total desired square footage). Operational facilities, for example, garages and warehouses, often require industrial zoning. As a result, there are limited opportunities to site these facilities. Additionally, proximity to truck routes and highways are often desirable to help minimize travel time and operating costs. DSNY, NYPD, and DOT make up most of the City’s existing operational needs (80%).
  - 22 projects are service sites, representing more than 746,000 square feet of needs (28% of the City’s desired square footage). Service sites generally require a moderate amount of space (30,000 median square footage) to accommodate in person interactions with the public. All service sites allow clients, or the public, access to the facilities. Service sites are more evenly distributed across the City, often serving specific boroughs or neighborhoods in centrally located, public transit-accessible areas. HRA and ACS represent more than half of the City’s existing service site needs (63%) by the proposed facilities total desired square footage.
  - A little more than a quarter of projects (18) are office-based sites, representing more than 324,000 square feet of needs (12% of the City’s total desired square footage). Office needs come in a range of sizes; from ~2,000 square foot Community Board offices to agency headquarters that require several 100,000 square feet. Half (9) of the proposed office sites will have a service component and are intended to be accessible to clients or the public. Administrative office facilities are generally clustered in Lower Manhattan and commercial districts of Brooklyn and Queens with strong public transit connections. Community Boards account for a third (6) of the City’s existing office needs.
- In summary:
  - “Active” proposals represent more than 2.6 million square feet of space sought. The median desired square footage is a little over 23,000 square feet; The most common square footage range of projects is between 40,001 square feet and 100,000 square feet with 16 projects.
  - Twenty-three different City agencies and six community boards have active facility

proposals. NYPD comprises of over 20% of all active proposals with 14. Other top requesting agencies include DOT (8), ACS (5) and HRA (5).

- Active proposals are planned for Brooklyn (21), Manhattan (15), the Bronx (12), Queens (8), and Staten Island (4) with six locations not yet specified.

### **Educational Facility Needs**

The Department of Education (DOE) works closely with the School Construction Authority (SCA) to plan for learning sites across all five boroughs. Their Adopted Five-Year Capital Plan for Fiscal Years 2020-2024 can be found [here](#). At the highest level, the SCA is looking to acquire or lease property for 29 different educational facilities, representing 17,080 school seats. This is down by 7 facilities and approximately 3,000 seats since last year's Report. A summary of target locations for different educational facility types can be found in Appendix C.

We hope that this upfront summary contributes to a broader understanding of the City's facility needs and the locations where they are needed.

## 2. Citywide Summary

This section provides a citywide view of new and prior facility proposals based on geography, use, physical character, action, timing, and status. The summary is divided into three parts:

- a) Summary of New Proposals (FY 2026-2027)
- b) Summary of All Recent Proposals (FY 2016-2027)
- c) Borough-specific Proposal Summaries (FY 2016-2027)

### a. Summary of New Proposals for FY 2026-2027

This year (FY 2026-2027), 15 new facility proposals were submitted reflecting current and future agency space needs and programmatic priorities. Since this report's format revision in 2015, 23 new proposals have been submitted on average each year.

Table 1 shows a breakdown of where agencies are in identifying a specific location for their facilities. Site-specific proposals are those where an agency has identified a specific location or address. For proposals without a specific location, agencies can provide a community district or borough where they intend to site. Detailed information on each proposal can be found in Section 3 of this report.

Table 2 shows the number of proposals, by borough, based on the facilities primary use. *Facility Domain* designations, defined below, are derived from City Planning’s Facilities Database classification system, which can be further explored on the [Facilities Explorer](#).

Facility Domain Terms:

**Administration of Government:** Offices and training and testing sites used by City agencies.

**Public Safety, Emergency Services, and Administration of Justice:** Police services, emergency response, courthouses, and correctional facilities.

**Health and Human Services:** Health and social service providers, including hospitals, legal services, and homeless shelters.

**Core Infrastructure and Transportation:** Train and bus yards, parking lots, solid waste processors, and wastewater treatment plants.

**Libraries and Cultural Programs:** Public libraries and cultural institutions

**Parks, Gardens, and Historical Sites:** Historic sites, recreational areas, parks, and natural preserves.

**Education, Child Welfare, and Youth:** Providers of children and youth services and all schools, including higher educational facilities.

<sup>2</sup>The School Construction Authority (SCA) and the Department of Education (DOE) report their proposed new and leased school facilities in Appendix C of this report. There are 61 newly constructed or leased school buildings planned for fiscal years 2025-2029.

Tables 3 and 4 show the *Facility Type*, defined below, by borough and agency, and the percent of those facilities that provide the public with access to the facility's services during operating hours.

Use Terms:

**Service:** Direct service provision to the public (e.g., daycare, court, job center).

**Operational:** City operations, including maintenance, storage, public safety, and other non-clerical/administrative work (e.g., tow pound, sanitation garage, laboratory).

**Office:** City government administrative work (e.g., agency office space, Community Board office).

Table 5 captures the primary reason, defined below, that agencies identified for each of their new needs.

SON Proposed Action Terms:

**Relocation:** Moving facility space from one location to another.

**New space request:** Adding facility space for a new use.

**Expansion:** Expanding a facility space while maintaining a preexisting space.

**Consolidation:** Combining separate facilities into an overall reduced number of spaces.

Table 6 summarizes proposals by their estimated size. Proposals are grouped by the borough in which they're expected to be sited. The table provides insight into the geographic distribution of proposals and facility sizes across the City.

Facility proposals have a wide range of footprints, which is determined primarily by use. Estimated square footage range from minimal office space for community boards (2,200 square feet) to operational space for sanitation garages (100,000 square feet).

