BOROUGH SUPERINTENDENTS OF BUILDINGS.

REVISED RULES AND REGULATIONS FOR PLUMBING AND DRAINAGE, WATER SUPPLY, GAS PIPING AND VENTILATION OF BUILDINGS.

Adopted by the Superintendents of Buildings for The City of New York, and published in accordance with the provisions of Section 141 of the Building Code, and Section 409 of the Greater New York Charter as amended.

Once in each year, every employing or master plumber carrying on his trade, business or calling in THE CITY OF NEW YORK shall register his name and address at the office of The Bureau of Buildings in the Borough in which his place of business is located, under such rules and regulations as said Bureau shall prescribe, in accordance with Section 141 of the Building Code of THE CITY OF NEW YORK.

A plumber proposing to do work in a borough other than that in which he is registered shall present his certificate at the office of the Bureau of Buildings in that borough before commencing work, so that the fact of his having been properly registered may be recorded.

(I)

FILING OF DRAWINGS, DESCRIPTIONS, ETC.

1—Drawings and triplicate descriptions, on forms furnished by the Bureau of Buildings for all Plumbing and Drainage shall be properly filled in, and filed by the owner or Architect in the said Bureau. The plans must be drawn to scale in ink, on cloth, or they must be cloth prints of such scale drawings, and shall consist of such floor plans and sections as may be necessary to show clearly all plumbing work to be done, and must show partitions and methods of ventilating water-closet apartments.

2—The said plumbing and drainage shall not be commenced or proceeded with until said drawings and descriptions shall have been so filed and approved by the Superintendent of Buildings.

3—No modification of the approved drawings and descriptions will be permitted unless either amended drawings and triplicate descriptions, or an amendment to the original drawings and descriptions, covering the proposed change or changes, are so filed and approved by the Superintendent of Buildings.

4—The drainage and plumbing of all buildings, both public and private, shall be executed in accordance with the rules and regulations of the Bureau of Buildings.

5—Repairs or alterations of plumbing or drainage may be made without filing drawings and descriptions in the Bureau of Buildings, but such repairs or alterations shall not be construed to include cases where new vertical lines or horizontal branches of soil, waste, vent or leader pipes are proposed to be used.

6—Notice of such repairs or alterations shall be given to the said Bureau before the same are commenced in such cases as shall be prescribed by the rules and regulations of the said Bureau, and the work shall be done in accordance with the said rules and regulations.

7—Where repairs or alterations ordered by the Board of Health, or Tenement House Department for sanitary reasons, include cases where new vertical and horizontal lines of soil, waste, vent or leader pipes are proposed to be used or old ones replaced, drawings and descriptions must be filed with and approved, by the Supt. of Buildings before same shall be commenced or proceeded with.

8—Repairs and alterations may comply in all respects with the weight, quality, arrangement and venting of the rest of the work in the building. Except when an existing soil, waste or vent line has been damaged by fire or other causes to the extent of 50% or more, of its entire length, same must be replaced by new lines installed in accordance with the rules and regulations governing new lines.

9—No plumbing and drainage or any part thereof shall be commenced until the plumber who is to do the work shall sign the specifications and make affidavit that he is duly authorized to proceed with the work. Affidavit must give the name and address of owner and plumber, etc. No registered plumber shall sign the specifications and act as the agent for a plumber who has not obtained a certificate of competency from the Examining Board of Plumbers as an Employing or Master Plumber. A violation of this rule will be deemed a sufficient reason by the Superintendent of Buildings for the cancellation of a Certificate of Registration, in accordance with Chapter 803, Laws of 1896.

10—One set of specifications will be received for not more than ten houses, and then only when on adjoining lots and houses are exactly alike.

11—Written notices must be given to the Supt. of Buildings by the plumber when any work is begun, and at such times as the work is ready for inspection.

(II)

DEFINITION OF TERMS.

12—The term "private sewer" is applied to main sewers that are not constructed by and under the supervision of the Department of Public Works.

13—The term "house sewer" is applied to that part of the main drain or sewer extending from a point two feet outside of the outer front wall of the building, vault or area to its connection with public sewer, private sewer or cesspool.

14—The term "house drain" is applied to that part of the main horizontal drain and its branches inside the walls of the building, vault or area and extending to and connecting with the house sewer.

15—The term "soil line" is applied to any vertical line of pipe having outlets above the floor of 1st story for water closet connections.

16—The term "waste line" is applied to any vertical line of pipe having outlets above the 1st floor for fixtures other than water closet.

17—The term "vent pipe" is applied to any special pipe provided to ventilate the system of piping and to prevent trap siphonage and back pressure.

(III)

MATERIALS AND WORKMANSHIP.

18—All materials must be of the best quality, free from defects, and all work must be executed in a thorough workmanlike manner.

19—All cast-iron pipes and fittings must be uncoated, sound, cylindrical and smooth, free from cracks, sand holes and other defects, and of uniform thickness, and of the grade known in commerce as "extra heavy."

20—Pipe, including the hub, shall weigh not less than the following average weights per linear foot:

Diameters.	Weights Per Linear Foot.
2 inches	5½ pounds
3 inches	9½ pounds
4 inches	13 pounds
5 inches	17 pounds
6 inches	20 pounds
7 inches	27 pounds
8 inches	33½ pounds
10 inches	45 pounds
12 inches	54 pounds

21—The size, weight and maker's name must be cast on each length of pipe.

22—All joints must be made with picked oakum and molten lead and be made gas-tight. Twelve (12) ounces of fine, soft pig lead must be used at each joint for each inch in the diameter of the pipe.

23—All wrought-iron and steel pipes must be equal in quality to "standard" and must be properly tested by the manufacturer. All pipe must be lap-welded. No plain black or uncoated pipe will be permitted.

24—All wrought iron or steel water supply, vent, waste and soil pipes must be galvanized.

25—Where galvanized wrought iron or steel pipe is required the fittings used on same must also be galvanized.

26—Fittings for waste or soil and refrigerator waste-pipes must be the special extra heavy cast-iron recessed and threaded drainage fittings, with smooth interior water-way, and threads tapered, so as to give a uniform grade to branches of not less than one-fourth of an inch per foot.

27—Short nipples on wrought iron or steel pipe, where the unthreaded part of the pipe is less than one and one-half inches long, must be of the thickness and weight known as "extra heavy" or "extra strong."

28—The pipe shall not be less than the following average thickness and weight per linear foot:

Diameters.	Thicknesses.	Weights Per Linear Foot.
1½ inches.....	.14 inches	2.68 pounds
2 inches.....	.15 inches	3.61 pounds
2½ inches.....	.20 inches	5.74 pounds
3 inches.....	.21 inches	7.54 pounds
3½ inches.....	.22 inches	9.00 pounds
4 inches.....	.23 inches	10.66 pounds
4½ inches.....	.24 inches	12.34 pounds
5 inches.....	.25 inches	14.50 pounds
6 inches.....	.28 inches	18.76 pounds
7 inches.....	.30 inches	23.27 pounds
8 inches.....	.32 inches	28.18 pounds
9 inches.....	.34 inches	33.70 pounds
10 inches.....	.36 inches	40.06 pounds
11 inches.....	.37 inches	45.02 pounds
12 inches.....	.37 inches	48.98 pounds

29—All brass pipe for soil, waste and vent pipes and solder nipples must be thoroughly annealed, drawn, brass tubing, of standard iron-pipe gauge.

30—Connections on brass pipe and between brass pipe and traps on iron pipe must not be made with slip joints or couplings. Threaded connections on brass pipe must be of the same size as iron pipe thread for same size of pipe and be tapered.

31—The following average thicknesses and weights per linear foot will be required:

Diameters.	Thicknesses.	Weights Per Linear Foot.
1½ inches.....	.14 inches	2.84 pounds
2 inches.....	.15 inches	3.82 pounds
2½ inches.....	.20 inches	6.08 pounds
3 inches.....	.21 inches	7.92 pounds
3½ inches.....	.22 inches	9.54 pounds
4 inches.....	.23 inches	11.29 pounds
4½ inches.....	.24 inches	13.08 pounds
5 inches.....	.25 inches	15.37 pounds
6 inches.....	.28 inches	19.88 pounds

32—Brass ferrules must be best quality, extra heavy, cast brass, not less than four inches long and two and one-quarter, three and one-half inches and 4½ inches in diameter, and not less than the following weights:

Diameters.	Weight.
2¼ inches.....	1 pound 0 ounces
3½ inches.....	1 pound 12 ounces
4½ inches.....	2 pounds 8 ounces

33—One and one-half inch ferrules are not permitted.

34—Soldering nipples must be heavy cast brass or of brass pipe, iron pipe-size. When cast they must not be less than the following weights:

Diameter.	Weights.
1½ inches.....	0 pounds 8 ounces
2 inches.....	0 pounds 14 ounces
2½ inches.....	1 pounds 6 ounces
3 inches.....	2 pounds 0 ounces
4 inches.....	3 pounds 8 ounces

35—Brass screw caps for cleanouts must be extra heavy, not less than one-eighth of an inch thick. The screw cap must have a solid square or hexagonal nut, not less than one inch high, with a least diameter of one and one-half inches. The body of the cleanout ferrule must be at least equal in weight and thickness to the caulking ferrule for the same size of pipe.

36—Where cleanouts are required by rules and by the approved plans, the screw cap must be of brass. The engaging part must have not less than six threads of iron-pipe size and be tapered. Cleanouts must be of full size of trap up to four inches in diameter, and not less than four inches for larger traps.

37—The use of lead pipes is restricted to the short branches of the soil and waste pipes, bends and traps, roof connections of inside leaders.

"Short branches" of lead pipe shall be construed to mean not more than:

8 feet of 1½ inch pipe.

5 feet of 2 inch pipe.

2 feet of 3 inch pipe.

2 feet of 4 inch pipe.

38—All connections between lead pipes and between lead and brass or copper pipes must be made by means of "wiped" solder joint.

39—All lead waste, soil, vent and flush pipes must be of the best quality, known in commerce as "D" and of not less than the following weights per linear foot:

Diameters.	Weights Per Linear Foot.
1¼ inches (for flush pipes only).....	2½ pounds
1½ inches.....	3 pounds
2 inches.....	4 pounds
3 inches.....	6 pounds
4 and 4½ inches.....	8 pounds

40—All lead traps and bends must be of the same weights and thicknesses as their corresponding pipe branches. Sheet lead for roof flashings must be six-pound lead, and must extend not less than six inches from the pipe, and the joint made watertight.

41—Copper tubing, when used for inside leader roof connections must be seamless drawn tubing, not less than 22 gauge, and when used for roof flashings must be not less than 18 gauge.

