The President informed the Board that no action had ever been taken by it in approval of the Wells-Lydid properties for terminals. The Chief Engineer said he understood the Board of Estimate and Apportionment had recently voted to acquire these properties for the city for park purposes. It was ordered that, before further action be taken, the communication of Mr. Belmont be forwarded to the Mayor for information and advice.

The following resolution was moved and laid over, a copy of the same being ordered transmitted to the Comptroller together with a copy of the communication and statement as above:

Resolved, That the City acquire from the Rapid Transit Subway Construction company for terminals of the Manhattan-Bronx Rapid Transit Railroad, the property on Lenox avenue, between One Hundred and Forty-eighth and One Hundred and Fiftieth streets, referred to in the letter of August Belmont, President of that Company, to the President of this Board, dated, 29th September, 1903, for the price of \$1,032,588.95, with interest on \$969,250.03 thereof at the annual rate of five per cent. per annum from and after the first day of October, 1903; that the deed or deeds of the said property shall be in full covenant and warranty form to be approved by the President of this Board upon the advice of the Counsel of the Board; that the deed or deeds shall be accompanied by a certificate of good title free and clear of encumbrance in the grantor or grantors in the said deed or deeds to be given by the Title Guarantee and Trust Company, such certificate to be in form to be approved by the President of this Board, which approval he is authorized to give upon the opinion of the Counsel of this Board; and that upon the due delivery of such deed or deeds to the President of this Board, together with such

certificate or certificates, there be paid to the Rapid Transit Subway Construction Company the said sum of \$1,032,588.95 with interest on \$969,250.03 thereof at five per cent. per annum from and after the first day of October, 1903.

The President presented the following report of the Committee on Plans:

1st October, 1903.

To the Board:

Your Committee on Plans begs leave to report that it has had several conferences with, and has received a number of communications from Messrs. Schmidt & Gallatin, No. 45 Broadway, with respect to their proposition to build a subway and install a continuous train system from the Williamsburg Bridge to the Battery in the Borough of Manhattan. Their communications are dated June 9, July 9 and July 16, and are to be found in the minutes of the Board at pp. 2148, 2192 and 2242 respectively. They desire also to install the continuous train on the Williamsburg Bridge, which is of course not within the jurisdiction of this Board.

As the Board is aware, it is proposed that this work shall be done under a contract similar to that for the construction and operation of the Rapid Transit Railroad of the City of New York.

At the conference between Messrs. Schmidt & Gallatin and their representatives and your Committee on Thursday, 24th September, 1903, the Chief Engineer of this Board, who has made some investigations into the system proposed and as operated in Paris and Chicago at the request of the Committee, reported that he regarded it as entirely feasible.

In view of the somewhat experimental nature of the operation of such a system on a large scale, your Committee has insisted that the successful bidders on the contract shall be required to furnish a satisfactory bond in the full amount of their bid, so as completely to indemnify the City against possible loss. This, Messrs. Schmidt & Gallatin have expressed their readiness to do. They have asked, however, that the contract shall be so drawn that in case the continuous train shall prove a failure for any reason they will be entitled to operate in the subway, trains or cars of the ordinary kind, not involving combustion in the tunnel.

Your Committee has voted affirmatively on the plan in general, and has requested the Chief Engineer of the Board to confer with the engineers of Messrs. Schmidt & Gallatin with a view to selecting a route between the Bridge and the Battery which shall not at all conflict with proposed or possible rapid transit railroads, after which the Counsel of the Board will be asked to confer with the Counsel of the firm to arrange the proposed contract. When these details have been tentatively agreed upon, the proposed routes and plan will be presented to the Board for such action as it may deem best.

(Signed)

A. E. ORR,

EDWARD M. GROUT,

Committee on Plans.

The following communication of the President of the Borough of Manhattan on pipe galleries was read:

CITY OF NEW YORK, OFFICE OF THE PRESIDENT OF THE BOROUGH OF MANHATTAN, CITY
HALL,

September 23, 1903.