## b. Summary of All Recent Proposals for FY 2016-2027

This section provides a cumulative summary of proposal submissions and each proposal's status. Summaries of recent proposals show how submissions progress through the siting process over time, while also capturing where the City is still actively seeking space.

Table 8 summarizes new and past proposals by their current status (defined below). The table provides insight into the timing of the facility siting process.

**Implemented:** Proposal for which a ULURP or Section 195 application received final approval; a contract for operation of a facility was approved; a facility was located in existing City space; or an expansion, reduction or closing was completed.

**In progress:** Proposal for which a ULURP or Section 195 application has been filed but not yet approved; a contractor has been selected but a contract has not yet received final approval; or an expansion/reduction of existing site is underway.

**Ongoing<sup>1</sup>:** Proposal for which the City is still actively seeking a site, a ULURP or Section 195 application has not been filed, or a contractor has not been selected.

**Modified:** Proposal for which modifications and changes are reflected in the current Statement of Needs.

**Cancelled:** Proposal for which the City is not actively seeking a site or implementation because of fiscal or programmatic considerations.

**New proposal:** Proposal that is appearing for the first time in the current Statement of Needs.

<sup>1</sup> The "Ongoing" status was previously "Active" in prior Statement of Needs reports. Beginning with the FY 2023-2024 report, "Ongoing" was used to avoid confusion around the term "active", which is used as an overarching category to describe projects with a status of "ongoing", "modified", or "new proposal". The "active" category of projects represents where the City is still actively looking for a site or where the formal siting process (ULURP or Section 195 application) has not yet begun.

Figure 1 and Tables 9, 10, and 11 provide a snapshot of the “active” facility proposals. This universe is comprised of proposals with an “ongoing”, “modified”, or “new proposal” status, meaning that the City is still actively looking for a site or the formal siting process (ULURP or Section 195 application) has not yet begun.

### **c. Borough-specific Proposal Summaries (FY 2016-2027)**

Section c organizes all proposals submitted by borough. Each borough-specific section includes a table listing proposals for comment and all previous proposals for reference. Where specific location information is available, we have also included a summary map of site-specific new and previous proposals. Detailed information on each new proposal for comment can be found in Section 3 of this report, and previous proposal information is available in Appendix A – Status of Proposals from FY 2025-2026 Statement of Needs.

## Bronx Proposals

Table 12 includes a list of all new and previous proposals with status and proposed geography. Detailed information on each proposal is available in Section 3 of this report.

<b>PUBLIC PURPOSE</b>	<p><b>Describe program services and goals:</b></p> <p>Williamsburg health center is occupied by several divisions/bureaus currently: Family Child Health/School Health vision program, Disease Control/HIV field services, Environmental Health/Pest Control services and Mental Health/Assistant Outpatient Treatment (AOT) services. School Health vision program provides no charge access to doctors; testing and glasses for kindergartners and first graders. HIV field program surveillance involves investigating reports from providers and labs for HIV related information including risk factor, date of initial diagnosis and actively searching for unreported cases diagnosed in hospitals, clinics, doctor's offices and community-based organizations. Pest control provides education, pesticide warnings for building residents and tenants, and guidance to building owners, managers, supers and workers. Also provide referrals to Healthy Neighborhoods program, Asthma referral forms, Rat and Bed bug information and focused workshops on healthy homes and pest control, as well as lot cleaning and assessments based on complaints. AOT services is a part of the Bureau of Mental Health which directly operates the City's court mandated program. The mission is to improve mental health and wellness for people in NYC while eliminating racial and other long standing societal disparities by providing services, resources and opportunities to providers that are grounded in accurate, data driven information, ultimately reducing stigma around mental health.</p> <p>This facility is not utilized by the public and all staff are engaged in primarily administrative functions to support the programmatic work described above. ## Manhattan New Proposals

PROPOSAL	Relocation of ACS' Administrative District 1
----------	--

DCAS Project ID	LBM19CAOH
STATUS	New Proposal
AGENCY	Administration for Children's Services (ACS) Division of Administration
AREA SERVED	Citywide
FACILITY TYPE	Operational
FACILITY DOMAIN	Administration of Government
PUBLIC FACING FACILITY	Yes, clients or members of the public would use or have open access to this facility.
PROPOSED LOCATION	110 William Street, New York, NY 10038
SIZE	SQFT: 35,000 Staff: 105 Clients to be served: N/A Parking: N/A
SPACE USE TYPE	Office: Administrative headquarters
PROPOSED ACTION	Relocation
PUBLIC PURPOSE	<p><b>Describe program services and goals:</b> The Administration for Children Services would like to relocate their Division of Administration into 110 William Street, where the remaining of the agency headquarters operation is being relocated. In doing so, this will require new space for the 105 staff within the Division of Administration. These numbers include actuals, budgeted vacancies, consultants/interns. The projected space need for the Division of Administration staff is approximately 30,000-35,000 Rentable Square Feet (RSF).</p> <p><b>Describe why current space(s) is (are) inadequate:</b> The Division of Administration seeks to relocate and join the rest of the ACS Headquarter team at 110 William Street.</p> <p><b>If relevant, indicate any space under your agency's jurisdiction that will be relinquished if new space is allocated:</b> As result of the Citywide Space Saving Exercise, ACS would like to relinquish the 66 John Street, MN office location at the end of the current lease on August 31, 2026 in order to meet the 7% deduction in the Real Estate portfolio.</p> <p><b>Describe any alternatives considered, including reconfiguring existing space:</b> N/A</p> <p><b>Please briefly explain how this facility will serve the geographic area indicated in the previous question:</b> The Division of Administration provides a wide range of support services throughout the agency to ensure all Divisions receive adequate and efficient support services to carry out their respective missions. The Division of Administration works collaboratively with many program areas offering internal resources and support necessary to function efficiently and effectively. The Division of Administration provides support services throughout the agency in the following areas: building maintenance, occupational safety and health, operational support, security, transportation, and print production.</p>

