The following report from the Chief Engineer of the Bureau of Highways:

City of New York, Borough of Brooklyn, Office of Commissioner of Public Works,  
Bureau of Highways, Chief Engineer's Office,

October 16, 1903.

WILLIAM C. REDFIELD, Esq., Commissioner of Public Works, Borough of Brooklyn:

Dear Sir—I return you herewith petition for the opening of Senator street, from First avenue to its easterly boundary.

In regard to this I would say that I find that this street is laid down on the map but has never been legally opened. There is one small building within the lines of the street, just west of Third avenue. If proceedings are initiated for opening this street, they should read from First to Fifth avenue.

Respectfully,

(Signed) GEO. W. TILLSON, Chief Engineer.

Following report from the Chief Engineer of the Bureau of Highways:

City of New York, Borough of Brooklyn, Office of Commissioner of Public Works,  
Bureau of Highways, Chief Engineer's Office,

March 26, 1903.

Mr. WILLIAM C. REDFIELD, Commissioner of Public Works:

Dear Sir—I return you herewith petition for opening Avenue T, from Coney Island avenue to Ocean Parkway. I would say that there is no necessity for opening the street any further than is here contemplated, and that the street is laid down on the map of New York. Also, that there are buildings on the line of the proposed street. There is no record of the street having been legally opened, although the roadway is in use from Coney Island avenue to East Eighth street.

Respectfully,

(Signed) GEO. W. TILLSON, Chief Engineer.

The following resolution was offered:

Resolved, That this resolution be forwarded to the Board of Estimate and Apportionment for its approval.

Which was decided in the affirmative by the following vote:

Commissioner Redfield and Aldermen Malone and Lundy.

Approved by the President of the Borough November 12, 1903.

No. 34.

To rescind resolution adopted December 19, 1902, amending one adopted June 19, 1902, to open East Nineteenth street from Gravesend Neck road to Voorhies lane or Jerome avenue by adding thereto the words, "omitting therefrom the property within the lines of said street occupied by the tracks of the New York and Manhattan Beach Railroad."

Deferred.

No. 275.

Petition to close Johnson's lane from a point on East Fourteenth street, north of Avenue S, across East Fifteenth street, the tracks of the New York and Brighton Beach Division of the Brooklyn Heights Railroad Company, East Sixteenth street, to a point between East Sixteenth street and East Seventeenth street, and thence south to Avenue S.

No. 411.

Petition to pave with granite blocks Nineteenth street 1,500 feet west of Third avenue.

The following report from the Chief Engineer of the Bureau of Highways:

City of New York, Borough of Brooklyn, Office of Commissioner of Public Works,  
Bureau of Highways, Chief Engineer's Office,

October 9, 1903.

WILLIAM C. REDFIELD, Esq., Commissioner of Public Works, Borough of Brooklyn:

Dear Sir—I return you herewith letter of Justin McCarthy, Secretary to the Local Boards, in which he asks for a new report in the matter of repaving with granite on Nineteenth street, 1,500 feet west of Third avenue.

In reply to this, I would say that my report, dated September 9, 1903, and numbered 165, did provide the information requested by Mr. McCarthy. By an error,

however, it was said that the estimate was given to the high water line when it should have read to the bulkhead line. The figures are correct for the bulkhead line. If Report No. 165 be changed to read, "The estimate is given from Third avenue to the bulkhead line, the portion of the street supposed to be open," it will be correct.

Respectfully,

(Signed) GEO. W. TILLSON, Chief Engineer.

Grading and Paving Report No. 165.

City of New York, Borough of Brooklyn, Office of Commissioner of Public Works,  
Bureau of Highways, Chief Engineer's Office,

September 9, 1903.

WILLIAM C. REDFIELD, Esq., Commissioner of Public Works, Borough of Brooklyn:

Dear Sir—I return you herewith petition for paving with granite block Nineteenth street, 1,500 feet west of Third avenue. The street has been declared open from Third avenue to the high-water line by resolution of the Common Council of the City of Brooklyn, October 13, 1890. It has been opened legally from the high-water line to the bulkhead line, title having been vested September 20, 1901. The street is now open for traffic from Third avenue to the high-water line.