Hon. ALEXANDER E. ORR, Chairman, Board of Rapid Transit Commissioners:

DEAR SIR—I acknowledge letter from the Secretary of the Rapid Transit Railroad Commissioners under date of September 18, enclosing a letter to you under date of August 18, from Mr. August Belmont, President of the Rapid Transit Subway Construction Company, embodying the following resolution, adopted at a meeting of the directors of that company on August 12:

"Resolved, That the President be authorized to inform the Board of Rapid Transit Railroad Commissioners that the Rapid Transit Subway Construction Company disapproves of the proposed plan for pipe galleries, until it can be demonstrated that there will be no danger therefrom to the traveling public."

The most exact, specific and, I think, conclusive answer which I am in a position to make to the resolution above quoted is to hand you the enclosed copy of report prepared at my request by James C. Bayles, M. E., Ph. D., formerly President of the Health Department of New York, and an expert in the underground distribution of gas, water and electricity. This report has been compiled with very great care and from the most authoritative data obtainable. I have examined it critically and carefully, and am impressed with the fact that it is complete, conservative and trustworthy in every statement of fact and in every conclusion drawn therefrom.

I would especially call your attention to Dr. Bayles' discussion of the conditions now existing in The City of New York as the result of gas distribution through mains buried in the ground. It is a matter of experience that these conditions are rapidly growing intolerable, and that the public nuisance and public danger of gas leakage are sufficiently serious to have commanded the attention and excited the indignation of every intelligent citizen.

Experience in the cities referred to in the enclosed report will show that no danger is to be apprehended from gas explosions in pipe galleries, even when a combination so apparently dangerous as that of gas mains and high and low pressure electric conductors combined in one tunnel would appear to establish the maximum of danger.

After sending the report to press, Dr. Bayles had an opportunity to confer at length with Mr. Maurice Fitzmaurice, Chief Engineer of the London County Council, and now in responsible charge of the London pipe galleries. He assured Dr. Bayles that a gas explosion had never occurred in the London subways; that permits to take into them naked lights, plumber's blow-lamps and soldering furnaces were freely given, and that in his daily visits to the pipe galleries he had never noticed the presence of gas even in small quantities. In reply to an inquiry, he said that should Dr. Bayles visit London and go with him into the pipe galleries, he might, if he chose, light his cigar and smoke from one end of them to the other. In fact, the only restriction upon smoking is in the case of workmen in the employ of the London County Council, who are not permitted to smoke while at work, either above or underground.

Testimony to the same effect is furnished by Mr. John P. Fox, of Boston, who lately went abroad to conduct an investigation for the Merchants' Association of this City, relative to street car line equipment, and who incidentally made a thorough study of pipe galleries for the municipal authorities of Boston.

Experience everywhere has shown that the danger to be apprehended from gas mains, and especially under impervious pavements, and the gas thus liberated accumulates in sewers, subways, cellars, street excavations and other pockets, to which it has access by infiltration. The danger to the Rapid Transit subway from this cause is not inconsiderable. Dr. Bayles advises me that he has taken readings for gas in the air in parts of the subway of this City and has never failed to find it in measurable quantities. What gas leakage is doing for the waterproofing of the subway roof, his report clearly shows.

In conclusion, permit me to suggest that the approval or disapproval of the plan of pipe galleries by the directors of the Rapid Transit Subway Construction Company is a matter rather of personal than of public interest. Should the City decide to build them, it will not, I imagine, be necessary that the approval of these gentlemen be had, although, as influential and public spirited citizens, it would be a cause for regret if they did not recognize their great and conspicuous advantage.

Very truly yours,

(Signed) JACOB A. CANTOR, President.

The President reported that a copy of the above had been forwarded to the President of the Rapid Transit Subway Construction Company.

The following letter of President of Rapid Transit Subway Construction Company was read:

RAPID TRANSIT SUBWAY CONSTRUCTION COMPANY,
September 23, 1903.

Hon. ALEXANDER E. ORR, President, No. 320 Broadway, New York, N. Y.:

DEAR SIR—On June 18, 1903, I addressed a communication to you as President of the Board of Rapid Transit Railroad Commissioners, urging the authorization of the subway from Forty-second street and Broadway to Fourteenth street and Union Square.