42—Each building must be separately and independently connected with a public or private sewer, or cesspool, except where a building is located on the rear of the same lot with another building, when its plumbing and drainage system may be connected to the house drain of the front building behind the house trap and fresh-air inlet which shall be used for both buildings if sewer connected: or may be connected to an existing cesspool of front house and be provided with a separate house trap and fresh air inlet.

43—Every building must have its sewer connections directly in front of the building, unless permission is otherwise granted by the Supt. of Buildings.

44—Where there is no sewer in the street or avenue, and it is possible to construct a private sewer to connect in an adjacent street or avenue, a private sewer must be constructed. It must be laid outside the curb, under the roadway of the street.

45—Cesspools and privy-vaults will be permitted only after it has been shown to the satisfaction of the Supt. of Buildings that their use is absolutely necessary.

46—When allowed, they must be constructed strictly in accordance with the terms of the permit issued by the Supt. of Buildings.

47—Cesspools must not be used as privy vaults nor can privy vaults be used as cesspools. Cesspools and privy vaults must be located at least 15 feet from any build-

ing and on the same lot as the building for which their use is intended. Walls of cesspools and privy vaults when constructed of brick must be 8 inches thick; if of stone 18 inches thick. Bottoms of cesspools and privy vaults must be of stone concrete 6 inches thick. The entire interior surface of cesspools and privy vaults must be finished with a coating of Portland Cement Mortar 1 inch thick.

48—As soon as it is possible to connect with a public sewer, the owner must have the cesspool and privy-vault emptied, cleaned and disinfected and filled with fresh earth, and have a sewer connection made in the manner herewith prescribed.

49—All pipe-lines must be supported at the base on brick piers, or by heavy iron hangers from the cellar-ceiling beams, and along the line by heavy iron hangers at intervals of not more than ten feet.

50—All pipes issuing from extension or elsewhere, which would otherwise open within 20 feet of the window of any building, must be extended above the top of any window located within such distance. When a building exceeds in height that of an adjoining building, and windows or openings are cut in the wall on the lot line within 20 feet of the roof terminal of any soil, waste or vent line now in place or subsequently installed in the lower building, the owner of the higher building shall defray the expense of extending said soil, waste or vent lines above the roof of the higher building or shall himself make such alteration.

51—The arrangement of all pipes must be as straight and direct as possible. Offsets will be permitted only when unavoidable.

52—All pipes and traps should, where possible, be exposed to view. They should always be readily accessible for inspection and repairing.

53—In every building where there is a leader connected to the drain, if there are any plumbing fixtures, there must be at least one four (4) inch pipe extending above the roof for ventilation.

54—All yards, areas and courts exceeding 15 square feet in area must be drained into the sewer. A shaft open at the top not exceeding 25 square feet in area, and which cannot be connected in back of a leader, yard, court or area drain trap, may be drained into a publicly placed, water supplied, properly trapped and vented slop sink.

55—These drains, when sewer-connected, must have connections not less than three inches in diameter. They should be controlled by one trap—the leader trap, if possible.

56—Floor drains will only be permitted when it can be shown to the satisfaction of the Superintendent of Buildings that their use is absolutely necessary and arrangements made to maintain a permanent water seal in the traps.

57—Cellar drains may be connected in back of and controlled by a leader, yard, court or area drain trap which need not be vented.

58—Subsoil drains should discharge into a sump or receiving tank, the contents of which if discharged by gravity may be discharged into a rain leader, yard, court or area drain behind the trap controlling same or may be discharged through a properly trapped and vented, water supplied receptacle. Where mechanical force is required to discharge the contents into the plumbing and drainage system a proper automatic cut off or check valve must be provided on the connection between house-drain and apparatus used for raising the contents of sump-pit.

59—The contents of settling chamber or dust receptacles for vacuum cleaners may be discharged into a Plumbing and Drainage system, the same as sub-soil drain sump-pits.

60—Every building shall be kept provided with proper metallic gutters and rain leaders for conducting water from all roofs in such manner as shall protect the walls and foundations from injury. In no case shall the water from any rain leader be allowed to flow upon the sidewalk or adjoining property, but the same shall be conducted by proper pipes to the sewer. If there be no sewer in the street upon which the building fronts, then the water from said leaders may be conducted by proper pipes laid below the surface of sidewalk to the street gutter, or may be conducted by extra heavy cast iron pipe to a leaching cesspool located at least 20 feet from any building. No plumbing fixtures shall discharge into a leaching cesspool.

61—Inside leaders must be made of cast-iron, wrought iron or steel, with roof connections made gas and water tight by means of a heavy lead or copper-drawn tubing wiped to a brass ferrule or nipple calked or screwed into the pipe.

62—Outside leaders may be made of steel metal, but they must connect with the house drain by means of a cast-iron pipe extending vertically five feet above the grade level.

63—Leaders must be trapped with cast-iron running traps so placed as to prevent freezing.

64—Rain-water leaders must not be used as soil, waste or vent pipes nor shall any such pipe be used as a leader.

VII.

THE HOUSE SEWER, HOUSE DRAIN, HOUSE TRAP AND FRESH AIR INLET.

65—Old house sewers can be used in connection with the new buildings or new plumbing only when they are found, on examination by the plumbing inspector, to conform in all respects to the requirements governing new sewers.

66—When a proper foundation consisting of a natural bed of earth, rock, etc., can be obtained, the house sewer can be of earthenware pipe.

67—Where the ground is made or filled in, or where the pipes are less than three feet deep, or in any case where there is danger of settlement by frost or from any cause, and when cesspools are used, the house sewer must be of extra heavy cast-iron pipe, with lead caulked joints.

68—No earthenware house-drain when found in a leaky or defective condition, shall be repaired or replaced except with heavy cast-iron pipe.

69—The house drain and its branches must be of extra heavy cast-iron when underground, and of extra heavy cast-iron or galvanized wrought iron or steel when above ground.

70—The house drain must properly connect with the house sewer at a point two feet outside of the outer front vault or area wall of the building. An arched or other proper opening must be provided for the drain in the wall to prevent damage by settlement.

71—The house drain if above the cellar floor must be supported at intervals of ten feet by eight-inch brick piers or suspended from the floor beams, or be otherwise properly supported by proper hangers placed not more than 10 feet apart.

72—No steam-exhaust, boiler blow off or drip pipe shall be connected with the house drain. Such pipes must first discharge into a proper condensing tank, and from this a proper outlet to the house sewer outside of the building must be provided. In low pressure steam systems the condensing tank may be omitted, but the waste connections must be otherwise as above required.

73—The house-drain and house-sewer must be run as direct as possible, with a fall of at least one-quarter inch per foot, all changes in direction made with proper fittings, and all connections made with Y branches and one-eighth and one-sixteenth bends.

74—The house sewer and house drain must be at least 4 inches in diameter when receiving the discharge of a water-closet. Where rain leaders are connected to the plumbing system, the sizes of house sewer, house drain and leader connections shall be computed according to the square feet of area drained into them. No house-sewer or house-drain shall be of less diameter than the largest line of pipe connected thereon. The following table is the maximum area allowed to drain into pipes of given diameter:

Diameter of Pipe.	Fall ¼ Inch per Foot.	Fall ½ Inch per Foot.
3.....	1,200 square feet.	1,500 square feet.
4.....	2,500 square feet.	3,200 square feet.
5.....	4,500 square feet.	6,000 square feet.
6.....	8,000 square feet.	10,000 square feet.
7.....	12,400 square feet.	15,600 square feet.
8.....	18,000 square feet.	22,500 square feet.
9.....	25,000 square feet.	31,500 square feet.
10.....	41,000 square feet.	59,000 square feet.
12.....	69,000 square feet.	98,000 square feet.

75—Full size Y and T branch fittings for handhole cleanouts must be provided where required on house drain and its branches. No clean-out need be larger than 6 inches in diameter.

76—An iron running trap must be placed in the house drain near the front wall of the house, and on the sewer side of all connections, except a Y fitting used to receive the discharge from an automatic sewage lift, oil separator, or a drip-pipe where

one is used. If placed outside of the house or below the cellar floor, it must be made accessible in a brick manhole, the walls of which must be eight inches thick, with an iron or flagstone cover. When outside the house it must never be less than three feet below the surface of the ground.

77—When the plumbing system of any building is altered by the addition of a new soil, waste or vent line, and no house trap and fresh air inlet or leader trap exists on the house drain, same shall be provided.

78—The house trap must have two cleanouts, with brass screw cap ferrules calked in.

79—A fresh-air inlet pipe must be connected with the house-drain just inside of the house trap and extended to the outer air, terminating with a return bend, with open end one foot above the grade at most available point to be determined by the Superintendent of Buildings and shown on plans. The fresh air inlet pipe must be of the same diameter as the house drain. An automatic device approved by the Superintendent of Buildings may be used, when set in a manner satisfactory to him.

80—No curb box or similar device with grating placed in sidewalk will be permitted for fresh air inlets.

VIII. SOIL AND WASTE LINES.

81—All main, soil, waste or vent pipes must be of iron, steel or brass.

82—When they receive the discharge of fixtures on any floor above the first they must be extended in full calibre at least one foot above the roof coping, and well away from all shafts, windows, chimneys or other ventilating openings. When less than four inches in diameter, they must be enlarged to four inches at a point not less than one foot below the roof surface by an increaser not less than nine (9) inches long.

83—No caps, cowl or bends shall be affixed to the top of such stack.

84—In all buildings wire baskets must be securely fastened into the opening of each pipe in an accessible position. When roofs are used for drying purpose or roof gardens, all pipes shall be extended to a height of seven feet.

85—Necessary offsets above the highest fixture branch must not be made at an angle of less than 45 degrees to the horizontal.

86—Soil and waste pipes must have proper Y or T. Y. branches for all fixture connections.

87—No connection to lead branches for water closets or slop sinks will be permitted, except the required branch vent.

88—Branch soil and waste pipe must have a fall of at least one-quarter inch per foot.

89—Short T.Y. branches will be permitted on vertical lines only. Long one-quarter bends and long T.Y.s are permitted. Short one-quarter bends and double hubs, short roof increasers and common offsets, and bands and saddles are prohibited.

90—The diameters of soil and waste pipes must not be less than those given in the following table:

Main soil stacks.....	4 inches.
Main soil-stacks for water closets on 5 or more floors.....	5 inches.
Branch soil pipes.....	4 inches.
Main waste stacks.....	2 inches.
Main waste stacks for kitchen sinks on 5 or more floors.....	3 inches.
Branch wastes for slop sinks.....	3 inches.
Branch waste-pipes for laundry tubs.....	1½ inches.
When set in ranges of three.....	2 inches.
Branch waste for kitchen sinks.....	2 inches.
Branch waste for urinals.....	2 inches.
Branch waste for other fixtures.....	1½ inches.