The estimate is given from Third avenue to the bulkhead line, the portion of the street supposed to be open.

The items of cost are:

6,600 cubic yards of grading, at 45 cents;

2,540 linear feet of curb, at 85 cents;

4,230 square yards of granite, at \$3.35.

Total estimated cost, \$20,300. Assessed valuation, \$70,000.

Water mains laid about 400 feet west of Third avenue and gas mains 150 feet west.

Report of the Sewer Bureau herewith attached.

I also send herewith plan and profile for the establishment of the grade on the lower end of this street, as there is none established below Third avenue.

Respectfully,

(Signed) GEO. W. TILLSON, Chief Engineer.

The following technical description from the Chief Engineer of the Bureau of Highways:

Technical description for proposed grade on Nineteenth street, from Third avenue to bulkhead line.

Beginning at Third avenue and Nineteenth street the grade to be 12.17 feet, as heretofore; thence westerly along Nineteenth street to the intersection of Second avenue (as authorized by chapter 132, Laws of 1892), and Nineteenth street, the grade to be 7.00 feet, as heretofore; thence westerly along Nineteenth street to bulkhead line, the grade to be 5.00 feet.

All elevations are referred to mean high water datum, as established by the Bureau of Highways, Borough of Brooklyn.

Dated Brooklyn, September 10, 1903.

(Signed) GEO. W. TILLSON,  
Chief Engineer, Bureau of Highways.

The following reports from the Superintendent of Sewers:

City of New York, Borough of Brooklyn, Bureau of Sewers, Office of Superintendent,

August 3, 1903.

Mr. GEO. W. TILLSON, Chief Engineer, Bureau of Highways:

Dear Sir—On July 7 you informed me that Nineteenth street, from Third avenue to a point 1,500 feet west, had been the subject of a petition filed in your office, requesting an improvement in the matter of paving. You desired that a statement be furnished you as to the sewer improvements which should precede the paving of this street.

This matter was referred to the Chief Engineer of Sewers, Borough of Brooklyn, who reports to me, as shown in the communication next attached.

Yours respectfully,

(Signed) JOHN THATCHER,  
Superintendent of Sewers, Borough of Brooklyn.

August 3, 1903.

Mr. JOHN THATCHER, Superintendent of Sewers:

Dear Sir—Referring to a communication addressed to you by the Chief Engineer of Highways, under date of July 7, 1903, informing you that a petition had been filed in his office for paving Nineteenth street, from Third avenue to a point 1,500 feet west, I beg to advise that a sewer extends in this street from Third avenue to a point 1,255 feet west of same, said point being where the bulkhead line of the New York Bay crosses Nineteenth street.

The paving improvement here is one that should meet the attention of the City authorities, as the present condition of the street led to the flooding of the Straw Dyeing Works, Parsons & Co., situate on the north side of Nineteenth street, between Second and Third avenues, on June 30, 1903, during a very heavy rainfall. Having been notified over the telephone that they were being flooded on June 30, I despatched Mr. John Hammond to the location, and I quote herewith a report that he has made to me in the matter:

"I arrived on the premises at about 12 m., and was shown through the factory, which I found to be partly flooded with water, particularly the boiler room and building in which it is situated. The other buildings were slightly wet on the cellar floor, and it was claimed that sewage had forced its way back into them through the drain fixtures in the front of buildings. The water in the boiler room and in that building came from surface drainage running into the building from Nineteenth street, the building being several feet lower in some parts than said street. The Parsons people do not dispute this fact, but say that during the immensely heavy storm this morning that the cover of sewer manhole in front was blown off, and that for a time at least water was emitted from the same, thus adding to the flood. These premises would have escaped flooding even during this unusual storm if the portion of Nineteenth street between them and Gowanus Canal had been allowed to remain open and the natural drainage flow maintained uninterrupted. This, however, is not the case. The City has leased the lower part of Nineteenth street, and the lessee has erected a high board fence completely across the street and filled in the surface of same until it is, I judge, a foot and a half or two feet higher than the portion of street in front of Parsons' factory, thus making a small watershed towards this point. It was raining quite heavily during my visit, and water was running to this place and being carried off through the sewer manhole, some bricks of which had been removed for the purpose of giving it egress. I am informed that an unusually high tide prevailed at the time when the storm was at its height, and as the ground here is mostly filled in or made ground, some of the water seen in them may have been due to filtration from this cause. The sewer is an overflow outlet for the larger sewer in Third avenue, and is 36-inch in size, and in front of Parsons' factory 5 or 6 feet deep; it seems to be working all right, but was running nearly full when I looked down the manhole at about 12.30 p. m."