Broadway is the most important of the intersecting thoroughfares running from One Hundred and Eighth street to Union Square, on the Island of Manhattan. Upon this avenue the most active business development has centred. This company believes that no rapid transit system will be complete without Broadway being

served by a connecting line to Union Square, which will afford to the citizens of Manhattan, The Bronx and Brooklyn, without change of cars, access to the shopping and theatre districts of Greater New York. Nevertheless, we consider that the opposition of abutting property owners and the growing spirit of antagonism to any work involving the further opening of the streets, which is being encouraged to a point which involves disregard to provisions of contracts for work now in progress, are such as to make it practically impossible to enter into a contract for the execution of the proposed extension to Union Square. No sub-contractor, in our opinion, would be willing to undertake the work for us at anything like a reasonable cost, to say nothing of the difficulty of procuring suitable sureties, in view of our present experiences.

We consider, further, that the construction, at the earliest possible date, of the extension down Broadway from the City Hall, with the Battery loop, is one of vital importance to the citizens of Manhattan and The Bronx, and that that portion of the road is in itself necessarily independent from the Brooklyn extension, and has always been understood by us to have been omitted from the original plans in order that the first contract should proceed on the lines of least resistance. It is obvious that questions connected with the prosecution of the present work and its early completion may be dealt with by the Commission with less difficulty if it be relieved of any pressure on our part for new construction.

For these reasons I am authorized to state to you that, so far as this company is concerned, it will be perfectly satisfactory to it if you abandon the proposed extension of the subway in Broadway from Forty-second street to Union Square entirely. On the other hand, if the property owners along Broadway wish the subway built, and you desire this line from Forty-second street to Union Square constructed irrespective of our preference one way or the other, and the property owners conclude that their best interests will be served by bidding for the contract and building it themselves in a manner calculated to meet their views on the subject, this company will be ready to contract to operate, provided that it will be made to appear that the revenue to be derived from it will be sufficient to pay the interest upon the cost and a reasonable return on such additional capital as will be required for its operation.

I remain, yours respectfully,
(Signed) AUGUST BELMONT, President.

The following letter of the Chief Engineer was read:

NEW YORK, September 22, 1903.

BION L. BURROWS, Esq., Secretary, Rapid Transit Board:

DEAR SIR—The Consolidated Gas Company request that the Board approve the location of their gas main under the sidewalk on the west side of Broadway, from the north curb of Forty-sixth street to 147 feet north of the north curb of Forty-sixth street.

Also the 20-inch gas main on the south side of Forty-second street, from the east side of Madison avenue to 123 feet east of the east curb of Madison avenue.

Also the 4-inch gas main on the south side of Forty-second street, from the east curb of Madison avenue to the west curb of Vanderbilt avenue.

Will you please see that the proper resolution is passed by the Board?

Very truly yours,

(Signed) WM. BARCLAY PARSONS, Chief Engineer.

The following resolution was moved:

Resolved, That this Board hereby consents to the location of gas mains of the Consolidated Gas Company under the sidewalk on the west side of Broadway, from the north curb of Forty-sixth street to 147 feet north of the north curb of Forty-sixth street; also 20-inch gas main on the south side of Forty-second street from the east side of Madison avenue to 123 feet east of the east curb of Madison avenue; also four-inch gas main on the north side of Forty-second street from the east curb of Madison avenue to the west curb of Vanderbilt avenue.

Ayes—The President, Acting Mayor, Deputy Comptroller and Commissioners Smith, Jesup and Claflin.

Nays—None.

Carried.

The following report of the Chief Engineer was read and a copy ordered forwarded to the President of the Borough of Manhattan:

BOARD OF RAPID TRANSIT RAILROAD COMMISSIONERS, CHIEF ENGINEER'S OFFICE, NEW YORK,

September 30, 1903.