PROPOSAL	New Space Request for DCLA's Studio Museum

<b>STATUS</b>	New Proposal
<b>AGENCY</b>	Department of Cultural Affairs (DCLA)
<b>AREA SERVED</b>	Citywide
<b>FACILITY TYPE</b>	Service
<b>FACILITY DOMAIN</b>	Libraries and Cultural Programs
<b>PUBLIC FACING FACILITY</b>	Yes, clients or members of the public would use or have open access to this facility.
<b>PROPOSED LOCATION</b>	144 West 125th Street, New York, NY 10027
<b>SIZE</b>	SQFT: 82,000 Staff: N/A Clients to be served: N/A Parking: N/A
<b>SPACE USE TYPE</b>	Office: Administrative headquarters, Cultural space
<b>PROPOSED ACTION</b>	New Space Request
<b>PUBLIC PURPOSE</b>	<p><b>Describe program services and goals:</b> The Studio Museum serves the local community as an educational and cultural venue where visitors, including families, adults, youth, school groups and educators, can learn about and enjoy black art and culture. The Studio Museum offers visual arts exhibitions, public programs and tours, educational programs for K-12 school groups, families and community organizations, and an artist-in-residence program, all centered around its mission to serve as the nexus for artists of African descent. The Studio Museum's exhibitions expand personal, public and academic understanding of modern and contemporary art and broaden the scope of art historical literature through the production of catalogues and brochures. During its 5 year history, the Studio Museum has also amassed a permanent collection of nearly 9,000 objects by more than 700 artists —spanning the 19th through the 21st centuries—and has provided a unique home for the creation, exploration and appreciation of work by black artists. Studio Museum programs serve adults, families and children who are members of the local community, New York City and the tri-state area; school groups from NYC and tri-state area schools; domestic and international tourists; national and international art world professionals; art museum professionals; and the general public.</p> <p><b>Describe why current space(s) is (are) inadequate:</b> The former building was a bank built in 1914. Renovated in 1981 for the Studio Museum to move in, it presented the following challenges:</p> <ul style="list-style-type: none"> <li>• Lack of column-free gallery spaces and loading dock.</li> <li>• Fixed and limiting ceiling height and gallery configurations that restricted the ability to exhibit artwork (Studio Museum collection as well as loans from other collections).</li> <li>• Contiguous galleries and limited access to support space required the Studio Museum to close all three galleries in order to de-install shows and install new ones, resulting in a three-week closure to the public three times every year.</li> <li>• Limited opportunity to increase spaces for much needed public access and amenities, including additional restrooms.</li> <li>• Infrastructure could not support state-of-the-art technology.</li> <li>• HVAC, roof and other building systems were well past their useful life and no longer provided reliable museum quality-climate control.</li> </ul> <p><b>If relevant, indicate any space under your agency's jurisdiction that will be relinquished if new space is allocated:</b> The new building has combined two adjacent lots on 125th Street: the sculpture court, City-owned lot 11, and the Studio Museum building on lot 9, previously owned by the Studio Museum. The Studio Museum transferred the Lot 9 property to the City, and existing structures on both lots were demolished for the new City-owned building. The Studio Museum operates the building and programs under a lease from the City of New York. The Studio Museum is a member of the New York City Cultural Institution Group.</p> <p><b>Describe any alternatives considered, including reconfiguring existing space:</b> A feasibility study in 2011 by Perkins Eastman Architects identified a concept and overall costs associated with</p>

	<p>a major renovation of the existing Studio Museum building. The study's conclusion was that a new structure would create a much more functional and efficient asset than engaging in the expense of renovation and limitations of preserving the existing structure. A feasibility study in 2013 by K. Backus &amp; Associates explored eighteen other locations in Harlem, and shortlisted four sites for detailed evaluation. Three of these sites were privately held and upfront acquisition costs were estimated at \$15M-\$25M; one site was already in a City managed RFP process. Three had tenants with unknown lease terms. The Studio Museum's current location on 125<sup>th</sup> Street for over 40 years is integral to the history and established presence of the institution. The location is at the geographic center of 125th Street and is proximate to other iconic cultural institutions such as the National Black Theater, the Apollo Theater, Jazz Museum of Harlem, Victoria Theatre and the Caribbean International Center. It is very easily accessible by public transportation from other parts of Harlem and New York City for residents and the thousands of tourists that visit every year</p> <p><b>Please briefly explain how this facility will serve the geographic area indicated in the previous question:</b> The project will strengthen the institution, and create a more visible and welcoming facility to the local community as well as the global audience for the Studio Museum's mission to promote the work of artists of African descent. The addition of an architecturally important building on 125<sup>th</sup> Street, the "Main Street of Harlem," will attract a larger audience and membership. The additional visibility, enhanced programs and increased audiences will strengthen the Studio Museum's ability to serve its neighborhood. Visitors will have access to larger, improved galleries that are designed for the purpose of viewing artwork. The new building will provide the appropriate MEP to allow the safe exhibition of valuable items of the collection and works borrowed from other institutions that require strict temperature and humidity controls. Two galleries can remain in operation while a third is installing a new show, no longer requiring the Studio Museum to close for three weeks every time shows change over. The Lower Level and Ground Level public spaces will be free to the public, providing a welcoming gathering space to draw in community members. More school groups can be accommodated with multiple education spaces that can be configured for different sized groups of children and adults. The ability to hold two or more programs simultaneously in new orientation and gathering spaces (Welcome Center, Lecture Hall) will allow the Studio Museum to serve a greater number of school children, teens and seniors. The new building will be more energy efficient and provide a lower carbon footprint with a more sustainable operation of the facility.</p>