It is evident that a repetition of the flooding will occur unless the board fence spoken of by Mr. Hammond is removed, and the street graded to the bulkhead line.

Two sewer basins can be built, one at the northeast and the other at the southeast corner of Second avenue and Nineteenth street, which would be of considerable benefit, providing the grading is performed; otherwise, they would be of no use. I estimate the cost of same at \$320. The assessed valuation of the real estate within the probable area of assessment is \$362,500.

No legal elevation can be found that has been adopted for this intersection, but same will be if the street is graded from Third avenue to bulkhead line about 7 feet. In view of this fact, an elevation at the intersection should be established by the Bureau of Highways in the regular manner.

Yours respectfully,

(Signed) HENRY R. ASSERSON,  
Chief Engineer of Sewers, Borough of Brooklyn.

No. 97.

Resolution to construct sewer in Sixth avenue, between Seventy-third and Seventy-fourth streets, and from Seventy-sixth street to Fort Hamilton avenue, and outlet sewer in Seventy-seventh street, between Fifth and Sixth avenues.

Deferred until such time as grading is completed.

No. 97.

The following report from the Superintendent of Sewers:

September 12, 1903.

Hon. WILLIAM C. REDFIELD, Commissioner of Public Works:

Dear Sir—I herewith return a communication which you referred to me, the same being from the Secretary of the Local Boards, addressed to you under date of August 31, 1903, setting forth an extract from a letter of Mr. Nelson P. Lewis, Chief Engineer of the Board of Estimate and Apportionment, in regard to the paving with asphalt of Sixth avenue, between Sixty-fifth street and Fort Hamilton avenue.

It is desired that a report upon the necessary sewer improvements should be furnished to precede the paving of said avenue.

The Chief Engineer of Sewers, Borough of Brooklyn, reports to me as follows: I beg to advise that sewers will be necessary in Sixth avenue, from Seventy-third street to Seventy-fourth street; and Sixth avenue, from Seventy-sixth street to Fort Hamilton avenue.

Also sewer basins are required in Sixth avenue, all four corners of Sixty-fifth street; north and east corners of Sixty-sixth street; south and west corners of Sixty-seventh street; all four corners of Sixty-eighth street; all four corners of Bay Ridge avenue; all four corners of Ovington avenue; south and east corners of Seventy-first street; south and east corners of Seventy-second street, and east corner of Seventy-third street, the estimated cost of which is \$24,300, and the assessed valuation of the real estate within the probable area of assessment is \$357,960.

The items of work necessary are:

280 feet 30-inch brick sewer, 558 feet 24-inch pipe sewer, 280 feet 18-inch pipe sewer, 330 feet 15-inch pipe sewer, 1,080 feet 12-inch pipe sewer, 20 manholes, 47 sewer basins and appurtenances.

I also beg to state that an outlet sewer will be necessary in Seventy-seventh street, between Fifth and Sixth avenues, the estimated cost of which is \$9,400, and the assessed valuation of the real estate within the probable area of assessment is \$504,875.

The items of work necessary are:

820 feet 36-inch brick sewer, 7 manholes and appurtenances.

Another outlet sewer is also necessary, viz., in Seventy-sixth street, between Fifth avenue and Sixth avenue, but as said outlet is included in a report of even date, in answer to a petition, it is omitted herein in order to avoid confusion in authorization.