Hon. A. E. ORR, President, Rapid Transit Board:

MY DEAR SIR—You will recollect that on several occasions I have called the attention of the Board to the fact that the change of grade in Elm street, at Franklin and Pearl streets, was made by the City and quite independent of Rapid Transit work, and that the Rapid Transit Subway is being built to the new grades. The result is the east and west traffic at Pearl and Franklin streets will be cut off. The new grades require certain regrading at Pearl and Franklin streets, east and west of Elm street. Our structure is finished at Pearl street, and traffic is cut off except foot travel. I have had the rapid transit structure backfilled so as to protect it. The gate on the City's water mains, a fire hydrant and the sewer catch-basins are, however, above the line of our roof and are subject to damage. I would ask therefore that the authorities be notified, so that in the event of any accident happening to these structures that this Board should not be held responsible. In this same connection I desire to point out the fact that the top of the subway is several feet above the abutting buildings and that there is danger that the basements of these buildings will be flooded by storm water running off the top of the subway.

Very truly yours,

(Signed) WM. BARCLAY PARSONS, Chief Engineer.

The following report of the Chief Engineer was read and a copy ordered sent to the President of the Borough of The Bronx:

BOARD OF RAPID TRANSIT RAILROAD COMMISSIONERS, CHIEF ENGINEER'S OFFICE, NEW YORK,

September 30, 1903.

Hon. A. E. ORR, President, Rapid Transit Board:

MY DEAR SIR—At Trinity and Westchester avenues, in the Borough of The Bronx, the City has authorized a change in the lines of the street. At this part of our route our structure is viaduct, and the columns of the structure have been so located as to fit the new lines of the street, and the foundations have been built accordingly.

On the surface of the street there is a double track trolley railroad. The new street lines require the street railway to be moved so as to be in the centre of the street. The surface railway has not been moved, and, in consequence, the location of two of our columns comes directly in line with their tracks.

I ask that you will be good enough to call the attention of the City authorities to this matter, in order that the street railway tracks can be moved and the street properly laid out to the new lines.

Very truly yours,

(Signed) WM. BARCLAY PARSONS, Chief Engineer.

The following letter was read and a copy ordered sent to the President of the Borough of Manhattan:

BOARD OF RAPID TRANSIT RAILROAD COMMISSIONERS, CHIEF ENGINEER'S OFFICE, NEW YORK,

September 30, 1903.

Hon. A. E. ORR, President, Rapid Transit Board:

MY DEAR SIR—On July 2, under instructions of the Board, I handed the Secretary, for transmission to the President of the Borough, plans showing the necessary change in lines of the intersection of Hillside avenue and Eleventh avenue at Fort George. Our work is now reaching a point where these new street lines should be definitely fixed and the property required should be acquired, as the delay is working a hardship on certain property owners. In order that the property owners may be informed as to the new street line, and that our work may be concluded at that point, it is necessary that we should be informed at as early a date as possible as to the determination of the President of the Borough.

Very truly yours,

(Signed) WM. BARCLAY PARSONS, Chief Engineer.

The following communication of the Commissioner of Water Supply, Gas and Electricity was read, with the report thereon by the Chief Engineer, and a copy of the latter ordered sent to the Commissioner:

DEPARTMENT OF WATER SUPPLY, GAS AND ELECTRICITY, COMMISSIONER'S OFFICE, NOS. 13-21 PARK ROW, CITY OF NEW YORK,

September 26, 1903.

Hon. ALEXANDER E. ORR, President, Rapid Transit Railroad Commissioners, No. 320 Broadway, New York:

SIR—The letter of the Secretary of your Board to the Engineer of Surface Construction of this department, dated September 24, 1903, stating that you have directed that the lights on Forty-second street be replaced where they were found before the work of construction was begun, as required by the contract, has been referred to me.

The Engineer of Surface Construction has recommended to me that many of these lights be placed in new locations, so as to afford a better distribution of light on the thoroughfare, and I am most anxious to accomplish this result, if possible.

Upon examination of the contract between your Board and Mr. John B. McDonald, I find that the Rapid Transit Statute, under clause 16, is made a part of the contract. Section 33 of the Act, as amended by Laws of 1896, chapter 729, section 2, provides in part as follows:

"For the purpose of the construction or operation of any railway under the provisions of this Act the Board of Rapid Transit Railroad Commissioners may remove or cause to be removed any pipes, sewers, subway or underground conduits or way underneath any street, highway, park or public place; provided, however, that the same shall be replaced as soon as practicable, either in the same position as before or in a secure and convenient position underneath such street, highway or public place, or underneath such other street, highway or public place as may be approved by the head of the Department of Public Works of the City."

