DEPARTMENT OF WATER SUPPLY, GAS AND ELECTRICITY.

REPORT FOR THE THREE MONTHS ENDING SEPTEMBER 30, 1912.
(Received at the City Record Office April 2, 1913.)

REPORT OF THE CHIEF ENGINEER.

November 1, 1912.

Hon. HENRY S. THOMPSON, Commissioner:

Dear Sir—I beg to submit report showing the condition of the water supply in the various boroughs, and work done in connection therewith, for the quarter ending September 30, 1912.

Manhattan and The Bronx.

Condition of Supply.

The rainfall for the quarter was about 25 per cent below the average and it was therefore necessary to draw the greater part of the supply from the stored waters, the flow of the river representing only about 14 per cent of the total amount drawn. Owing to the large amount in storage at the beginning of the quarter, there is ample supply on hand to meet the consumption and there is no reason to anticipate any danger of shortage of supply, such as threatened during 1911. The consumption has shown an increase over the figures of 1911, due to the stopping of the house to house inspection to reduce waste which was so actively carried on during the corresponding period of last year. The effect of last year's campaign is shown, however, by the consumption for this year, the consumption up to October 1 this year being on an average 48,000,000 gallons per day less than it would have been, taking the 1910 figures as a basis and allowing 3 per cent increase per annum as the normal growth in consumption, due to the growth of the City. By drawing water mainly from the lower level in Croton Lake at the new dam, and by the treatment of the waters in the storage reservoirs with copper sulphate, it has been possible to supply water of an excellent quality throughout the summer, the temperature of the water supplied as drawn from Croton Lake being 65 degrees Fahrenheit, as compared with 75 degrees Fahrenheit in 1911.

Plans for chlorinating the supply from Gleneida Lake and Katonah Brook were completed, the Katonah plant being put into operation on July 15, 1912. The Gleneida plant has not been used, as it was not necessary to draw from this portion of the watershed.

Collection System.

It was not found necessary to put in service the old Croton Aqueduct, north of Jerome Park Reservoir, and bids were received for the rebuilding of those portions of the Aqueduct where the structure has shown weakness. This contract has not yet been awarded and it is improbable that the work can be completed before the latter part of next spring or early in the summer.

Plans and specifications for the main portion of the filtration plant for the Croton supply at the Jerome Park Reservoir site were submitted to the Board of Estimate and Apportionment for approval, and after careful consideration of this matter, a committee consisting of the Mayor, the Comptroller, and the Presidents of the Boroughs of Manhattan, The Bronx and Richmond, to whom the Board of Estimate referred the matter with power to act, approved the contract and specifications.

Pumping Stations.

An increase of about 100 per cent in the amount of water pumped at the Jerome Avenue Station was necessitated by the increased area placed upon the Williamsbridge Reservoir service, together with the normal growth in consumption in the territory covered by this service.

Distribution.

The installation of the High Pressure Fire Service mains south of Chambers street has been actively carried on by the contractor during the quarter, 19,516 feet of mains being installed. This work will not, however, be completed until next spring.

Brooklyn.

In accordance with the recommendation of this bureau, the Board of Estimate and Apportionment on July 11 approved the employment of 40 inspectors and 10 clerks to carry on the house to house water waste investigation, the economic results to be obtained from such investigation having been shown in the report for the second quarter. This work was commenced in the latter part of July and has been carried on continuously throughout the quarter. The results of the house to house inspection, together with the waste notices which were sent out in June, are shown by the following table:

Note—Statements appeared in the press as to the scarcity of water early in March, 1911. Formal notices calling attention to the necessity of stopping all leaks were issued in this borough in June, 1912, and actual house to house inspection commenced about August 1.

From this table it will be seen that while the reduction in consumption, based upon the corresponding period of 1911, was comparatively slight, such comparison is misleading, as the consumption in 1911 was materially reduced due to the general agitation on water waste, owing to the drought and resultant shortage in supply. On the basis of the consumption which it is estimated would have obtained under normal conditions, the water waste investigation has saved about fourteen million gallons per day and the expenditure for this work, including the cost of printing and distributing water waste notices, has been $9,693. The resultant cost per million gallons saved has been $7.53, which is less than 5 per cent. of the cost of water at meter rates, which in round figures is $133. With the reduced consumption, no difficulty has been experienced in furnishing an adequate supply, to all parts of the borough, authough the rainfall was 17 per cent. below the average for the third quarter for the past ten years.

