MAYOR DE BLASIO RELEASES STATEMENT ON THE AMERICAN JOBS PLAN

NEW YORK—Mayor Bill de Blasio today released the following statement praising President Biden's American Jobs Plan:

"A recovery for all of us requires strong federal investments in infrastructure and jobs. President Biden meets the moment with the American Jobs Plan, which includes investments critically important to New York City including billions for public housing, transit, broadband and workforce development. This plan also treats climate change as the urgent crisis that it is, with new opportunities to create green jobs and make our cities more resilient. I thank President Biden for his leadership and look forward to working with our partners in Congress to get this done."
