Above a height of 120 feet, all portions of a #building# facing Eleventh Avenue shall be set back from the #street wall# of the #building# at least 15 feet, except such set back distance may include the depth of any permitted recesses. Portions of #street walls# along the West 31st and West 32nd Street Extensions within 50 feet of Eleventh Avenue need not setback after the maximum base height to allow tower portions that

comply with the provisions of paragraph (c) below to rise without setback.

All portions of a #building# that exceed the maximum base height of 120 feet shall comply with the tower provisions of paragraph (c) of this Section.

(c) Towers

All #stories# of a #development# or #enlargement# located partially or wholly above the maximum base height of 120 feet shall be considered a 'tower' and shall comply with the provisions of this paragraph. Not more than one tower shall be permitted on Site 4.

(1) Maximum floor plate

The gross area of any such #story# shall not exceed 12,000 square feet.

(2) Maximum length and height

For any portion of a tower above 120 feet, the maximum horizontal dimension, measured in any direction, shall not exceed 145 feet. However, if the angle of the tower's maximum horizontal dimension is aligned within 15 degrees of a 45 degree line constructed from either the southwest or northeast corner of the Site 4 rectangle in plan, as shown on Map 6 (Subdistrict F Site Plan), then such maximum horizontal dimension measured in this direction may be increased to 160 feet, provided that the maximum dimension measured perpendicular to such increased dimension does not exceed a length of 120 feet.

The maximum height of a tower on Site 4 shall be a minimum of 100 feet taller than any tower located on Site 3.

All towers that exceed a height of 350 feet shall provide articulation in accordance with Section 93-569 (Tower top articulation).

Such #street walls# shall rise without setback to a minimum height of 50 feet as measured above the level of the #High Line bed#, and a maximum height of 60 feet as measured above the level of the #High Line bed#. Above a height of 60 feet, all portions of a tower, or portions of a transition height located beneath a tower facing the #High Line# shall be set back from the #street wall# of the #building# at least 15 feet, except such set back distance may include the depth of any permitted recesses. Portions of #street walls# along the Southwest Open Space within 60 feet of the #High Line# need not setback after the maximum base height to allow portions of a tower, or portions of a transition height located beneath a tower that comply with the provisions of subparagraph (4) and subparagraph (3), respectively, of this paragraph (a) to rise without setback.

All portions of a #building# that exceed the maximum base height of 90 feet or shall comply with the tower provisions of subparagraph (4) of this paragraph (a), with the exception of a #building# which provides a transition height in accordance

with the provisions of subparagraph (3) of this paragraph (a).

- (3) Transition height

If the outermost walls of all #stories# of any tower provided in accordance with the tower provisions of subparagraph (4) of this paragraph (a) are individually inscribed within a rectangle where the east-west dimension does not exceed a length of 110 feet, a transition height may be provided above the #building# base in accordance with the provisions of this subparagraph (3).

Above the maximum base height a #street wall# may rise to a maximum transition height equal to two-thirds the height of the #street wall# of the #building# base facing the West 31st Street Extension. Such a transition height shall not exceed a maximum height of 150 feet as measured above the West 31st Street Extension #street line#.

All portions of a transition height shall be set back 30 feet from the #street wall# of the #building# base along the West 31st Street Extension and the #High Line#, except that where towers are provided directly above a portion of the transition height, such a portion of transition height located directly below a tower shall provide setbacks in accordance with the #building# base provisions of subparagraph (2) of this paragraph (a).

All portions of a #building# that exceed the maximum transition height shall comply with the tower provisions of subparagraph (4) of this paragraph (a).

- (4) Towers

All #stories# of a #development# or #enlargement# located partially or wholly above a height of 90 feet, or 150 feet if a transition height is provided in accordance with the provisions of subparagraph (3) of this paragraph (a), shall be considered a 'tower' and shall comply with the provisions of this subparagraph (4).