<b>SPACE USE TYPE</b>	Office: Other, Service site, Space is needed to host monthly General Board and committee meetings
<b>PROPOSED ACTION</b>	Relocation
<b>PUBLIC PURPOSE</b>	<p><b>Describe program services and goals:</b> Bronx Community Board Three services six neighborhoods to ensure they receive essential city services. The Board hosts monthly General Board and Committee meetings open to the public. The Board also hosts monthly Public Hearings, annual Resource Fairs, Emergency Preparedness Fairs, and Health Fairs. We also host DOHMH Rat Academy and FDNY Fire Safety events which require us to need extra space.</p> <p><b>Describe why current space(s) is (are) inadequate:</b> The current landlord is negligent when addressing maintenance repair issues, as well as heating and cooling issues. The infestation of rats in the walls of the office space and the garbage disposal practices in front of the office create unsanitary conditions. This creates frustration and an unhealthy work environment. The space is inadequate when hosting monthly meetings with the community at large, stakeholders, and guests who attend are uncomfortable and cramped attending meetings. The office interior has not been painted, nor has the carpet been replaced in over ten years. The current lease states that the landlord will paint the office space and replace the carpet every ten years. Bronx Community Board Three would like to see improved amenities such as better heating and cooling systems, modern appliances, and well-designed layouts that would serve the staff and community at large. Relocating to a well-managed and maintained space will provide the District Manager and the staff an environment that will contribute to a happier and healthier workplace.</p> <p><b>If relevant, indicate any space under your agency's jurisdiction that will be relinquished if new space is allocated:</b> 1426 Boston Road aka 1429 Prospect Avenue, Bronx, CD 3</p> <p><b>Describe any alternatives considered, including reconfiguring existing space:</b> N/A</p> <p><b>Please briefly explain how this facility will serve the geographic area indicated in the previous question:</b> This facility serves Bronx Community District/Board Three.</p>

<b>SPACE USE TYPE</b>	Office: Administrative field office
<b>PROPOSED ACTION</b>	Relocation
<b>PUBLIC PURPOSE</b>	<b><i>Describe program services and goals:</i></b> CB 8 proposes to relocate its district office, currently at 5676 Riverdale Avenue (Bronx, CD 8) to a new, more centrally located space in the Kingsbridge neighborhood of CD 8. The existing location is in a basement, lacks any source of natural light, and has only one means of egress. A central location will also make the office more accessible to CB 8's constituents. Community Boards play an important role in improving the quality of life for all New Yorkers. Community Boards deal with zoning issues, make budget recommendations and address community concerns. The proposed office will house three full-time staff members including the District Manager. The Board Chairperson, Community Board members and other volunteers will utilize the space on an as-needed basis. The requested space should also be adequate for holding smaller public meetings.

<b>PROPOSED ACTION</b>	Relocation
<b>PUBLIC PURPOSE</b>	<p><b><i>Describe program services and goals:</i></b> DSNY operates its Bronx 7/8 District Sanitation Garages out of a bi-level City owned facility at 423 West 215th Street in Manhattan with separate garage operations on each floor. Each garage operation provides its respective community district with residential refuse and recycling collection, street cleaning and winter response and snow removal functions.</p> <p><b><i>Describe why current space(s) is (are) inadequate:</i></b> The second-floor reinforced concrete slab, which supports the weight of collection trucks among other DSNY equipment and operational needs, has been deemed unsuitable for regular garage activities. Despite DSNY's best efforts to maintain and strengthen the slab, the weight and vibration of equipment has caused pieces of the structure to fall onto the currently operational garage directly below and significant weakening of the slab in some areas such that it is entirely unsafe to utilize.</p> <p><b><i>Describe any alternatives considered, including reconfiguring existing space:</i></b> After an exhaustive search of City owned parcels occupied by sister agencies did not yield a temporary site, DSNY is requesting an emergency site search for privately owned property for space to adequately house all necessary garage operations for both Bronx Districts Garage 7 and 8 to begin.</p> <p><b><i>Briefly explain how this facility will serve the geographic area indicated in the previous question:</i></b> The facility provides residential refuse and recycling collection, street cleaning and winter response and snow removal functions for Bronx Community districts 7 and 8.</p>

PROPOSED ACTION	Relocation
PUBLIC PURPOSE	<p><b><i>Describe program services and goals:</i></b> DOT's Sidewalk Inspections &amp; Management's (SIM) Citywide Concrete Program (CWC) handles sidewalk repairs, pedestrian ramp installations, and construction of traffic medians and pedestrian safety islands throughout the five boroughs. To optimize operational efficiencies, they report to the boroughs in which they provide support. SIM's Bronx CWC operation is currently served by two temporary yards under the Post Road Bridge which spans the Hutchinson River. 49 construction trade field staff currently support the Bronx from these locations.</p> <p><b><i>Describe why current space(s) is (are) inadequate:</i></b> In response to the City being ordered to install or upgrade pedestrian ramps at all 162,000 street corners in the City, SIM will be adding another 18 construction trade field staff plus two Highway Inspections &amp; Quality Assurance (HIQA) inspectors to support this initiative in the Bronx. Not only does the SIM program require additional space because of this program expansion, SIM is being displaced from this Bronx location due to planned 2021 renovations of the bridge as well as a Department of Environmental Protection (DEP) court-mandate. Because of these factors, a new, larger site is needed.</p> <p><b><i>If relevant, indicate any space under your agency's jurisdiction that will be relinquished if new space is allocated:</i></b> Existing yards under the Post Road Bridge may be relinquished if new space is allocated. There is private sector interest in one of these yards for Short-Term License use. The other yard will be repurposed for a DEP water filtration plant to support the adjacent Hutchinson River. Also, DOT plans to renovate the Post Road Bridge in 2021. This bridge spans both operations, as such both operations must be relocated before renovations can occur.</p> <p><b><i>Describe any alternatives considered, including reconfiguring existing space:</i></b> Considering the planned bridge renovations in 2021, re-configuring existing space is not an option. Several alternative locations have been, and are, being considered. Temporarily locating at a DEP site</p>