Pumping Stations.

At the Ridgewood station the work of overhauling the new Davis & Farnum pumps for the purpose of test has been carried on, and it is expected that the four pumps will be ready for testing before the end of the year.

While bids were received on June 12 for rebuilding the Worthington triple expansion engine No. 2 located at the North Side station, the lowest of three bids received being $32,325, this contract has not been awarded owing to lack of funds, the Board of Estimate and Apportionment not having as yet made the necessary transfer of funds.

On August the City took title to the 6th street and the Forest Park plants, which were being operated under contract made with Silas W. Titus dated July 15, 1907. This contract which called for the furnishing of water to a minimum amount of ten million gallons per day from two stations to be built and operated by the contractor, had been a subject of controversy for several years, owing to the failure both on the part of the City and the contractor, to fully comply with the requirements of the contract. After the matter had been heard before a Board of Arbiters appointed by the Comptroller, the Board of Estimate and Apportionment on August 13, 1912, authorized the acquirement of the plants and the termination of the contract, the price to be paid being $337,012.50. Since the acquirement of the plants, this Department has operated the Forest Park plant, and it is proposed to dismantle the 6th street plant, as the water obtainable from this plant is not satisfactory for domestic consumption.

The yield at the Jameco station has been steadily increased since the change was made to direct suction in April, 1912, by the overhauling and repairing of the wells at this station. During the month of August, the amount of water pumped from this station was 227 million gallons, at a cost of $3,117, whereas during the same month in 1911, when the plant was being operated under contract with Silas W. Titus, the amount of water pumped was 234 million gallons at a cost of $6,624. The saving due to the operation of the plant under direct suction, by the City's force, as compared to the air lift system as operated by the contractor, was 106 per cent., based upon the present cost per million gallons.

Distribution.

The replacing of mains in the district bounded by Atlantic avenue, Sumner avenue, Flushing avenue, Borough Line, Evergreen Cemetery and East New York avenue, including the cross connection of mains, has been practically completed, so that the district charge made in 1903 by the Fire Insurance Exchange on account of inadequate water supply, amounting to 20 per cent., should be removed as soon as the necessary tests of flow from hydrants have been made, this matter now awaiting action by the Fire Insurance Exchange.

Borough of Queens.

There has been no difficulty in meeting the requirements of the consumers during the quarter, although it was found advisable to start the Whitestone station on August 21, and since then it has been furnishing about 0.7 of a million gallons per day.

The 30-inch connecting main between the 1st and 3d Wards has been laid, and as soon as the additional water is made available by the completion of the 24-inch main from the Bayside station, water can be pumped from the 3d to the 1st Ward. The money has not been appropriated for the main connecting the Brooklyn system with the Queens system and this supply will not therefore be available until next year.

Borough of Richmond.

Normal conditions have existed in this borough during the quarter and by operating the temporary station on the Southfield Boulevard, no difficulty has been experienced in obtaining the requisite pressure to meet all demands, and for the first time in many years, there has been no necessity during the summer months of stopping the use of water for sprinkling purposes.

The attached tables give the more important statistics in relation to the water supply system. Respectfully submitted, I. M. DE VARONA, Chief Engineer.

BUREAU OF WATER REGISTER—MANHATTAN.

Hon. HENRY S. THOMPSON, Commissioner:

Dear Sir—Herein I beg to make report of transactions of this Bureau, in condensed form, for the third quarter of 1912.

Collections—I attach statement of collections for the quarter, compiled from the cashier's monthly reports. As explained in the report for the previous quarter, the apparently large shrinkage in frontage rate revenue is due to the fact that the charge for 1912 covered the period from May 1 to December 31, only two-thirds of the usual charge, and the apparent difference is, therefore, correct. The receipts for meter charges have also been affected by the new legislation providing for the return of unpaid items in March instead of August, so that the receipts for the month of July, which is usually the period of heaviest payment, were far below those of previous years.