- (i) Maximum floor plate

If more than one tower is provided on Site 6, the aggregate gross area of any such tower #stories#, measured at any height, shall not exceed 25,000 square feet.

- (ii) Maximum length and height

The outermost walls of all #stories# of a tower, when viewed from above, shall be inscribed within a rectangle where the east-west dimension shall not exceed a length of 160 feet and the north-south dimension shall not exceed a length of 110 feet. Where more than one tower is located on Site 6, each tower shall comply independently with such maximum dimensions.

The #aggregate width of street walls# of all #stories# of a tower facing the West 31st Street Extension or the #High Line# shall not exceed 220 feet within 40 feet of the #street wall# of the #building# base.

If more than one tower is provided on Site 6, such towers shall either be equal in height, or the easternmost tower shall have a height greater than the height of the westernmost tower.

All towers that exceed a height of 350 feet shall provide articulation in accordance with Section 93-569 (Tower top articulation).

- (b) Certification to expand Site 6

The area of Site 6, as shown on Map 6 (Subdistrict F Site Plan), may be extended westward by up to 40 feet in order to accommodate a public #school# upon certification of the Chairperson of the City Planning Commission that:

- (1) The Chairperson of the City Planning Commission is in receipt of a letter from the School Construction Authority that describes the need for the additional area;
- (2) The Site and Landscape Plans for the Southwest Open Space have been approved by the Chairperson of the City Planning Commission, pursuant to Section 93-78 (Site and Landscape Plans for Public Access Areas in Subdistrict F);
- (3) No portion of a tower located on Site 6 extends beyond 395 feet west of the Eleventh Avenue #street line#; and
- (4) Any portion of a #building# located beyond 395 feet from the Eleventh Avenue #street line# affects southwesterly view corridors from the Central Open Space towards the Hudson River to the minimum extent necessary to accommodate a public #school#.

93-569

**Tower top articulation**

All towers that exceed a height of 350 feet shall provide articulation in accordance with this Section.

For the purposes of this Section, a minimum of the uppermost 15 percent of the height of a #building or other structure#, including all rooftop mechanical structures and their required enclosures pursuant to the regulations of paragraph (b) of Section 93-4 1 (Rooftop Regulations), shall henceforth be referred to as the 'Tower Top Zone'. However, chimneys, antennae or decorative spires shall not be considered part of the Tower Top Zone, provided no such structures contain #floor area#.

The height of such #building or other structure# shall be measured from the highest level of the public sidewalk or finished grade located nearest such #building or other structure#.

The Tower Top Zone shall contain an 'Upper Zone' and a 'Lower Zone'. The Lower Zone shall be a minimum of 50 percent of the height of the Tower Top Zone and shall contain tower #stories#. The Upper Zone shall contain the highest tower #story# where #floor area# occupies more than 75 percent of the gross area of such #story#, and any enclosed rooftop mechanical equipment.

For the purposed of this Section 93-569, each tower of a #building or other structure# shall be comprised of four separate tower top elevation views which shall be used to measure compliance with the regulations of this Section. Each elevation view shall have an angle of 90 degrees from another such view.

Each tower top shall provide the following forms of articulation: (a)

Change in the #building or other structure# profile

- (1) Constructing the profile change boundary

To comply with the provisions of this subparagraph (a)(1), a rectilinear boundary within the Tower Top Zone shall be created in each elevation view to determine the required amount of profile change. In order to construct such boundary, two datum lines shall first be drawn in each elevation view. Such datum lines shall begin at the average outermost edges of those portions of tower floor plates above a height of 350 feet containing #floor area# below the Tower Top Zone, and shall extend upward for the entirety of the height of the #building or other structure#. The rectilinear profile change boundary shall include the portion of these two datum lines within the Tower Top Zone, as well as their intersection with two datum lines indicating the uppermost elevation and the lowermost elevation of the Tower Top Zone. In addition, a datum line shall indicate the boundary between the Upper and Lower Zone, creating a boundary for both the Upper Zone and Lower Zone.

