(2) EXPENSES OF COMMISSION—FINAL ALLOWANCE. 2532

The Secretary stated that the Chairman had written under date of November 11, 1908, to the Board of Estimate and Apportionment calling its attention to the possibility that the expenses of the Commission would exceed one million dollars, and that in reply thereto a communication had been received from the Board of Estimate and Apportionment enclosing a copy of the Comptroller's report upon which their resolution of October 30, 1908, authorizing an appropriation of \$150,000.00 as a "final allowance" for the expenses of the Commission, was adopted. PELHAM PARK AND CITY ISLAND RAILROAD COMPANIES—CHANGE OF MOTIVE POWER—OPINION AND RESOLUTIONS.

Commissioner Eustis presented the following communication from the Counsel to the Commission: November 17, 1908.

Public Service Commission for the First District:

SIRS—Answering Commissioner Eustis's oral request for an opinion on the question of whether the Commission has authority to approve a change in motive power from horse power to overhead electric current by the American Monorail System, as perfected by H. H. Tunis, I beg to advise you as follows:

Such approval of change of motive power is governed by Section 100 of the Railroad Law, which reads as follows:

Sec. 100. Motive Power.—Any street surface railroad may operate any portion of its road by animal or horse power or by cable, electricity, or any power other than locomotive steam power, which said locomotive steam power is primarily generated by the locomotive propelling the cars, and in the use of which either escaping steam or smoke is visible, which may be approved by the state board of railroad commissioners, and consented to by the owners of one-half of the property bounded on that portion of the railroad with respect to which a change of motive power is proposed; and if the consent of such property owners cannot be obtained, the determination of three disinterested commissioners, appointed by the appellate division of the supreme court of the department in which such railroad is located, in favor of such motive power, confirmed by the court, shall be taken in lieu of the consent of the property owners. The consent of the property owners shall be obtained and the proceedings for the appointment and the determination of the commissioners and the confirmation of their report shall be conducted in the manner prescribed in sections ninety-one and ninety-four of this article, so far as the same can properly be made applicable thereto. Any railroad corporation making a change in its motive power under this section, may make any change in the construction of its road or roadbed or other property rendered necessary by the change in its motive power.

It has been held that this section authorizes such changes as from horse power to overhead trolley power and from horse power to underground cable power.

In my opinion the testimony taken at the hearing indicates that the change contemplated in the case of the Pelham Park Railroad Company and City Island Railroad Company is not so essentially different from that of a change to trolley construction as to prevent your granting the power to erect the new structure as part of the equipment necessary to the new motive power, under the provisions of Section 100 of the Railroad Law. The question is one of degree, and as the nature of the structure is not well known it is of course uncertain how great the additional burden on the street will be. If it prove to be similar to trolley construction, I should expect the Courts to hold that your approval is sufficient. If, on the other hand, a structure is erected that is more like an elevated railroad, then I should expect the Courts to hold that the franchise for this should be obtained from the Board of Estimate and Apportionment.

In any event, your approval of the change of motive power is necessary and proper, and if additional authority is needed from the Board of Estimate and Apportionment the railroad companies may apply to that Board.

I can see no reason why your Commission should not grant the approval asked, if in your opinion the change is desirable. The railroad companies in assuming that no application to the Board of Estimate and Apportionment is necessary are taking a risk with full knowledge of the facts, and your action can in no way prevent the City of New York from exercising its rights in the matter.

The railroad companies have stated that they have the necessary consents of property owners, and I think your Commission may reasonably require that such consents be submitted for examination before your approval is given.

I send you herewith a proposed resolution approving this change.

Respectfully yours,

(Signed) GEORGE S. COLEMAN, Counsel to the Commission.

The following resolutions were thereupon moved by Commissioner Eustis:

Order (No. 842).

Whereas, an application, dated October 15, 1908, has been made to the Public Service Commission for the First District by the Pelham Park Railroad Company for approval of change of motive power from horse power to overhead electric power as used by the American Monorail System, and

Whereas, a hearing was held before the Public Service Commission for the First District after due notice given to The City of New York and to the public by advertisement duly had in certain newspapers, to wit, the New York Press and the New York Evening Post, at which hearing testimony was taken, and at which hearing it appeared that the change of motive power as above set forth had been consented to by the owners of more than one-half of the property bounded on the Pelham Park Railroad Company;

Now therefore, it is

Resolved, That the change of motive power from horse power to overhead electric current to be operated in connection with the American Monorail System perfected by Howard Hanson Tunis, as applied for by the Pelham Park Railroad Company, be and the same hereby is in all respects approved upon the route as follows:

Beginning at or near Bartow Station on the Harlem River and Portchester Railroad; thence to, along and through the street known as Third street to the highway known as the Shore road; thence along and across the said Shore road to the highway known as the City Island Road; thence through, along and upon the said City Island Road to a junction with the City Island Railroad at or near Marshall's Corner.