In regard to the legal opening of the streets, I beg to state Sixth avenue, Sixtieth street to Fort Hamilton avenue, Commissioners were appointed June 26, 1899 ("City Record," page 8191, December 20, 1899). As this street contained a railroad crossing, the legality of the proceedings was questioned, and an opinion rendered thereon by Corporation Counsel Rives, October 31, 1902 ("City Record," page 313, January 13, 1903). Perhaps this was one of the streets included in the list sent to the Legislature to straighten out the legality of the proceedings.

Seventy-seventh street, from Shore road to Seventh avenue. Bill of costs, etc., in opening proceedings was to have been presented to Supreme Court, July 15, 1903, for confirmation ("City Record," 1903, page 5489).

Respectfully yours,

(Signed) JOHN THATCHER, Superintendent of Sewers.

The following resolution was offered:

Dear Sir—I herewith return a communication which you referred to me, the same being addressed to the Bureau of Sewers by the Secretary of the President of the Borough of Brooklyn, dated August 28, 1903, requesting information in relation to the construction of a sewer in Ninety-sixth street, between Marine avenue and Shore road.

I also return original petition which accompanied said communication.

The Chief Engineer of Sewers, Borough of Brooklyn, reports to me as follows: I beg to report that the estimated cost for above mentioned improvement is \$3,400, and the assessed valuation of the real estate within the probable area of assessment is \$58,060.

The items of work necessary are:

50 feet 15-inch pipe sewer, 625 feet 12-inch pipe sewer, 7 manholes, 2 receiving basins and appurtenances.

In regard to outlet sewers, information of which is requested, I beg to state that the outlets are built or under construction.

In regard to the legal opening of the streets, information of which is requested, I beg to state that Ninety-sixth street, from Marine avenue to Narrows avenue (now Shore road), was declared open by Common Council, City of Brooklyn, April 8, 1895.

Application for appointment of Commissioners for opening Ninety-sixth street, from Third avenue to Shore road, was to be made May 25, 1903. ("City Record," page 3822, May 11, 1903.)

Amendatory proceedings to exclude the part between Marine avenue and Shore road were to come before the Local Board July 1, 1903. ("City Record," June 16, 1903, page 4985.)

Respectfully yours,

(Signed) JOHN THATCHER, Superintendent of Sewers.

HENRY R. ASSERSON, Esq., Chief Engineer, Bureau of Sewers, Borough of Brooklyn:

Dear Sir—Replying to your letter asking if Ninety-sixth street, from Marine avenue to the Shore road, is an open street or not, I would say that it is laid down on the map and is 60 feet wide. There are no buildings within the lines of the street. Opening proceedings are now pending for this street, from Third avenue to the Shore road. This includes the portion asked for by you. Rule map was furnished the Corporation Counsel's office April 4, 1903.

City of New York, Borough of Brooklyn, Bureau of Sewers, Office of Superintendent, Room 46, Municipal Department Building,

Mr. GEORGE W. TILLSON, Chief Engineer of Highways:

Dear Sir—In reply to your communication of August 18, 1903, in which you informed me that a petition had been filed in your office for grading, paving and curbing Bay Seventeenth street, between Benson avenue and Cropsey avenue, I respectfully state that the Chief Engineer of this Bureau has furnished me with the following information:

I beg to advise that all sewers necessary are built. A sewer basin is required at the easterly corner of Bay Seventeenth street and Bath avenue, however, the estimated cost for same being \$165, and the assessed valuation of the real estate within the probable area of assessment being \$44,700.

This basin is included in the quantities of the Bath avenue sewer which has recently been authorized, but is given here if it is decided that Bay Seventeenth street should be paved at once, in which case the same will be omitted in the Bath avenue sewer contract.