IX. VENT PIPES.

91—All traps must be protected from siphonage and back-pressure and the drainage system ventilated by special lines of vent-pipes.

92—All vent-pipe lines and main branches must be of iron, steel or brass. They must be increased in diameter and extended above the roof as required for waste-pipes. They may be connected with the adjoining soil or waste line well above the highest fixture, but this will not be permitted when there are fixtures on more than six floors.

93—All offsets must be made at an angle of not less than forty-five degrees to the horizontal, and all lines must be connected at the bottom with a soil or waste pipe or the drain in such a manner as to prevent the accumulation of rust scale.

94—Branch vent pipes shall be kept above the top of all connecting fixtures, so as to prevent the use of vent pipes as soil pipes or waste pipes. Branch vent pipes should be connected not less than six inches nor more than two feet from crown of trap or side of lead bend.

95—Vent connections for water-closets and slop sinks must be made from the branch soil or waste-pipe just below the trap of the fixture, and this branch vent pipe must be so connected as to prevent obstruction and no waste-pipe connected between it and the fixtures. Earthenware traps must have no vent horns.

96—No sheet metal, brick or other flue shall be used as a vent-pipe.

97—The sizes of vent-pipes throughout must not be less than the following: For main vents, two inches in diameter; for water closets on three or more floors, three inches in diameter; for other fixtures on less than seven floors, two inches in diameter; three inch vent pipe will be permitted for less than nine stories; for more than eight and less than sixteen stories, four inches in diameter; for more than fifteen and less than twenty-two stories, five inches in diameter; for more than twenty-one stories the size of vent pipe shall be determined by the Superintendent of Buildings.

For fixtures other than water-closets and slop sinks and for more than eight stories, vent pipes may be one inch smaller in diameter than above stated.

For long branch vent pipes over 10 feet in length but not exceeding 25 feet, two inches in diameter; when over 25 feet in length but not exceeding 50 feet, three inches in diameter. No branch vent pipe can exceed 50 feet in length, nor can any main vent be of less diameter than the largest branch vent connecting to same.

98—When the plumbing fixtures installed in any building are arranged in groups or batteries and the number of branch vents from the traps of fixtures connecting to any main branch vent exceeds the number and size given in the following table, a 3 inch main branch vent must be provided for the additional vent connections.

2—1½ inch branches on a 1½ inch main branch.	
4—2 inch branches on a 2 inch main branch.	
7—1½ inch branches on a 2 inch main branch.	
2—2 inch branches on a 2 inch main branch.	
4—1½ inch branches on a 2 inch main branch.	
1—2 inch branches on a 2 inch main branch.	
5—1½ inch branches on a 2 inch main branch.	

X. TRAPS.

99—No form of trap will be permitted to be used unless it has been approved by the Supt. of Buildings.

100—No masons' cesspool, bell, pot, bottle or D-trap will be permitted, nor any form of trap that is not self-cleaning, nor that has interior chamber or mechanism, nor any trap except earthenware ones that depend upon interior partitions for a seal. Backwater or tide valves will only be permitted when it can be shown to the satisfaction of the Supt. of Buildings that their use is absolutely necessary and of a type as approved by him.

101—Every fixture must be separately trapped by a water-sealing trap placed as close to the fixture outlet as possible, and no trap shall be placed more than 2 feet 0 inches from any fixture.

102—A set of not more than three wash trays may connect with a single trap, or into the trap of an adjoining sink, provided both sink and tub waste outlets are on the same side of the waste line, and the sink is nearest the line. When so connected, the waste-pipe from the wash-trays must be branched in below the water-seal.

103—The discharge from any fixture must not pass through more than one trap before reaching the house drain.

104—All traps must be well supported and set true with respect to their water levels.

105—All fixtures, other than waterclosets and urinals, must have strong metallic strainers or bars over the outlets to prevent obstruction of the waste pipe.

106—All exposed or accessible traps, except watercloset traps, must have brass trap screws for cleaning the trap placed on the inlet side, or below the water level.

107—All iron traps for house drain, yard and other drains and leaders must be running traps with handhole cleanouts of full size of the traps, when same are less

than five (5) inches. All traps under ground must be made accessible by brick man-holes with proper covers.

108—Overflow pipes from fixtures must in all cases be connected on the inlet side of traps.

109—All earthenware traps must have approved heavy brass floor plates properly secured to the branch soil pipe and bolted to the trap flange, and the joint made gas-tight. The use of rubber washers for floor connections is prohibited. All floor flanges must be set in place and inspected before any watercloset is set thereon.

110—No trap shall be placed at the foot of main soil and waste pipe lines.

111—Plunge baths should be provided with a trap at least four inches in diameter, the waste from trap to bath to be reduced two diameters and this waste to be controlled by a gate valve. Overflow pipes, if provided, must be connected on inlet side of trap. Traps must be ventilated by a separate vent line extended above roof. Vent lines shall be the same size as trap and waste connection.

112—The sizes for traps must not be less than those given in the following table:

Traps for waterclosets.....	4 inches in diameter
Traps for slop sinks.....	3 inches in diameter
Traps for kitchen sinks.....	2 inches in diameter
Traps for wash trays.....	2 inches in diameter
Traps for urinals.....	2 inches in diameter
Traps for shower-baths.....	2 inches in diameter
Traps for other fixtures.....	1½ inches in diameter

Traps for leaders, area, floor and other drains must be at least 3 inches in diameter.

113—Dental cuspidors must be separately trapped by a trap of at least 1½ inches in diameter, properly vented and placed as close to the fixtures as possible. The connection between trap and cuspidor may be ¾ inch in diameter.

114—No plumbing fixtures except bar sinks, soda fountains or drinking fountains shall be installed with an indirect waste connection to the plumbing and drainage system. The waste of every bar-sink, soda-fountain and drinking-fountain if not directly connected, must discharge over a properly water supplied, trapped and vented sink. The main waste lines shall be 2 inches in diameter, and the branches to fixtures at least 1½ inches in diameter. Drinking fountains must be trapped and the waste line extended through the roof. No vent connections need be provided.

115—Safe and refrigerator waste-pipes must be of galvanized iron, and be not less than 1¼ inches in diameter nor larger than 1½ inches in diameter with pipe branches at least 1 inch in diameter with strainers over each inlet.

116—Safe and refrigerator waste pipes shall not be trapped. They must discharge over a properly water supplied, trapped and vented sink, publicly placed, not more than 4 feet above the floor. In no case shall any refrigerator or safe waste pipe discharge over a sink located in a room used for living purposes.

117—The branches on vertical lines must be made by Y or T.Y fittings and carried up to the safe with as much pitch as possible.

118—Lead safes must be graded and neatly turned over bevel strips at their edges.

119—Where there is an offset on a refrigerator waste-pipe in the cellar there must be cleanouts to control the horizontal part of the pipe.

120—In all lodgings and tenement houses the safe and refrigerator waste pipes must extend above the roof.

121—In all buildings occupied as stores, dwellings, lodging or boarding houses, hotels, offices, lofts, workshops, factories or storage houses, there must be at least one water-closet in each building. There must be sufficient water-closets so that there will never be more than 15 persons to each water-closet. In places of public assembly, the number of toilets and the most available location are to be determined by the Superintendent of Buildings.

122—Separate water closets and toilet rooms must be provided for each sex in buildings used as workshops, lofts, office buildings, factories, hotels and all places of public assembly.

123—In lodging-houses there must be one water-closet on each floor, and where there are more than 15 persons on any floor there must be an additional water-closet on that floor for every 15 additional persons or fraction thereof.

124—In tenement-houses, lodging houses, factories, workshops, and all public buildings, the entire water closet apartment and side walls to a height of six inches from the floor, except at the door, must be made waterproof with asphalt, cement, tile, metal or other waterproof material as approved by the Superintendent of Buildings.

125—In all buildings the water closet and urinal apartments must be ventilated to the outer air by windows opening on the same lot as the building is situated on or by a ventilating skylight placed over each room or apartment wherein such fixtures are located.

126—In all buildings the outside partition of any water-closet or urinal apartment must be air tight and extend to the ceiling or be independently ceiled over. When necessary to properly light such apartments, the upper part of the partitions must be provided with translucent glass. The interior partitions of such apartments must be dwarfed partitions.

127—The general water closet accommodation of any building cannot be placed in the cellar, nor can any water closet be placed outside of a building except to replace an existing water closet.

128—In alteration work where it is not practicable to ventilate a water closet or urinal apartment by windows or a skylight directly to the outer air, there may be provided a galvanized wrought iron vent duct extended to the outer air which must be equal in area to at least 144 square inches for one water closet or urinal, and an additional 72 square inches for each water closet added therein.

129—Where water closets will not support a rim-seat, the seat must be supported on galvanized iron legs.

130—Every earthenware water closet with connection through the floor in all new work, and in all alterations, must be set on an approved floor slab of porcelain, slate or other material impervious to moisture, same to be not less in size than the base of the water closet set thereon.

131—All water closets must have earthenware flushing rim bowls. They must be set entirely free and open from all enclosing woodwork.

132—Pan, Plunger, offset-washout and washout, or other water-closets having an unventilated space, or whose walls are not thoroughly washed out at each discharge will not be permitted.

133—Long hopper water-closets will not be permitted, except earthenware hoppers where there is an exposure to frost.

134—Drip trays on water closet will not be permitted.

135—Water-closets and urinals must never be connected directly with or flushed from the water supply pipes, except when flushometer valves are used.

136—Each water-closet and urinal must be flushed from a separate cistern, the water from which is used for no other purpose, or may be flushed through flushometer valves.

137—Where "Flushometers" are used, they must be supplied from tank pressure, unless otherwise permitted by the Superintendent of Buildings; the rising lines shall be at least one and one-half inches in diameter, and the branches shall be at least one and one-quarter inches in diameter for water-closets and three-quarter inch in diameter for urinals.

138—The overflow of cisterns may discharge into the bowls of the closet, but in no case connect with any part of the drainage system.

139—Iron water-closet and urinal cisterns and automatic water-closet and urinal cisterns are prohibited unless approved by the Superintendent of Buildings.

140—The copper lining of water-closet and urinal cisterns must not be lighter than ten (10) ounce copper.

141—Water-closet flush pipes must be not less than one and one-fourth inches and urinal flush-pipes one (1) inch in diameter, and if of lead must not weigh less than two and one-half pounds and two pounds per linear foot. Flush couplings must be of full size of the pipe.

142—Rubber connections and elbows are not permitted on flush pipes.

143—Latrines, trough water-closets and similar appliances may be used only on written permit from the said Superintendent of Buildings, and must be set and arranged as may be required by the terms of the permit.