- (2) Required profile change

A minimum of 10 percent of the area of the profile change boundary within the Lower Zone shall remain open to the sky in each required elevation view. Such profile change shall begin upward at the lowermost datum line of the Tower Top Zone. In addition, a minimum of 20 percent of the area of the profile change boundary within the Upper Zone shall remain open to the sky in each required elevation view.

However, for portions of a #building or other structure# providing enclosed rooftop mechanical equipment within the Upper Zone, the width (as viewed in elevation) of the lowermost portion of enclosed rooftop mechanical space at that point in elevation which coincides with the uppermost portion of the highest tower #story# shall in no event be reduced beyond 50 percent of the width of such highest tower #story#. Upwards of such a point in elevation, no restriction on maximum width reduction for enclosed rooftops mechanical spaces shall apply.

- (b) Change in the #building or other structure lot coverage#

For portions of a #building or other structure# within the Lower Zone, the average #lot coverage# for all tower #stories# within such zone shall not exceed 80 percent of the #lot coverage# of the tower #story# with the largest #lot coverage# below the Tower Top Zone and above a height of 350 feet.

- (c) Material continuity

A minimum of ten percent of the surface area of the exterior portion of the facade of the #building or other structure# within the Tower Top Zone, as viewed in elevation, shall be composed of a single material. Such material shall be continuously visible (in each elevation view) from the lowermost datum line of the Tower Top Zone to the uppermost datum line of the Tower Top Zone. However, within each #story# of the Lower Zone, a break in the vertical continuity of the material shall be permitted, provided that the vertical break does not exceed twelve inches.

Above a height of 120 feet, a setback at least 20 feet in depth is required from such prolongation line. However, such building wall may rise without setback at such prolongation line, provided the aggregate width of such building wall does not exceed 50 percent of the width of such line and provided all other portions of the #building# that exceed a height of 120 feet are set back at least 20 feet from such prolongation line at a height not lower than 90 feet.

The retail and glazing requirements of Section 93-14 (~~Retail Continuity Along Designated Streets~~ Ground Floor Level Requirements) shall apply to at least 70 percent of the length of all building walls facing each side of the outdoor plaza, except that such retail requirements shall not apply to any #building# containing only #uses# in Use Group 3 or 4 located west of the southerly prolongation of the eastern sidewalk widening line of Hudson Boulevard East and within 220 feet of West 30th Street.

■ NOTICE

**NOTICE OF INTENT TO ENTER INTO NEGOTIATIONS**

Pursuant to Section 1-14 (f) of the Concession Rules of the City of New York, the Department of Citywide Administrative Services, Division of Real Estate Services (DCAS/DRES) intends to enter into negotiations with Villa Marin GMC, Inc. (“Villa Marin”) to utilize approximately 60,800 square feet of waterfront property located approximately 50 feet north and approximately 244 feet west of the south west corner of Housman Avenue and Richmond Terrace, known as block 1109, portion of lots 8, 14, 18, 23. This concession term is for one (1) year with two (2) one year renewal options, exercisable at the City’s sole discretion. The property will be utilized pursuant to an occupancy permit issued by DCAS/DRES; no leasehold or other proprietary right is offered. The concession term will commence approximately January 1, 2010. DCAS/DRES projects approximately \$56,400 in annual concession revenue to the City.

DCAS has determined that it is not in the best interest of the City to award this concession pursuant to a competitive process because of the unique location of the property. The concession agreement will authorize Villa Marin to continue to use this property for storage of trailers and vehicle parking in conjunction with Villa Marin’s car dealership business located on the adjacent lot.