Further Resolved, That this approval take effect only upon the Pelham Park Railroad Company obtaining the local consents and approvals required by law and depositing the same with the Public Service Commission for the First District for examination.

Order (No. 843).

Whereas, An application, dated October 15, 1908, has been made to the Public Service Commission for the First District by the City Island Railroad Company for approval of change of motive power from horse power to overhead electric power as used by the American Monorail System, and

Whereas, A hearing was held before the Public Service Commission for the First District after due notice given to The City of New York and to the public by advertisement duly had in certain newspapers, to wit, the New York Press and the New York Evening Post, at which hearing testimony was taken, and at which hearing it appeared that the change of motive power as above set forth had been consented to by the owners of more than one-half of the property bounded on the City Island Railroad Company;

Now therefore, it is

Resolved, That the change of motive power from horse power to overhead electric current to be operated in connection with the American Monorail System perfected by Howard Hanson Tunis, as applied for by the City Island Railroad Company, be and the same hereby is in all respects approved upon the route as follows:

Beginning at a junction with the Pelham Park Railroad at or near Marshall's Corner on the highway known as the City Island Road; thence through, along and upon the said City Island Road to and across City Island bridge; thence through, along and upon the street or highway known as Main Street to a point on said street at or near the corner of intersection of Franklin Avenue.

Further Resolved, That this approval take effect only upon the City Island Railroad Company obtaining the local consents and approvals required by law and depositing the same with the Public Service Commission for the First District for examination.

Commissioner Bassett—"In considering this proposition, we act under the powers that were granted to us as successors of the State Railroad Board, and somewhat as when issuing a certificate of public convenience and a necessity. Before a company can change its motive power it must obtain our approval, but that does not mean that all needed rights are perfected any more than when we issue a certificate of public convenience and a necessity; it means that no further rights may be needed. I can easily conceive that a company operating a horse railroad should go through two or three separate cities. It might then apply to the Public Service Commission to make a change of the motive power to electricity. The grant of the certificate would still leave the company where it might need to go to these several cities to procure additional rights. It therefore seems to me that it is not necessary that we should await the action of the Board of Estimate and Apportionment before we grant this certificate of change of motive power. It leaves the company free to obtain such additional rights as the law demands, and the municipality is in no way injured. I am therefore in favor of the resolutions and second the motion for their adoption."

Commissioner Malloch—"I wish to be excused from voting on this motion, not having seen the Engineer's report and not knowing, except by verbal communication, what statements are made therein. Personally, I consider it quite improper to authorize off-hand a change in motive power which involves such a radical change as the adoption of a method which has not been tried in New York nor in any other city in the United States under the conditions which will exist on the two lines running between Bartow and City Island. Until an engineering report has been submitted which states that the plan is safe and proper in the judgment of a competent electrical engineer, I cannot see how one can vote intelligently upon these resolutions."

Ayes—Commissioners Willcox, McCarroll, Bassett, Eustis.

Nays—None.

Carried.

The Secretary presented a communication from the President of the Hudson and Manhattan Railroad Company, under date of November 14, 1908, enclosing formal acceptance of Order No. 768, together with certified copy of resolutions adopted by the Board of Directors of that Company in relation thereto, and also the consent of the United States Fidelity and Guaranty Company, surety on the bond of the New York and New Jersey Railroad Company, to said Order No. 768. The communication was ordered filed.

(11) 2879-L. RAPID TRANSIT RAILROAD—PROGRESS OF WORK—REPORT OF CHIEF ENGINEER.

The Committee of the Whole presented the following report from the Chief Engineer, which was ordered filed:

November 16, 1908.

Public Service Commission for the First District:

GENTLEMEN—Pursuant to the request of the Committee of the Whole, transmitted to me by the Secretary, I report the progress on the Shuttle Service at South Ferry, additional tracks north of 96th Street, and other construction work.

The construction of an extra track for Shuttle Service at South Ferry is about half completed, and will be ready for operation on May 1, 1909.

The construction of additional tracks north of 96th Street was commenced on October 1, 1908, and in connection therewith three large water mains are now being laid on West End Avenue and will probably be placed in service about January 1, 1909. The main work of construction will then commence, and will require about two years to complete.

The work on 72nd Street station, for additional stairways, marquee and illuminating signs, was commenced a week ago, and will require about three months to complete.

The additional stairway at 145th Street will be completed about December 15, 1908.