Inspection Division—The average number of Inspectors during the quarter was 96, and their work may be summarized as follows:

Meter readings	65,002
Examinations, inspections and special reports	14,479
Uncompleted assignments	5,871
Total reports to Water Registrar	85,352

Meter Setting Division—During the quarter 5,044 permits were issued to set and repair meters, of which 3,994 were permits to repair meters and 1,050 permits to set new meters.

Complaint Division—During this quarter 775 complaints were received for consideration. Of these and others outstanding, 865 were settled during the period with a gross allowance of $8,782.09, or about 21.26 per cent. of amount claimed. Allowances were made on 357 of the complaints, and increases were awarded on 3.

Shipping Division—The total number of violations reported during the quarter amounted to 46, of which 25 were picked up by the patrol boat "Croton," and the balance, 21, were turned in by the Shore Inspectors.

Pipe Yard—At the Meter Testing Station during the quarter, 3,933 meters were received and tested, 3,889 meters were distributed on permits, 100 meters were rejected on test.

The outside work may be summarized as follows: Meters tested on premises, 711, at an average cost of $2.36. Test tees installed, 3, at an average cost of $4.87 for each set. Sixty-five watering troughs were repaired during the quarter at a total cost of $228.94.

Miscellaneous—During the summer we got into good working order the arrangement whereby this Department was to work in harmony with the Bureau of Buildings in checking the charges for water for building purposes, using the services of the newly created position of estimator operating under the Building Department

An autograph recording time clock has been installed at the Testing Station.

Respectfully submitted, BENJ. A. KEILY, Water Registrar.

P. S.—This quarter covers the vacation period, which is principally reflected in this report in the results in the Inspection Division. The meter readings were fully maintained, but there was necessarily a shrinkage in general inspections.

BUREAU OF WATER REGISTRAR, BROOKLYN.

Brooklyn, November 13, 1912.

Hon. HENRY S. THOMPSON, Commissioner:

Dear Sir—I enclose herewith quarterly report of the Water Registrar, covering the period ending September 30, 1912.

The report is made up of individual reports by the heads of the various divisions of the Bureau, and fully covers the work done in those divisions.

Our receipts for the quarter show a considerable falling off, and the total receipts for the first three quarters of the year show a decrease of slightly under 25 per cent. This can be accounted for by the facts that only eight months' frontage tax is being collected for 1912, and that the unpaid rates, both frontage and meter, were returned to the Receiver of Taxes on March 1 of this year, instead of August 1, as heretofore.

The house to house inspection which is being carried on is producing good results. The work was started in August, and up to the week ending November 9 the

Total number of examinations made was	39,778
Total number of leaks discovered	51,557
Total number of re-examinations	13,407
Leaks found to have been repaired	26,137
Leaks not repaired	7,103
New leaks found on re-examination	150

This work has doubtless resulted in a considerable saving of water.

Based on the actual consumption of 1910, and assuming an increase of 3 per cent per annum, due to increase in population, our estimated consumption for August of this year was 152,000,000 gallons per day; actual consumption, 138,000,000 gallons per day. September estimated consumption, 154,000,000 gallons per day; actual consumption, 139,000,000 gallons per day. October estimated consumption, 152,000,000 gallons per day; actual consumption, 137,000,000 gallons per day.

These figures do not show a very material reduction in consumption, as compared with 1911, but I believe this can be accounted for by the fact that Brooklyn doubtless benefited by the agitation during the famine scare in Manhattan and The Bronx, as our consumption for July, August, September and October, 1911, shows a considerable falling off from 1910, while normally there should have been an increase.

The work of the Bureau of Water Supply and the Lighting and Electrical Bureaus is being carried on as usual, and you will doubtless receive quarterly reports from them direct. Yours truly,

F. T. PARSONS, Deputy Commissioner, Borough of Brooklyn.

October 24, 1912.