Instructions and information for potential concessionaries concerning how they may express interest in the proposed concession and/or how they may obtain additional information concerning the proposed concession should be directed to Margie Harris, Director, Division of Real Estate Services at (212) 669-4241 or via email at [mharris@dcas.nyc.gov](mailto:mharris@dcas.nyc.gov). To ensure the consideration by DCAS/DRES of any “expressions of interest” resulting from this notification please contact Ms. Harris by November 26, 2009. Ms. Harris may also be contacted with any questions and/or correspondence relating to the potential concession award. DCAS will evaluate any proposals received in response to this solicitation on the basis of the fee offered and the intended use of the concession property by the proposed concessionaire. Where applicable, DCAS/DRES may condition the award of this concession upon the successful completion of VENDEX Questionnaires (Vendor and Principal Questionnaires) and review of that information by the Department of Investigation.

This concession is subject to applicable provisions of Federal, State, and Local laws and executive orders requiring affirmative action and equal employment opportunity. Please note that the New York City Comptroller is charged with the audit of concession agreements in New York City. Any person or entity who believes that there has been unfairness, favoritism or impropriety in the proposal process should inform the Comptroller, Office of Contract Administration, 1 Centre Street, New York, New York 10007, telephone number (212) 669-2323.

**Name, Description and Location of Proposal**

Rose Plaza on the River

The applicant, Rose River Plaza, LLC, is proposing several discretionary actions in connection with the redevelopment of the waterfront parcels located at 470-490 Kent Avenue (Block 2134, Lots 1, 150 and part of 126) located in the Williamsburg neighborhood of Brooklyn Community District 1.

The proposed actions consist of the following discretionary approvals:

- A map amendment for Block 2134, Lots 1 and 150 and a portion of Lot 126 to rezone an M3-1 manufacturing district to an R7-3 residential district with a 100-foot C2-4 commercial overlay along Kent and Division avenues. The existing M3-1 zoning district allows for heavy industrial uses and commercial uses at a maximum FAR of 2.0; it does not allow residential use. The proposed R7-3 district allows residential use at a maximum 3.75 FAR. The proposed C2-4 overlay would allow commercial use at a maximum FAR of 2.0.
- A text amendment to Appendix F of the New York City Zoning Resolution (ZR), which would include the Project Site among the Inclusionary Housing designated areas. The text amendment would increase the maximum FAR of the proposed project from 3.75 FAR to 5.0 FAR.
- A special permit pursuant to ZR section 62-736, "Bulk modifications on waterfront blocks" to permit the following modifications:
  - ZR Section 62-341(a)(4) to modify the maximum 80 percent permitted footprint coverage for those stories above 185 feet for Buildings A and C. Buildings A and C's footprint coverage at height of 185 feet are 100 percent of the stories below. Building B complies with ZR Section 62-341(a)(4).
  - ZR Section 62-341(c)(2) to modify the maximum permitted building height of 185 feet to 249 feet for Building A and 287 feet for Building C.
  - ZR Section 62-341(c)(4) to modify the maximum permitted floor plate of 8,100 square feet gross floor area above 65 feet maximum base height, to 9,443 square feet (Buildings A and B) and 9,018 square feet (Building C).
  - ZR Section 62-341(c)(5) to modify setback requirements above 150 feet for Buildings A, B and C as Buildings A, B and C are not setback at height of 150 feet.
  - ZR Section 62-341(c)(6) which restricts the maximum length of any story located above the maximum base height and facing a shoreline to 100 feet. The length of the seventh floor of Building A is 119 feet, and the length of the seventh floor of Building C is 160 feet. Building B complies with ZR Section 62-341(c)(6).
- An authorization pursuant to ZR 62-722(b) for the following:
  - ZR Sections 62-62(b)(2), 62-626(a)(2)(i) and 62-626(a)(2)(ii) to permit an obstruction within a portion of the buffer zone to allow for an ancillary pathway, handicap accessible ramp and additional seating.
  - ZR Section 62-632(a) to alter the specific design requirements for Prototype II: Moderate-Intensity Walkway to locate the public walkway more than 10 feet from the seaward edge of the shore public walkway.
  - ZR Section 62-632(b) to modify the specific design requirements for Prototype II: Moderate-Intensity Walkway to allow for less than 60 percent of the total linear seating landward of the shore public walkway. Although less than 60 percent of the total linear seating is located landward of the shore public walkway, the public shore walkway will include more than the total required linear feet of seating.
  - ZR Section 62-632 (c)(1) and (c)(2) to modify the specific design requirements for Prototype II: Moderate-Intensity Walkway relating to minimum plantings within the pedestrian circulation zone.
  - ZR Sections 62-635 (b)(1) and (b)(2) to modify Supplemental Public Access Area - Prototype II: Waterview Park requirements, specifically relating to minimum pedestrian circulation zone requirements, and "major portion" dimensions, to preserve the incorporation of the Urban Beach and Grass Garden, among the other pedestrian friendly waterfront elements.
  - ZR Section 62-636(b) to vary the required linear feet of seating within the Supplemental Public Access Area - Prototype II: Waterview Park.
  - ZR Section 62-636(c)(1) to modify the Supplemental Public Access Area - Prototype II: Waterview Park requirement to permit less than 50 percent of planting area within the pedestrian circulation zone.
  - ZR Section 62-636(c)(2) to modify the Supplemental Public Access Area -