The Van Cortlandt Park Extension is at present practically completed and will probably be finished before January 1, 1909.

The work of enclosing the shafts on 168th Street, 181st Street and Mott Avenue stations has been begun at station 181st Street. This work is so unusual that it is intended to complete this station before proceeding with the others in case there should be any developments during construction which might suggest improvement in the plans, and to ascertain the approximate cost.

Very truly yours,

(Signed) HENRY B. SEAMAN, Chief Engineer.

(12) 2090. FOURTH AVENUE SUBWAY—PROGRESS OF WORK—REPORT OF CHIEF ENGINEER.

The Committee of the Whole presented the following report from the Chief Engineer, which was ordered filed:

November 13, 1908.

Public Service Commission for the First District:

GENTLEMEN—Pursuant to the request of the Committee of the Whole, transmitted to me by the Secretary, I submit report on the progress of the Fourth Avenue Subway in Brooklyn.

Contract plans for this Subway were completed to 43d Street, and the contracts were awarded by your Commission on May 22, 1908. These contracts provide for the completion of the work in twenty-four months, or by May 22, 1910. It may be noted that this is only five months after the date of completion of the Loop Lines in Manhattan, and of the proposed opening of Manhattan Bridge. Had the work commenced when the contracts were awarded, it would now be nearly one-fourth done.

The pavement on Flatbush Avenue Extension is awaiting the construction of this Subway.

Very truly yours,

(Signed) HENRY B. SEAMAN, Chief Engineer.

(13) 2090. CONTRACT NO. 2—BROOKLYN LOOP LINES—PROGRESS OF WORK—REPORT OF CHIEF ENGINEER.

The Committee of the Whole presented the following report from the Chief Engineer, which was ordered filed:

November 12, 1908.

Public Service Commission for the First District:

GENTLEMEN—Pursuant to the request of the Committee of the Whole, transmitted to me by the Secretary, I would report the progress on the Brooklyn Loop Lines in Manhattan.

The work on these lines is at present about one-half done, and, with the exception of the Chambers Street station, it should be completed by January, 1910.

At Chambers Street station the work was stopped in accordance with letter of May 12 from Mayor McClellan, requesting that this Commission "direct the Contractors to suspend work in connection with the Subway Station." The six months which have elapsed since that date have been taken up in the preparation of plans by the Department of Bridges for the foundation of the Municipal Office Building, which plans I understand are now completed and the contract about to be let. I am advised that it will take about one year to build these foundations, and probably several months more to bring the work up to the point at which it was stopped six months ago.

It will not be practical to operate the Loop Lines until the Chambers Street station is completed.

Very truly yours,

(Signed) HENRY B. SEAMAN, Chief Engineer.

(14) 3350. CONSTRUCTION AND FINANCING OF FUTURE SUBWAYS.

The Secretary presented a communication, dated November 16, 1908, from Joseph Cacavajo, Consulting Engineer, detailing a plan for the construction and financing of future subways in New York City. The communication was referred to the Committee of the Whole.

(15) On motion, duly seconded, it was Resolved, That the Commission takes the following action in relation to employees:

TERMS AND CONDITIONS.

The buildings and appurtenances thereto will be sold to the highest bidder, who must pay immediately cash or a certified check drawn to the order of the Comptroller of the City of New York, and must also at the time of sale give a certified check or cash in full of the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of fifty dollars the sum of fifty dollars shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but unfinished at the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the building or buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal, nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or any of these conditions shall forthwith void the sale and cause immediate forfeiture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing thereon or permitting the occupancy of any such building by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

All the material of the buildings, sheds, walks, structures and cellars of whatsoever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the sidewalk and curb in front of said buildings, extending within the described area and down to the level of the cellar bottom, shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point; also the foundation walls of all classes shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street, and the opening of the main sewer in street shall be properly closed in compliance with the directions of the Bureau of Sewers, Borough of Manhattan, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed.

The permit for all opening in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances, or any part thereof, within thirty days from the day of possession will work forfeiture of ownership of such buildings, appurtenances, or portion, as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and The City of New York will, without notice to the purchaser, cause the same to be removed, and the costs and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and must be completed within thirty days from the day of possession, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damages and costs to which it, they or any of them be not by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furnishings, plaster, chimneys, projecting brick, etc., on the faces of such party walls, are to be taken down and removed. The walls shall be made permanently self-supporting, beam-ends, etc., bricked up, and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs of adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the contractor.

The Comptroller of the City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids; and it is further

Resolved, That, while the said sale is held under the supervision of the Commissioners of the Sinking Fund, the Comptroller is authorized to cause the sale to be advertised and to direct the sale thereof as financial officer of the City.