144—All urinals must be constructed of materials impervious to moisture, and that will not corrode under the action of urine. The floor and wall of the urinal apartments must be lined with similar non-absorbent and non-corrosive material.

145—The platforms of treads of urinal stalls must never be connected independently to the plumbing system, nor can they be connected to any safe waste-pipe.

146—Iron trough water-closets and trough urinals must be enameled or galvanized.

147—In all houses, sinks must be entirely open, on iron legs or brackets without any inclosing woodwork.

148—Wooden washtubs are prohibited, except when used in hotels, restaurants or bottling establishments for washing dishes or bottles. Cement or artificial stone tubs will not be permitted unless approved by the Superintendent of Buildings.

XIII.

WATER SUPPLY FOR FIXTURES.

149—All water-closets and other plumbing fixtures must be provided with a sufficient supply of water for flushing to keep them in a proper and cleanly condition.

Flush tanks must have a capacity of eight gallons for water-closets and five gallons for urinals.

150—House service pipes must be connected to the street mains by means of taps, and a stop cock or valve placed under the sidewalk at the curb, in compliance with the rules and under the supervision of the Department of Water Supply, Gas and Electricity.

151—A separate stop or valve must be placed upon the service pipe inside the front wall.

152—The diameters of street service pipes must not be less than three-quarter inch for dwellings and tenements occupied by six families or less; one inch for tenements or apartment houses occupied by more than six families and one and one-half inch for hotels, factories and other miscellaneous buildings, provided that in no case can the diameter of the service pipes be less than the diameter of the tap installed under the supervision of the Department of Water Supply, Gas and Electricity.

153—That all rising lines have a stop cock or valve at the foot of each line and in all buildings, except dwellings, a separate stop cock or valve must be placed on the branches from riser for each fixture if isolated or each group of fixtures such as bathrooms, kitchens, etc., located to be accessible at all times. The diameters of all rising lines must not be less than $\frac{3}{4}$ inch, but where lead or brass pipe is used the minimum diameter may be $\frac{1}{2}$ inch.

154—Diameters of branches to any fixtures must not be less than $\frac{1}{2}$ inch, except when used to supply water-closet, cisterns or lavatories. When the material used is lead or brass pipe, the minimum diameter may be $\frac{3}{8}$ inch. Branches for flush valves for water closets must not be less than $1\frac{1}{4}$ inch in diameter and for urinals not less than $\frac{3}{4}$ inch in diameter.

155—Where a hot water supply system is installed, the distance between the hot and cold water risers should not be less than 6 inches. Where it is impossible to place them 6 inches or more apart, the hot water riser must be covered with an approved insulating material and a method of circulation provided that will insure a prompt delivery of hot water at the faucet when required.

156—All risers and branches must be properly fastened.

157—When the water pressure is not sufficient to supply freely and continuously all fixtures, a house supply tank must be provided of sufficient size to afford an ample supply of water to all fixtures at all times. Such tanks must be supplied from the pressure or by power pumps, as may be necessary; when from the pressure, ball cocks must be provided.

158—House supply tanks must be metal covered so as to exclude dust and so located as to prevent water contamination by gas and odors from plumbing fixtures.

159—House supply-tanks must be of wood or iron or of wood lined with tinned and planished copper.

160—House tanks must be supported on iron beams.

161—The overflow pipe should discharge upon the roof, where possible, and in such cases should be brought down to within six (6) inches of the roof, or it must be trapped and discharged over an open and water-supplied sink not in the same room, not over $3\frac{1}{2}$ feet above the floor. In no case shall the overflow be connected with any part of the plumbing system.

162—Emptying pipes for such tanks must be provided, and be discharged in the manner required for overflow pipes, and may be branched into overflow pipes. Emptying pipes for tanks containing more than five hundred (500) gallons must be four (4) inches in diameter and provided with a valve of same size fitted with a wheel or lever handle.

163—Acid wastes must be "B" lead pipe or earthen pipe, if of lead pipe they must be at least 2 inches in diameter and if of earthen pipe at least 3 inches in diameter. They must be extended through roof for ventilation and continued down to the lowest story of building and so arranged as to discharge into a lime box and diluting sink properly trapped and vented and connected inside of house trap. If the lime box and diluting sink is not used the acid waste must be extended to an earthen house sewer or separately and independently connected to a public or private sewer in street and provided with an accessible running trap located just inside of front wall of building. All branches and joints on lead acid wastes must be made by means of burnt lead joints. If earthenware pipe is used, vertical joints must be made with a mixture of asphaltum and cement. Each length of pipe on vertical runs and on horizontal runs when above the cellar floor must be supported at each hub by proper supports. All floor drains and fixture connections must be trapped and run as direct as possible.

SEWAGE LIFTS.

164—When it is necessary to use a sump system and sewage lift to receive the discharge from the waste or soil connection of fixtures, same shall be arranged to be accessible. If discharged with compressed air it shall be connected to the house drain on the sewer side of all leader or area drain traps and fixture connections or may be connected to house drain on the sewer side of house trap. A separate trap and fresh air inlet must be provided on the inlet side of sump and a 4-inch pipe line continued from drain discharging into sump up to and above roof, for purposes of ventilation. Relief pipes must be provided on sewage receptacles of sumps. Traps of fixtures connected to sump systems must not be vented to vent lines which are used to ventilate traps of fixtures on gravity system. Sump systems should be entirely separate both as to discharge and venting from rest of plumbing system in buildings.

OIL SEPARATORS.

165—Oil separators installed in any building where volatile fluids are used, must be arranged to be readily accessible. They must not receive the discharge of any water closet, rain leader, yard, court or area drain.

166—They must, if discharged by gravity, be connected by a Y branch fitting to the house drain behind the house trap in such a manner that will not interfere with the house drain and the rest of the plumbing and drainage system. When mechanical force is used to discharge the contents, the connection must be made by a Y branch fitting on the sewer side of house trap.

167—No separate running trap need be provided on the drain entering oil separators, but a separate fresh air inlet and vent line must be provided to keep the system of drainage controlled by the oil separator entirely separate from the rest of plumbing and drainage system.

168—The size of fresh air inlet shall be determined by the size of inlet connection to oil separator, which shall be considered the same as the term house drain for determining the size of all fresh air inlets, which shall conform to the same requirements as regards size and arrangement of terminals for fresh air inlets as called for in regulations.

169—Vent lines shall conform in all respects to vent lines for plumbing fixtures as regards size and arrangement.

170—Relief pipes must be provided at least $1\frac{1}{2}$ inches in diameter. They may be connected to a vent line when installed as a separate system or must be carried independently above the roof.

TESTING THE PLUMBING SYSTEM.

171—The entire plumbing and drainage system within the building must be tested by the plumber, in the presence of a plumbing inspector, under a water test. All pipes must remain uncovered in every part until they have successfully passed the test. The plumber must securely close all openings, as directed by the Inspector of Plumbing. The use of wooden plugs for this purpose is prohibited.

172—The water test will be applied by closing the lower end of the main house-drain and filling the pipes to the highest opening above the roof with water. The water test shall include at one time the house drain and branches, all vertical and horizontal soil, waste and vent and leader lines and all branches therefrom to a point above the surface of the finished floor and beyond the finished face of walls and partitions. If the drain or any part of the system is to be tested separately there must be a head of water at least six (6) feet above all parts of the work so tested, and special provision must be made for including all joints and connections in at least one test.

173—After the completion of the plumbing work in any new or altered building

and before the building is occupied, a final smoke test must be applied in the presence of a Plumbing Inspector. Except that for a building not over 6 stories in height a peppermint test may be applied.

174—The material and labor for the tests must be furnished by the plumber. Where the peppermint test is used two ounces of oil of peppermint must be provided for each line up to five stories and equal in height and an additional ounce of oil of peppermint must be provided for each line when lines are more than five stories in height.

PLUMBING IN TENEMENT HOUSES.

175—All sections or parts of sections of the Tenement House Law relating to plumbing, and drainage of tenement houses are to be observed, and are hereby made a part of these Rules and Regulations.

GAS PIPING AND FIXTURES.

176—Hereafter the gas piping and fixtures in all new buildings and all alterations and extensions made to the gas piping or fixtures in old buildings must be done in accordance with the following rules, which are made in accordance with the provisions of section 89 of the Building Code.

For additional requirements of public buildings, theatres, and places of assemblage, see Part XXI of the Building Code.

177—Before the construction or alteration of any gas piping in any building or part of any building, a permit must be obtained from the Superintendent of Buildings. This permit will be issued only to a registered plumber. Small alterations may be made by notifying the Bureau of Buildings, using the same blank forms provided for alterations and repairs to plumbing.

178—All gas pipe shall be of the best quality wrought iron or steel and of the kind classed as standard pipe, and shall weigh according to the following scale:

Diameters.	Weights per Linear Foot.
$\frac{3}{8}$ inch	0.56 pound
$\frac{1}{2}$ inch	0.85 pound
$\frac{3}{4}$ inch	1.12 pound
1 inch	1.67 pound
$1\frac{1}{4}$ inch	2.24 pound
$1\frac{1}{2}$ inch	2.68 pound
2 inch	3.61 pound
$2\frac{1}{2}$ inch	5.75 pound
3 inch	7.54 pound
$3\frac{1}{2}$ inch	9.00 pound
4 inch	10.66 pound

No pipe allowed of less than $\frac{3}{8}$ inch in diameter.

179—All fittings (except stop-cocks or valves) shall be of malleable iron.

180—There shall be a heavy brass straightway cock or valve on the service pipe immediately inside the front foundation wall. Iron cocks or valves are not permitted.

181—Where it is not impracticable so to do, all risers shall be left not more than five feet from front wall.

182—No pipe shall be laid so as to support any weight (except fixtures) or be subjected to any strain whatsoever. All pipe shall be properly laid and fastened to prevent becoming trapped, and shall be laid, when practicable, above timbers or beams instead of beneath them. Where running lines or branches cross beams they must do so within thirty-six inches of the end of the beams, and in no case shall the said pipes be let into the beams more than two inches in depth. Any pipe laid in a cold or damp place shall be properly dripped, protected and painted with two coats of red lead and boiled oil or tarred.

183—No gas pipe shall be laid in cement or concrete unless the pipe or channel in which it is placed is well covered with tar.

184—All drops must be set plumb and securely fastened, each one having at least one solid strap. Drops and outlets less than $\frac{3}{4}$ of an inch in diameter shall not be left more than one inch below plastering, centre-pieces, or woodwork.

185—All outlets and risers shall be left capped until covered by fixtures.

186—No unions or running threads shall be permitted. Where necessary to cut out to repair leaks or make extensions, pipe shall be again put together with right and left couplings.