Prototype II: Waterview Park requirement to allow less than 35 percent of lawn area with the major portion of the Waterview Park.

- ZR Section 62-642 to allow for obstructions within the required visual corridor to slightly modify the visual corridor's slope to accommodate the below grade parking facility. The authorization would also authorize a single tree within a 15 foot wide area along one side of the centerline of the visual corridor.
- ZR Section 62-672(c) to allow seating to be set back less than three feet from the proposed circulation path.
- ZR Section 62-675(b)(3) to modify tree and shrub spacing requirements.
- ZR Section 62-675 (c)(4) to modify raised planting berm requirements to permit the height from the public shore walkway to the top of the raised planting berm to measure more than 60 inches in height.
- In addition, the following ministerial approvals are being sought:
  - A zoning certification pursuant to ZR section 62-711 "Waterfront public access and visual corridors," that a site plan has been submitted to show compliance with waterfront public access and visual corridor requirements and;
  - A Coastal Zone Consistency Determination.

Construction of the proposed project would also require permits from the Army Corps of Engineers and the New York State Department of Environmental Conservation (NYSDEC) relating to the proposed reconstruction of the platform along the water's edge. Consequently, a coordinated review with NYSDEC is being conducted.

The applicant may also apply for Low Income Housing Tax Credits and/or the Low Income Housing Finance Program from the New York City Department of Housing Preservation and Development (HPD) and the New York City Housing Development Corporation (HDC). These applications would be prepared under a separate undertaking prior to construction on the project site.

The proposed actions would facilitate a proposal by the applicant to develop three mixed-used buildings- Buildings A, B and C - containing approximately 816,065 square feet of residential floor area above grade, including 801 residential units, 160 of which would be affordable units developed pursuant to the city's Inclusionary Housing Program (20% of the proposed project's housing); and 29,000 square feet of commercial floor area. The applicant intends to provide a mix of studio, one-, two-, and three-bedroom apartments. Building A would be located in the southern portion of the project site and front Kent and Division Avenues. It would consist of a 25-story tower (249 feet). Building B would be located on Kent Avenue in the northern portion of the site and would consist of 18-stories (181 feet), including a 6-story base. Building C would be located at the northern portion of the projects site, west of Building B, and would consist of a six-story base and a 29-story tower. 496 accessory parking spaces would be provided below grade. The accessory parking would be accessed via a proposed curb cut located on Division Avenue at the southern end of the project site. Egress would be provided via a proposed curb cut located on Kent Avenue between South 10th and South 11th Streets. The proposed development would include the construction of 32,200 sf of publicly accessible open space and a publicly accessible waterfront esplanade, as well as 67,000 sf of private open space.

