

Sampling of Safety Improvements Installed Within 1/2 Mile of NYC Schools in 2018-2019

New York City Department of Transportation

May 18, 2020

Ralph Avenue at Marion Street, Brooklyn: New traffic signal, crosswalks, pedestrian island, and painted curb extension adjacent to P.S. 40 George W. Carver.

Introduction

The New York City Department of Transportation is committed to improving street safety for children throughout the five boroughs. Local Law 241 of 2017 requires the agency to develop strategies for enhancing safety within a half mile of at least 50 schools by March 30, 2018 and every two years thereafter until 2024, and report on their implementation. DOT currently implements over 100 street redesign projects annually which span the city and collectively fall within a half mile radius of hundreds of schools. In addition, each year the agency installs nearly 400 speed bumps, at least 50 School Slow Zones, hundreds of traffic signal projects, and sponsors dozens of safety-related capital projects.

The following report is a sampling of street redesign projects installed within one quarter of a mile of 100 schools around the city, a tighter radius than required in the local law. This list includes projects that added pedestrian islands, turn lanes, bicycle lanes, and left turn traffic signals- all proven traffic safety techniques. Details on these projects are available in the hyperlinks provided in the following table. DOT looks forward to developing additional safety improvements in the coming two years and will report on these initiatives in the 2022 report.