187—No gasfitters' cement shall be used, except in putting fixtures together.

188—All gas brackets and fixtures shall be placed so that the burners of same are not less than three feet below any ceiling or woodwork, unless the same is properly protected by a shield, in which case the distance shall not be less than eighteen inches.

No swinging or folding gas brackets shall be placed against any stud partition or woodwork.

No gas brackets on any lath and plaster partition or woodwork shall be less than five inches in length, measured from the burner to the plaster surface or woodwork.

Gas lights placed near window curtains or any other combustible material shall be protected by a proper shield.

189—Gas outlets for burners shall not be placed under tanks, back of doors or within four feet of any meter.

190—All buildings shall be piped according to the following scale:

Diameter.	Length.	Burners.
$\frac{3}{8}$ inch	26 feet	3
$\frac{1}{2}$ inch	36 feet	6
$\frac{3}{4}$ inch	60 feet	20
1 inch	80 feet	35
$1\frac{1}{4}$ inch	110 feet	60
$1\frac{1}{2}$ inch	150 feet	100
2 inch	200 feet	200
$2\frac{1}{2}$ inch	300 feet	300
3 inch	450 feet	450
$3\frac{1}{2}$ inch	500 feet	600
4 inch	600 feet	750

191—Outlets for gas ranges shall have a diameter not less than required for six burners, and all gas ranges and heaters shall have a straightway cock on service pipe.

192—When brass piping is used on the outside of plastering or woodwork it shall be classed as fixtures.

193—All brass tubing used for arms and stems of fixtures shall be at least No. 18 standard gauge and full size outside so as to cut a full thread.

All threads on brass pipe shall screw in at least 5-16 of an inch. All rope or square tubing shall be brazed or soldered into fittings and distributors, or have a nipple brazed into the tubing.

194—All cast fittings, such as cocks, swing joints, double centres, nozzles, etc., shall be extra heavy brass. The plugs of all cocks must be ground to a smooth and true surface for their entire length, be free from sandholes, have not less than $\frac{3}{4}$ of an inch bearing (except in cases of special design), have two flat sides on the end for the washer, and have two nuts instead of a tail screw. All stop pins to keys or cocks shall be screwed into place.

195—After all piping is fitted and fastened and all outlets capped up, there must be applied by the plumber, in the presence of an inspector of the Bureau of Buildings, a test with air to a pressure equal to a column mercury 6 inches in height, and the same to stand for five minutes; only mercury gauge shall be used. No piping shall be covered up, nor shall any fixture, gas heater or range be connected thereto until a card showing the approval of this test has been issued by the Superintendent of Buildings.

196—No meter will be set by any gas company until a certificate is filed with them from the Bureau of Buildings certifying that the gas pipes and fixtures comply with the foregoing rules.

197—When for any reason it may be impracticable to comply strictly with the foregoing rules, the Superintendent of Buildings shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modifications shall be indorsed upon the permit over the signature of the Superintendent of Buildings.

We, the undersigned, Superintendents of Buildings in the various Boroughs, do hereby certify that the foregoing Rules and Regulations for Plumbing and Drainage, Water Supply, Gas Piping and Ventilation of Buildings, have been duly adopted for The City of New York.

Notice to Property Owners.

NOTICE OF ASSESSMENT FOR OPENING STREETS AND PARKS.

IN PURSUANCE OF SECTION 1005 OF THE Greater New York Charter, the Comptroller of The City of New York hereby gives public notice of the confirmation by the Supreme Court, and the entering in the Bureau for the Collection of Assessments and Arrears, of the assessment for OPENING AND ACQUIRING TITLE to the following named avenue and place in the BOROUGH OF QUEENS:

SECOND WARD.

HIGH STREET—OPENING, from Bielby st. to Maspeth ave. Confirmed February 10, 1912, and entered March 6, 1912. Area of assessment includes all those lands, tenements and hereditaments and premises situate, lying and

being in the Borough of Queens, in The City of New York, which, taken together, are bounded and described as follows, viz.:

Beginning on the southerly line of Maspeth ave. at the centre line of the block between High st. and Van Cott ave., as shown on section No. 12 of the Final Maps of the Borough of Queens, and running thence southerly and parallel to High st. to the southerly side of Bielby st.; thence westerly along the southerly side of Bielby st. to the intersection of Rust st. with the easterly line of Rust st.; thence northwesterly along the easterly line of Rust st. 387 feet to a point, said point being 119 feet west of and at right angles to High st.; thence in a northerly direction and parallel with High st. to the southerly side of Maspeth ave.; thence easterly along the southerly line of Maspeth ave. to the centre line of the block between High st. and Van Cott ave., the point of beginning.

The above entitled assessment was entered on the date hereinafter given, in the Record of Titles of Assessments kept in the Bureau for the Collection of Assessments and Arrears of Taxes and Assessments and of Water Rents, and unless the amount assessed for benefit on any person or property shall be paid within sixty days after the date of said entry of the assessments, interest will be collected thereon, as provided in section 1019 of said Greater New York Charter.

Said section provides, in part, that "If any such assessment shall remain unpaid for the period of sixty days after the date of entry thereof in the said Record of Titles of Assessments, it shall be the duty of the officer authorized to collect and receive the amount of said assessment to charge, collect and receive interest thereon at the rate of seven per centum per annum, to be calculated to the date of payment from the date when such assessment became a lien, as provided by section 159 of this act."

Section 159 of this act provides "An assessment shall become a lien upon the real estate affected thereby ten days after its entry in the said record."

The above assessment is payable to the Collector of Assessments and Arrears at the Bureau for the Collection of Assessments and Arrears of Taxes and Assessments and of Water Rents, at the Municipal Building, Court House Square, Long Island City, Borough of Queens, between the hours of 9 a. m. to 12 m., and on Saturdays from 9 a. m. to 12 m., and all payments made thereon on or before May 6, 1912, will be exempt from interest, as above provided, and after that date will be subject to a charge of interest at the rate of seven per centum per annum from the date when the above assessment became a lien to the date of payment.

Pursuant to a resolution adopted by the Commissioners of the Sinking Fund, at a meeting held January 10, 1912, the sale by sealed bids of the above described buildings and appurtenances thereto will be held by direction of the Comptroller on

WEDNESDAY, MARCH 27, 1912, at 11 a. m., in lots and parcels and in manner and form as follows:

Parcel No. 1. Two-story and basement frame house at Southern boulevard and Crotona ave. No. 2541 Southern boulevard.

Sealed bids (blank forms of which may be obtained upon application) will be received by the Comptroller at the office of the Collector of City Revenue, Room K, No. 280 Broadway, Borough of Manhattan, until 11 a. m. on the 27th day of March, 1912, and then publicly opened for the sale for removal of the above described buildings and appurtenances thereto, and the award will be made to the highest bidder within twenty-four hours, or as soon as possible thereafter.

Each parcel must be bid for separately and will be sold in its entirety, as described in above advertisement.

Each and every bid must be accompanied by a deposit of cash or certified check in a sum equal to 25 per cent. of the amount of the bid, except that a minimum deposit of \$50 will be required with all bids, and that a deposit of \$500 will be sufficient to entitle bidders to bid on any or all of the buildings.

Deposits of unsuccessful bidders will be returned within twenty-four hours after successful bidders have paid purchase price in full and given security, and those of successful bidders may be declared forfeited to The City of New York by the Comptroller upon the failure of the successful bidder to further comply with the requirements of the terms and conditions of the sale as set forth hereinafter.

Successful bidders will be required to pay the purchase money and deposit the required security within twenty-four hours of the receipt of notification of the acceptance of their bids.

The Comptroller reserves the right to reject any and all bids and to waive any defects or informalities in any bid should it be deemed in the interest of The City of New York to do so.

All bids must state clearly (1) the number or description of the building or buildings bid for, (2) the amount of the bid, (3) the full name and address of the bidder.

All bids must be inclosed in properly sealed envelopes, marked "Proposals to be opened March 27, 1912," and must be delivered, or mailed in time for their delivery, prior to 11 a. m. of that date to the "Collector of City Revenue, Room K, No. 280 Broadway, New York City," from whom any further particulars regarding the buildings to be disposed of may be obtained.

THE BUILDINGS WILL BE SOLD FOR IMMEDIATE REMOVAL ONLY, SUBJECT TO THE TERMS AND CONDITIONS PRINTED ON THE LAST PAGE OF THIS ISSUE OF THE "CITY RECORD."

City of New York, Department of Finance,
Comptroller's Office, February 26, 1912. m1,18

CORPORATION SALE BY SEALED BIDS OF THE LEASE OF CERTAIN REAL ESTATE AND APPURTENANCES THERETO.

UPON THE AUTHORIZATION OF THE Commissioners of the Sinking Fund, and pursuant to a resolution adopted by them at a meeting held February 21, 1912, the Comptroller of The City of New York will sell by sealed bids on

FRIDAY, MARCH 15, 1912,
at 11 a. m., in Room K, No. 280 Broadway, Borough of Manhattan, the lease for a period of ten years, commencing April 1, 1912, of the premises belonging to the Corporation of The City of New York, situated on the westerly side of Eldridge st., distant 87.8 feet north of Grand st., plot 50 feet by 100 feet, with the improvements thereon, known as 105 and 107 Eldridge st., in the Borough of Manhattan.

The Comptroller will receive sealed bids for the lease of the said parcel of land and the improvements thereon for the said period, at the minimum or upset price of \$6,000 per annum, payable quarterly in advance, and the said sale will be made upon the following

TERMS AND CONDITIONS.
Each bid must be accompanied by cash or a certified check for twenty-five per cent. of the amount of the yearly rental offered; the amount so paid for one quarter's rent shall be forfeited if the successful bidder does not execute the lease when notified that it is ready for execution.

He will also be required to give an undertaking in the amount of the annual rental bid, with two sufficient sureties to be approved by the Comptroller, conditioned for the payment of the rent quarterly in advance and for the performance of the covenants and terms of the lease.

No person shall be received as lessee or surety who is a delinquent on any former lease from the corporation, and no bid shall be accepted from any person who is in arrears to the corporation upon debt or contract, or who is a defaulter as surety, or otherwise, upon any obligation to the corporation, as provided by law.

The lease will be in the usual form of leases of like property, and will contain, in addition to other terms, covenants and conditions as follows:

1. A clause providing that the lessee shall pay the usual rates for water, per meter measurement, and comply with the rules and regulations of the Department of Water Supply, Gas and Electricity.

2. A clause providing that the lessee shall not make any alterations or improvements to the property except with the consent and approval of the Comptroller.

3. A clause providing that during the term of the lease the lessee shall keep the buildings in proper repair, both inside and outside, and shall comply with all the laws and ordinances of The City of New York.