The project site is currently occupied by two buildings containing a lumber yard and storage and wholesale distribution businesses on Block 2134, Lots 1 and 150. Block 2134, Lot 126 consists of underwater lands. The lot, which is owned by the City of New York, is located within the East River in the area between the Bulkhead Line and the U.S. Pierhead Line. The city has no plans to develop the parcels.

Construction on the proposed project is anticipated to be completed by 2011.

**Statement of No Significant Effect:**

The Environmental Assessment and Review Division of the Department of City Planning, on behalf of the City Planning Commission, has completed its technical review of the Environmental Assessment Statement, dated October 28, 2009, prepared in connection with the ULURP Application (No. 080339 ZMK, 080340 ZSK, N080341 ZAK, N080342 ZCK and N100056ZRY). The City Planning Commission has determined that the proposed action will have no significant effect on the quality of the environment, once it is modified as follows:

1. The applicant has entered into a restrictive declaration with the New York City Landmarks Preservation Commission (LPC) to develop and implement an archaeological monitoring program consultation with LPC. The historic resources analysis concluded that land filling features dating to the early 19th century have the potential to yield significant archaeological data. Consequently, construction on the project site could create the potential for a significant adverse impact related to archaeological resources. Pursuant to the restrictive declaration, the applicant, Rose River Plaza, LLC, agrees to develop and implement an archaeological monitoring program in consultation with LPC.
2. The applicant, Rose River Plaza, LLC, agrees via a restrictive declaration with the New York City Department of Environmental Protection (DEP) to require that the applicant identify and remediate any hazardous materials found in connection with the development of the project site. The declaration states that the applicant would not undertake grading, excavation, foundation, alteration,

building or other permits for the site until DEP has issued a Notice of Satisfaction.

3. The applicant, Rose River Plaza, LLC, agrees via a restrictive declaration with the New York City Department of Transportation (DOT) to identify the existence of any additional potential traffic impacts, if any, resulting from the development of the property thirty days from the implementation of the Kent Avenue Improvement, a date no later than December 31, 2011, and has agreed to submit to DOT and DCP a traffic study prepared by a qualified traffic consultant, to test and identify whether any potential additional traffic impacts would result, if any. If the analysis identifies any potential impacts, the applicant agrees to coordinate any relevant mitigation measures with the DOT and Department of City Planning.

Furthermore, the applicant agrees to contact the DOT within six months after the completion of this project and to inform them of the need to implement the following traffic mitigation. DOT agrees to investigate the need of implementing this mitigation measure once the project is built and occupied:

- At the intersection of Broadway and Kent Avenue, during the weekday PM peak hour, 2 seconds a 2-second shift in green time from eastbound/westbound phase to the northbound/southbound phase.
4. Additionally, the applicant will enter into a restrictive declaration to restrict the fuel type for all HVAC systems to ensure that no significant adverse impacts associated with Air Quality will occur. The restrictive declaration will require that the heating, ventilation, and air conditioning (HVAC) system, serving the Proposed Project, burn natural gas exclusively.
  5. Furthermore, the applicant will enter into a restrictive declaration to provide window attenuation to ensure that no significant adverse impacts associated with Noise will occur. The restrictive declaration will require that the residential windows bordering Division Avenue, the East River, and the north project site boundary require 30 dBA of composite window attenuation, and the proposed residential/commercial windows at the facades bordering Kent Avenue require 35 dBA and 30 dBA respectively, of composite window attenuation.