F. T. PARSONS, Esq., Deputy Commissioner:

Dear Sir—I transmit herewith reports of the chiefs of the various divisions of this Bureau which show in detail the business transacted during the quarter ending September 30.

The work in all the Divisions is increasing very rapidly from various causes, making necessary the retaining of the temporary Clerks in service and night work on the part of some of the Clerks of the regular force. I have found from experience that Clerks who are obliged to work at night for any length of time are not in as good condition for their regular day duties as they should be, and I therefore respectfully request the appointment of five Clerks at $900 per year for duty in this office in order that further night work may not be required.

I also enclose a comparative statement showing the collections for the last quarter; also statement for the past nine months.

I again call your attention to my previous recommendations for the promotion of various Clerks in this Bureau, as in all the cases mentioned they have given faithful services to the Department and are justly entitled to recognition by an increase in salary. Respectfully, WM. R. McGUIRE, Water Registrar.

October 3, 1912.

Mr. WILLIAM R. McGUIRE, Water Registrar:

Dear Sir—The following is a report of business transacted in the Cashier's Division covering the quarter ending September 30, 1912:

Total amount received and deposited to the credit of the City Chamberlain, $968,114.43, distributed as follows:

Frontage rates, current year	$593,883 37
Frontage rates, prior year	475 74
Penalty, current year	2,814 65
Penalty, prior year	75
Meter rates	343,387 50

Labor and material	1,796 19
Sale of ashes	15 00
Hose permits	1,435 00
Meter glasses	37 00
	$968,114 43

The total number of entries on the cash sheets during the period was 59,565.

Respectfully, J. McCOY GRAY, Cashier.

October 1, 1912.

Mr. WILLIAM R. McGUIRE, Water Registrar:

Dear Sir—In accordance with your request, I beg to submit for your consideration report on the Frontage Rate Division for the quarter ending September 30, 1912.

The month of July was an exceptionally busy month, due to the sending out of notices reminding taxpayers of the imposition of the 5 per cent. penalty on all items remaining unpaid at the close of the month and subsequent payment of such items. On July 31, over 5,000 payments were made on Frontage Rate accounts. Despite the large volume of payments made, all were posted and verified on the ledgers before the close of the second week in August. Subsequently trial balances of the ledgers were taken and were reconciled without delay with the figures furnished by the Control Division. The 5 per cent. penalty imposed on August 1 has been placed on the ledgers.

During the months of August and September 141 and 342 new buildings were entered on the books, the charges being $1,445.29 and $2,144.39, based on annual charges of $2.892 and $5.505, respectively, the corresponding figures for the month of July not being immediately available.

I wish to remind you that owing to the revision of the law which changes the water year to agree with the calendar year, it will be necessary to have the 1913 ledgers completely written up by December 15, 1912; and as the Engineering Bureau is actively engaged in laying additional mains and the new territory must be entered on the records before the above date, an increase in the clerical force should be made.

The work of the Division has been carried on smoothly, the clerical force without exception having attended to their duties promptly and with satisfaction. Respectfully submitted.

JOHN J. HARTMANN, Clerk in Charge, Frontage Rates Division.

October 7, 1912.

Mr. W. R. McGUIRE, Water Registrar:

Dear Sir—I beg to submit a report of the Control Division for the quarter ending September 30, 1912, as follows:

On July 17, 1912, I took charge of this division and found the work somewhat behind at that time. The Accounts Receivable on Frontage Rates, as of May 1, were incorrect in 123 different instances, which necessitated my changing all our Control Summaries for May, June and July before it was possible to take off a correct trial balance for July 31. This meant for this division a large amount of detail work which does not really show on the surface of this report. I also had the Accounts Receivable schedules re-written.

There were also 3,497 adjustment authorities put through for the quarter, which, combined with the rush period at the end of July, taxed us to our extreme limit to keep up with our current work scheduling cash, meter readings, etc., at that time.

Then when we had finally cleared up our work we scheduled the 5 per cent. penalties, as of August 1, from the frontage rate ledgers and verified the same with the adding machines to prevent future errors on the Accounts Receivable.