4. A clause providing that all repairs, alterations and improvements made on or to the property by the lessee, during the period of the lease, shall become the property of The City of New York at the expiration of said lease.

The Comptroller shall have the right to reject any or all bids if deemed to be to the interest of The City of New York.

NOTICE IS HEREBY GIVEN THAT AT THE meeting of the Board of Estimate and Apportionment held on February 8, 1912, the following resolutions were adopted:

Whereas, The Board of Estimate and Apportionment of The City of New York is considering the advisability of amending the proceeding instituted by said Board, March 26, 1909, for acquiring title to Olmstead avenue (formerly Avenue D, south of Westchester avenue and Jefferson street, northerly therefrom) between Protectory avenue and the bulkhead line of Pugsleys Creek; Odell street (Jackson street) between Unionport road and Protectory avenue; and Purdy street (Washington street) between Westchester avenue and Protectory avenue, Borough of The Bronx, so as to conform with the changes made in the lines of Olmstead avenue and of Purdy street as shown upon a map or plan adopted by the Board of Estimate and Apportionment January 11, 1912, and approved by the Mayor January 17, 1912, and by the inclusion in the proceeding of the remaining length of each of these three streets between West Farms road and the former location of Protectory avenue; the amended proceeding to relate to Olmstead avenue, from the bulkhead line of Pugsleys Creek to West Farms road; Odell street, from Unionport road to Purdy street; and Purdy street, from Westchester avenue to West Farms road.

Resolved, That the Board of Estimate and Apportionment, in pursuance of the provisions of the Greater New York Charter hereby gives notice that the following is the proposed area of assessment for benefit in this proposed amended proceeding:

Beginning at a point on the northerly bulkhead line of Pugsleys Creek, as this line is indicated on the final maps of sections 49 and 54, where it is intersected by the prolongation of a line midway between Pugsley avenue and Olmstead avenue as these streets are laid out between Lafayette avenue and Turnbull avenue, and running thence northwardly along the said line midway between Pugsley avenue and Olmstead avenue and along the prolongations of the said line, to the intersection with a line distant 100 feet southerly from and parallel with the southerly line of McGraw avenue, the said distance being measured at right angles to McGraw avenue; thence eastwardly along the said line parallel with McGraw avenue to the intersection with the prolongation of a line midway between Hoguet avenue and Olmstead avenue; thence northwardly along the said line midway between Hoguet avenue and Olmstead avenue and along the prolongations of the said line to the intersection with a line distant 100 feet northerly from and parallel with the northerly line of West Farms road, the said distance being measured at right angles to West Farms road; thence eastwardly along the said line parallel with West Farms road to the intersection with the prolongation of a line distant 100 feet northeasterly from and parallel with the northeasterly line of Purdy street as this street is laid out in the tangent adjoining West Farms road, the said distance being measured at right angles to Purdy street; thence southeasterly along the said line parallel with Purdy street and along the prolongations of the said line to the intersection with the prolongation of a line midway between Purdy street and Castle Hill avenue as these streets are laid out between Parker street and St. Raymond avenue; thence southwardly along the said line midway between Purdy street and Castle Hill avenue and along the prolongations of the said line to the intersection with a line distant 100 feet southerly from and parallel with the southerly line of Westchester avenue, the said distance being measured at right angles to Westchester avenue; thence westwardly along the said line parallel with Westchester avenue to the intersection with the prolongation of a line midway between Castle Hill avenue and Olmstead avenue as these streets are laid out between Lafayette avenue and Turnbull avenue; thence southwardly along the said line midway between Castle Hill avenue and Olmstead avenue and along the prolongations of the said line to the intersection with the northeasterly line of Barrett avenue; thence southwesterly at right angles to Barrett avenue to the intersection with the bulkhead line of Pugsleys Creek hereinbefore referred to; thence northwesterly along the said bulkhead line to the point or place of beginning.

Resolved, That this Board consider the proposed area of assessment at a meeting of this Board to be held in the City of New York, Borough of Manhattan, in the City Hall, on the 21st day of March, 1912, at 10.30 a. m., and that at the same time and place a public hearing thereon will then and there be had.

Resolved, That the Secretary of this Board cause these resolutions and a notice to all persons affected thereby to be published in the City Record for ten days prior to the 21st day of March, 1912.

Dated March 8, 1912.

NOTICE IS HEREBY GIVEN THAT AT THE meeting of the Board of Estimate and Apportionment held on February 8, 1912, the following resolutions were adopted:

Whereas, The Board of Estimate and Apportionment of The City of New York is considering the advisability of instituting proceedings to acquire title to the lands and premises required for the opening and extending of Lake street, from Junction avenue to Alburis avenue, and Banta (Canton) street, from Van Dine street

to Junction avenue, in the Borough of Queens, City of New York; and

Whereas, The Board of Estimate and Apportionment is authorized and required at the time of the adoption of the resolution directing the institution of proceedings to acquire title to the lands required for the foregoing improvement to fix and determine upon an area or areas of assessment for benefit for said proceedings;

Resolved, That the Board of Estimate and Apportionment, in pursuance of the provisions of section 980 of the Greater New York Charter, as amended, hereby gives notice that the following is the proposed area of assessment for benefit in these proceedings:

Beginning at a point on the westerly line of Vorhees place where it is intersected by the prolongation of a line midway between Banta street and Coe place as these streets are laid out east of Vorhees place, and running thence eastwardly along the said line midway between Banta street and Coe place and along the prolongations of the said line to the intersection with a line bisecting the angle formed by the intersection of the prolongations of the southerly line of Roosevelt avenue and the northerly line of Lake street as these streets are laid out between 41st street and 42d street; thence eastwardly along the said bisecting line to the intersection with the westerly line of Louona avenue; thence eastwardly in a straight line to a point on the easterly line of Louona avenue where it is intersected by a line distant 70 feet northerly from and parallel with the northerly line of Lake street as this street is laid out between Louona avenue and Alburis avenue, the said distance being measured at right angles to Lake street; thence eastwardly along the said line parallel with Lake street and along the prolongation of the said line to the intersection with a line distant 100 feet easterly from and parallel with the easterly line of Alburis avenue, the said distance being measured at right angles to Alburis avenue; thence southwardly along the said line parallel with Alburis avenue to the intersection with the prolongation of a line midway between Lake street and Hunt street, as these streets are laid out between Lydig street and 42d street; thence westwardly along the said line midway between Lake street and Hunt street and along the prolongations of the said line to the intersection with a line distant 100 feet westerly from and parallel with the westerly line of Junction avenue, the said distance being measured at right angles to Junction avenue; thence northwardly along the said line parallel with Junction avenue to the intersection with a line bisecting the angle formed by the intersection of the prolongations of the centre lines of Banta street and Hunt street, as these streets are laid out between Vorhees place and 37th street; thence westwardly along the said bisecting line to the intersection with a line bisecting the angle formed by the intersection of the prolongations of the centre lines of Banta street and Hunt street, as these streets are laid out between Van Nest street and Vorhees place; thence westwardly along the said bisecting line to the intersection with a line distant 100 feet westerly from and parallel with the westerly line of Van Dine street, the said distance being measured at right angles to Van Dine street; thence northwardly along the said line parallel with Van Dine street to the intersection with a line parallel with Banta street, as this street is laid out where it adjoins Van Dine street, and passing through the point of beginning; thence eastwardly along the said line parallel with Banta street to the point or place of beginning.

Resolved, That this Board consider the proposed area of assessment at a meeting of the Board to be held in The City of New York, Borough of Manhattan, in the City Hall, on the 21st day of March, 1912, at 10.30 a. m., and that at the same time and place a public hearing thereon will then and there be had.

Resolved, That the Secretary of this Board cause these resolutions and a notice to all persons affected thereby to be published in the City Record for ten days prior to the 21st day of March, 1912.

NOTICE IS HEREBY GIVEN THAT AT THE meeting of the Board of Estimate and Apportionment held on February 8, 1912, the following resolutions were adopted:

Whereas, The Board of Estimate and Apportionment of The City of New York is considering the advisability of amending the proceeding instituted by said Board January 12, 1911, for acquiring title to Alstyne (Washington) avenue, from Hanover avenue to Radcliffe (Moore) street, Borough of Queens, so as to relate to Alstyne avenue, from Card place to Radcliffe street, as shown upon a map or plan adopted by the Board of Estimate and Apportionment January 11, 1912, and approved by the Mayor January 17, 1912.

Resolved, That the Board of Estimate and Apportionment, in pursuance of the provisions of the Greater New York Charter, hereby gives notice that the following is the proposed area of assessment for benefit in this proposed amended proceeding:

Beginning at a point on the prolongation of a line midway between Alstyne avenue and Luring street, as these streets are laid out west of Junction avenue, distant 100 feet westerly from the westerly line of Card place, the said distance being measured at right angles to Card place, and running thence eastwardly along the said line midway between Alstyne avenue and Luring street and along the prolongations of the said line to the intersection with the prolongation of a line midway between Alstyne avenue and Merritt place; thence eastwardly along the said line midway between Alstyne avenue and Merritt place and along the prolongations of the said line to the intersection with the westerly line of Corona avenue; thence eastwardly in a straight line to a point on the easterly line of Sothen avenue where it is intersected by a line midway between Alstyne avenue and Fanning place; thence eastwardly along the said line midway between Alstyne avenue and Fanning place to the intersection with the westerly line of Marlowe avenue; thence eastwardly in a straight line to a point on the easterly line of Marlowe avenue distant 100 feet northerly from the prolongation of the northerly line of Alstyne avenue, as this street is laid out east of Marlowe avenue, the said distance being measured at right angles to Alstyne avenue; thence eastwardly and parallel with Alstyne avenue and the prolongations thereof to the intersection with the northwesterly line of Radcliff street; thence southeastwardly at right angles to Radcliff street to the intersection with a line midway between Radcliff street and Strong street; thence southwestwardly along the said line midway between Radcliff street and Strong street to the intersection with a line at right angles to Radcliff street and passing through a point on its southeasterly side distant 100 feet southerly from the southerly line of Alstyne avenue, the said distance being measured at right angles to Alstyne avenue; thence northwesterly along the said line at right angles to Radcliff street to the intersection with its southeasterly side; thence westwardly and parallel with Alstyne avenue to the intersection with the prolongation of a line midway between Alstyne avenue and Gerry avenue, as these streets are laid out between Sothen avenue and Marlowe avenue; thence westwardly along the said line midway between Alstyne avenue and Gerry avenue and along the prolongations of the said line to the intersection

curb line of 41 avenue, in the Borough of Manhattan, between levels ten (10) feet above the curb grade and a sufficient depth below said

curb to provide proper support for the street and walk surfaces, be and they are hereby in all respects repealed, canceled and revoked; and be it further

Resolved, That the President of the Borough of Manhattan be and he is hereby authorized to remove or cause to be removed all said encroachments or encumbrances in accordance with the foregoing resolution.