**Supporting Statement:**

The above determination is based on an environmental assessment which finds that:

1. The scope of work for the monitoring program will be submitted to LPC before work of the proposed project begins. The applicant has entered into a restrictive declaration with LPC that requires prior to excavation activities on the project site, the LPC approve a testing protocol and mitigation plan, as necessary. The restrictive declaration requires that the Department of Buildings cannot issue a building permit until LPC either issues 1) a notice to proceed; 2) a notice of no objection; or 3) a notice of satisfaction for the archaeological investigation and potential mitigation of any archaeological resources within the Project Site.
- The restrictive declaration was executed September 21, 2009 and submitted for recording on October 28, 2009. Consequently, no significant adverse impacts related to historic resources are expected to occur.
2. A Phase I Environmental Site Assessment (ESA) was prepared in January 2004, and is available in the proposal's CEQR file, for the properties located in Brooklyn (Block 2134, Lots 1 and 150) for the project site. The Phase I ESA was reviewed by DEP's Office of Environmental Planning and Assessment. Phase II testing was performed in October 2005 and activities were conducted in accordance with Sampling Protocol and site-specific Health and Safety Plan (HASP) dated November 2004, which was reviewed and approved by DEP in December, 2004. The declaration, binding on all successors and assigns of the applicant, requires that the applicant identify and remediate any hazardous materials found in connection with the development of the project site. The Final Notice of Satisfaction would be issued only after the applicant has demonstrated that hazardous materials remediation has been fully completed to the satisfaction of DEP.

The restrictive declaration was executed September 21, 2009 and submitted for recording on October 28, 2009. Consequently, no significant adverse impacts related to hazardous materials are expected to occur.

3. The Restrictive Declaration with DOT (approved August 5th, 2009) requires that prior to execution of a temporary or permanent certificate of occupancy by the Department of Buildings, the applicant will prepare a traffic study of future conditions with the proposed street changes to identify any additional traffic impacts following the stabilization of the Kent Avenue improvement program and if any additional improvement measures are warranted. NYCDOT must review and approve this traffic study, and the applicant must implement the recommended improvement measures to the written satisfaction of NYCDOT. The restrictive declaration was executed September 21, 2009 and submitted for recording on October 28, 2009.

The traffic analysis indicates that project-generated traffic has the potential to generate a significant adverse impact at the following intersection:

- Broadway and Kent Avenue

The proposed signal timing modification would fully mitigate the potential impact at this intersection. With this improvement in place, the southbound approach would operate at LOS D compared to an LOS E.

With the restrictive declaration and signal timing modification in place, no significant adverse impacts related to traffic are expected to occur.

- The air quality analysis indicates that the proposed project has the potential to generate significant adverse impacts resulting from project-generated HVAC emissions. Consequently, a restrictive declaration would require the exclusive use of natural gas in all HVAC systems. With this restriction in place, no significant adverse impacts related to air quality are expected to occur.
- The noise analysis indicates that the proposed project has the potential to generate significant adverse impacts related to high levels of existing ambient noise. Consequently, a restrictive declaration would require 30 dBA of window attenuation for the residential windows bordering Division Avenue, the East River, and the north project site, and 35 dBA for residential and 30 dBA for commercial windows at the facades bordering Kent Avenue. With these restrictions in place, no significant adverse impacts related to noise are expected to occur.
- No other significant adverse effects on the environment which would require an Environmental Impact Statement are foreseeable.

It is fully agreed and understood that if the foregoing conditions, modification, and alterations are not fully incorporated into the proposed action, this Conditional Negative Declaration shall become null and void. In such event, the applicant shall be required to prepare a Draft Environmental Impact Statement before proceeding further with said proposal.

This Conditional Negative Declaration has been prepared in accordance with Article 8 of the Environmental Conservation Law 6NYCRR part 617.

**Name, Description and Location of Proposal:**

15 William Street

The applicant, SDS William Street, LLC is applying to the City Planning Commission for a Special Permit pursuant to Zoning Resolution (ZR) §74-52 for a public parking garage and a text amendment to Map 5 in Appendix A of the Special Lower Manhattan District to eliminate the prohibition on curb cuts on the north side of Beaver Street between Broad and William Streets. The proposed actions would facilitate a proposal by the applicant to develop a 195-space, monthly only, public parking garage on the ground floor and three cellar levels of a recently built 44-story mixed-use building located at 15 William Street (Block 25, Lot 35). The project site is located in the Financial District neighborhood of Manhattan Community District 1 within a C5-5 district of the Special Lower Manhattan District.