	<p>in Hunts Point.</p> <p><b>Please briefly explain how this facility will serve the geographic area indicated in the previous question:</b></p> <p>This facility will serve as the hub for DOT sidewalk repairs and improvements for the entire Bronx.</p>

	<p>VPCS promotes and protects the health and quality of life for New York City residents and visitors by: ensuring an environment free from animal-borne disease hazards and nuisances, inspecting and baiting over 100,000 public and private properties in New York City for rats, permitting and inspecting many animal-related industries such as the carriage horse trade and pet shops. VPCS has over 40 exterminators, over 40 vehicles, over 100 public health sanitarians. There is an extensive need for storage of supplies (bait-stations, shovels), pesticides and uniforms as well as safety equipment.</p> <p>Since 2016, we expanded treatment of Aedes mosquitoes particularly in response to the emergence of exotic mosquito-borne viruses in parts of southern U.S. Due to the inception of the Rat Reservoir and recently Rat Mitigation funding, VPCS is using more pesticides (rodenticides) than ever before. In addition, many different types of pesticide formulations are being purchased to strategically combat New York City's rodent population.</p>

<b>AREA SERVED</b>	Citywide
<b>FACILITY TYPE</b>	Operational
<b>FACILITY DOMAIN</b>	Core Infrastructure and Transportation
<b>PUBLIC FACING FACILITY</b>	No, this site would only be accessed by City staff and their supervised visitors.
<b>PROPOSED LOCATION SIZE</b>	Brooklyn, CD 2
	SQ. FT: 3,750 (assumes inclusion of emergency support infrastructure)
	Staff: 16 total (10 max in the facility at any given time)
	Clients to be served: Entire City (Broadcast and Cable Network)
	Parking spaces: N/A
<b>SPACE USE TYPE</b>	Master Control Operations for TV and Radio Broadcast and Cable
<b>PROPOSED ACTION</b>	Relocation
<b>PUBLIC PURPOSE</b>	Describe program services and goals:
	The Master Control Facility distributes by broadcast and cable NYC Media's public service TV and radio programming (including broadcasts of Council and other public meetings that must be broadcast under the City Charter) and emergency alerts required by the Federal Communications Commission (FCC).
	This facility is critical to maintain the City's television and radio broadcast licenses from FCC. Without these two FCC licenses, MOME cannot broadcast coverage of the Mayor and City Council. MOME will need to be able to occupy the new master control space by no later than June 1, 2023.
	Describe why current space(s) is (are) inadequate:
	The license for the space at the CUNY Graduate Center, at 365 5th Avenue, expired in February 2020. That license was intended to be temporary, and CUNY is not able to renew it. As a holdover without a real-estate license, MOME's tenuous legal status is causing problems that threaten ability to comply with broadcast law and impact employee morale and retention. MOME will need a new space in order to continue our city and federal legal mandates.
	If relevant, indicate any space under your agency's jurisdiction that will be relinquished if new space is allocated:
	No space will be relinquished. Current space is under CUNY's control and CUNY is not able to provide it to us going forward.
	Describe any alternatives considered, including reconfiguring existing space:
	MOME has considered leasing private space as an option, but this would be cost prohibitive due to specific requirements such as the need of significant backup power that is not commonly available. PSAC 1 and 2 were considered but deemed unsuitable due to lack of space needed for master control. MOME has also considered space at New York City Emergency Management (NYCEM) headquarters. This option has since been reconsidered due to insufficient space needed to accommodate master control equipment.
	Please briefly explain how this facility will serve the geographic area indicated in the previous question:
	This facility serves the entire NYC metropolitan area.
<b>DESIRED DATE OF OCCUPANCY</b>	6/1/23

<b>SITING CRITERIA</b>	Whatever zoning required for PSAC I. Transit access. The master control facility requires access on a 24/7, 365 days a year basis. It must be easily accessible because of its nature as an emergency broadcast facility. It must be close to City Hall and 1 Centre Street. It must have circuit connectivity to broadcast transmitters and cable company equipment. Facility would house master control equipped with 24/7 emergency backup power.

<b>PROPOSED ACTION</b>	Relocation
<b>PUBLIC PURPOSE</b>	Describe program services and goals:
	New Police Precinct to service the community with the 70 Precinct / CB 14
	Describe why current space(s) is (are) inadequate:
	The current space, situated at 154 Lawrence Avenue, was constructed in 1909 and needs costly repairs. The facility is vastly undersized and there is no room for expansion as the site is adjoined by critical community facilities.
	If relevant, indicate any space under your agency's jurisdiction that will be relinquished if new space is allocated:
	None, NYPD intends to keep the current space at 154 Lawrence Avenue.
	Describe any alternatives considered, including reconfiguring existing space:
	N/A
	Please briefly explain how this facility will serve the geographic area indicated in the previous question:

<b>SIZE</b>	SF: 11,487 Staff: 35 Clients to be served: n/a Parking spaces: n/a
<b>SPACE USE TYPE</b>	Office: Administrative headquarters
<b>PROPOSED ACTION</b>	Relocation
<b>PUBLIC PURPOSE</b>	<p><b><i>Describe program services and goals:</i></b> The Poison Control Center's (PCC) overall goal is to reduce poisonings and provide education, guidance, and emergency assistance to the public health care providers. The facility is designated as a regional poison control center by the New York State Department of Health. The PCC provides comprehensive services 24 hours a day, seven days a week for the poison prevention and treatment to all New Yorkers. The center is staffed with registered pharmacists and nurses certified in poison information.</p> <p><b><i>Describe why current space(s) is (are) inadequate:</i></b> The current space is inadequate due to the aging infrastructure and plans to vacate the current location within the next four to five years. DOHMH is currently in contract with the Economic Development Corporation (EDC) to build a new Public Health laboratory building on the Harlem Hospital campus; we have completed design, H+H buildings are being demolished and construction CPs are being developed. Poison control will not go to the new building and must be located near Bellevue Hospital due to the need for the state-of-the-art 24-hour call center, multiple office accommodations, an adequate teaming space and conferencing area, and ample storage. Reconfiguration efforts have already been attempted and exhausted. Therefore, relocation is currently deemed as the best resolution for the Center's needs functionality.</p> <p><b><i>If relevant, indicate any space under your agency's jurisdiction that will be relinquished if new space is allocated:</i></b> Public Health Laboratory (PHL) at 455 First Avenue, New York, NY 10016.</p> <p><b><i>Describe any alternatives considered, including reconfiguring existing space:</i></b> The new PHL project will only house PHL programming; all other programs must identify new space to continue operations, once the construction has been completed. The current building is planned for turnover to EDC for life science purposes.</p> <p><b><i>Please briefly explain how this facility will serve the geographic area indicated in the previous question:</i></b> PCC handles more than 90,000 calls annually and is the only facility that provides emergency toxicology services to doctors, emergency departments and households in New York City, Nassau, Suffolk and</p>

	Westchester counties. The Center has access to translation services for more than 150 languages and provides services for the hearing impaired that utilize telecommunication devices.
<b>DESIRED DATE OF OCCUPANCY</b>	01/01/2025
<b>SITING CRITERIA</b>	This center must be within proximity to the Bellevue Hospital Center. Location is paramount due to the collection sharing of data, meeting of fellows, coordination of trainings and various other interactions as it is related to the benefit of public health needs on a statewide level. <b>SPACE USE TYPE</b>	Office: Administrative field office, Daycare or school, Training site, Plant, Education/Classroom
<b>PROPOSED ACTION</b>	New space request
<b>PUBLIC PURPOSE</b>	<p><b>Describe program services and goals:</b> The new building will serve school groups, families, after-school clubs, adults, and seniors. For decades, Queens Botanical Garden (QBG) has offered Environmental Education Workshops designed to teach children, grades Pre-K through high school, about science and ecology. These workshops create a learning environment that inspires young minds and prepares teachers to present environmental science issues in dynamic and meaningful ways. Structured as "living laboratories," workshops are experiential, including tours of the Garden's 39 acres of trees, flowers, animals, insects, and green architecture; students participate in hands-on activities, receive worksheets, and partake in discussions that together enhance classroom learning and excite students about science and the natural world. Public programming for families, adults, and seniors is a growth area for the Garden and additional indoor space will increase opportunity to offer horticulture, arts, and environmental programs to the community. This project has already completed design and is out for bid (FMS ID PV272EDUC).</p> <p><b>Describe why current space(s) is (are) inadequate:</b> N/A</p> <p><b>If relevant, indicate any space under your agency's jurisdiction that will be relinquished if new space is allocated:</b> N/A</p> <p><b>Describe any alternatives considered, including reconfiguring existing space:</b> N/A</p> <p><b>Please briefly explain how this facility will serve the geographic area indicated in the previous question:</b> Provide new classroom and program space for education.</p>

<b>SPACE USE TYPE</b>	Office: Borough office
<b>PROPOSED ACTION</b>	Expansion
<b>PUBLIC PURPOSE</b>	<p><b><i>Describe program services and goals:</i></b> DOP currently operates its Queens Adult Supervision services, as well as the Jamaica NeON (Neighborhood Opportunity Network,) out of leased space on floors 2, 3, 4 and 5 at 162-24 Jamaica Avenue in Jamaica, Queens.</p> <p><b><i>Describe why current space(s) is (are) inadequate:</i></b> The building is currently operating at full capacity with 107 staff assigned to the building, of which 10 do not currently have assigned workspaces. To maximize the existing space, DOP has had to curtail certain NeON services including suspension of the Clothing Closet and reduced NeON Nutrition Kitchen services, along with 10 staff currently sharing workspaces. DOP has been made aware that the mezzanine space in the building will soon be available for leasing. This presents a unique opportunity to resolve the space challenges currently being faced at this location.</p> <p><b><i>Briefly explain how this facility will serve the geographic area indicated in the previous question:</i></b> DOP can enhance the NeON suite of community programming because the mezzanine space is street-facing and highly visible. This will allow for the full range of NeON programming (like our South Bronx location) as well as the upcoming launch of NeON Works (focused on careers and employment), all with maximum visibility and community participation.</p> <p>This additional space is critical to the agency's operational needs and supports an on- going commitment to ensuring public safety and the successful implementation of DOP's Safer City for All equity agenda.</p>