The collections for the quarter ending July 31 were 76.70 per cent. of the Accounts Receivable as of May 1, 1912, as against 75.93 per cent. for the same period in 1911. While this was only a small increase in money to the Department, it entailed an increased volume of work and liability of errors owing to the uneven amounts of the individual items on Frontage Rates.

I am pleased to report that by the combined efforts of the Clerks in this Division I can now say that our work is completely up to date in everything with which we have to do, and in conclusion will say that I have received the hearty co-operation in my Division not only of the Clerks in this Division, but also all the chiefs of the other divisions and those who are in executive authority in the Department, which is very encouraging to a new occupant of this position, and sincerely hope and, as far as I can personally help it, I will try to continue this good feeling in the future, which tends to make our duties more pleasant to perform. Respectfully,

E. COOLEY, Jr., Clerk in Charge, Control Division.

October 3, 1912.

Mr. WILLIAM R. McGUIRE, Water Registrar:

Dear Sir—The following is a record of the transactions affecting the Meter Billing Division of this Bureau for the quarter ending September 30, 1912:

Approximately twenty-one thousand (21,000) meters were read and bills rendered.

Fifty-four (54) ledgers were balanced monthly and trial balances were transmitted to the Control Division for comparison.

Initial examinations for one thousand three hundred and nine (1,309) new accounts were received and accounts for these were opened.

Three hundred and twenty-one (321) examinations affecting changes in meter rates were received and entered.

Owing to the large number of new meters set during this year, the fifty-four (54) ledgers now in use have grown too bulky, and will, therefore, be subdivided, as of October 1, into seventy-six (76) new volumes.

The change in the law penalizing meter rates past due has caused considerable additional work, and I think it advisable that an Extra Clerk be assigned to this Division so that I may detail an experienced Clerk to enter all penalties. Respectfully,

E. D. CATHERWOOD, Clerk in Charge, Meter Billing Division.

Totals	14,327	12,520	8,144	34,991

I would respectfully call your attention to the decrease in the amount of work in the third quarter. This is largely due to vacation periods, most of which occurred in this quarter; also to the withdrawing of seven (7) Inspectors and their temporary assignment in charge or Leak and Waste Investigation; also decrease in resurvey examination, due to men being assigned to other work, mostly on initial examinations of new meter settings. The increase in the number of special readings is due to premises being closed, while occupants were out of the City, etc., causing same to be read as specials. Respectfully,

CHAS. W. RENNIE, Chief Inspector.

Supplementing the above, I herewith submit quarterly report of leak and waste examinations from August 15 to September 30, 1912:

Sections 8, 9 and 10—Examinations	17,513
Leak and waste	24,739

CHAS. W. RENNIE, Chief Inspector.

October 5, 1912.

Mr. CHARLES W. RENNIE, Chief Inspector:

Dear Sir—The following is a report of the work performed by this division for the quarter ending September 30, 1912:

Field work—Meters tested, 196; test tees installed, 6; investigations, 39; meters removed for test, 18; meters reset, 10; drinking hydrants repaired, 6; horse troughs repaired, 3; temporary meter settings (Coney Island), 22; meters sealed, 19; drinking hydrants installed, 3; miscellaneous jobs, 17—Total, 339.

Testing Room Work.

Meters tested, 2,026; meters condemned (after test), 25; notice sent to plumbers to remove meters, 193—Total, 2,219. Grand Total, 2,558.

During the period mentioned one of the testing gangs was detailed to the Queen's water office for one month and three days, and each of the testing gangs were allowed two weeks' vacation.

Considerable time is consumed in connection with the temporary meter settings at Coney Island on account of the large size meters handled and the plumbing necessary for installing same. Respectfully submitted,

J. N. FLANAGAN, Clerk In Charge, Meter Testing Division.

	$1,422,124 00	$968,114 43			46.71

The decrease in frontage rates is due to an eight months' charge on rates as against one year for 1911, and also the fact that many premises were transferred to the Meter Accounts.

The collections for the three months ending July 31, 1912, showed that we collected 76.70 per cent. of the total frontage rates levied on May 31, 1912, as against 75.93 per cent. for the corresponding period of 1911.