The project site is also located with the Wall Street Historic District, listed on the State/National Register, and is part of the Street Plan of New Amsterdam and Colonial New York, a designated New York City landmark. The project site's zoning lot includes the Lord's Court building (Block 25, Lot 27) which is also located within the Wall Street Historic District. The project site's zoning lot is contiguous to 25 Broad Street, listed on the State/National Register and a designated NYC landmark, and the Lee-Higginson Bank, located within the Wall Street Historic District, and determined by the New York City Landmarks Preservation Commission to be State/National Register eligible.

The project site is currently occupied by a recently constructed 44 story building which, when fully occupied, is expected to include approximately 320 dwelling units, 6,127 gross square-feet of ground floor retail space, a 65 space accessory garage on part of the ground floor and on the three cellar levels. The project site provides an easement with abutting properties which is used as a driveway to access loading areas at the rear of the building. There are two existing curb cuts: an as-of-right 10 foot wide curb cut for access to the garage and a 15 foot wide curb cut (initially permitted by Department of Buildings and subsequently revoked) constructed for loading access. Both curb cuts are located on Beaver Street.

The proposed action would facilitate the development of a 195 space, monthly-only, attended public garage on part of the ground floor and on portions of cellar levels 1 and 3 and all of cellar level 2. The action would also permit the expansion of both curb cuts to 20 feet, providing each with one lane of entry and one lane of exit. Absent the proposed action, the area of the proposed garage would be occupied by a 65 space accessory garage, and retail storage, accessory to the building's ground floor retail space.

**The City Planning Commission is considering modifications to the proposed actions. Under the proposed modifications, the proposed special permit for the public parking garage would not be approved, and the proposed text amendment would be modified to not allow the widening of the existing 10 foot curb cut to facilitate access into the proposed public parking garage. Consequently, the proposed modifications would allow only for a 20 foot curb cut to provide access to the loading areas at the rear of the building.**

This application replaces an earlier application for the project site, CEQR No. 05DCP074M, which was withdrawn.

**Statement of No Significant Effect:**

The Environmental Assessment and Review Division of the Department of City Planning, on behalf of the City Planning Commission, have completed its technical review of the Environmental Assessment Statement, dated June 23, 2009, prepared in connection with the ULURP applications (ULURP Nos. C090293ZSM and N090294ZRM). The City Planning Commission has determined that the proposed action will have no significant effect on the quality of the environment.

**Supporting Statement:**

The above determination is based on an environmental assessment which finds that:

- On June 29, 2009, a Negative Declaration (see attached) was issued for the original application.
- The modifications under consideration by the City Planning Commission would allow for a 20 foot curb cut providing access to the loading areas at the rear of the building, but would not allow the proposed 195-space, monthly only, public parking garage or the proposed widening of the 10 foot curb cut leading to the existing 65 space accessory garage to 20 feet. These modifications would not result in significant adverse environmental impacts or alter the conclusions of the Negative Declaration issued on June 29, 2009.
- The New York City Landmarks Preservation Commission (LPC) previously determined that the 15 William Street site had potential archaeological sensitivity, in part based on a Phase 1A Archaeological Assessment of the site prepared by Historical Perspectives, Inc., which found that the site had potential sensitivity for a well and other features associated with a 17th-century brewery, a 17th-century residence, and subsequent residential occupations through the 18th and 19th centuries. However, this sensitivity was eliminated by excavation activities occurring before the current owner purchased the project site.
- No significant effects on the environment which would require an Environmental Impact Statement are foreseeable. This Negative Declaration has been prepared in accordance with Article 8 of the Environmental Conservation Law 6NYCRR part 617.

This Revised Negative Declaration has been prepared in accordance with Article 8 of the Environmental Conservation Law 6NYCRR part 617.