PUBLIC SERVICE COMMISSION.

INVITATION TO CONTRACTORS.

PART OF LEXINGTON AVENUE ROUTE.
The City of New York, acting by the Public Service Commission for the First District (hereinafter called "the Commission") invites proposals to construct Section No. 2-A of the Lexington Avenue Rapid Transit Railroad, including the underlying portion of the Canal Street Rapid Transit Railroad or Route No. 20.

The points within the City between which the said part is to run and the route or routes to be followed are briefly as follows:

Section No. 2-A. Beginning at a point under Broadway about ninety (90) feet north of the center line of Walker street and extending thence northerly under Broadway for about five hundred and thirty (530) feet to a point about fifty (50) feet north of the center line of Howard street; including the underlying portion of the Canal Street Rapid Transit Railroad, or Route No. 20 extending under Canal street and Broadway and under and across the portion of the Lexington Avenue Route above described a distance of about one hundred and fifty-seven (157) feet.

The general plan of construction calls for a subsurface railroad having four tracks for two tracks for the Lexington Avenue Route and two tracks for such underlying portion of the Canal Street Route; all of which are more particularly indicated on the contract drawings.

Bidders will not be required to do the station-finish work, nor to provide or lay tracks, ties or ballast.

The work of construction under the contract will include the construction of all necessary sewers and connections along the route of the railroad in Broadway and in Canal street; also the necessary support, maintenance, readjustment and reconstruction of vaults adjacent to buildings, pipes, tubes, conduits, subways or other subsurface structures; the support and care, including underpinning where necessary, of all buildings, surface railroads and other structures, etc., affected by or interfered with during the construction of the work; also the restoration of the sidewalks and the temporary paving and maintenance of roadways.

The method of construction will be by trench excavation under cover, unless otherwise permitted by the Commission.

Bidders must examine the form of contract and the specifications, maps and plans; must visit the location of the work and inform themselves of the present conditions along the line thereof and make their own estimates of the facilities and difficulties attending the execution of the proposed work.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated, in the printed form of contract and in the contract drawings therein referred to. Printed copies of the form of contract, bond and contractor's proposal may be had on application at the office of the Commission, No. 154 Nassau st., Borough of Manhattan, City of New York. The contract drawings may be inspected at the same office, and copies thereof may be purchased by prospective bidders by payment of five dollars (\$5). The printed form of contract and the contract drawings are to be deemed a part of this invitation.

The Commission is informed by the Department of Docks and Ferries that docks and bulkheads along the East River may be available for dumping purposes. Information in regard thereto may be obtained by any intending bidder upon inquiry at the office of the Commission.

Partial payments to the Contractor will be made monthly as the work proceeds as provided in the form of contract.

The Contractor will be required to complete the work as soon as practicable and within a period of forty (40) months.

Sealed bids or proposals will be received at the office of the Commission at No. 154 Nassau Street, Borough of Manhattan, City of New York, until the 22nd day of March, 1912, at twelve (12) o'clock noon, at which time, or at a later date to be fixed by the Commission, the proposals will be publicly opened.

Separate proposals must be submitted for the portion of the Lexington Avenue Route above described and for the underlying portion of the Canal Street Route above described. The Commission may accept the proposal for such portion of the Lexington Avenue Route while at the same time rejecting the accompanying proposal for such portion of the Canal Street Route. Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

Statements based upon estimates of the Engineer, of the quantities of the various classes of the work and of the nature and extent as near as practicable of the work required on such portion of the Lexington Avenue Route and on such portion of the Canal Street Route are to be found in the schedules forming a part of the form of Contractor's Proposal. The quantities given in such schedules are approximate only, and given as a basis for the uniform comparison of bids and no claim is to be made against the City on account of any excess or deficiency, absolute or relative, in the same, except as provided in the specifications and form of contract.

If the contract as awarded embraces both such portion of the Lexington Avenue Route and such portion of the Canal Street Route, the Commission further reserves the right to omit such portion of the Canal Street Route upon the terms and conditions stated in the form of contract.

All proposals must, when submitted, be enclosed in a sealed envelope endorsed "Proposal for Constructing Part of Rapid Transit Railroad—Route No. 5, Section No. 2-A," and must be delivered to the Commission or its Secretary; and in the presence of the person submitting the proposal, it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a separate certified check drawn upon a national or state bank or trust company having its principal office in the City of New York, satisfactory to the Commission and payable to the order of the Comptroller of The City of New York for the sum of Fifteen Thousand Dollars (\$15,000). Such check must not be enclosed in the envelope containing the proposal.

The Unit Prices must not be improperly balanced, and any bid which the Commission considers detrimental to the City's interests may be rejected.

No proposal, after it shall have been deposited with the Commission, will be allowed to be withdrawn for any reason whatever.

The award of the contract will be made by the Commission as soon as practicable after the opening of the proposals.

Bidders whose proposals are otherwise satisfactory, in case the sureties or securities named by them are not approved by the Commission, may substitute in their proposals the names of other sureties or securities approved by the Commission, but such substitution must be made within five days after notice of disapproval, unless such period is extended by the Commission.

A bidder whose proposal shall be accepted shall, in person or by duly authorized representative, attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and such bidder

shall then deliver a contract in the form referred to, duly executed and with its execution duly approved.

At the time of the delivery of the contract, the Contractor will be required to furnish security to the City by giving a bond for thirty-five thousand dollars (\$35,000) if the contract as awarded embraces only such portion of the Lexington Avenue Route and fifty thousand dollars (\$50,000) if the contract as awarded embraces both such portion of the Lexington Avenue Route and such portion of the Canal Street Route. At the option of the successful bidder cash or approved securities may be deposited instead of giving a bond. If securities are deposited in place of a bond under this contract, they must be of the character of securities in which Savings Banks may invest their funds and must be approved by the Commission.

The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security fifteen per centum (15%) of the amounts certified from time to time to be due to the Contractor will be deducted until the amounts so deducted and retained shall equal the sum of One Hundred Thousand Dollars (\$100,000) if the contract as awarded embraces only such portion of the Lexington Avenue Route and One Hundred and Fifty Thousand Dollars (\$150,000) if the contract as awarded embraces both such portion of the Lexington Avenue Route and such portion of the Canal Street Route. Thereafter there shall be so deducted and retained for such purpose ten per centum (10%) of the amounts certified from time to time to be due to the Contractor. The Contractor may from time to time withdraw portions of the amounts so retained upon depositing in lieu thereof corporate stock of The City of New York equal in market value to the amount so withdrawn.

In case of failure or neglect to execute and deliver the contract or to execute and deliver the required bond or to make the required deposit, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case, the Commission will give notice thereof to such defaulting bidder, and the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interests of the City to contract with, or may by new advertisement invite further proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other Contractor over the amount of the bid of such defaulting bidder.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, or to make the required deposit, then the Invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damage by it sustained by reason of such failure, and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions in respect of the bond or deposit are complied with.

The right to reject any and all bids is reserved.

FIRST DEPARTMENT.

In the matter of acquiring title by The City of New York to certain lands and premises situated on the westerly side of HAMILTON PLACE, between One Hundred and Fortieth and One Hundred and Forty-first streets, in the Borough of Manhattan, duly selected as a site for school purposes, according to law.

WE, THE UNDERSIGNED COMMISSIONERS of Estimate and Appraisal in the above entitled proceeding, do hereby give notice to the owner or owners, lessee or lessees, parties or persons respectively entitled to or interested in the lands, tenements, hereditaments and premises, title to which is sought to be acquired in this proceeding, and to all others to whom it may concern, to wit:

First—That we have completed our estimate of the loss and damage to the respective owners, lessees, parties or persons respectively entitled to or interested in the lands and premises affected by the proceeding, known as Parcel Damage No. 2, or having any interest therein as directed by the order of the Special Term granted herein and entered in the office of the Clerk of the County of New York on the 10th day of February, 1912, and have filed a true report or transcript of such estimate in the office of the Board of Education of The City of New York, at its office, situated at the southwest corner of 59th street and Park avenue, in the Borough of Manhattan, City of New York, for the inspection of whomsoever it may concern.

Second—That all parties or persons whose rights may be affected by the said estimate, or who may object to the same, or any part thereof, may within ten days after the first publication of this notice, Monday, March 4, 1912, file their objections, in writing, with us at our office, Room 401, 258 Broadway, in the Borough of Manhattan, in The City of New York; and we, the said Commissioners, will hear parties so objecting, at our said office, on the 15th day of March, 1912, at one o'clock in the afternoon of that day, and upon such subsequent days as may be found necessary.

Dated New York, March 1, 1912.
CHARLES L. HOFFMAN, BENNO LEWINSON, GEORGE WILLIAM CLUNE, Commissioners.
JOSEPH M. SCHENCK, Clerk. m4,14

FIRST DEPARTMENT.

In the matter of the application of The City of New York, relative to acquiring title, wherever the same has not been heretofore acquired, for the same purpose in fee, to the lands, tenements and hereditaments required for the opening and extending of PARKER STREET (AVENUE) (although not yet named by proper authority), from Protectory avenue to Wellington avenue, in the Twenty-fourth Ward, Borough of The Bronx, City of New York.

NOTICE IS HEREBY GIVEN THAT THE bill of costs, charges and expenses incurred by reason of the proceedings in the above-entitled matter will be presented for taxation to one of the Justices of the Supreme Court of the State of New York, First Department, at a Special Term thereof, Part I, to be held at the County Court House in the Borough of Manhattan, in The City of New York, on the 18th day of March, 1912, at 10.30 o'clock in the forenoon of that day, or as soon thereafter as counsel can be heard thereon; and that the said bill of costs, charges and expenses has been deposited in the office of the Clerk of the County of New York, there to remain for and during the space of ten days, as required by law.

Dated Borough of Manhattan, New York, March 4, 1912.

ERNEST HALL, Commissioner of Assessment.
JOEL J. SQUIER, Clerk. m4,14

FIRST DEPARTMENT.

In the matter of the application of The City of New York, relative to acquiring title, wherever the same has not been heretofore

acquired for the same purpose in fee to the lands, tenements and hereditaments required for the opening and extending of the EASTERN BOULEVARD, from the property of the New York, New Haven and Hartford Railroad to Hunts Point Road, in the Twenty-third Ward, Borough of The Bronx, City of New York, as amended by a resolution of the Board of Estimate and Apportionment adopted on the 20th day of April, 1911, and by an order of this Court bearing date the 29th day of December, 1911, and entered in the office of the Clerk of the County of New York on the 3d day of January, 1912, so as to omit from said proceeding that portion of the said Eastern Boulevard, between Truxton Street and the property of the New York, New Haven and Hartford Railroad.