Trial balances were taken off the frontage rate ledgers and proved with the control figures as of July 31, 1912.

Trial balances were taken off the meter rate ledgers and proved with the control sheets as of July 31, 1912, August 31, 1912, and September 30, 1912. All meter readings for this quarter were entered on the records and meter bills rendered before the close of the quarter.

In the Permit Division the issuing of permits to replace meter glasses at a nominal charge of $1 each was introduced. A record of meter setting violations was started and a card system of meter references established.

A new system of inspection was introduced and the entire work of the Inspection Division rearranged in order to conform with the requirements thereof.

Respectfully, JOSEPH GILL, Acting Water Registrar.

BUREAU OF WATER REGISTER, RICHMOND.

Hon. HENRY S. THOMPSON, Commissioner:

Dear Sir—I beg to submit the following report for the quarter ending September 30, 1912:

Pressure of work during the opening month of the quarter just ended on the Frontage Rate Division was noticeable, but less than during the corresponding month of last year, owing to the increased number of people who applied for (and paid) their bills in May and June. This change in the habits of consumers, due to advancement of the date for beginning collection of the annual tax levy in the same building, has been so pronounced that the third quarter has been supplanted by the second as the banner quarter for collections in this borough. With the advancement of the time for beginning frontage rate collections to January next year, while the time for collecting the annual tax levy begins in May, it is anticipated that the collection of frontage rates will be spread more uniformly over the first six months of our collection period instead of being, as heretofore, so largely crowded into a short period preceding imposition of penalty, as many consumers will no doubt await their call at Borough Hall in May or June for the payment of the real estate tax to settle with this department, in preference to making a special journey here during the winter to effect the saving of an inconsiderable penalty.

With the beginning of August and the falling off in business with consumers, attention was turned largely to the scheduling of five per cent. penalties, following which work was begun on the 1913 ledgers.

The following is a comparison of receipts:

Current quarter (July, August, September, 1912), $50,268.23.

Preceding quarter (April, May, June, 1912), $53,483.24.

Corresponding quarter of last year (July, August, September, 1911), $67,575.43.

Decrease in gross receipts for the first nine months of 1912, as compared with the corresponding high record of 1911, amounted to $21,090.11, 14.41 per cent., the smallest amount and smallest percentage of decrease shown by any of the five boroughs. Collections to date for the current eight-months frontage year exceed two-thirds of those made during the corresponding period of the preceding twelve-months year. Meter rate collections for the first nine months of 1912 amount to $71,114.11, $9,318.93 (15 per cent.) in excess of the best record for a corresponding period. The large number of new meter accounts opened during the quarter, viz., 159, give promise of further increase in this desirable class of revenue, without decrease of frontage revenue.

Of course continued increase in the number of meter accounts steadily increases the work of our inspection force, as well as of the inside men handling this branch of the business, but, thus far, the work has been kept up to date without augmenting our force, and continues in a state of efficiency.

The following summarizes the work of the Inspection Division: 3,659 regular meter readings; 468 special readings; 1,603 examinations; 1,528 inspections; 60 special reports.

Summary of the work of the Meter Setting Division shows permits for: Taps, 244; plugs, 21; connections to private services, 49; building purposes (regular), 111; building purposes (miscellaneous), 20; hose (unmetered premises), 30; meter glasses, 5; service repairs, 133; new meters, 166; set in place of meters removed, 5; resetting meters, 115; removing meters, 3; changes, 1.

Notices: Building purpose, 28; repair meters, 64; install meters, 57; violation, 2; three-day, 39; return permits, 79; leak and waste, 86; City plumber set permits, 0; City plumber reset permits, 2; N. P. M. accounts, 3.

Examinations to bill room: New meter accounts, 159; set in place of meters removed, 9; meters removed, 6; changes, 1.

Accounts receivable at the end of the quarter represent little more than two months' revenue. Yours respectfully, JOHN E. BOWE, Deputy Commissioner.