Under section 469 of the Greater New York Charter, as amended, I am given cognizance and control of the use and transmission of gas under the streets, and all subsurface structures, except sewers, are under the jurisdiction of this department.

I therefore respectfully request that before the lamps on Forty-second street, or on any other street in which the Rapid Transit construction has been under way, are replaced in their former locations, you will kindly advise me, so that I may confer with you as to whether other locations will not be more desirable from the point of view of economy and better distribution of light.

Thanking you for your kind attention to this matter.

Respectfully,

(Signed) R. G. MONROE,

Commissioner of Water Supply, Gas and Electricity.

NEW YORK, September 30, 1903.

Hon. A. E. ORR, President, Rapid Transit Board:

MY DEAR SIR—I return you herewith the communication of the Commissioner of Water Supply, Gas and Electricity, addressed to you under date of September 26, which has been referred to me for report.

Nearly all of the lights along the Rapid Transit route that have been removed have been replaced in the position in which they were found, no request having been made by the Department of Water Supply, Gas and Electricity to other effect. If the Commission desires new locations made for any of the lights that have not yet been replaced, I would ask that the plan of the new location be transmitted without delay, as I am calling upon the contractors to use all energy to have the streets restored to a normal condition.

Very truly yours,

(Signed) WM. BARCLAY PARSONS, Chief Engineer.

Resolved, Further, that the Secretary be and he is hereby instructed to forward a copy of the revised estimate to the Board of Estimate and Apportionment.

The Secretary stated that for some years past it had been the practice of the Commission to admit to examination for promotion only such persons as had served the city for the period required under the provisions of Rule 38, and that in no case was a person considered eligible to compete for promotion until he had served at least six months in the grade from which he sought promotion, and had served the city for a period equivalent to six months for each grade through which he sought promotion. He requested the Commission to construe the first paragraph of Rule 38, stating the preliminary qualifications of candidates for promotion, and particularly requested information as to whether, in the opinion of the Commission, the words "next lower grade" should be construed to mean the next lower grade in the Department in which an employee was serving, or the next lower grade numerically, as fixed by Rule 37. On motion, duly seconded, the Secretary was instructed to admit to examinations for promotion in positions graded under the provisions of Rule 37 only those persons who have served in the grade from which they seek promotion for a period equivalent to service of six months for each grade through which they seek promotion, and it was

Resolved, Further, that in view of the fact that the questions in the last examination for Inspector of Masonry were all founded upon one branch of mason work, the last paragraph of Rule 13, providing that, "No person who has entered any examination for a position in the classified service and who has failed therein shall be admitted within nine months from the date thereof to a new examination for the same or a similar position," be waived, in so far as it applies to the next examination for the position of Inspector of Masonry.

OFFICE OF THE DEPARTMENT OF DOCKS AND FERRIES, PIER "A," FOOT OF BATTERY PLACE, NORTH RIVER, BOROUGH OF MANHATTAN, THE CITY OF NEW YORK.

SEALED BIDS OR ESTIMATES WILL BE received by the Commissioner of Docks at Pier "A," foot of Battery place, in The City of New York, until 12 o'clock noon, on

THURSDAY, NOVEMBER 5, 1903.

for the right to dump and fill in behind the new bulkhead wall between the northerly side line of West One Hundred and Thirty-first street and the southerly side line of West One Hundred and Thirty-third street, on the North river, Borough of Manhattan, beginning at a point in the rear of the bulkhead wall near the northerly side of the pier at the foot of West One Hundred and Thirty-first street, North river; thence extending northerly along the rear of the bulkhead wall to the southerly side of West One Hundred and Thirty-third street; thence inshore or westerly along the southerly side of West One Hundred and Thirty-third street about 67 feet to the face of the old crib bulkhead thereat; thence extending southerly along the face of the old crib bulkhead to a point where said crib bulkhead intersects the bulkhead near the northerly side line of West One Hundred and Thirty-first street; thence extending westerly about 78 feet along said crib bulkhead, or close row piles, approximately along the northerly side of West One Hundred and Thirty-first street, to the point of beginning.