NOTICE IS HEREBY GIVEN TO ALL PERSONS interested in the above entitled proceeding, and to the owner or owners, occupant or occupants of all houses and lots and improved and unimproved lands affected thereby, and to all others whom it may concern, to wit:

First—That the undersigned, Commissioners of Estimate, have completed their estimate of damage, and that all persons interested in this proceeding, or in any of the lands, tenements and hereditaments and premises affected thereby, having any objection thereto, do file their said objections in writing, duly verified, with them at their office, Nos. 90 and 92 West Broadway, in the Borough of Manhattan, in The City of New York, on or before the 21st day of March, 1912, and that the said Commissioners will hear parties so objecting, and for that purpose will be in attendance at their said office on the 25th day of March, 1912, at 2 o'clock p. m.

Second—That the undersigned, Commissioner of Assessment, has completed his estimate of benefit and that all persons interested in this proceeding, or in any of the lands, tenements and hereditaments and premises affected thereby, having any objection thereto, do file their said objections in writing, duly verified, with him at his office, Nos. 90 and 92 West Broadway, in the Borough of Manhattan, in The City of New York, on or before the 21st day of March, 1912, and that the said Commissioner will hear parties so objecting, and for that purpose will be in attendance at his said office on the 26th day of March, 1912, at 2 o'clock p. m.

Third—That the Commissioner of Assessment has assessed any or all such lands, tenements and hereditaments and premises as are within the area of assessment fixed and prescribed as the amended area of assessment for benefit by the Board of Estimate and Apportionment on the 20th day of April, 1911, and that the said area of assessment includes all those lands, tenements and hereditaments and premises situate and being in the Borough of The Bronx, in The City of New York, which, taken together, are bounded and described as follows, viz:

Bounded on the north by a line distant 100 feet northerly from and parallel with the northerly line of Randall avenue, and by the prolongation of the said line, the said distance being measured at right angles to Randall avenue; on the east by a line midway between Halleck street and Payne street; on the south by a line distant 100 feet southerly from and parallel with the southerly line of East Bay avenue and by the prolongation of the said line, the said distance being measured at right angles to East Bay avenue; and on the west by a line midway between Barry street and Dupont street, and by the prolongation of the said line.

Fourth—That the abstracts of said estimate of damage and of said assessment for benefit together with the damage and benefit maps, and also all the affidavits, estimates, proofs and other documents used by the Commissioners of Estimate and by the Commissioner of Assessment in making the same, have been deposited in the Bureau of Street Openings in the Law Department of The City of New York, Nos. 90 and 92 West Broadway, in the Borough of Manhattan, in said City, there to remain until the 23d day of March, 1912.

Fifth—That, provided there be no objections filed to either of said abstracts, the reports as to awards and as to assessments for benefit herein will be presented for confirmation to the Supreme Court of the State of New York, First Department, at a Special Term thereof, Part III, to be held in the County Court House in the Borough of Manhattan, in The City of New York, on the 31st day of May, 1912, at the opening of the Court on that day.

Sixth—In case, however, objections are filed to the foregoing abstracts of estimate and assessment, or to either of them the motion to confirm the reports as to awards and as to assessments shall stand adjourned to the date to be hereafter specified in the notice provided in such cases to be given in relation to filing the final reports, pursuant to Sections 981 and 984 of the Greater New York Charter, as amended by chapter 658 of the Laws of 1906.

Dated Borough of Manhattan, New York, February 27, 1912.

In the matter of the application of The City of New York, relative to acquiring title wherever the same has not been heretofore acquired for the same purpose in fee to the lands, tenements and hereditaments required for the opening and extending of COTTON STREET, from Arrietta street to Griffin street, in the Second Ward, Borough of Richmond, City of New York.

PURSUANT TO THE STATUTES IN SUCH cases made and provided, notice is hereby given that an application will be made to the Supreme Court of the State of New York, Second Department, at a Special Term of said Court, to be held for the hearing of motions, in the County Court House, in the County of Kings, in the Borough of Brooklyn, in The City of New York, on the 15th day of March, 1912, at the opening of the Court on that day, or as soon thereafter as Counsel can be heard thereon, for the appointment of Commissioners of Estimate and one Commissioner of Assessment in the above entitled matter. The nature and extent of the improvement hereby intended is the acquisition of title in fee by The City of New York, for the use of the public, to all the lands and premises, with the buildings thereon and the appurtenances thereto belonging, required for the opening and extending of Cotton street, from Arrietta street to Griffin street, in the Second Ward, Borough of Richmond, City of New York, being the following described lots, pieces or parcels of land, viz.:

Beginning at a point on the northeasterly line of Griffin street 56.52 feet southeasterly from the intersection of the easterly line of an unnamed street (the extension of Stuyvesant place) and said northeasterly line of Griffin street.
1. Thence northeasterly at right angles to said northeasterly line of Griffin street 109.96 feet.
2. Thence northwardly deflecting 56 degrees 46 minutes 39 seconds to the left 289.97 feet to the southerly line of Arrietta street.
3. Thence eastwardly, along said southerly line of Arrietta street 52.46 feet.
4. Thence southwardly parallel to and 50 feet easterly from the second course 332.86 feet.
5. Thence southwesterly parallel to and 50 feet southeasterly from the first course 156.98 feet to the above mentioned northeasterly line of Griffin street.
6. Thence northwesterly along said northeasterly line of Griffin street 50 feet to the point of beginning.

Cotton street is shown on a map entitled "Layout and Grades of Cotton street, from Arrietta street, near S. L. R. T. R. R. to Griffin street, in the Second Ward, Borough of Richmond, The City of New York," which map was adopted by the Board of Estimate and Apportionment July 29, 1910, and filed in the office of the President of the Borough of Richmond, September 15, 1910, and in the offices of the Clerk of the County of Richmond and the Counsel to the Corporation of The City of New York on or about the same date.

The Board of Estimate and Apportionment on the 15th day of June, 1911, duly fixed and determined the area of assessment for benefit in this proceeding as follows:

Beginning at a point on the prolongation of a line distant 100 feet northerly from and parallel with the northerly line of Cotton street, as this street is laid out immediately east of and adjoining Griffin street, the said distance being measured at right angles to Cotton street, where it is intersected by a line always distant 100 feet westerly from and parallel with the westerly line of Griffin street, the said distance being measured at right angles to Griffin street, and running thence eastwardly along the said line parallel with Cotton street and along the prolongation of the said line to the intersection with a line midway between Griffin street and Cotton street as these streets are laid out immediately south of and adjoining Arrietta street; thence

northwardly along the said line midway between Griffin street and Cotton street and along the prolongation of the said line to the intersection with the centre line of Arrietta street; thence eastwardly along the centre line of Arrietta street to the intersection with the prolongation of a line distant 100 feet easterly from and parallel with the easterly line of Stuyvesant place as this street is laid out adjoining Arrietta street on the north, the said distance being measured at right angles to Stuyvesant place; thence northwardly and always distant 100 feet easterly from and parallel with the easterly line of Stuyvesant place and the prolongation thereof to the intersection with the southerly property line of the U. S. Government Lighthouse Reservation; thence eastwardly along the said property line and along the prolongation thereof to the intersection with the U. S. bulkhead line of New York Bay; thence southwardly along the said bulkhead line to a point distant 500 feet southerly from the prolongation of the southerly line of Arrietta street, the said distance being measured at right angles to Arrietta street; thence westwardly and always distant 500 feet southerly from and parallel with the southerly line of Arrietta street and the prolongation thereof to the intersection with the easterly right of way line of the Staten Island Rapid Transit Railway; thence northwardly along the said right of way line to the intersection with the prolongation of a line distant 100 feet southerly from and parallel with the southerly line of Cotton street as this street is laid out immediately east of and adjoining Griffin street, the said distance being measured at right angles to Cotton street; thence westwardly along the said line parallel with Cotton street and along the prolongations of the said line to the intersection with a line parallel with Griffin street and passing through the point of beginning; thence northwardly along the said line parallel with Griffin street to the point or place of beginning.

(The lines of the streets herein referred to which are not laid out upon the City map are intended to be those in use and as commonly recognized.)

NOTICE TO BIDDERS AT SALES OF OLD BUILDINGS, ETC.

TERMS AND CONDITIONS UNDER WHICH BUILDINGS, ETC., WILL BE SOLD FOR REMOVAL FROM CITY PROPERTY.

THE BUILDINGS AND APPURTENANCES thereto will be sold to the highest bidder, who must pay cash or certified check, drawn to the order of the Comptroller of The City of New York, and must also give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of \$50, the sum of \$50 shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but unfinished at the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the building or buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal, nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or any of these conditions shall forthwith void the sale and cause immediate forfeiture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing therein or permitting the occupancy of any such building by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

The sale will be as of the condition of the property on date of delivery thereof to the purchaser. The City of New York will not be responsible for any change or loss which may occur in the condition of the buildings, or their appurtenances between the time of the sale thereof and the time of delivering possession to the purchaser, after being properly vacated of all tenants. The sale and delivery to purchaser will be made as nearly together as the circumstance of vacating the structures of their tenants will permit.

All the material of the buildings, sheds, walks, structures and cellars of whatever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the exterior walls of the buildings and their foundations and the sidewalks and curb in front of said buildings, extending within the described area shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point. The exterior walls and their foundations shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building. Where there is no curb the elevation of the surrounding ground shall be considered curb level. All wells, cesspools, sinks, etc., existing on the property must be filled to the level of the surrounding ground with clean earth.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street, and the opening of the main sewer in street shall be properly closed in compliance with the directions of the Bureau of Sewers in the Borough in which the buildings are situated, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed.

The permit for all opening in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances, or any part thereof, within thirty days from the day of possession will work forfeiture of ownership of such buildings, appurtenances, or portion as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and The City of New York will, without notice to the purchaser, cause the same to be removed, and the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and must be completed within thirty days from the day of possession, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless, The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Where party walls are found to exist between buildings purchased by different bidders, the materials of said party walls shall be understood to be equally divided between the separate purchasers.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furrings, plaster, chimneys, projecting brick, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beam-ends, etc., bricked up, and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs and adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the contractor.

The Comptroller of The City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids; and it is further

Resolved, That, while the said sale is held under the supervision of the Commissioners of the Sinking Fund, the Comptroller is authorized to cause the sale to be advertised and to direct the sale thereof as financial officer of the City.

PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department, and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a Department, chief of a Bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