PUBLIC NOTICE IS HEREBY GIVEN THAT at a meeting of the Board of Estimate and Apportionment, held April 10, 1913, the following petition was received:

To the Honorable the Board of Estimate and Apportionment of The City of New York:

Union Railway Company of New York City, a New York Corporation (herein called "the petitioner"), respectfully states:

First—That this Board, by resolution adopted on May 11, 1911, and approved by the Mayor on May 12, 1911, approved a form of franchise contract, to be executed by The City of New York, granting to the petitioner the right and privilege to construct, maintain and operate a double track extension to its present street surface railway with the necessary wires and equipment for the purpose of conveying passengers only in the Borough of Manhattan, City of New York, upon the following route, to wit:

Beginning at and connecting with the existing tracks of the petitioner on the 155th Street Viaduct, at or near 8th avenue, thence westerly upon and over said Viaduct to its intersection with 155th street and westerly upon and along said 155th street to the easterly side of Broadway.

Second—That the petitioner executed the said contract on March 27, 1913, but finds that public convenience and the demand for transportation on said street will be adequately answered by the construction, maintenance and operation of such extension from 8th avenue to Amsterdam avenue only.

Third—That the petitioner therefore desires that the said contract be modified as follows:

(a) By substituting the words "Amsterdam avenue" for the words "the easterly side of Broadway," in Section 1 thereof;

(b) By reducing the amounts of the several payments required under Section 2-Third thereof in proportion to such reduction in length of the said extension; and

(c) By substituting the words "Amsterdam avenue" for the word "Broadway" in Section 2-Twenty-fifth thereof.

Wherefore the petitioner asks this Board to approve such modifications and to authorize the execution of a proper supplemental contract by the City of New York.

Dated, New York, March 27, 1913.

NOTICE TO BIDDERS AT SALES OF OLD BUILDINGS, ETC.

TERMS AND CONDITIONS UNDER WHICH BUILDINGS, ETC., WILL BE SOLD FOR REMOVAL FROM CITY PROPERTY.

THE BUILDINGS AND APPURTENANCES thereto will be sold to the highest bidder, who must pay cash or certified check, drawn to the order of the Comptroller of The City of New York, and must also give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of $50, the sum of $50 shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but unfinished at the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the building or buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal, nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or any of these conditions shall forthwith void the sale and cause immediate forfeiture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing therein or permitting the occupancy of any such building by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

The sale will be as of the condition of the property on date of delivery thereof to the purchaser. The City of New York will not be responsible for any change or loss which may occur in the condition of the buildings, or their appurtenances between the time of the sale thereof and the time of delivering possession to the purchaser, after being properly vacated of all tenants. The sale and delivery to purchaser will be made as nearly together as the circumstance of vacating the structures of their tenants will permit.

All the material of the buildings, sheds, walks, structures and cellars of whatsoever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the exterior walls of the buildings and their foundations and the sidewalks and curb in front of said buildings, extending within the described area shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point. The exterior walls and their foundations shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building. Where there is no curb the elevation of the surrounding ground shall be considered curb level. All wells, cesspools, sinks, etc., existing on the property must be filled to the level of the surrounding ground with clean earth.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street, and the opening of the main sewer in street shall be properly closed in compliance with the directions of the Bureau of Sewers in the Borough in which the buildings are situated, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed.

The permit for all opening in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances, or any part thereof, within thirty days from the day of possession will work forfeiture of ownership of such buildings, appurtenances or portion as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidder's assent to the above conditions being understood to be implied by the act of bidding and The City of New York will, without notice to the purchaser, cause the same to be removed and the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and must be completed within thirty days from the day of possession, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Where party walls are found to exist between buildings purchased by different bidders, the materials of said party walls shall be understood to be equally divided between the separate purchasers.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furrings, plaster, chimneys, projecting brick, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beamholes, etc., bricked up, and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs and adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the contractor.

The Comptroller of The City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids, and it is further

Resolved, That, while the said sale is held under the supervision of the Commissioners of the Sinking Fund, the Comptroller is authorized to cause the sale to be advertised and to direct the sale thereof as financial officer of the City.