<b>PROPOSED ACTION</b>	Relocation

<b>PUBLIC PURPOSE</b>	<p><b><i>Describe program services and goals:</i></b>          DOT's SIM Citywide Concrete Program (CWC) is responsible for sidewalk repairs, pedestrian ramp installations, and construction of traffic medians and pedestrian safety islands throughout the five boroughs. In response to New York City being ordered to install or upgrade pedestrian ramps at all 162,000 street corners in the City, SIM needs industrial land on which to stage and recycle construction debris. This location should ideally be central to all five boroughs because the site supports citywide construction efforts. The concrete crushing operation was reintroduced in a marginal capacity at our 8 29th Street yard in Brooklyn.</p> <p><b><i>Describe why current space(s) is (are) inadequate:</i></b>          With the expansion of the court-mandated Pedestrian Ramp program this operation will not support the amount of construction material resulting from the expanded program.</p> <p><b><i>If relevant, indicate any space under your agency's jurisdiction that will be relinquished if new space is allocated:</i></b>          DOT previously relinquished 150,000 square feet of land used for this operation in Idlewild Park, Queens to the Department of Parks and Recreation (DPR). Currently, the operation continues at approximately 50% capacity at South Brooklyn Marine Terminal. DOT will relinquish approximately 65,000 square feet at South Brooklyn Marine Terminal within the next five years. As a result, DOT needs to relocate and expand its operation in support of the pedestrian ramp expansion initiative.</p> <p><b><i>Describe any alternatives considered, including reconfiguring existing space:</i></b>          After leaving Idlewild Park, the concrete crushing operation was reintroduced in a marginal capacity at our 8 29th Street yard in Brooklyn. PROPOSED ACTION	Expansion
PUBLIC PURPOSE	<p><b><i>Describe program services and goals:</i></b> The Automated Enforcement Unit (aka Red Light, Bus Lane and Speed Camera Program) is responsible for the administration and operation of the agency's Red Light, Bus Lane and Speed Camera programs. This unit currently operates 196 red light cameras at 150 intersections. In addition, the unit currently operates 136 fixed bus lane cameras, 100 fixed, and 40 mobile speed cameras. Their responsibility is to review camera footage and determine if according to law, a motorist is in violation of running a red light, driving in a dedicated bus lane or driving in excess of city speed limits. This unit also issues summonses for these violations.</p> <p><b><i>Describe why current space(s) is (are) inadequate:</i></b> This unit has grown, is growing, but is at capacity at its current location of 34-02 Queens Boulevard. Moreover, other programs reporting to 34-02 Queens Boulevard are also at capacity and growing. This further supports the need to relocate this stand-alone program from 34-02 Queens Boulevard.</p> <p><b><i>If relevant, indicate any space under your agency's jurisdiction that will be relinquished if new space is allocated:</i></b> Current location 34-02 Queens Boulevard is over-capacity. We are actively converting more systems furniture to create more workspace but ultimately by relocating this program, the other programs can grow sustainably.</p> <p><b><i>Describe any alternatives considered, including reconfiguring existing space:</i></b> DOT continues to convert systems furniture to produce more workspace, as well as to demo offices in accordance with the city's Open Plan Guidelines. The operations at 34-02 Queens Boulevard remain over-capacity. Moreover, the staff supporting the mobile enforcement units (tied to the Automated Enforcement program) currently work out of space of unsustainable conditions - temporary trailers parked on a sidewalk adjacent to a public parking garage which serves to house their mobile automated enforcement vehicles.</p>

<b>SIZE</b>	Square footage: 5,600 Staff: 30 Clients to be served: ~128,000 Parking spaces: 0
<b>SPACE USE TYPE</b>	Office: Field office
<b>PROPOSED ACTION</b>	Expansion
<b>PUBLIC PURPOSE</b>	<p><b><i>Describe program services and goals:</i></b> This request is in response to the Mayor's request for the TLC to create a Driver Assistance Center in response to legislation passed in August 2018. The Driver Assistance Center will be staffed by TLC employees, contracted financial advisors and counselors to help struggling taxi and for-hire vehicle (FHV) drivers and owners. The identified space the TLC is requesting is contiguous to the waiting room at TLC Licensing offices at 31-00 47th Ave in Long Island City. TLC will be able to use the existing security lobby and waiting room to support the Driver Assistance Center.</p> <p>The new space will also house some members of the new Business Practices Accountability Unit created at the Mayor's direction to monitor and audit brokers and other TLC licensed business entities. It will also house the expanded Driver Protection Unit, which grew in response to legislation passed in August 2018 establishing the Office of Inclusion. By keeping these units in the same building, TLC is maintaining operational efficiencies and a more customer service friendly environment for the industry in which we serve. The opportunity cost of not taking advantage of this new space is running the risk of having to rent a space somewhere else, running a separate operation at that space, and the additional costs and logistical problems that go along with that.</p> <p><b><i>Describe why current space(s) is (are) inadequate:</i></b> The Driver Assistance Center has a requirement for additional public space for clients and counselors to have private conversation. The existing space does not fulfil this need.</p> <p><b><i>Describe any alternatives considered, including reconfiguring existing space:</i></b> The existing space does not have enough square footage to make the Driver Assistance Center possible.</p> <p><b><i>Briefly explain how this facility will serve the geographic area indicated in the previous question:</i></b> This space will publicly serve as the Driver Assistance Center for TLC's clients.</p>

<b>PROPOSED ACTION</b>	Expansion
<b>PUBLIC PURPOSE</b>	<p><b>Describe program services and goals:</b> The main objective of this project is to update the existing Music Hall on Snug Harbor's campus to comply with the American Disability Act (ADA) and Actor's Equity requirements. The building addition will create a separate entrance for actors and theater staff as well as additional backstage support areas which will have a direct connection to audience seating, sub-grade backstage areas and stage right in the Music Hall. Certificate of Occupancy and Place of Assembly permit will be achieved as an objective of this project. This project is in the final stage of construction (FMS ID PV490-Q3).</p> <p><b>Describe why current space(s) is (are) inadequate:</b> The existing, landmarked building does not meet current ADA and Actor's Equity requirements.</p> <p><b>If relevant, indicate any space under your agency's jurisdiction that will be relinquished if new space is allocated:</b> N/A</p> <p><b>Describe any alternatives considered, including reconfiguring existing space:</b> N/A</p> <p><b>Please briefly explain how this facility will serve the geographic area indicated in the previous question:</b> The annex building will provide ADA-access for staff, performers, and the general public while increasing building capacity for public service and production values.</p>