About 158 feet south of Benson avenue there is shown on the insurance and other maps, including those of the Assessors, Rutherford place, a street 60 feet wide, the status of which is uncertain, the street not being recognized by the Commissioner's map. If this is to be a street, by interpolation of grades we find that a basin will be required at the northerly corner of the intersection, unless the water is guttered across same. The estimated cost for this basin is \$165, while the assessed valuation of the real estate within the probable area of assessment is \$51,100.

It appears from the flat grades of the territory that a grade summit should be established in Rutherford place, between Bay Seventeenth street and Eighteenth avenue, should such become a street. If such is done a basin will be required at the easterly corner of Bay Seventeenth street and Rutherford place, the estimated cost of which would be \$165, and the assessed valuation of the real estate within the probable area of assessment \$44,700, unless the water is guttered as above mentioned to cross this intersection.

Although I have given the above estimates, two being tentative, I am of the opinion that the basins should not be constructed, because the Bath Beach system was designed only for house drainage and not intended to care for surface waters. I believe therefore that the Bath avenue sewer should be constructed before said basins are built.

If it is absolutely necessary to pave the street, the temporary guttering of the pavement at the intersection would permit the laying of said pavement, without the possibility of damage to houses connected with our small sewers. Steps should be taken, I believe, to determine the status of Rutherford place and to establish grades for same at the earliest practicable moment.

Respectfully yours,  
(Signed) JOHN THATCHER, Superintendent of Sewers.

City of New York, Borough of Brooklyn, Bureau of Sewers, Office of Superintendent, Room 26, Municipal Department Building,

Mr. GEO. W. TILLSON, Chief Engineer of Highways:

Dear Sir—In reply to your communication of August 18, 1903, in which you informed me that a petition had been filed in your office for grading, paving and curbing Bay Sixteenth street (now New Utrecht avenue), between Benson and Cropsey avenues.

I respectfully inform you that the Chief Engineer of this Bureau has furnished me with the following information:

"I beg to advise that sewers exist within these limits, the same having been constructed as part of a separate system of sewerage, to convey house drainage only, and not surface waters, by the old Town of New Utrecht, and that it is intended to readjust said system by the construction of main sewers, the principal main of which, viz., in Bath avenue, has recently been authorized.

"In the revision of this system it is contemplated to reconstruct the sewer within the street in question by replacing the same with an 18-inch pipe instead of the 12-inch pipe which now exists, and to reverse the flow to discharge into the Bath avenue sewer when same is completed.

"Several sewer basins are also required in this reconstruction, but cannot be built until said reconstruction sewers are completed. I refrain from giving an estimate upon the work, therefore, at this time, as no outlet will be provided until the Bath avenue sewer is completed, which probably will not be until a year and a half hence, that is, including its outlet, the Ninety-second street tunnel, which is now being built.

"If it is determined to pave this street, I advise that temporary drainage gutters be provided at the intersections of the streets to conduct water as the same is now being cared for. It is also quite important that the status of Rutherford place, between New Utrecht avenue and Bay Seventeenth street, should be decided upon, whether a City street or not, because if it is so decided that it is a City street, it appears that a grade chart will be necessary for same, which will require summits between the blocks through which it extends for proper drainage, the establishment of said grades to determine the necessity of sewer basins at New Utrecht avenue and Rutherford place."

Respectfully,  
(Signed) JOHN THATCHER, Superintendent.

8,550 square yards of asphalt pavement, at \$2.25.

Total estimated cost, \$12,100 for macadam and \$25,600 for asphalt pavement. Assessed valuation, \$78,800.

The street is legally open from Bath avenue to the bay, having been confirmed May 18, 1883. Opening proceedings are pending from Benson avenue to Bath avenue, draft damage map having been sent June 13, 1901. Water and gas mains have been laid. Report of Sewer Bureau herewith attached.

City of New York, Borough of Brooklyn, Bureau of Sewers, Office of Superintendent, Room No. 46, Municipal Department Building,

Mr. GEORGE W. TILLSON, Chief Engineer of Highways:

Dear Sir—In reply to your communication of August 18, 1903, in which you informed me that a petition had been filed in your office for grading, paving and curbing Bay Fifteenth street (now Seventeenth avenue), from Benson avenue to Gravesend Bay, I beg to state that the Chief Engineer of this Bureau has furnished me with the following information:

"I beg to advise that sewers are built in this street within the limits required, but that several sewer-basins have not been constructed, because the existing sewerage system in Bath Beach is a separate one, that is intended for house drainage only, and not to care for the surface waters.