TERMS AND CONDITIONS OF SALE.

The filling will be put in to a height of about 5 feet or less above mean high-water mark over the above-described area.

The privilege to fill in the said described area will be sold to the highest bidder, one-half the price for such right or privilege must be paid at the time of sale and the remaining half when one-half of the work of filling in has been completed.

The total estimated quantity to be filled in is about 23,750 cubic yards, more or less. This total estimated quantity of 23,750 cubic yards is approximate only and is estimated without allowance for sinkage or settlement below the mud line. The Department is not bound in any way by such estimate, and bidders must satisfy themselves of the actual quantity required to fill in the above-described area by examination of the premises or such other means as they may prefer, the intention of the Department being to fill in the whole of the said premises behind the bulkhead wall, and no allowances will be made to the purchaser from the purchase price on account of any discrepancy which may be found between the above estimated quantity and the actual amount of filling required. The purchaser will be required to place the filling in accordance with the following specifications:

All the filling shall, unless otherwise directed, be placed directly in the rear of the bulkhead wall and carried from the bulkhead wall toward the shore until the bank of same has been carried out at the finished grade for a distance of about 40 feet from the face of the bulkhead wall, at which time, if so directed by the Engineer, the filling may be commenced from the shore toward the crib.

All material must be dumped and filled in only in such manner, at such points and in such order or procedure and at such times and seasons as may, from time to time, be directed, and the work of filling in may be entirely suspended for such periods of time as may be directed. The purchaser shall have no claim for damage or for any allowance from the purchase money on account of such suspension of the work.

All directions shall be given by the Engineer, and whenever the word "Engineer" is used in these specifications it refers to and designates the Engineer-in-Chief of the Department of Docks and Ferries, or such officer or employee as may be designated by him.

Rip-rap stone coming directly on or against the bulkhead wall must be deposited carefully in such manner as will not injure the same.

All the filling, except as otherwise specified herein, shall be of ashes, cellar dirt, broken stone, etc., entirely free from garbage or any organic matter objectionable in the opinion of the Engineer.

At any section of the bulkhead wall the filling shall be brought up level with the top of the coping at such section, and no higher, unless otherwise directed, and will be placed at such grade at its inshore end as may be directed by the Engineer.

The filling shall be commenced within five days after the date of the receipt of a notification from the Engineer that the work, or any part of it, is ready to be begun, and shall be completed within one hundred and fifty days from the date of the receipt of said notification. If at any time during the progress of the work it shall be deemed necessary to order the suspension of the whole or any part of the filling by the reason of the non-completion of the bulkhead wall, or for any other cause that the Commissioner of Docks may deem fit and proper, the time for the completion of said filling shall be extended so much as it may have been delayed by such suspension.

In case the purchaser at any time does not proceed with the work of filling in to the satisfaction of the Commissioner of Docks, the said Commissioner may at once terminate the privilege of filling in and proceed to have the remainder of the filling in done by other parties in such way and manner as he deems proper.

The purchaser shall, during the work of filling in and at all times until the completion thereof, take all necessary precautions and place proper guards for the prevention of accidents, and put up and maintain at night sufficient lights, and he shall indemnify and save harmless The City of New York from all damages and costs to which it may be put by reason of injury to the person or property of another resulting from negligence or carelessness in the performance of the work or guarding the same.

No bid or estimate will be considered unless accompanied by a certified check drawn to the order of the Commissioner of Docks, or money to the amount of twenty-five per centum of the amount of the bid, which amount shall be applied in the case of the successful bidder to the first one-quarter of the amount of the filling to be deposited; twenty-five per centum to be paid when the first one-quarter of filling has been completed; twenty-five per centum additional when one-half the filling has been completed, and the balance, twenty-five per centum, when three-quarters of said filling has been completed.

The Commissioner reserves the right to reject all bids or estimates if he shall deem it to be for the interest of the City so to do.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application to the President, Board or Department for which the work is to be done.