<b>PROPOSED LOCATION</b>	130 Stuyvesant Place, Staten Island, CD 1
<b>SIZE</b>	Square footage: 2,500 – 4,500 Staff: 25 Clients to be served: n/a Parking spaces: 6
<b>SPACE USE TYPE</b>	Office
<b>PROPOSED ACTION</b>	New space
<b>PUBLIC PURPOSE</b>	<p><b><i>Describe program services and goals:</i></b> New York State's recently enacted criminal justice reform legislation, which took effect on January 1, 2020, will drastically change the practices and day-to-day operations of RCDA. RCDA will need additional space for new Assistant District Attorneys (ADAs) as well as legal support staff that will be hired to meet the requirements of the new law. The City has recently increased financial resources; however, determination of staffing, size, security needs, and location are still in progress.</p> <p><b><i>Describe why current space(s) is (are) inadequate:</i></b> RCDA offices are already over capacity. Therefore, acquiring new space is essential to accommodating this staff increase.</p> <p><b><i>Describe any alternatives considered, including reconfiguring existing space:</i></b> RCDA has taken steps to reorganize existing space to accommodate the increase in staff but all options have been exhausted and additional space is required. An example of one of the many steps RCDA has taken to maximize its existing space includes shipping over 85,000 case files to be stored offsite and repurposed file rooms to accommodate staff. RCDA has also sacrificed office space and removed several walls throughout the building to install more space-efficient desks in a bullpen style, which can accommodate more people.</p> <p><b><i>Briefly explain how this facility will serve the geographic area indicated in the previous question:</i></b> RCDA is the chief law enforcement agency of Richmond County responsible for strengthening and protecting public safety and investigating and prosecuting all crimes committed within its jurisdiction (Richmond County/Staten Island). The new space that has been requested will house the Criminal Court Bureau ADAs, who are responsible for the intake of all criminal complaints (roughly 8,000-10,000 a year) in Staten Island as well as prosecuting all non-domestic violence misdemeanor offenses. These ADAs will work with police officers and witnesses to draft the complaints from this space that are then sent for arraignment in the criminal courthouse at 26 Central Avenue. Because of the intertwined nature of the complaint room and courthouse, and legal necessity for arraignments to take place on a tight timeframe, it is imperative that this new space be within proximity to the Staten Island courthouse.</p>
<b>DESIRED DATE OF OCCUPANCY</b>	2020

<b>PROPOSED LOCATION</b>	Not yet specified
<b>SIZE</b>	Square footage: TBD Staff: TBD Clients to be served: TBD Parking spaces: n/a
<b>SPACE USE TYPE</b>	Other: Homeless shelter
<b>PROPOSED ACTION</b>	New space request
<b>PUBLIC PURPOSE</b>	<p><b><i>Describe program services and goals:</i></b> DHS proposes to replace, upgrade or develop transitional and assessment shelter facilities for homeless individuals and families as the location and composition of the homeless population changes. These facilities will provide a wide spectrum of services to stabilize homeless clients and support their search for permanent housing. With the anticipated success of DHS' permanency and prevention programs, and as the shelter system's census permits, DHS will reduce the shelter system's overall capacity.</p> <p>DHS ensures that there is sufficient capacity to meet demand through an Open-Ended Request for Proposals (RFP) Process maintained by DHS and authorized by the City's Procurement Policy Board (PPB) Rules. Through this process, nonprofit organizations submit proposals in which they offer their services as shelter operators. DHS will then review and rate the proposal and determine whether it will enter a shelter contract for sites and services proposed.</p>

PROPOSED ACTION	Expansion
PUBLIC PURPOSE	<p><b><i>Describe program services and goals:</i></b> DOT's Sidewalk Inspections &amp; Management's (SIM) Citywide Concrete. Program (CWC) is responsible for sidewalk repairs, pedestrian ramp installations, and construction of traffic medians and pedestrian safety islands throughout the five boroughs. To optimize operational efficiencies, they report to the boroughs in which they provide support. DOT's Fleet Services Division dedicates staff to maintain SIM vehicles and equipment. This program will support SIM vehicles and equipment dedicated to the Bronx.</p> <p><b><i>Describe why current space(s) is (are) inadequate:</i></b> In response to the City being ordered to install or upgrade pedestrian ramps at all 162,000 street corners in the City, DOT's Fleet Services Division will be adding another 14 mechanics specifically assigned to support SIM's expanded pedestrian ramp program in the Bronx. Part of this deployment will involve expanding existing Fleet workshops. Additional space is needed so that Fleet Services can expand its Bronx repair operations.</p> <p><b><i>Describe any alternatives considered, including reconfiguring existing space:</i></b> DOT considered expanding existing Fleet Services operations at its 2144 Webster location across the street to DOT's Bronx Sign Shop and relocating the Sign Shop. ## Appendix C – Summary of Department of Education Needs

The list below identifies 46 proposed new and leased school buildings included in the Department of Education's Adopted Five-Year Capital Plan for Fiscal Years 2025-2029. The Capital Plan was approved and adopted in June 2024. The Department has been seeking sites during the 2025 fiscal year for leased buildings and construction of new buildings, anticipating needs in fiscal years 2026 and 2027. Proposed leased buildings are marked (L) in the Facility Type column below. All other buildings listed are proposed to be newly constructed.