"Although I mention hereinafter in this report the location of these basins, and give an estimate of cost, etc., for same, I do not think it would be advisable to construct them now, nor until the Bath avenue sewer is completed, the same having been recently authorized. The construction of this sewer will permit building the basins to care for surface drainage, without liability of damage to houses now connected with the small sewers.

"The basins required will be situated at the northerly, southerly, and westerly corners of Seventeenth avenue and Benson avenue, at the easterly corner of Seventeenth avenue and Cropsey avenue, and at the northerly and easterly corners of Seventeenth avenue and Bath avenue, their estimated cost being \$990, and the assessed valuation of the real estate within the probable area of assessment, \$146,650.

"The two latter basins mentioned will be a part of the Bath avenue sewer contract, but I include same within the estimate, if it is decided that the street should be paved at once. They would, under these conditions, be omitted from Bath avenue sewer contract.

"Just south of Benson avenue, about 158 feet from same, there is shown on the insurance and other maps, including those of the assessors, Rutherford place, a street 60 feet wide, the status of which is uncertain, the street not being recognized by the Commissioner's Map. If this is to be a street, it has been found that by interpolating the grades of the vicinity, such slight fall of the street will obtain that the establishment of summits will be necessary. The result of their establishment may or may not necessitate the construction of sewer-basins at the Rutherford place intersection; however, if it is determined to pave the street, it is probable that basins at this intersection can be omitted by gutter construction, performed by the Bureau of Highways when said paving is performed.

"It may be that all of the basins could be omitted by gutter constructions, if it is determined to pave said street before our sewers of the combined system are constructed. I believe this to be a better solution of the matter under these conditions. The surface waters would then be constructed as they are at the present time. I am of the opinion it would be much better to defer the paving of this street until the sewers I have mentioned are completed."

Respectfully yours,

(Signed) JOHN THATCHER, Superintendent of Sewers.

The item of cost is:

800 cubic yards of grading at 40 cents.

Total estimated cost, \$300. Assessed valuation, \$110,100.

The street is legally open. As no pavement is asked for, the condition of the subsurface construction is not important. The amount of work on this street is so small that I would recommend that nothing be done until it is proposed to curb and lay sidewalks. From Second avenue to a point near Narrows avenue, this street is macadamized and it is supposed to be macadamized according to a grade authorized by the old town of New Utrecht, but the record of which, however, cannot be found, and the estimate is based upon this being the established grade.

Report No. 173—Grading and Paving.

City of New York, Borough of Brooklyn, Office of Commissioner of Public Works, Bureau of Highways, Chief Engineer's Office, Municipal Building, September 28, 1903.

Mr. WILLIAM C. REDFIELD, Commissioner of Public Works:

Dear Sir—I return you herewith petition for the construction of concrete curb and gutter on the west side of Thirteenth avenue, between Eighty-second and Eighty-sixth streets; also extract from N. P. Lewis, Chief Engineer, Board of Estimate and Apportionment, regarding the same.

I quite agree with Mr. Lewis that the gutter on both sides of the street should be the same, and as the gutter on the east side is made of cement, I present herewith an estimate for concrete curb and gutter on the west side. Cement curb and gutter have been laid on the east side from Eighty-third to Eighty-sixth street, and from Eighty-second to Eighty-third street none has been laid. The resolution therefore should read for curbing and guttering with cement Thirteenth avenue, from Eighty-second to Eighty-third street, on both sides, and from Eighty-third to Eighty-sixth street on the west side.

The item of cost is:

1,400 linear feet of cement curb and gutter, at \$2.

The street is legally opened. As pavement is not to be laid the condition of the subsurface is not important.

The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures. Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
